PREFACE

When THE STATESMAN'S YEAR-BOOK was computer-set in 1978 the editor brought about some fundamental changes to the format and these were well received. In this the 118th edition there are further improvements. Great emphasis has been placed on the French overseas departments and territories and French-speaking countries. The former Condominium of New Hebrides is now Vanuatu and specially prepared maps show 'World Islam' and 'International Fishing'. The editor regrets that, at the time of going to press, many of the US Ambassadors to be appointed under the new administration were not known.

Again the editor would like to thank all his correspondents for superb help during the year and would like to reiterate that he is always pleased to receive constructive and informed criticism. Sometimes it is not possible to bring about change immediately but all suggestions are considered.

The second edition of THE STATESMAN'S YEAR-BOOK WORLD GAZETTEER is available for those who need more detailed information about individual towns.

PART I

INTERNATIONAL
ORGANIZATIONS

THE UNITED NATIONS

The United Nations is an association of states which have pledged themselves, through signing the Charter, to maintain international peace and security and to co-operate in establishing political, economic and social conditions under which this task can be securely achieved. Nothing contained in the Charter authorizes the organization to intervene in matters which are essentially within the domestic jurisdiction of any state.

The United Nations Charter originated from proposals agreed upon at discussions held at Dumbarton Oaks (Washington, D.C.) between the USSR, US and UK from 21 Aug. to 28 Sept., and between US, UK and China from 29 Sept. to 7 Oct. 1944. These proposals were laid before the United Nations Conference on International Organization, held at San Francisco from 25 April to 26 June 1945, and (after amendments had been made to the original proposals) the Charter of the United Nations was signed on 26 June 1945 by the delegates of 50 countries. Ratification of all the signatures had been received by 31 Dec. 1945. (For the complete text of the Charter *see* THE STATESMAN'S YEAR-BOOK, 1946, pp. xxi-xxxii.)

The United Nations formally came into existence on 24 Oct. 1945, with the deposit of the requisite number of ratifications of the Charter with the US Department of State. The official languages of the United Nations are Arabic, Chinese, English, French, Russian and Spanish; the working languages are English, French and (in the General Assembly) Arabic, Chinese, Spanish and Russian.

The headquarters of the United Nations is in New York City, USA.

Flag. United Nations blue with UN emblem in white in the centre.

Membership. Membership is open to all peace-loving states whose admission will be effected by the General Assembly upon recommendation of the Security Council.

The table on pp. 12-15 shows the member states of the United Nations and their participation in the Related Agencies, and those non-member states which have been admitted to certain Related Agencies.

The Principal Organs of the United Nations are: 1. The General Assembly, 2. The Security Council, 3. The Economic and Social Council, 4. The Trusteeship Council, 5. The International Court of Justice, 6. The Secretariat.

1. **The General Assembly** consists of all the members of the United Nations. Each member is entitled to be represented at its meetings by 5 delegates and 5 alternate delegates, but has only 1 vote. The General Assembly meets regularly once a year, commencing on the third Tuesday in Sept., the session normally lasts until mid-December and is resumed for some weeks in the new year if this is required. Special sessions may be convoked by the Secretary-General if requested by the Security Council, by a majority of the members of the United Nations or by 1 member concurred with by the majority of the members. The General Assembly elects its President for each session.

The first regular session was held in London from 10 Jan. to 14 Feb. and in New York from 23 Oct. to 16 Dec. 1946.

Special sessions have been held on Palestine (1947, 1948), Tunisia (1961), Financial Situation of UN (1963), South West Africa, Peace-Keeping, Postponement of Outer Space Conference (1967), Raw Materials and Development (1974), New International Economic Order (1975), Peace-keeping force in the Lebanon, Namibia, Disarmament (1978), Economic Issues (1980); Emergency Special sessions were held on

Suez, Hungary (1956), Lebanon-Jordan-United Arab Republic dispute (1958), Congo (1960), Middle East (1967), Afghanistan, Palestine (1980).

The work of the General Assembly is divided between 6 Main Committees and the Special Political Committee, on each of which every member has the right to be represented by 1 delegate. I. Political Security. II. Economic and Financial. III. Social, Humanitarian and Cultural. IV. Trust and Non-Self-Governing Territories. V. Administrative and Budgetary. VI. Legal.

In addition there is a General Committee charged with the task of co-ordinating the proceedings of the Assembly and its Committees; and a Credentials Committee which verifies the credentials of the delegates. The General Committee consists of 25 members, comprising the President of the General Assembly, its 17 Vice-Presidents and the Chairmen of the 7 Main Committees. The Credentials Committee consists of 9 members, elected at the beginning of each session of the General Assembly. The Assembly has 2 standing committees—an Advisory Committee on Administrative and Budgetary Questions, and a Committee on Contributions. The General Assembly establishes subsidiary and *ad hoc* bodies when necessary to deal with specific matters. These include: Special Committee on Peace-keeping Operations (33 members), Commission on Human Rights (32 members), Commission for the unification and rehabilitation of Korea (7 members), Committee on the peaceful uses of outer space (28 members), Conciliation Commission for Palestine (3 members), Committee on Disarmament (40 members), International Law Commission (25 members), Scientific Committee on the effects of atomic radiation (15 members), Special Committee on the implementation of the declaration on the granting of independence to colonial countries and peoples (24 members), Special Committee on the policies of Apartheid of the Government of the Republic of South Africa (11 members), UN High Commissioner for Refugees, UN Relief and Works Agency for Palestine Refugees in the Near East, Peace Observation Commission (14 members), UN Commission on International Trade Law (29 members) and Committee on the Peaceful Uses of Sea-bed and Ocean Floor Beyond the Limits of National Jurisdiction (91 members), Governing Council for Environmental Programmes (54 members).

The General Assembly may discuss any matters within the scope of the Charter, and, with the exception of any situation or dispute on the agenda of the Security Council, may make recommendations on any such questions or matters. For decisions on important questions a two-thirds majority is required, on other questions a simple majority of members present and voting. In addition, the Assembly at its fifth session, in 1950, decided that if the Security Council, because of lack of unanimity of the permanent members, fails to exercise its primary responsibility for the maintenance of international peace and security in any case where there appears to be a threat to the peace, breach of the peace or act of aggression, the General Assembly shall consider the matter immediately with a view to making appropriate recommendations to members for collective measures, including in the case of a breach of the peace or act of aggression the use of armed force when necessary, to maintain or restore international peace and security.

The General Assembly receives and considers reports from the other organs of the United Nations, including the Security Council. The Secretary-General makes an annual report to it on the work of the Organization.

2. The Security Council consists of 15 members, each of which has 1 representative and 1 vote. There are 5 permanent and 10 non-permanent members elected for a 2-year term by a two-thirds majority of the General Assembly.

Retiring members are not eligible for immediate re-election. Any other member of the United Nations will be invited to participate without vote in the discussion of questions specially affecting its interests.

The Security Council bears the primary responsibility for the maintenance of peace and security. It is also responsible for the functions of the UN in trust territories classed as 'strategic areas'. Decisions on procedural questions are made by an affirmative vote of 9 members. On all other matters the affirmative vote of 9 members must include the concurring votes of all permanent members (in practice, however, an abstention by a permanent member is not considered a veto), subject to

the provision that when the Security Council is considering methods for the peaceful settlement of a dispute, parties to the dispute abstain from voting.

For the maintenance of international peace and security the Security Council can, in accordance with special agreements to be concluded, call on armed forces, assistance and facilities of the member states. It is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent members of the Security Council or their representatives.

The Presidency of the Security Council is held for 1 month in rotation by the member states in the English alphabetical order of their names.

The Security Council functions continuously. Its members are permanently represented at the seat of the organization, but it may meet at any place that will best facilitate its work.

The Council has 2 standing committees, of Experts and on the Admission of New Members. In addition, from time to time, it establishes *ad hoc* committees and commissions such as the Truce Supervision Organization in Palestine. It has also appointed a Representative for India and Pakistan.

Permanent Members: China, France, USSR, UK, USA.

Non-Permanent Members: Ireland, Japan, Spain, Uganda (the fifth to be decided) (until 31 Dec. 1982); German Democratic Republic, Mexico (1981), Niger, the Philippines, Tunisia (until 31 Dec. 1981).

3. The Economic and Social Council is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters.

By Nov. 1977, 15 'specialized' inter-governmental agencies working in these fields had been brought into relationship with the United Nations. The Economic and Social Council may also make arrangements for consultation with international non-governmental organizations and, after consultation with the member concerned, with national organizations; by Sept. 1978, 231 non-governmental organizations had been granted consultative status and a further 534 were on the register.

The Economic and Social Council consists of 1 delegate each of 54 Member States elected by a two-thirds majority of the General Assembly. Nine are elected each year for a 3-year term. Retiring members are eligible for immediate re-election. Each member has 1 vote. Decisions are made by a majority of the members present and voting.

The Council nominally holds 2 sessions a year, and special sessions may be held if required. The President is elected for 1 year and is eligible for immediate re-election.

The Economic and Social Council has the following commissions:

Regional Economic Commissions. ECE (Economic Commission for Europe, Geneva); ESCAP (Economic and Social Commission for Asia and the Pacific, Bangkok); ECLA (Economic Commission for Latin America, Santiago, Chile); ECA (Economic Commission for Africa, Addis Ababa); ECWA (Economic Commission for Western Asia, Beirut). These Commissions have been established to enable the nations of the major regions of the world to co-operate on common problems and also to produce economic information.

(1) Six functional Statistical Commissions; with subcommission on Statistical Sampling. (2) Commission on Human Rights; with subcommission on Prevention of Discrimination and Protection of Minorities. (3) Social Development Commission; (4) Commission on the Status of Women; (5) Commission on Narcotic Drugs; (6) Population Commission.

The Economic and Social Council has the following standing committees: The Economic Committee, Social Committee, Co-ordination Committee, Committee on Non-Governmental Organizations, Interim Committee on Programme of Conferences, Committee for Industrial Development, Advisory Committee on the Application of Science and Technology to Development, Committee on Housing, Building and Planning.

Other special bodies are the Permanent Central Opium Board, the Drug Supervisory Body, the Interim Co-ordinating Committee for International

Commodity Arrangements and the Administrative Committee on Co-ordination to ensure (1) the most effective implementation of the agreements entered into between the United Nations and the specialized agencies and (2) co-ordination of activities.

Membership: Argentina, Bangladesh, Burundi, Byelorussia, Cameroon, Canada, China, Denmark, Fiji, India, Kenya, Nicaragua, Norway, Peru, Poland, Sudan, USSR, UK (until 31 Dec. 1983); Australia, Bahamas, Belgium, Bulgaria, Chile, Ethiopia, Iraq, Italy, Jordan, Libya, Malawi, Mexico, Nepal, Nigeria, Thailand, USA, Yugoslavia, Zaire (until 31 Dec. 1982); Algeria, Barbados, Brazil, Cyprus, Ecuador, France, German Democratic Republic, Federal Republic of Germany, Ghana, Indonesia, Irish Republic, Morocco, Pakistan, Senegal, Spain, Turkey, Venezuela, Zambia (until 31 Dec. 1981).

4. The Trusteeship Council. The Charter provides for an international trusteeship system to safeguard the interests of the inhabitants of territories which are not yet fully self-governing and which may be placed thereunder by individual trusteeship agreements. These are called trust territories.

All of the original 11 trust territories except one, the Pacific Islands (Micronesia), administered by the USA, have become independent or joined independent countries.

The Trusteeship Council consists of the 1 member administering trust territories: USA; the permanent members of the Security Council that are not administering trust territories: China, France, USSR and UK. Decisions of the Council are made by a majority of the members present and voting, each member having 1 vote. The Council holds one regular session each year, and special sessions if required.

5. The International Court of Justice was created by an international treaty, the Statute of the Court, which forms an integral part of the United Nations Charter. All members of the United Nations are *ipso facto* parties to the Statute of the Court.

The Court is composed of independent judges, elected regardless of their nationality, who possess the qualifications required in their countries for appointment to the highest judicial offices, or are jurisconsults of recognized competence in international law. There are 15 judges, no 2 of whom may be nationals of the same state. They are elected by the Security Council and the General Assembly of the United Nations sitting independently. Candidates are chosen from a list of persons nominated by the national groups in the Permanent Court of Arbitration established by the Hague Conventions of 1899 and 1907. In the case of members of the United Nations not represented in the Permanent Court of Arbitration, candidates are nominated by national groups appointed for the purpose by their governments. The judges are elected for a 9-year term and are eligible for immediate re-election. When engaged on business of the Court, they enjoy diplomatic privileges and immunities.

The Court elects its own President and Vice-Presidents for 3 years and remains permanently in session, except for judicial vacations. The full court of 15 judges normally sits, but a quorum of 9 judges is sufficient to constitute the Court. It may form chambers of 3 or more judges for dealing with particular categories of cases, and forms annually a chamber of 5 judges to hear and determine, at the request of the parties, cases by summary procedures.

Competence and Jurisdiction. Only states may be parties in cases before the Court, which is open to the states parties to its Statute. The conditions under which the Court will be open to other states are laid down by the Security Council. The Court exercises its jurisdiction in all cases which the parties refer to it and in all matters provided for in the Charter, or in treaties and conventions in force. Disputes concerning the jurisdiction of the Court are settled by the Court's own decision.

The Court may apply in its decision: (a) international conventions; (b) international custom; (c) the general principles of law recognized by civilized nations; and (d) as subsidiary means for the determination of the rules of law, judicial decisions and the teachings of highly qualified publicists. If the parties agree, the Court may decide a case *ex aequo et bono*. The Court may also give an advisory opinion on any legal question to any organ of the United Nations or its agencies.

Procedure. The official languages of the Court are French and English. At the request of any party the Court will authorize the use of another language by this party. All questions are decided by a majority of the judges present. If the votes are equal, the President has a casting vote. The judgment is final and without appeal, but a revision may be applied for within 10 years from the date of the judgment on the ground of a new decisive factor. Unless otherwise decided by the Court, each party bears its own costs.

Judges. The judges of the Court, elected by the Security Council and the General Assembly, are as follows: (1) To serve until 5 Feb. 1982: André Gros (France), Isaac Forster (Senegal), Sir Humphrey Waldock (UK), Nagendra Singh (India), José María Ruda (Argentina). (2) To serve until 5 Feb. 1985: Manfred Lachs (Poland), Taslim Olawale Elias (Nigeria), Hermann Mosler (Federal Republic of Germany), Shigeru Oda (Japan), Abdallah Fikri El-Khani (Syria). (3) To serve until 5 Feb. 1988: Platon D. Morozov (USSR), Roberto Ago (Italy), A. El. Erian (Egypt), J. Sette-Camara (Brazil), Stephen Schwebel (USA).

'National' Judges. If there is no judge on the bench of the nationality of the parties to the dispute, each party has the right to choose a judge. Such judges shall take part in the decision on terms of complete equality with their colleagues.

The Court has its seat at The Hague, but may sit elsewhere whenever it considers this desirable. The expenses of the Court are borne by the UN.

Registrar: Santiago Torres Bernárdez (Spain).

6. **The Secretariat** is composed of the Secretary-General, who is the chief administrative officer of the organization, and an international staff appointed by him under regulations established by the General Assembly. However, the Secretary-General, the High Commissioner for Refugees and the Managing Director of the Fund are appointed by the General Assembly. The first Secretary-General was Trygve Lie (Norway), 1946–53; the second, Dag Hammarskjöld (Sweden), 1953–61; the third, U. Thant (Burma), 1961–71.

The Secretary-General acts as chief administrative officer in all meetings of the General Assembly, the Security Council, the Economic and Social Council and the Trusteeship Council.

Secretary-General: Kurt Waldheim (Austria), appointed 1 Jan. 1972.

The Secretary-General is assisted by about 20 Under-Secretaries-General and nearly 20 Assistant Secretaries-General.

The *UN Development Programme*, created on 22 Nov. 1965, is an amalgamation of the programme of Technical Assistance and the Special Fund. *Administrator:* Bradford Morse (USA).

The *UN Conference on Trade and Development* was established in 1964. It comprises those states which are members of the UN, its specialized agencies or the International Atomic Energy Agency. Its permanent organ, the Trade and Development Board (55 members), meets twice a year. Its 4 subsidiary organs meet annually: these are the Committees on Commodities, Manufactures, Shipping, and Invisibles and Financing Related to Trade. The first UNCTAD was held in Geneva in 1964, the second in New Delhi in 1968, the third in Santiago (Chile) 1972, the fourth in Nairobi (Kenya) 1976 and the fifth in Manila (Philippines) 1979. *Secretary-General:* Gamani Corea (Sri Lanka, appointed May 1974). *Headquarters:* Geneva, Switzerland.

The *UN Industrial Organization* (UNIDO) has worked as an autonomous body with the UN to promote industrialization and co-ordinate activities undertaken by the UN family in this field since 1967. Principal body is the 45-member Industrial Development Board, which formulates UNIDO's policy and its programme of activities. UNIDO tries to help the urgent need of developing countries to accelerate their promotional and operational activities and supports them by relevant studies and research. *Executive Director:* Abderraham Khane (Algeria). *Headquarters:* Wagramerstrasse 5, Vienna XXII, Austria.

Office of the United Nations High Commissioner for Refugees (UNHCR) was established by the UN General Assembly with effect from 1 Jan. 1951, originally for 3 years. Since 1954, its mandate has been renewed for 5-year periods. Under General Assembly resolution 32/67 adopted in Nov. 1977 the Office was prolonged until 31 Dec. 1983.

The task of UNHCR is of a purely humanitarian and non-political character.

The main functions of the Office of the High Commissioner are to provide international protection for refugees, to seek permanent solutions to their problems through voluntary repatriation, resettlement in other countries or integration into the country of present residence. UNHCR may also be called upon to provide emergency relief and supplementary aid where necessary.

UNHCR concerns itself with refugees who have been determined to come within its mandate under the Statute, and with persons in analogous circumstances whom it assists under the terms of the good offices resolutions adopted by the General Assembly.

The High Commissioner is elected by the General Assembly and follows policy directives given him by the General Assembly or the Economic and Social Council. He reports to the Third Committee of the General Assembly (Social and Humanitarian Affairs), through the Economic and Social Council. The Executive Committee of the High Commissioner's Programme gives the High Commissioner guidance in respect of material assistance programmes and advises him at his request in the exercise of his functions under the Statute. It meets normally once a year at Geneva. It includes representatives of 31 states, members and non-members of the UN. Its annual sessions are normally held in October in Geneva. In recent years it has been customary for the High Commissioner to invite representatives of member states to meet with him informally at least once between sessions to keep them abreast of important developments.

International protection is the primary function of UNHCR. Its main objective is to promote and safeguard the rights and interests of refugees. In so doing UNHCR devotes special attention to promoting a generous policy of asylum on the part of governments and seeks to improve the status of refugees in their country of residence. It also helps them to cease to be refugees through the acquisition of the nationality of their country of residence when voluntary repatriation is not applicable. UNHCR pursues its objectives in the field of protection by encouraging the conclusion of intergovernmental legal instruments in favour of refugees, by supervising the implementation of their provisions and by encouraging governments to adopt legislation and administrative procedures for the benefit of refugees. The main instrument in this field is the 1951 Convention Relating to the Status of Refugees. It prescribes a minimum standard of treatment for refugees in such important matters as employment, social security and freedom of movement, and provides for the issuance, by contracting states, of travel documents in lieu of national passports. The most important provision of the Convention is embodied in Article 33 which forbids the return of a refugee to a country where his life or liberty would be in danger because of persecution for reasons of race, religion, nationality or political opinion (*refoulement*).

A protocol relating to the status of refugees came into force in 1967 and had the effect of extending the provisions of the 1951 Convention (which applies to persons who have become refugees as a result of events prior to that date) to new groups of refugees.

On 1 Oct. 1980, 83 member states had acceded to the 1951 Convention and or the 1967 Protocol.

The Sub-Committee of the Whole on International Protection took up at its 1980 session the questions of extradition of refugees, voluntary repatriation, temporary refuge and the protection of asylum-seekers, particularly at sea. The sub-committee requested that the High Commissioner convene a group of experts to study the question of temporary refuge, particularly in cases of large-scale influxes. Abuses in the treatment of refugees, including violations of the internationally-recognized principle of *non-refoulement*, continued to be brought to the attention of the High Commissioner and were a cause of great concern to his Office. The thirty-first session of the Executive Committee of the High Commissioner's Programme acknowledged

that, despite progress in the field of protection, serious problems still remained. It also urged wider dissemination of information on refugee law.

Throughout 1979 the two areas of the world of greatest concern to UNHCR were Asia and Africa. In May, a Conference on the Situation of Refugees in Africa, sponsored jointly by UNHCR, the OAU and the Economic Commission for Africa, met in Arusha, United Republic of Tanzania. The Conference, noting that the African continent harboured the greatest concentration of refugees in the world, sought to promote an increased effort on the part of the international community to provide assistance. UNHCR's involvement is primarily directed at local integration, in rural settlements or in an urban environment, and includes counselling services and educational and training programmes.

In Dec. 1979 the Lancaster House Constitutional Conference in London provided for free elections in Southern Rhodesia leading to an independent Zimbabwe. At the request of the UK Government, UNHCR undertook to co-ordinate the repatriation of some 220,000 Zimbabwean refugees from Botswana, Mozambique and Zambia. At the request of the new Government, the Secretary-General appointed the High Commissioner to co-ordinate, for an initial period, the reinstallation and rehabilitation of the returnees and displaced persons. programme aimed at resettling some 650,000 persons was put into effect at an estimated cost of \$140m. which was met chiefly through the response to a special appeal launched by the High Commissioner to the international community.

Events in the Horn of Africa compounded the effects of severe drought and caused more than 1m. persons to flee their homelands by mid-1980. Resolutions of the Economic and Social Council called upon UNHCR and other relevant UN bodies to provide assistance and a Special Co-ordinator for the region was appointed by the High Commissioner in Feb. 1980. Some \$55m. were earmarked, under general programmes, for humanitarian assistance and local integration of refugees in Jibuti, Ethiopia, Somalia and the Sudan in 1980.

In the light of world-wide publicity for the plight of the 'boat people', the Secretary-General of the UN convened, in July 1979, a meeting on Refugees and Displaced Persons in South-East Asia. Following the meeting, UNHCR announced that pledges amounting to \$160m. in cash and in kind as well as 260,000 resettlement places had been offered by participating countries. The governments of Indonesia and the Philippines offered to host Refugee Processing Centres to accommodate refugees for whom resettlement guarantees had been secured. Just prior to the meeting, on 30 May 1979, a memorandum of understanding between the Government of Vietnam and UNHCR was concluded to permit the orderly departure of family reunion and other humanitarian cases.

In 1979, a total of 270,882 Indo-Chinese refugees, 205,489 of whom were 'boat people', arrived in countries of temporary asylum. During the same period, some 192,115 persons were resettled with UNHCR assistance in third countries. Monthly arrivals had decreased to fewer than 4,000 persons by Dec. 1979 after having reached a peak of almost 70,000 the previous June. Numbers rose in 1980 to over 17,000 in May but averaged only 9,700 per month in the first 9 months of 1980 against an average departure rate of 23,400 per month. As of 30 Sept. 1980, 186,437 Indo-Chinese refugees were still awaiting permanent solutions in the camps of South-East Asia, not including Kampucheans who arrived in Thailand in 1979 who received UNHCR assistance in holding centres near the Kampuchean border.

Also in Asia, some 932,000 refugees from Afghanistan were registered by the Pakistani authorities as of June 1980. UNHCR initially responded with \$190,000 from the Emergency Fund for shelter, food and clothing, followed by the implementation of an assistance programme which included establishment of basic health units and income-generating agricultural and handicraft projects.

In its on-going capacity as co-ordinator of UN humanitarian assistance in Cyprus, UNHCR in 1979 channelled some \$6m. in aid for displaced persons throughout Cyprus for shelter, reafforestation and agriculture, health care and medical supplies.

In Oct. 1980, the Executive Committee of the High Commissioner's Programme approved a revised target figure for 1980 General Programmes of \$299m., including some \$165m. for assistance programmes in Asia and \$98m. for African refugees, a 1981 General Programmes target of \$335m. was also approved. It was thought that, with the greatly expanded number of persons of concern to the High Commissioner, UNHCR's overall financial requirements would be in the region of \$500m. in 1980, with approximately the same amount needed for 1981.

INTERNATIONAL ATOMIC ENERGY AGENCY (IAEA)

Origin. The International Atomic Energy Agency came into existence on 29 July 1957. Its statute had been approved on 26 Oct. 1956, at an international conference held at UN Headquarters, New York. A relationship agreement links it with the United Nations. The IAEA had 110 member states in 1980.

Functions. (1) To accelerate and enlarge the contribution of atomic energy to peace, health and prosperity throughout the world, and (2) to ensure that assistance provided by it or at its request or under its supervision or control is not used in such a way as to further any military purpose.

The IAEA gives advice and technical assistance to developing countries on nuclear power development (provides a series of training courses on nuclear power project planning), on health and safety, on radioactive waste management, on legal aspects of the use of atomic energy, and on prospecting for and exploiting nuclear raw materials; in addition it promotes the use of radiation and isotopes in agriculture, industry, medicine and hydrology through expert services, training courses and fellowships, grants of equipment and supplies, research contracts, scientific meetings and publications. Since 1958 the Agency has provided technical assistance totalling \$108m., consisting of the services of 3,742 experts and lecturers, 7,739 fellowships, equipment worth \$37m. not including research contracts. The IAEA has research laboratories in Austria and Monaco. At Trieste, the International Centre for Theoretical Physics was established in 1964 which is now operated jointly by UNESCO and IAEA.

The IAEA applies safeguards in 29 States pursuant to NPT and in 21 States under other agreements to 117 power reactors, 4 conversion plants, 33 fabrication plants, 4 enrichment plants, 5 reprocessing plants, 171 research reactors and critical assemblies, 19 separate storage facilities, 40 locations containing more than 1 effective kg of nuclear material, 307 locations containing 1 or less than 1 effective kg of nuclear material. The above figures include facilities safeguarded under agreement with the European Atomic Energy Community and its non-nuclear-weapon States.

Organization. The Statute provides for an annual General Conference, a Board of Governors of 34 members and a staff headed by a Director-General.

Headquarters: Vienna International Centre, PO Box 100, A-1400 Vienna, Austria.

Director-General: Sigvard Eklund (Sweden).

INTERNATIONAL LABOUR ORGANISATION (ILO)

Origin. The ILO, established in 1919 as an autonomous part of the League of Nations, is an intergovernmental agency with a tripartite structure, in which representatives of governments, employers and workers participate. It seeks through international action to improve labour conditions, raise living standards and promote productive employment. In 1946 the ILO was recognized by the United Nations as a specialized agency. In 1969 it was awarded the Nobel Peace Prize. In 1980 it numbered 144 members.

Functions. One of the ILO's principal functions is the formulation of international standards in the form of International Labour Conventions and Recommendations. Member countries are required to submit Conventions to their competent national

authorities with a view to ratification. If a country ratifies a Convention it agrees to bring its laws into line with its terms and to report periodically how these regulations are being applied. More than 4,800 ratifications of 153 Conventions had been deposited by mid-1980. Machinery is available to ascertain whether Conventions thus ratified are effectively applied.

Recommendations do not require ratification, but member states are obliged to consider them with a view to giving effect to their provisions by legislation or other action. By the end of 1980 the International Labour Conference had adopted 162 recommendations.

Organization. The ILO consists of the International Labour Conference, the Governing Body and the International Labour Office.

The Conference is the supreme deliberative organ of the ILO: it meets annually at Geneva. National delegations are composed of 2 government delegates, 1 employers' delegate and 1 workers' delegate.

The Governing Body, elected by the Conference, is the executive council. It is composed of 28 government members, 14 workers' members and 14 employers' members.

Ten governments hold permanent seats on the Governing Body because of their industrial importance, namely, Brazil, Canada, China, Federal Republic of Germany, France, India, Italy, Japan, USSR and U.K. with the addition in 1980 of US. The remaining 18 government seats were, at the end of 1980, held by Bangladesh, Cameroon, Colombia, Ivory Coast, Spain, Guyana, Honduras, Iran, Lebanon, Niger, Peru, Romania, Sierra Leone, Czechoslovakia, Thailand, Tunisia, Venezuela and Zambia.

The Office serves as secretariat, operational headquarters, research centre and publishing house.

The ILO budget for 1980-81 amounted to US\$203m.

Activities. In addition to its research and advisory activities, the ILO extends technical co-operation to governments under its regular budget and under the UN Development Programme and Funds-in-Trust in the fields of employment promotion, human resources development (including vocational and management training), development of social institutions, small-scale industries, rural development, social security, industrial safety and hygiene, productivity, etc. Technical co-operation also includes expert missions and a fellowship programme. Some \$79m. was spent on technical co-operation in 1979. Projects were in progress in over 100 countries and nearly 1,000 experts involved.

Major emphasis is being given to the ILO's World Employment Programme, launched in 1969 with the purpose of stimulating national and international efforts to increase the volume of productive employment, and so to counter the problem of rising unemployment in developing countries. Employment strategy missions were carried out under the Programme in Colombia, Iran, Kenya, Sri Lanka, the Philippines and the Dominican Republic. The work of these missions was complemented by an ILO programme of research designed to provide policy-makers with the information to promote employment. A World Employment Conference was held in June 1976. The International Labour Conference (Geneva, June 1980) adopted a Recommendation on older workers and prepared the way for new instruments on collective bargaining, equality of treatment for workers with family responsibilities and safety and health.

In 1960 the ILO established in Geneva the International Institute for Labour Studies. The Institute specializes in advanced education and research on social and labour policy. It brings together for group study experienced persons from all parts of the world—government administrators, trade-union officials, industrial experts, management, university and other specialists.

A training institution was opened by the ILO in Turin, Italy, in 1965—the International Centre for Advanced Technical and Vocational Training. The Centre provides opportunities for technical, vocational and management training for individuals who have advanced beyond the facilities available in their own countries. Courses are geared particularly to the needs of developing countries.

Director-General: Francis Blanchard (France).

Chairman of the Governing Body: Vijit Sangtong (Thailand).
London Branch Office: 96/98 Marsham St., SW1.

The ILO has regional offices in Addis Ababa (for Africa), Bangkok (for Asia and the Pacific) and Lima (for Latin America and the Caribbean). FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS (FAO)

Origin. The UN Conference on Food and Agriculture in May 1943, at Hot Springs, Virginia, set up an Interim Commission in Washington in July 1943 to plan the Organization, which came into being on 16 Oct. 1945.

Functions. FAO gives international support to national programmes to increase the efficiency of agriculture, forestry and fisheries, and to improve the conditions of the people engaged in relevant activities.

FAO keeps world food and agricultural conditions under continuous review and supplies member governments with facts and figures, appraisals and forecasts relating to trends in the world agricultural situation and on production, trade and consumption.

The FAO Conference meets every 2 years. At its 20th session held in Nov. 1979, it admitted 3 new States: Dominica, Western Samoa and Saint Lucia.

Reporting to the 78th session of the FAO Council in Nov. 1980, the Director-General warned of the deteriorating state of world food and agriculture. Increases in production had been only marginal, while per caput output had declined for the second consecutive year. The situation was extremely grave in Africa, where more than 150m. people were affected by abnormal food shortages mainly due to drought conditions. Difficulties were compounded in many instances by the presence of large numbers of refugees and displaced persons.

The world cereal situation was precarious as a result of bad weather in several major grain producing and exporting countries. Since import needs of developing countries were expected to increase, cereal stocks would have to be drawn down to levels considerably below the margin of safety needed for world food security. Prices, especially for maize, continued to rise.

Food production in some developing regions was not keeping pace with growing population. The consequences would be increased dependence of food-importing developing countries on world markets. Food production in the Far East was expected to increase by over 3% in 1980, but food and agricultural production in the developed countries as a whole was likely to be more than 1% lower than 1979.

The international food aid goals, such as that of the International Emergency Food Reserve, had not been met and the lack of an internationally co-ordinated system of national cereal stocks was making the world more prone to a food crisis.

The value of world exports of agricultural, forestry and fishery products increased by over 14% in 1979 and continued to rise in early 1980. The greater part of the increase benefited developed countries. Only about one-third of the increased value of agricultural exports was due to increased volume of products, the rest was predominantly price-based.

FAO provides secretariat services for the exchange of information and for co-operative action in its field of concern. More than 2,000 experts are assigned to field projects in developing countries. Through co-operative arrangements with private and public lending institutions, such as the World Bank, it helps to mobilize capital backing to programmes of development. With the UN, FAO sponsors the World Food Programme, which uses food and cash pledged by member countries for economic and social development projects and for alleviating distress during emergencies. Through the Freedom from Hunger Action for Development Programme, which is conducted by some 100 national committees, FAO arouses concern over the gravity and extent of the world food situation and mobilizes public support for programmes to improve the quality of life of rural communities.

Organization. FAO's programme and overall policy are approved by a Conference (composed of one representative of each of the 147 member nations) and interim supervision is given by a Council (consisting of 49 nations elected by the Conference). The work of the Organization is carried out by an international staff led by a Director-General.

Budget for 1980-81: \$278.74m.

Headquarters: Viale delle Terme di Caracalla, Rome, Italy.

Director-General: Dr Edouard Saouma (Lebanon).

UNITED NATIONS EDUCATIONAL, SCIENTIFIC AND CULTURAL ORGANIZATION (UNESCO)

Origin. A Conference for the establishment of an Educational, Scientific and Cultural Organization of the United Nations was convened by the Government of the UK in association with the Government of France, and met in London, 1-16 Nov. 1945. UNESCO came into being on 4 Nov. 1946.

Functions. The purpose of UNESCO is to contribute to peace and security by promoting collaboration among the nations through education, science and culture in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations. The UNESCO budget for 1980 was \$115.5m.

Activities. The education programme has four main objectives: the extension of education; the improvement of education; and life-long education for living in a world community.

To train teachers specialized in the techniques of fundamental education UNESCO is helping to establish regional and national training centres. A centre for Latin America was opened in Mexico in 1951, one for the Arab States was set up in Egypt in 1953. UNESCO seeks to promote the progressive application of the right to free and compulsory education for all and to improve the quality of education everywhere.

In the natural sciences, UNESCO seeks to promote international scientific co-operation, such as the International Hydrological Programme which began in 1966. It encourages scientific research designed to improve the living conditions of mankind. Science co-operation offices have been set up in Montevideo, Cairo, New Delhi, Nairobi and Jakarta.

In the field of communication, UNESCO endeavours, by disseminating information, carrying out research and providing advice, to increase the scope and quality of press, film and radio services throughout the world.

Organization. The organs of UNESCO are a General Conference (composed of representatives from each member state), an Executive Board (consisting of 45 government representatives elected by the General Conference) and a Secretariat. UNESCO had 153 members and 1 associate member in 1980.

National commissions act as liaison groups between UNESCO and the educational, scientific and cultural life of their own countries.

Budget for 1981: \$200,133,700.

Headquarters: UNESCO House, 9 Place de Fontenoy, Paris (7^{eme}).

Director-General: Amadou Mahtar M'Bow (Senegal).

WORLD HEALTH ORGANIZATION (WHO)

Origin. An International Conference, convened by the UN Economic and Social Council, to consider a single health organization resulted in the adoption on 22 July 1946 of the constitution of the World Health Organization. This constitution came into force on 7 April 1948.

Structure. The principal organs of WHO are the World Health Assembly, the Executive Board and the Secretariat. Each of the 155 member states and 1 Associate Member (1980) has the right to be represented at the Assembly, which meets annually usually in Geneva, Switzerland. The 30-member Executive Board is composed of technically qualified health experts designated by as many member states elected by the Assembly. The Secretariat consists of technical and administrative staff headed by a Director-General. Health activities in member countries are carried out through regional organizations which have been established in Africa (regional office, Brazzaville), South-East Asia (New Delhi), Europe (Copenhagen), Eastern Mediterranean (Alexandria) and Western Pacific (Manila). The Pan American Sanitary Bureau in Washington serves as the Regional Office of WHO for the Americas.

Functions. WHO's objective, as stated in the first article of the Constitution is 'the attainment by all peoples of the highest possible level of health'. As the directing and co-ordinating authority on international health it establishes and maintains collaboration with the UN, specialized agencies, government health administrations, professional and other groups concerned with health. The Constitution also directs WHO to assist governments to strengthen their health services, to stimulate and advance work to eradicate diseases, to promote maternal and child health, mental health, medical research and the prevention of accidents; to improve standards of teaching and training in the health professions, and of nutrition, housing, sanitation, working conditions and other aspects of environmental health. The Organization also is empowered to propose conventions, agreements and regulations and make recommendations about international health matters; to revise the international nomenclature of diseases, causes of death and public health practices; to develop, establish and promote international standards concerning foods, biological, pharmaceutical and similar substances.

Methods of work. Co-operation in country projects is undertaken only on the request of the government concerned, through the 6 regional offices of the Organization. Worldwide technical services are made available by headquarters. Expert committees whose members are chosen from the 47 advisory panels of experts meet to advise the Director-General on a given subject. Scientific groups and consultative meetings are called for similar purposes. To further the education of health personnel of all categories, seminars, technical conferences and training courses are organized and

advisors, consultants and lecturers are provided. WHO awards fellowships for study to nationals of member countries.

Activities. WHO's main activities in 1980 were towards promoting national, regional and global strategies for the attainment of the main social target of the member states for the next two decades, 'Health for all by the year 2000'.

Water supply and sanitation needs of more than 100 countries were assessed in preparation for the International Drinking Water Supply and Sanitation Decade launched by the UN General Assembly on 10 Nov. Several interregional, regional and national workshops were conducted to develop national strategies for the Decade. Co-operation was given to Member Governments in planning their water supply and sanitation programmes.

An expert group reviewed the progress of the Priority Programme for the Control of Diarrhoeal Diseases, and recommended launching of national programmes based on oral dehydration therapy (ORT) and better feeding and hygienic practices. ORT is a simple method of preventing dehydration – the main cause of death in acute diarrhoea – by giving the patient a solution made up of table salt, baking powder, potassium chloride, and sugar dissolved in water.

Co-operation was given to more than 100 countries under the Expanded Programme on Immunization (EPI) against childhood diseases – diphtheria, pertussis, tetanus, poliomyelitis, measles and tuberculosis. An essential requirement of the programme is the 'cold chain' refrigerators and cold boxes suitable for storage and transportation of vaccines in tropical climates. A number of the new cold chain products were developed and introduced during the year and training manuals published.

The 33rd World Health Assembly meeting in May proclaimed at a special ceremony the global eradication of smallpox. It recommended that vaccination against smallpox be discontinued in every country except for investigators at special risk, and no certificates of vaccination against the disease be required from international travellers.

The 32nd World Health Assembly met in May 1979 and adopted an effective working budget of \$427.29m. for the work of WHO in 1980-81.

In programmes relating to non-communicable diseases, such as cardiovascular diseases and cancer, research figures prominently. Work in cancer is carried out both at the International Agency for Research on Cancer at Lyons in the field of environmental biology, and in a number of WHO collaborating centres which are concerned with clinical studies, classification and cancer control services. The medical research programme of WHO is based on a world-wide network of collaborating centres and on advisory committees on medical research established in its 6 regions. Six tropical diseases, malaria, schistosomiasis, trypanosomiasis, filariasis, leishmaniasis and leprosy, are the target of a special research programme to develop new tools, strengthen research institutions and train workers in the countries affected. In mental health the focus is on research and on development of service delivery models suitable for countries with limited resources. In pharmacology and toxicology work is geared to ensuring the availability of effective and safe drugs to developing countries at prices that they can afford.

INTERNATIONAL MONETARY FUND (IMF)

The International Monetary Fund was established on 27 Dec. 1945 as an independent international organization; its relationship with the UN is defined in an agreement of mutual co-operation which came into force on 15 Nov. 1947. The first amendment to the Fund's articles creating the special drawing right (SDR) took effect on 28 July 1969 and the second amendment took effect on 1 April 1978.

The Fund is authorized under its Articles of Agreement to supplement its resources by borrowing. In Jan. 1962, a 4-year agreement was concluded with 10 industrial members (Belgium, Canada, France, Federal Republic of Germany, Italy, Japan, Netherlands, Sweden, UK, USA) who undertook to lend the Fund up to \$6,000m. in their own currencies, if this should be needed to forestall or cope with an impairment of the international monetary system. These agreements, which have now been extended until 1985, were used to finance drawings made by the UK in 1964, 1965, 1968, 1969 and 1977, by France in 1969 and 1970 and by USA in 1978.

Purposes: To promote international monetary co-operation, the expansion of international trade and exchange stability; to assist in the removal of exchange restrictions and the establishment of a multilateral system of payments; and to alleviate any serious disequilibrium in members' international balance of payments by making the resources of the Fund available to them under adequate safeguards.

Activities. Each member of the Fund undertakes a broad obligation to collaborate with the Fund and other members to ensure the existence of orderly exchange arrangements and to promote a system of stable exchange rates. In addition, members are subject to certain obligations relating to domestic and external policies that can effect the balance of payments and the exchange rate. The Fund makes its resources available, under proper safeguards, to its members to meet short-term or medium-term payments difficulties. The Fund also supplements, as and when needed, the existing reserve assets of participants in the Special Drawing Account. The first allocation of special drawing rights was made on 1 Jan. 1970. Total allocations amounted to SDR 9,300m. On 24 Sept. 1978 the Fund agreed on a 50% increase in quotas under the 7th general review of quotas which would raise the Fund's general resources to SDR 59,900m. To further enhance its balance of payments assistance to its members the Fund established a compulsory financing facility on 23 Feb. 1963, an oil facility on 12 June 1974, an extended facility for medium term assistance to members with special balance of payments problems on 13 Sept. 1974, an oil facility on 4 April 1975, and a trust fund on 5 May 1976. The Board of Governors approved a resolution, on 24 Sept. 1978, authorizing the allocation of SDR 4,000m. in each of the 3 years 1979, 1980 and 1981.

A Report on Reform of the International Monetary System was submitted to the

Board of Governors at the 1972 annual meeting. During the meeting the Committee on Reform of the International Monetary System and Related Issues, generally known as the Committee of Twenty, held its first session, with the mandate to advise and report to the Board on all aspects of the international monetary system, including proposals for any amendments of the Articles of Agreement. The Committee of Twenty ceased to exist after submitting its final report in 1974. An Interim Committee of the Board of Governors on the International Monetary System and a Joint Ministerial Committee of the Boards of Governors of the World Bank and the Fund on the Transfer of Real Resources to Developing Countries (Development Committee) were established and held their initial meetings in Jan. 1975 and since then have met on a semi-annual basis.

Organization. The highest authority in the Fund is exercised by the Board of Governors on which each member government is represented. Normally the Governors meet once a year, although the Governors may take votes by mail or other means between annual meetings. The Board of Governors has delegated many of its powers to the executive directors in Washington, of whom there are 22, of which 6 are appointed by individual members and the other 16 elected by groups of countries. Each appointed director has voting power proportionate to the quota of the government he represents, while each elected director casts all the votes of the countries which elected him. The 6 appointed executive directors represent the US, UK, France, Federal Republic of Germany, Saudi Arabia and Japan.

The managing director is selected by the executive directors: he presides as chairman at their meetings, but may not vote except in case of a tie. His term is for 5 years, but may be extended or terminated at the discretion of the executive directors. He is responsible for the ordinary business of the Fund, under general control of the executive directors, and supervises a staff of about 1,400.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

Conceived at the Bretton Woods Conference, July 1944, the Bank began operations in June 1946. Its purpose is to provide funds and technical assistance to facilitate economic development in its poorer member countries.

The Bank obtains its funds from the following sources: Capital subscribed by member countries; sales of its own securities; sales of parts of its loans; repayments; and net earnings. The subscribed capital of the Bank amounted to \$34,429m. at 30 June 1980. On 4 Jan. 1980, the Board of Governors adopted a resolution that increased the authorized capital stock of the Bank by 331,500 shares. This represented an increase of approximately \$40,000m. The resolution provides that the paid-in portion of the shares authorized to be subscribed under it will be 7.5%, compared with the 10% paid-in portion of existing capital stock. Borrowing in the market had reached \$45,932m. by 30 June 1980, of which \$29,667m. was outstanding, and sales of portions of Bank loans from portfolio had totalled \$2,980m. The Bank is self-supporting. Its net earnings for year ending 30 June 1980 amounted to \$588m.; in addition, the Bank had reserves of \$3,995m.

By 30 June 1980 the Bank had made 1,875 loans totalling \$59,341.4m. in 100 of its 139 member countries. Lending was for the following purposes: Agriculture and rural development, \$12,102m.; Development Finance Companies, \$5,981m.; educa-

tion, \$2,098m.; energy, \$12,688m.; industry, \$4,680m.; non-project, \$2,516m.; population, health and nutrition, \$227m.; power, \$12,902m.; telecommunications, \$1,264m.; tourism, \$364m.; transportation, \$12,902m.; urban development, \$1,137m.; water supply and sewerage, \$2,658m., and technical assistance, \$42m.

In order to eliminate wasteful overlapping of development assistance and to ensure that the funds available are used to the best possible effect, the Bank has organized consortia or consultative groups of aid-giving nations for the following countries: Bangladesh, Colombia, Egypt, Korea, Nepal, Pakistan, the Philippines, Sudan, Uganda, Zaïre and the Caribbean Group for Co-operation in Economic Development. The Bank furnishes a wide variety of technical assistance. It acts as executing agency for a number of pre-investment surveys financed by the UN Development Programme. Resident missions have been established in 23 developing member countries as well as 3 regional missions in East and West Africa and Thailand primarily to assist in the preparation of projects. The Bank helps member countries to identify and prepare projects for the development of agriculture, education and water supply by drawing on the expertise of the FAO, WHO, UNIDO and UNESCO through its co-operative agreements with these organizations. The Bank maintains a staff college, the Economic Development Institute in Washington, D.C., for senior officials of the member countries.

To help the poorest member countries the INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA) was established in 1960. IDA grants development credits on a long-term, interest-free basis. By 30 June 1980 IDA had extended 973 credits to 72 countries, totalling \$20,570m. for the same general purpose as bank loans. IDA's primary lending resources have been the subscriptions and supplementary contributions of member countries, chiefly its 21 wealthiest. The World Bank has made grants to IDA out of its net income; the Association also has a small flow of net income of its own.

INTERNATIONAL FINANCE CORPORATION (IFC)

The Corporation, an affiliate of the World Bank, was established in July 1956. Paid-in capital at 30 June 1980 was \$307m., subscribed by 113 member countries. In addition, it has accumulated earnings of \$140m. IFC supplements the activities of the World Bank by encouraging the growth of productive private enterprises in less developed member countries. Chiefly, IFC makes investments in the form of subscriptions to the share capital of privately owned companies, or long-term loans, or both. The Corporation will help finance new ventures, and it will also assist established enterprises to expand, improve or diversify their operations.

At 30 June 1980 IFC had approved investments amounting to \$3,209m. in 73 countries. The total amount of loans and equity which IFC had sold or agreed to sell to other investors as of that date was \$1,157.7m.

INTERNATIONAL CIVIL AVIATION ORGANIZATION (ICAO)

Origin. The Convention providing for the establishment of the International Civil Aviation Organization was drawn up by the International Civil Aviation Conference held in Chicago from 1 Nov. to 7 Dec. 1944. A Provisional International Civil Aviation Organization (PICAO) operated for 20 months until the formal establishment of ICAO on 4 April 1947.

The Convention on International Civil Aviation superseded the provisions of the Paris Convention of 1919, which established the International Commission for Air Navigation (ICAN), and the Pan American Convention on Air Navigation drawn up at Havana in 1928.

Functions. It assists international civil aviation by establishing technical standards for safety and efficiency of air navigation and promoting simpler procedures at borders, develops regional plans for ground facilities and services needed for international flying, disseminates air-transport statistics and prepares studies on aviation economics; fosters the development of air law conventions. As part of the UN Development Programme it provides technical assistance to States in developing civil aviation programmes.

Organization. The principal organs of ICAO are an Assembly, consisting of all members of the Organization, and a Council, which is comprised of 33 states elected by the Assembly, for 3 years, and meets in virtually continuous session. In electing these states, the Assembly must give adequate representation to: (1) member states of major importance in air transport; (2) those member states not otherwise included which make the largest contribution to the provision of facilities for the international civil air navigation; (3) those member states not otherwise included whose election will ensure that all major geographical areas of the world are represented. The main subsidiary bodies are: the Air Navigation Commission, composed of 15 members appointed by the Council; Air Transport Committee, open to council members; and the Legal Committee, on which all members of ICAO may be represented. There are 146 members. Budget for 1979, \$25,436,000.

UNIVERSAL POSTAL UNION (UPU)

Origin. The UPU was established on 1 July 1875, when the Universal Postal Convention adopted by the Postal Congress of Berne on 9 Oct. 1874 came into force. The UPU was known at first as the General Postal Union, its name being changed at the Congress of Paris in 1878. In 1980 there were 158 member countries.

Functions. The aim of the UPU is to assure the organization and perfection of the various postal services and to promote, in this field, the development of international collaboration. To this end, the members of UPU are united in a single postal territory for the reciprocal exchange of correspondence.

Organization. The UPU is composed of a Universal Postal Congress, which usually meets every 5 years, a permanent Executive Council consisting of 40 members, a consultative Committee, which consists of 35 members elected on a geographical basis by each Congress, and an International Bureau, which functions as the permanent secretariat.

Since 1 July 1948 the Union has been governed by the revised Convention adopted by the twelfth Congress in Paris on 5 July 1947.

INTERNATIONAL TELECOMMUNICATION UNION (ITU)

Origin. The International Telegraph Union, founded in Paris in 1865, and the International Radiotelegraph Union, founded in Berlin in 1906, were merged by the

Madrid Convention of 1932 to form the International Telecommunication Union. ITU came into being on 1 Jan. 1934. The ITU has been governed since 1 Jan. 1975 by the revised International Telecommunication Convention adopted on 23 Oct. 1973.

Functions. The ITU: (1) allocates radio frequencies and registers radio-frequency assignments; (2) seeks to establish the lowest rates possible, consistent with efficient service and taking into account the necessity for keeping the independent financial administration of telecommunication on a sound basis; (3) promotes the adoption of measures for ensuring the safety of life through telecommunication; and (4) makes studies and recommendations and collects and publishes information for the benefit of its members.

Organization. The ITU consists of the Plenipotentiary Conference, Administrative Conferences, the Administrative Council of 36 members, the General Secretariat, the International Frequency Registration Board, and 2 international consultative committees (radio, telephone and telegraph).

Budget for 1975: \$62.32m.

WORLD METEOROLOGICAL ORGANIZATION (WMO)

Origin. A Conference of Directors of the International Meteorological Organization (set up in 1873), meeting in Washington in 1947, adopted a Convention creating the World Meteorological Organization. The WMO Convention became effective on 23 March 1950, and WMO was formally established on 19 March 1951, when the first session of its Congress was convened in Paris. An agreement to bring WMO into relationship with the United Nations was approved by this Congress and came into force on 21 Dec. 1951 with its approval by the General Assembly of the United Nations.

Functions. (1) To facilitate world-wide co-operation in the establishment of networks of stations for the making of meteorological observations as well as hydrological or other geophysical observations related to meteorology, and to promote the establishment and maintenance of meteorological centres charged with the provision of meteorological and related services; (2) to promote the establishment and maintenance of systems for the rapid exchange of meteorological and related information; (3) to promote standardization of meteorological and related observations and to ensure the uniform publication of observations and statistics; (4) to further the application of meteorology to aviation, shipping, water problems, agriculture and other human activities; (5) to promote activities in operational hydrology and to further close co-operation between meteorological and hydrological services; and (6) to encourage research and training in meteorology and, as appropriate, to assist in co-ordinating the international aspects of such research and training.

Organization. WMO is an inter-governmental organization of 147 member states and 5 member territories responsible for the operation of their own meteorological services. Constituent bodies of WMO are the World Meteorological Congress which meets every 4 years, the executive committee composed of 29 members elected in their personal capacity and including the President and 3 Vice-Presidents of the Organization, 6 regional associations of members and 8 technical commissions established by the Congress. A permanent secretariat is maintained in Geneva.

GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT)

Origin. The General Agreement on Tariffs and Trade was negotiated in 1947 and entered into force on 1 Jan. 1948. Its 23 original signatories were members of a Preparatory Committee appointed by the UN Economic and Social Council to draft the charter for a proposed International Trade Organization. Since this charter was never ratified, the General Agreement, intended as an interim arrangement, has instead remained as the only international instrument laying down trade rules

accepted by countries responsible for most of the world's trade. In Nov. 1980 there were 85 contracting parties, with a further 32 countries participating under special arrangements.

Functions. GATT functions both as a multilateral treaty that lays down a common code of conduct in international trade and trade relations and as a forum for negotiation and consultation to overcome trade problems and reduce trade barriers. Key provisions of the Agreement guarantee most-favoured-nation treatment (exceptions being granted to customs unions and free trade areas, and for certain preferences in favour of developing countries); require that protection be given to domestic industry only through tariffs (apart from specified exceptions); provide for negotiations to reduce tariffs (which are then 'bound' against subsequent increase) and other trade distortions; and lay down principles (particularly in Part IV of the Agreement, added in 1965) to assist the trade of developing countries. The Agreement also provides for consultation on, and settlement of, disputes, for 'waivers' (the grant of authorization, when warranted, to derogate from specific GATT obligations) and for emergency action in defined circumstances.

Seven 'rounds' of multilateral trade negotiations, including the Kennedy Round of 1964-67, took place in GATT up to 1979. The latest in this series, the Tōkyō Round, although held in Geneva, was so called because it was launched at a Ministerial meeting in the Japanese capital in Sept. 1973.

Ninety-nine countries participated in the Tōkyō Round. In Nov. 1979, the negotiations were successfully concluded with agreements covering: An improved legal framework for the conduct of world trade (which includes recognition of tariff and non-tariff treatment in favour of and among developing countries as a permanent legal feature of the world trading system); non-tariff measures (subsidies and countervailing duties; technical barriers to trade; government procurement; customs valuation; import licensing procedures; and a revision of the 1967 GATT anti-dumping code); bovine meat; dairy products; tropical products; and an agreement on free trade in civil aircraft. The agreements contain provisions for special and more favourable treatment for developing countries.

Participating countries also agreed to reduce tariffs on thousands of industrial and agricultural products, for the most part over a period of 7 years beginning on 1 Jan. 1980. As a result of these concessions, industrialized countries will reduce the average level of their import duties on manufactures by about 34%, a cut comparable to that achieved in the Kennedy Round of 1964-67.

The agreements providing an improved framework for the conduct of world trade took effect in Nov. 1979. The other agreements took effect on 1 Jan. 1980, except for those covering government procurement and customs valuation, which will take effect on 1 Jan. 1981, and the concessions on tropical products which began as early as 1977. Committees were established in 1980 to supervise implementation of the agreements which entered into force that year. Negotiations continued in 1980 on the 1 major unresolved Tōkyō Round issue of whether to revise GATT rules on emergency safeguard action against imports.

A new GATT work programme, established in Nov. 1979, gave priority to full implementation of the Tōkyō Round agreements, future trade liberalization and further efforts to assist the trade of developing countries; the rôle of the Committee on Trade and Development, which is largely responsible for these efforts, was strengthened in the work programme, and a sub-committee was established in March 1980 to examine protective measures taken against imports from developing countries.

To assist the trade of developing countries, GATT established in 1964 the International Trade Centre (since 1968 operated jointly with the UN Conference on Trade and Development) to provide information and training on export markets and marketing techniques. Other GATT action in favour of developing countries includes training courses on trade policy questions.

THE INTERNATIONAL NARCOTICS CONTROL BOARD (INCB)

Origin. The INCB was established by the Single Convention on Narcotic Drugs, 1961, and assumed the functions of the Permanent Central Board and the Drug Supervisory Body, which were themselves treaty organs created by the narcotics Conventions of 1925 and 1931 respectively. The 1961 Convention came into force on 13 Dec. 1964. The INCB entered upon its duties on 2 March 1968. Its functions and membership were enlarged by the 1972 Protocol amending the 1961 Convention.

Functions. The functions of the Board under the Treaties are to work with governments to ensure that the aims of the drug control treaties are not seriously endangered by reason of the failure of any country or territory to carry out the provisions of such treaties; to limit the cultivation, production, manufacture and use of drugs to an adequate amount required for medical and scientific purposes; to prevent the illicit cultivation, production and manufacture of, and illicit trafficking in and use of, drugs; to ensure the availability of drugs for medical and scientific purposes; to encourage universal co-operation in the field of drug control. The 1971 Convention on Psychotropic Substances broadens the scope of the Board's activities to include the supervision of national control over these substances.

Organization. The INCB is composed of 13 members, elected by the Economic and Social Council in their individual capacities and not as representatives of governments, who, by their competence, impartiality and disinterestedness, will command general confidence. During its sessions held at least twice a year, the Board reviews the drug situation throughout the world and supervises the implementation of the various drug control treaties. The INCB is assisted by a permanent secretariat which is in continuous dialogue with national authorities. Information received from over 170 governments is analysed by the secretariat and submitted for the Board's attention during its sessions.

WORLD INTELLECTUAL PROPERTY ORGANIZATION (WIPO)

Origin. The Convention establishing WIPO was signed at Stockholm in 1967 by 51 countries, and entered into force in April 1970. In Dec. 1974 WIPO became a specialized agency of the UNO.

Objectives. The objectives of WIPO are to promote the protection of intellectual property throughout the world through co-operation among States and, where ap-

propriate, in collaboration with any other international organization, and to ensure administrative co-operation among the Unions established by various treaties for the protection of intellectual property. The Convention provides expressly for the encouragement of the conclusion of international agreements designed to promote the protection of intellectual property, and for the provision of legal-technical assistance at the request of States.

Intellectual property includes the rights relating to: literary, artistic and scientific works; performances of performing artists, phonograms and broadcasts; inventions in all fields of human endeavour; scientific discoveries; industrial designs; trademarks, service marks and commercial names and designations; protection against unfair competition and all other rights resulting from intellectual activity in the industrial, scientific, literary or artistic fields.

Functions. Among its other functions, WIPO performs the administrative tasks of certain international treaties dealing with various subjects of intellectual property, assembles and disseminates information concerning the protection of intellectual property, carries out and promotes studies in this field, publishes the results of such studies, and maintains services, including registration and publication services, facilitating the international protection of intellectual property.

WIPO performs the administrative tasks conferred by the Paris Convention for the Protection of Industrial Property, by various Special Agreements made within the framework of the Paris Convention and by the Berne Convention for the Protection of Literary and Artistic Works. The Special Agreements referred to, and currently in force, are: Madrid Agreement for the Repression of False or Deceptive Indications of Source on Goods, Madrid Agreement concerning the International Registration of Marks, Patent Co-operation Treaty, The Hague Agreement concerning the International Deposit of Industrial Designs, Nice Agreement concerning the International Classification of Goods and Services for the Purposes of the Registration of Marks, Lisbon Agreement for the Protection of Appellations of Origin and their International Registration, Locarno Agreement Establishing an International Classification for Industrial Designs, Strasbourg Agreement concerning the International Patent Classification Trademark Registration Treaty, Budapest Treaty on the International Recognition of the Deposit of Micro-organisms for the Purposes of Patent Procedure. Other special agreements to be administered by WIPO when they come into force, are: Vienna Agreement for the Protection of Type Faces and their International Deposit and the Protocol to that Agreement, Vienna Agreement Establishing an International Classification of the Figurative Elements of Marks and Geneva Treaty on the International Recording of Scientific Discoveries. In the field of neighbouring rights, the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations administered by WIPO, the International Labour Organization and Unesco. There are also the Convention for the Protection of Producers of Phonograms Against Unauthorized Duplication of their Phonograms, which is administered by WIPO and the Convention Relating to the Distribution of Programmes carrying Signals Transmitted by Satellite.

Technical Assistance The legal-technical assistance programme of WIPO is intended to assist developing countries in the improvement of their intellectual property systems in order to support their national and regional plans for economic development. The methods used include expert advice on the modernization of laws and on the building of appropriate governmental institutions, including the training of staff, together with the stimulation of industrial research and development activities by assisting in the flow of scientific and technical information.

Two Permanent Programs for Development Co-operation have been established, one in the field of industrial property, the other in the field of copyright and neighbouring rights. Their objective is to promote and encourage inventive and innovative activity in developing countries, as well as to facilitate the dissemination of intellectual creations.

Membership in WIPO is open to any State which is a member of at least one of the Unions and to other States which are members of the organizations of the United

Nations system, are party to the Statute of the International Court of Justice, or are invited to join by the General Assembly of WIPO. Membership of the Unions is open to any State. The total combined membership of WIPO and of the Unions on 10 Dec. 1980, was 116 states.

INTERNATIONAL UNION FOR THE PROTECTION OF NEW VARIETIES OF PLANTS (UPOV)

The Director General of WIPO is also the Secretary-General of the International Union for the Protection of New Varieties of Plants (UPOV) whose headquarters are at the same address. The Secretary-General is assisted by a Vice-Secretary-General.

Origin. The Convention establishing UPOV was signed in Paris in 1961 and revised in 1972 and 1978. The revised text of 1978 was not in force in 1980.

Functions. The purpose of the Convention for the Protection of New Varieties of Plants is to recognize and secure to the breeder of a new plant variety an intellectual property right (plant breeder's right) in the member states, in particular to ensure that he receives a fair remuneration for his work. The effect of the right of the breeder is that his prior authorization shall be necessary for the production of propagating material of his protected variety for the purpose of sale, and for the offering for sale and sale of such material. Before protection is granted the new variety is subject to examination for novelty, distinctness from other varieties, stability and homogeneity and must have received an acceptable denomination. UPOV assists member states in the introduction of plant variety protection legislation and in the promotion of international co-operation in the examination of varieties.

Member States: Belgium, Denmark, France, Federal Republic of Germany, Israel, Italy, Netherlands, Republic of South Africa, Spain, Sweden, Switzerland, UK. (12 states.)

Signatory states of the revised text of the UPOV Convention (1978): Belgium, Canada, Denmark, France, Federal Republic of Germany, Irish Republic, Italy, Japan, Mexico, Netherlands, New Zealand, Republic of South Africa, Sweden, Switzerland, UK, USA. (16 states.)

THE COMMONWEALTH

Constitution. The Commonwealth is a free association of sovereign independent nations, numbering 44 at the end of 1980. There is no charter, treaty or constitution; the association is expressed in co-operation, consultation and mutual assistance for which the Commonwealth Secretariat is the central co-ordinating organization.

The Commonwealth was first defined by the Imperial Conference of 1926 as a group of 'autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations'. The basis of the association changed from one owing allegiance to a common Crown, and the modern Commonwealth was born, in 1949 when the member countries accepted India's intention of becoming a republic at the same time continuing 'her full membership of the Commonwealth of Nations and her acceptance of the King as the symbol of the free association of its independent member nations and as such the Head of the Commonwealth'. There are now (1980) 15 Queen's realms, 25 republics, and 4 other

monarchies in the Commonwealth. All acknowledge the Queen symbolically as Head of the Commonwealth.

The Queen's legal title rests on the statute of 12 and 13 Will. III. c. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being Protestants'. By proclamation of 17 July 1917 the royal family became known as the House and Family of Windsor. On 8 Feb. 1960 the Queen issued a declaration varying her confirmatory declaration of 9 April 1952 to the effect that while the Queen and her children should continue to be known as the House of Windsor, her descendants, other than descendants entitled to the style of Royal Highness and the title of Prince or Princess, and female descendants who marry and their descendants should bear the name of Mountbatten-Windsor. The Royal Style and Titles of Queen Elizabeth are: In *Australia*: 'Elizabeth the Second, by the Grace of God Queen of Australia and Her other Realms and Territories, Head of the Commonwealth'. In the *Bahamas*: 'Elizabeth the Second, by the Grace of God, Queen of the Commonwealth of the Bahamas and of Her other Realms and Territories, Head of the Commonwealth'. In *Barbados*: 'Elizabeth the Second, by the Grace of God, Queen of Barbados and of Her other Realms and Territories, Head of the Commonwealth'. In *Canada*: 'Elizabeth the Second, by the Grace of God of the United Kingdom, Canada and Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith'. In *Fiji*: 'Elizabeth the Second, by the Grace of God, Queen of Fiji and of Her other Realms and Territories, Head of the Commonwealth'. In *Grenada*: 'Elizabeth the Second, by the Grace of God, Queen of the United Kingdom of Great Britain and Northern Ireland and of Grenada and Her other Realms and Territories, Head of the Commonwealth'. In *Jamaica*: 'Elizabeth the Second, by the Grace of God of Jamaica and of Her other Realms and Territories Queen, Head of the Commonwealth'. In *Mauritius*: 'Elizabeth the Second, Queen of Mauritius and of Her other Realms and Territories, Head of the Commonwealth'. In *New Zealand*: 'Elizabeth the Second, by the Grace of God Queen of New Zealand and Her other Realms and Territories, Head of the Commonwealth, Defender of the Faith'. In *Papua New Guinea*: 'Elizabeth the Second, Queen of Papua New Guinea and Her other Realms and Territories, Head of the Commonwealth'. In *Saint Lucia*: 'Elizabeth the Second, by the Grace of God, Queen of Saint Lucia and of Her other Realms and Territories, Head of Commonwealth'. In *Saint Vincent and the Grenadines*: 'Elizabeth the Second, by the Grace of God, Queen of Saint Vincent and the Grenadines and of Her other Realms and Territories, Head of the Commonwealth'. In *Solomon Islands*: 'Elizabeth the Second by the Grace of God Queen of Solomon Islands and of Her other Realms and Territories, Head of the Commonwealth'. In *Tuvalu*: 'Elizabeth the Second by the Grace of God, Queen of Tuvalu and of Her other Realms and Territories, Head of the Commonwealth'. In the *United Kingdom*: 'Elizabeth the Second, by the Grace of God of the United Kingdom of Great Britain and Northern Ireland and of Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith'.

A number of territories, formerly under British jurisdiction or mandate did not join the Commonwealth on independence: Egypt, Iraq, Transjordan, Burma, Palestine, Sudan, British Somaliland, South Cameroons, the Maldives Islands and Aden. Two countries, the Republic of South Africa in 1961 and Pakistan in 1972, have left the Commonwealth.

Nauru, Tuvalu and Saint Vincent and the Grenadines are special members, with the right to participate in all functional Commonwealth meetings and activities but not to attend meetings of Commonwealth Heads of Government.

Associated States. The Caribbean islands of Antigua, St Christopher–Nevis–Anguilla, Dominica, Grenada and Saint Lucia entered into a new form of association with Britain in Feb. 1967. St Vincent became an associated state on 27 Oct. 1969. Each has control of its internal affairs, with the right to amend its own constitution (including the power to end the associated status and declare itself independent). Britain continues to be responsible for external affairs and defence. Grenada became independent, within the Commonwealth, on 7 Feb. 1974. Dominica on 3 Nov. 1978, Saint Lucia on 22 Feb. 1979, Saint Vincent and the Grenadines on 27 Oct. 1979, which means that there are (Dec. 1980) 2 associated states, *viz.* Antigua and St Christopher–Nevis. The Cook Islands and Niue are similarly associated with New Zealand.

An Act of the UK Parliament, the Anguilla Act (which came into effect on 19 Dec. 1980, formally separated Anguilla from the Associated State of St Christopher–Nevis–Anguilla. Anguilla thus now has *de jure* the status of a separate dependency which it has enjoyed *de facto* since 1969.

Dependent Territories. There are 14 British dependent territories, 6 Australian dependent territories and 2 New Zealand dependent territories. A dependent territory is a territory belonging by settlement, conquest or annexation to the British, Australian or New Zealand Crown.

United Kingdom dependent territories administered through the Foreign and Commonwealth Office comprise, in the Far East: Hong Kong; in the Indian Ocean: British Indian Ocean Territory; in the Mediterranean, Gibraltar; in the Atlantic Ocean: Bermuda, Falkland Islands and dependencies, South Georgia and South Sandwich Islands, British Antarctic Territory, St Helena and dependencies of Ascension and Tristan da Cunha, in the Caribbean: Belize, Montserrat, British Virgin Islands, Cayman Islands, Turks and Caicos Islands, Anguilla (*see above*), in the Western Pacific: Pitcairn. The Australian dependent territories are: Coral Sea Islands Territory, Cocos (Keeling) Islands, Christmas Island, Heard and McDonald Islands, Norfolk Island and the Australian Antarctic Territory. The New Zealand dependent territories are: Tokelau Islands and Ross Dependency.

While constitutional responsibility to Parliament for the government of the British dependent territories rests with the Secretary of State for Foreign and Commonwealth Affairs, the administration of the territories is carried out by the Governments of the territories themselves.

Brunei is a sovereign state in treaty relationship with Great Britain, whereby Great Britain is responsible for the conduct of external affairs and has a consultative responsibility for defence. It has never been a dependent territory, and in 1971 ceased to be a protected state. A Treaty of Friendship and Co-operation was signed on 7 Jan. 1979, becoming effective on 31 Dec. 1983 when Brunei will assume her full

international responsibilities and Britain will give up her consultative commitment over defence matters.

British Government Department. With effect from 17 Oct. 1968, the Secretary of State for Foreign and Commonwealth Affairs is responsible for the conduct of relations with members of the Commonwealth as well as with foreign countries, and for the administration of British dependent territories.

Commonwealth Secretariat. The Commonwealth Secretariat is an international body at the service of all 44 member countries. It provides the central organization for joint consultation and co-operation in many fields. It was established in 1965 by Commonwealth Heads of Government and has observer status at the UN General Assembly.

The Secretariat disseminates information on matters of common concern, organizes and services meetings and conferences, co-ordinates many Commonwealth activities, and provides expert technical assistance for economic and social development through the multilateral Commonwealth Fund for Technical Co-operation. The Secretariat is organized in divisions and sections which correspond to its main areas of operation: International affairs, economic affairs, food production and rural development, youth education, information, applied studies in government, science and technology, law and health. Within this structure the Secretariat organizes the biennial meetings of Commonwealth Heads of Government, annual meetings of Finance Ministers of member countries, and regular meetings of Ministers of Education, Law, Health, and others as appropriate.

To emphasize the multilateral nature of the association, meetings are held in different cities and regions within the Commonwealth. Heads of Government decided that the Secretariat should work from London as it has the widest range of communications of any Commonwealth city, as well as the largest assembly of diplomatic missions.

The Commonwealth Secretary-General, who has access to Heads of Government, is the head of the Secretariat which is staffed by officers from member countries and financed by contributions from member governments.

Headquarters: Marlborough House, Pall Mall, London, SW1Y 5HX.

Secretary-General: Shridath S. Ramphal (Guyana).

WORLD COUNCIL OF CHURCHES

The World Council of Churches was formally constituted on 23 Aug. 1948, at Amsterdam, by an assembly representing 147 churches from 44 countries. By 1980 the member churches numbered nearly 300, from over 100 countries.

The basis of membership (1975) states: 'The World Council of Churches is a fellowship of Churches which confess the Lord Jesus Christ as God and Saviour according to the Scriptures and therefore seek to fulfil together their common calling to the glory of the one God, Father, Son and Holy Spirit.' Membership is open to Churches which express their agreement with this basis and satisfy such criteria as the Assembly or Central Committee may prescribe. Today 271 Churches of Protestant, Anglican, Orthodox, Old Catholic and Pentecostal confessions belong to this fellowship.

The World Council was founded by the coming together of several diverse Christian movements. These included the overseas mission groups gathered from 1921 in the International Missionary Council, the Faith and Order Movement founded by American Episcopal Bishop Charles Brent, and the Life and Work Movement led by Swedish Lutheran Archbishop Nathan Söderblom.

On 13 May 1938 at Utrecht a provisional committee was appointed to prepare for the formation of a World Council of Churches. It was under the chairmanship of William Temple, then Archbishop of York.

Assembly. The governing body of the World Council, consisting of delegates specially appointed by the member Churches. It meets every 6 or 7 years to frame policy and to consider some main theme. The Assembly has no legislative powers and depends for the implementation of its decisions upon the action of the member Churches. Assemblies have been held in Amsterdam (1948), Evanston (1954), New Delhi (1961), Uppsala (1968), and Nairobi (1975). The next is to be held in Vancouver, Canada in 1983 under the theme 'Jesus Christ: the Life of the World'. In between assemblies, a 134 member Central Committee meets annually to carry out the assembly mandate, with a smaller 26 member Executive Committee meeting twice a year.

Presidents. *Hon. President* The Rev. Dr W. A. Visser't Hooft *Presidium* Mrs Justice A. R. Jagge (Ghana), Prof. José Miguez-Bonino (Argentina), Dr T. B. Simatupang (Indonesia), Most Rev. Olof Sundby (Sweden), Dr Cynthia Wedel (USA), His Holiness Ilyia II (USSR).

WCC programmes are organized from headquarters in Geneva, Switzerland by a staff of 300 and a range of supervisory committees drawn from member churches. The 3 programme units are:

(i) Justice and Service which includes Inter-Church Aid, Refugee and World Service (channelling over \$30m from member churches to areas of need); the Commission on the Churches' Participation in Development, the Commission of the Churches on International Affairs, the Programme to Combat Racism and the Christian Medical Commission.

(ii) Education and Renewal includes sections dealing with renewal and congregational life, women, youth, church-related education, biblical studies, family ministry and the Programme on Theological Education.

(iii) Faith and Witness includes the Commission on World Mission and Evangelism, Church and Society and the sub-unit on Dialogue with People of Living Faiths and Ideologies.

A General Secretariat with a Communication Department, finance and central services co-ordinates the work of these 3 units.

Since 1975 the WCC has held several major world conferences on such diverse themes as 'Faith, Science and the Future', 'Your Kingdom Come', 'Family Power and Social Change', 'Strategies for Churches Combating Racism in the 1980's', 'The Community of Women and Men in the Church' and 'Giving an Account of the Hope that is in Us'.

Officers of the Central and Executive Committees: *Moderator*: The Most Rev. Edward W. Scott (Canada). *Vice-Moderators*: His Holiness. Karekin II (Lebanon); Jean Skuse (Australia). *General Secretary*: The Rev. Dr Philip A. Potter.

Office: PO Box 66, 150 route de Ferney, 1211 Geneva 20, Switzerland.

The British Council of Churches, which is an associated national council of the World Council, acts as agent for the WCC in the UK.

INTERNATIONAL TRADE UNIONISM

International trade-union co-operation is organized through the three major 'Internationals', the democratic International Confederation of Free Trade Unions (ICFTU), the Communist-directed World Federation of Trade Unions (WFTU) and the World Confederation of Labour (WCL). In addition, federations of specific trades or industries protect their special interests by organizing on an international level and are associated to a varying degree with their corresponding 'Internationals'. The International Trade Secretariats (ITS) are completely autonomous but seek to co-ordinate their policies and activities with those of the ICFTU; the International Trade Federations (ITFs) are very closely integrated with the WCL; the Trade Union Internationals (TUIs) are completely subservient to WFTU.

Coldrick, A. P., and Jones, P., *International Directory of the Trade Union Movement*, London, 1979

History The first general trade-union International, the International Federation of Trade Unions (IFTU), was set up in 1913, but no real achievement was possible until its post-war reconstitution in 1919. Some trade-union movements, seeking to implement the social precepts of the Christian faith, established the International Federation of Christian Trade Unions (IFCTU) in 1920. The name was changed to the World Confederation of Labour in 1968.

During the Second World War moves to establish universal trade unionism resulted in the formation of the World Federation of Trade Unions (WFTU) in 1945. The Christian trade unions refused to join the new association and reconstituted the IFCTU. Attempts by the Communists to impose their own ideology within the WFTU led to the eventual secession of the democratic elements, which reconstituted themselves in the ICFTU in 1949.

EUROPEAN TRADE UNION CONFEDERATION. In Feb. 1973 the European Trade Union Confederation was formed by trade unionists in 15 Western European countries to deal with questions of interest to European working people arising inside and outside the EEC. All the founding organizations were ICFTU affiliates but subsequently they accepted into membership European WCL affiliates, the Irish Congress of Trade Unions and the Italian Communist trade union centre (CGIL) and other national organizations. The ETUC Congress meets every 3 years and the Executive Committee 6 times a year. The membership is now about 40m. from 31 centres in 18 countries.

General Secretary: Mathias Hinterscheid.

Headquarters: Rue Montagne aux Herbes Potagères 37, 1000 Brussels.

INTERNATIONAL CONFEDERATION OF FREE TRADE UNIONS. The first congress of ICFTU was held in London in Dec. 1949. The constitution as amended provides for co-operation with the United Nations and the International Labour Organization and for regional organizations to promote free trade unionism, especially in less-developed countries.

Organization. The Congress meets every 3 years. It elects the Executive Board of 29 members nominated on an area basis for a 3-year period; the Board meets at least twice a year. Various committees cover policy *vis-à-vis* such problems as those connected with Atomic Energy and also the administration of the International Solidarity Fund. There are joint ICFTU-ITS Committees for co-ordinating activities and also for women workers' problems. Headquarters: 37-41, rue Montagne aux Herbes Potagères, Brussels 1000, Belgium.

General Secretary: Otto Kersten.

Regional organizations exist in America, office in Mexico City; Asia, office in New Delhi.

Membership. The ICFTU has 126 affiliated organizations in 90 countries, which together represent about 70m. workers. The biggest groups were the British Trades Union Congress (11m.), the Federal German Deutscher Gewerkschaftsbund (7.4m.), the Confederazione Italiana Sindacati Lavoratori (2.1m.), the Swedish Landsorganisationen (1.9m.), the Canadian Labour Congress (1.3m.), the Österreichischer Gewerkschaftsbund (1.6m.), the Belgian General Federation of Labour (900,000), the Indian National Trade Union Congress (3.3m.), the French Confédération Générale du Travail Force Ouvrière (900,000), Brazilian Confederação Nacional dos Trabalhadores no Comércio (2.5m.), Australian Council of Trade Unions (1.3m.), Japanese Confederation of Labour, Domei (1.3m.).

The American Federation of Labor and Congress of Industrial Organizations disaffiliated in Feb. 1969.

THE WORLD FEDERATION OF TRADE UNIONS. The WFTU formally came into existence on 3 Oct. 1945, representing trade-union organizations in more than 50 countries of the world, both Communist and non-Communist, excluding Federal Republic of Germany and Japan, as well as a number of lesser and colonial territories. Representation from the USA was limited to the Congress of Industrial Organizations, as the American Federation of Labor declined to participate.

In Jan. 1949 the British, USA and Netherlands trade unions withdrew from WFTU, which had come under complete Communist control; and by June 1951 all non-Communist trade-unions, including the Yugoslavian Federation, had left WFTU.

Organization. The Congress meets every 4 years. In between, the General Council, of 134 members (including deputies), is the governing body, meeting (in theory) at least once a year. The Bureau controls the activities of WFTU between meetings of the General Council; it consists of the President, the General Secretary and members from different continents, the total number being decided at each Congress. The Bureau is elected by the General Council.

General Secretary: Enrique Pastorino (Uruguay).

Membership. A total membership of 190m. from 73 national centres is claimed. The biggest groups are the Soviet All-Union Central Council of Trade Unions (90m.), the German Democratic Republic Free German Trade Union Federation (7.5m.), the Polish Central Council of Trade Unions (7m.), the Czechoslovak Central Council of Trade Unions (5.5m.), the Italian General Confederation of Labour (GCIL, 3.5m.), the Romanian General Confederation of Labour (3.5m.), the Hungarian Central Council of Trade Unions (3m.) and the French Confederation of Labour (CGT, 2.5m.).

Publications. *World Trade Union Movement* (monthly, in 9 languages); *Trade Union Press* (fortnightly, in 6 languages).

WORLD CONFEDERATION OF LABOUR. The first congress of the International Federation of Christian Trade Unions (IFCTU), as the WCL was then called, met in 1920; but a large proportion of its 3.4m. members were in Italy and Germany, where affiliated unions were suppressed by the Fascist and Nazi régimes, and in 1940 IFCTU went out of existence. It was reconstituted in 1945, and declined to merge with WFTU and, later, with ICFTU. The policy of IFCTU was based on the papal encyclicals *Rerum novarum* (1891) and *Quadragesimo anno* (1931), but in 1968, when the Federation became the WCL, it was broadened to include other concepts. The WCL now has Protestant, Buddhist and Moslem members as well as its mainly Roman Catholic members.

Organization. The WCL is organized on a federative basis which leaves wide discretion to its autonomous constituent unions. Its governing body is the Congress, which meets every 4 years. The Congress appoints (or re-appoints) the Secretary-General at each 4-yearly meeting. The General Council which meets at least once a year, is composed of the members of the Confederal Board (at least 22 members, elected by the Congress) and representatives of national confederations, international trade federations, and trade union organizations where there is no confederation affiliated to the WCL. The Confederal Board is responsible for the general leadership of the WCL, in accordance with the decisions and directives of the Council and Congress. Headquarters: 50 rue Joseph II, Brussels 1040, Belgium.

Secretary-General: Jan Kulakowski.

There are regional organizations in Latin America (office in Caracas), Africa (office in Banjul, Gambia) and Asia (office in Manila). There is also a liaison centre in Montreal.

Membership. A total membership of 15m. in about 90 countries is claimed. The biggest groups are the French Democratic Confederation of Labour (800,000), the Confederation of Christian Trade Unions of Belgium (1.1m.), the Netherlands Catholic Workers' Movement (340,000).

Publication. *Labour Press and Information* (11 each year, in 5 languages).

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT (OECD)

History and Membership. On 30 Sept. 1961 the Organisation for European Economic Co-operation (OEEC), after a history of 14 years (see THE STATESMAN'S

YEAR-BOOK, 1961, p. 32), was replaced by the Organisation for Economic Co-operation and Development. The change of title marks the Organisation's altered status and functions: with the accession of Canada and USA as full members it ceased to be a purely European body; while at the same time it added development aid to the list of its other activities. The member countries are now Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Greece, Iceland, Irish Republic, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, UK and USA. Yugoslavia participates in the Organisation's activities with a special status. The Commission of the European Communities generally takes part in OECD's work.

Objectives. To promote economic and social welfare throughout the OECD area by assisting its member governments in the formulation of policies designed to this end and by co-ordinating these policies; and to stimulate and harmonize its members' efforts in favour of developing countries.

Organs. The supreme body of the Organisation is the Council composed of one representative for each member country. It meets either at Permanent Representative level (about once a week) under the Chairmanship of the Secretary-General, or at Ministerial level (usually once a year) under the Chairmanship of a Minister elected annually. Decisions and Recommendations are adopted by mutual agreement of all members of the Council.

The Council is assisted by an Executive Committee composed of 14 members of the Council designated annually by the latter. The major part of the Organisation's work is, however, prepared and carried out in numerous specialized committees and working parties and sub-groups, of which there exist over 200. Thus, the Organisation comprises Committees for Economic Policy; Economic and Development Review; Development Assistance (DAC); Trade; Invisible Transactions; Financial Markets; Fiscal Affairs; Restrictive Business Practices; Maritime Transport; International Investment and Multinational Enterprises; Energy Policy; Industry; Steel; Scientific and Technological Policy; Education; Manpower and Social Affairs; Environment; Agriculture; Fisheries, etc. Moreover there exists a High-Level Group-Commodities.

Four autonomous or semi-autonomous bodies also belong to the Organisation: the International Energy Agency (IEA); the Nuclear Energy Agency (NEA); the Development Centre and the Centre for Educational Research and Innovation (CERI).

The Council, the committees and the other bodies are serviced by an international Secretariat headed by the Secretary-General of the Organisation.

Chairman of the Council (ministerial): Elected annually.

Chairman of the Council (official level): The Secretary-General.

Chairman of the Executive Committee: A. F. Maddocks (UK).

Secretary-General: Emile van Lennep (Netherlands).

Deputy Secretaries-General: Jacob M. Myerson (USA), Paul Lemerle (France).

Headquarters: Château de la Muette, 2, rue André Pascal, 75775 Paris Cedex 16, France.

NORTH ATLANTIC TREATY ORGANIZATION (NATO)

On 28 April 1948 the Canadian Secretary of State for External Affairs broached the idea of a 'security league' of the free nations, in extension of the Brussels Treaty of 17 March 1948. The United States Senate, on 11 June, recommended 'the association of the United States with such regional and other collective arrangements as are based on continuous self-help and mutual aid, and as affect its national security'. Detailed proposals were subsequently worked out between the Brussels Treaty powers, the USA and Canada.

On 4 April 1949 the foreign ministers of Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the UK and the USA met in Washington and signed a treaty, the main clauses of which read as follows:

Article 1. The parties undertake, as set forth in the Charter of the United Nations, to settle any international disputes in which they may be involved by peaceful means in such a manner that international peace and security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes of the United Nations.

Article 2. The parties will contribute toward the further development of peaceful and friendly international relations by strengthening their free institutions, by bringing about a better understanding of the principles upon which these institutions are founded, and by promoting conditions of stability and well-being. They will seek to eliminate conflict in their international economic policies and will encourage economic collaboration between any or all of them.

Article 3. In order more effectively to achieve the objectives of this treaty, the parties, separately and jointly by means of continuous and effective self-help and mutual aid, will maintain and develop their individual and collective capacity to resist armed attack.

Article 4. The parties will consult together whenever, in the opinion of any of them, the territorial integrity, political independence or security of any of the parties is threatened.

Article 5. The parties agree that an armed attack against one or more of them in Europe or North America shall be considered an attack against them all and consequently they agree that, if such an armed attack occurs, each of them, in exercise of the right of individual or collective self-defence recognized by article 51 of the Charter of the United Nations, will assist the party or parties so attacked by taking forthwith, individually and in concert with the other parties, such action as it deems necessary, including the use of armed force, to restore and maintain the security of the North Atlantic area. Any such armed attack and all measures taken as a result thereof shall immediately be reported to the Security Council. Such measures shall be terminated when the Security Council has taken the measures necessary to restore and maintain international peace and security.

Article 6. For the purpose of Article 5 an armed attack on one or more of the parties is deemed to include an armed attack (i) on the territory of any of the parties in Europe or North America, on the Algerian Departments of France,¹ on the territory of Turkey or on the islands under the jurisdiction of any of the parties in the North Atlantic area north of the Tropic of Cancer; (ii) on the forces, vessels or aircraft of any of the parties, when in or over these territories or any other area in Europe in which occupation forces of any of the parties were stationed on the date when the treaty entered into force or the Mediterranean Sea or the North Atlantic area north of the Tropic of Cancer.²

Article 8. Each party declares that none of the international engagements now in force between it and any other of the parties or any third state is in conflict with the provisions of this treaty, and undertakes not to enter into any international engagement in conflict with this treaty.

Article 10. The parties may, by unanimous agreement, invite any other European state in a position to further the principles of this treaty and to contribute to the security of the North Atlantic area to accede to this treaty. Any state so invited may become a party to the treaty by depositing its instrument of accession with the government of the United States of America. The government of the United States of America will inform each of the parties of the deposit of each such instrument of accession.

Article 12. After the treaty has been in force for 10 years, or at any time thereafter, the parties shall, if any of them so requests, consult together for the purpose of reviewing the treaty, having regard for the factors then affecting peace and security in the North Atlantic area, including the development of universal as well as regional arrangements under the Charter of the United Nations for the maintenance of international peace and security.

Article 13 After the treaty has been in force for 20 years, any party may cease to be a party one year after its notice of denunciation has been given to the government of the United States of America, which will inform the governments of the other parties of the deposit of each notice of denunciation.

¹ The relevant clauses of the treaty have become inapplicable to the Republic of Algeria as from 3 July 1962.

² This Article was modified as a result of the accession of Greece and Turkey to the treaty.

The treaty came into force on 24 Aug. 1949. Greece and Turkey were admitted as parties to the treaty in 1951 (effective Feb. 1952), the Federal Republic of Germany in Oct. 1954 (effective 5 May 1955).

NATO is an organization of sovereign states equal in status. Decisions taken are expressions of the collective will of member governments arrived at by common consent.

The North Atlantic Council is composed of representatives of the 15 member countries. At Ministerial Meetings of the Council, member nations are represented by Ministers of Foreign Affairs. These meetings are held twice a year. The Council also meets on occasion at the level of Heads of State and Government. In permanent session, at the level of Ambassadors, the Council meets at least once a week.

The Defence Planning Committee is composed of representatives of the 14 member countries taking part in NATO's integrated military structure. Like the Council, it meets both in permanent session at the level of Ambassadors and twice a year at Ministerial level. At Ministerial Meetings member nations are represented by Defence Ministers.

The Council and Defence Planning Committee are chaired by the Secretary General of NATO at whatever level they meet. Opening sessions of Ministerial Meetings of the Council are presided over by the President, an honorary position held annually by the Foreign Minister of one of the member nations.

Nuclear matters are discussed by the Nuclear Planning Group in which 13 countries now participate. It meets regularly at the level of Permanent Representatives (Ambassadors) and twice a year at the level of Ministers of Defence.

The Permanent Representatives of member countries are supported by the National Delegations located at NATO Headquarters. The Delegations are composed of advisors and officials qualified to represent their countries on the various committees created by the Council. The Committees are supported by the International Staff responsible to the Secretary General.

The International Staff comprises the Office of the Secretary General, the Executive Secretariat, 5 major Divisions (Political Affairs; Defence Planning and Policy; Defence Support; Infrastructure, Logistics and Council Operations; and Scientific Affairs), the Office of Management and the Office of the Financial Controller. Through their structure of Directorates and Services, the Divisions support the work of the Committees in numerous fields including Political Affairs; Economic Affairs; Information; Force Planning and Policy; Nuclear Planning; Civil Emergency Planning; Armaments and Defence Research; Command, Control and Communications; Air Defence; Infrastructure and Logistics; Environmental Problems; Administration and Personnel; and Civil and Military Budgetary Affairs.

Headquarters: 1110 Brussels, Belgium.

Secretary-General: Joseph Luns (Netherlands), appointed Oct. 1971.

Flag: Dark blue with a white compass rose of 4 points in the centre.

The Secretary-General takes the chair at all Council meetings, except at the opening and closing of Ministerial sessions, when he gives way to the Council President. The office of President is held annually by the Foreign Minister of one of the Treaty countries.

The *Military Committee* is responsible for making recommendations to the Council Defence Planning Committee on military matters and for supplying guidance to the Allied Commanders. Composed of the Chiefs-of-Staff of all member countries except France and Iceland (which has no military forces), the Committee is assisted by an integrated International Military Staff. It meets at Chiefs-of-Staff level at least twice a year but remains in permanent session at the level of national military representatives. Liaison between the Military Committee and the French

High Command is effected through the French Mission to the Military Committee. The permanent chairman of the Military Committee is elected by the Chiefs-of-Staff for a period of 2-3 years. The present chairman is Admiral Robert H. Falls (Canada), appointed July 1980.

The area covered by the North Atlantic Treaty is divided among three commands: The Atlantic Ocean Command, the European Command and the Channel Command. Defence plans for the North American area are developed by the Canada-US Regional Planning Group.

The NATO commanders are responsible for the development of defence plans for their respective areas, for the determination of force requirements and for the deployment and exercise of the forces under their command.

The *Allied Command Europe* (ACE) covers the area extending from the North Cape to the Mediterranean and from the Atlantic to the eastern border of Turkey, excluding the UK and Portugal, the defence of which does not fall under any one major NATO Command. The European area, which is subdivided into a number of subordinate commands, is under the Supreme Allied Commander Europe (SACEUR) whose Headquarters, near Mons in Belgium, are known as SHAPE (Supreme Headquarters Allied Powers Europe).

SACEUR has also under his orders the ACE Mobile Force, composed of both land and air force units from different member countries, which can be ready for action at very short notice in any threatened area. The present SACEUR is Gen. Bernard W. Rogers (USA).

Under the Supreme Allied Commander Atlantic (SACLANT) the *Atlantic Command* extends from the North Pole to the Tropic of Cancer and from the coastal waters of North America to those of Europe and Africa, but excludes the Channel and the British Isles. SACLANT, who would have the primary task in wartime of ensuring the security of the sea lanes in the whole Atlantic area, is an operational rather than an administrative commander. Under his direct command is the Standing Naval Force Atlantic (STANAVFORLANT) which is a permanent international squadron of ships drawn from NATO Navies which normally operate in the Atlantic.

The present SACLANT, whose Headquarters are in Norfolk (USA), is Admiral Harry D. Train (US), appointed Oct. 1978.

The *Channel Command* covers the English Channel and the southern North Sea. Under the Allied Commander-in-Chief Channel (CINCHAN) its mission is to control and protect merchant shipping in the area, co-operating with SACEUR in the air defence of the Channel. The forces earmarked to the Command in emergency are predominantly naval but include maritime air forces. CINCHAN has also under his command the NATO Standing Naval Force Channel (STANAVFORCHAN) a permanent mine counter measures force comprising ships drawn from the navies of Belgium, the Netherlands and the UK. The present CINCHAN, with Headquarters at Northwood (UK), is Admiral Sir James Eberle (UK), appointed May, 1979.

The *Canada-US Regional Planning Group*, which covers the North American area, develops and recommends to the Military Committee plans for the defence of this area. It meets alternately in Washington and Ottawa.

WESTERN EUROPEAN UNION

On 17 March 1948 a 50-year treaty 'for collaboration in economic, social and cultural matters and for collective self-defence' was signed in Brussels by the Foreign Ministers of the UK, France, the Netherlands, Belgium and Luxembourg (See THE STATESMAN'S YEAR-BOOK, 1954, pp. 32 f.).

On 20 Dec. 1950 the functions of the Western Union defence organization were transferred to the North Atlantic Treaty command, but it was decided that the

reorganization of the military machinery should not affect the right of the Western Union Defence Ministers and the Chiefs of Staff to meet as they please to consider matters of mutual concern to the Brussels Treaty powers.

After the breakdown of the European Defence Community on 30 Aug. 1954 a conference was held in London from 28 Sept. to 3 Oct. 1954, attended by Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the UK and the USA, at which it was decided to invite the Federal Republic of Germany and Italy to accede to the Brussels Treaty, to end the occupation of Western Germany and to invite the latter to accede to the North Atlantic Treaty; the Federal Republic agreed that it would voluntarily limit its arms production, and provision was made for the setting up of an agency to control the armaments of the 7 Brussels Treaty powers; the UK undertook not to withdraw from the Continent her 4 divisions and the Tactical Air Force assigned to the Supreme Allied Commander against the wishes of a majority, *i.e.*, 4 of the Brussels Treaty powers, except in the event of an acute overseas emergency.

At a Conference of Ministers held in Paris from 20 to 23 Oct. 1954 these decisions were embodied in 4 Protocols modifying the Brussels Treaty which were signed in Paris on 23 Oct. 1954 and came into force on 6 May 1955.

The *Council of WEU* consists of the Foreign Ministers of the 7 powers or their representatives; it is so organized as to be able to exercise its functions continuously. An *Assembly*, composed of representatives of the Brussels Treaty powers to the Consultative Assembly of the Council of Europe, meets twice a year, usually in Paris. An *Agency for the Control of Armaments* and a *Standing Armaments Committee* have been set up in Paris. The social and cultural activities were transferred to the Council of Europe on 1 June 1960.

After the breakdown of the negotiations for Britain's entry into the Common Market in 1963 the 6 EEC countries proposed to the UK that the WEU Council (the Six and the UK) should meet every 3 months 'to take stock of the political and economic situation in Europe'. The UK welcomed this proposal, and regular meetings took place. Following the re-opening of negotiations in 1970 which led to the signing of the Treaty of Accession in Jan. 1972 this arrangement has been discontinued.

COUNCIL OF EUROPE

In 1948 the 'Congress of Europe', bringing together at The Hague nearly 1,000 influential Europeans from 26 countries, called for the creation of a united Europe, including a European Assembly. This proposal, examined first by the Ministerial Council of the Brussels Treaty Organization, then by a conference of ambassadors, was at the origin of the Council of Europe. The Statute of the Council was signed at London on 5 May 1949 and came into force 2 months later. The founder members were Belgium, Denmark, France, the Irish Republic, Italy, Luxembourg, the Netherlands, Norway, Sweden and the UK. Turkey and Greece joined in 1949, Iceland in 1950, the Federal Republic of Germany in 1951 (having been an associate since 1950), Austria in 1956, Cyprus in 1961, Switzerland in 1963, Malta in 1965, Portugal in 1976, Spain in 1977 and Liechtenstein in 1978.

Membership is limited to European States which 'accept the principles of the rule of law and of the enjoyment by all persons within [their] jurisdiction of human rights and fundamental freedoms'. The Statute provides for both withdrawal (Art. 7) and suspension (Arts. 8 and 9). Greece withdrew from the Council in Dec. 1969 and rejoined in Nov. 1974.

Structure. Under the Statute two organs were set up: an inter-governmental *Committee of [Foreign] Ministers* with powers of decision and of recommendation to governments, and an inter-parliamentary deliberative body, the *Parliamentary Assembly* (referred to in the Statute as the *Consultative Assembly*)—both of which are served by the Secretariat. In addition, a large number of committees of experts

have been established, two of them, the Council for Cultural Co-operation and the Committee on Legal Co-operation, having a measure of autonomy; on municipal matters the Committee of Ministers receives recommendations from the Conference of Local and Regional Authorities of Europe.

The Committee of Ministers meets usually twice a year, their deputies 10 times a year.

The Parliamentary Assembly normally consists of 170 parliamentarians elected or appointed by their national parliaments (Austria 6, Belgium 7, Cyprus 3, Denmark 5, France 18, Federal Republic of Germany 18, Greece 7, Iceland 3, Irish Republic 4, Italy 18, Liechtenstein 2, Luxembourg 3, Malta 3, Netherlands 7, Norway 5, Portugal 7, Spain 12, Sweden 6, Switzerland 6, Turkey 12, UK 18); it meets 3 times a year for approximately a week. For domestic reasons Cyprus is not at present represented in the Assembly. The work of the Assembly is prepared by parliamentary committees.

The *Joint Committee*, which acts as an organ of co-ordination and liaison between representatives of the Committee of Ministers and members of the Parliamentary Assembly and gives members an opportunity to exchange views on matters of important European interest.

The European Convention on Human Rights, signed in 1950, set up special machinery to guarantee internationally fundamental rights and freedoms. A *European Commission* investigates alleged violations of the Convention submitted to it either by States or, in most cases, by individuals. Its findings can then be examined by the *European Court of Human Rights* (set up in 1959), whose obligatory jurisdiction has been recognized by 18 States, or by the Committee of Ministers, empowered to take binding decisions by two-thirds majority vote.

For questions of national refugees and over-population, a Special Representative has been appointed, responsible to the governments collectively. In 1956 the Resettlement Fund for National Refugees and Over-Population was created on the initiative of the special representative. With 19 member countries, the main purpose of the Fund is to give financial aid, particularly in the spheres of housing, vocational training, regional planning and regional development. Since its foundation, the total amount of loans thus granted comes to over US\$1,000m.

In 1970 the Council set up a European Youth Centre where young people can discuss their own approach to international co-operation. More recently, a European Youth Foundation was created, administered by the Secretary-General, and which provides money to subsidize activities by European Youth Organizations.

Aims and Achievements. Art. 1 of the Statute states that the Council's aim is 'to achieve a greater unity between its members for the purpose of safeguarding and realising the ideals and principles which are their common heritage and facilitating their economic and social progress'; 'this aim shall be pursued . . . by discussion of questions of common concern and by agreements and common action'. The only limitation is provided by Art. 1 (d), which excludes 'matters relating to national defence'.

Although without legislative powers, the Assembly acts as the power-house of the Council initiating European action in key areas by making recommendations to the Committee of Ministers. As the widest parliamentary forum in Western Europe, the Assembly also acts as the conscience of the area by voicing its opinions on important current issues. These are embodied in resolutions. The Ministers' role is to translate the Assembly's recommendations into action, particularly as regards lowering the barriers between the European countries, harmonizing their legislation or introducing where possible common European laws, abolishing discrimination on grounds of nationality and undertaking certain tasks on a joint European basis.

In May 1976 the Committee of Ministers adopted the first 5-year plan (1976-80) of intergovernmental co-operation to be undertaken by the Council of Europe. The plan, which is reviewed every 2 years, takes account of political developments and progress achieved, and covers 8 key areas: human rights, social and socio-economic questions, education and culture, youth, public health, environment and regional planning, local and regional government, and legal co-operation. The first revision was undertaken in 1978.

More than 100 Conventions and Agreements have been concluded covering such matters as social security, patents, extradition, medical treatment, training of

nurses, equivalence of degrees and diplomas, innkeepers' liability, compulsory motor insurance, the protection of television broadcasts, adoption of children, transportation of animals and *au pair* placement. In the legal field, of particular significance in 1977, was the adoption of the European Convention on the Suppression of Terrorism, as well as the European Convention on the Legal Status of Migrant Workers. In 1980 the Committee of Ministers adopted a European Convention for the protection of individuals with regard to the automatic processing of personal data. A Social Charter which came into force in 1965 sets out the social and economic rights which all member governments agree to guarantee to their citizens.

EUROPEAN COMMUNITIES

In May 1950 Belgium, France, the Federal Republic of Germany, Italy, Luxembourg and the Netherlands started negotiations with the aim of ensuring continual peace by a merging of their essential interests. The negotiations culminated with the signing of the Treaty of Paris creating the European Coal and Steel Community (ECSC). After it was found impossible to create European Communities covering Defence and Foreign Affairs, two more communities with the aims of gradually integrating the economies of the 6 nations and of moving towards closer political unity. The European Economic Community (EEC) and the European Atomic Energy Community (EAEC or Euratom) were created in 1957 by the signing of the Treaties of Rome.

Until 1 July 1967 the 3 Communities, though legally separate under their constituent treaties, had some institutions in common. On that day they merged their 3 executives in one Commission of the European Communities and also their 3 councils. Although each of the 3 communities still retains its distinct legal personality. The Court of Auditors of the European Communities was created by the Treaty of Brussels which came into force on 1 June 1977.

On 30 June 1970 membership negotiations began between the Six and UK, Denmark, Irish Republic and Norway. On 22 Jan. 1972 those 4 countries signed the Treaty of Accession to the Community. In Nov. 1972 a Norwegian referendum rejected entry, but on 1 Jan. 1973 UK, Irish Republic and Denmark became full members.

On 28 May 1979 the Treaty concerning the accession of Greece to the Community was signed. The Treaty, which entered into force on 1 Jan. 1981, was ratified by the Greek Parliament on 28 June 1979.

The *Commission* consists of 13 members appointed by the member states to serve for 4 years; the President and 5 Vice-Presidents serve for 2 years. The Commission

acts independently in the interests of the Community as a whole. Its task is the implementation of the Treaties, and in this it has the right of both initiative and execution: it proposes to the Council of Ministers the methods by which the aims of the Treaties can be achieved, and is then responsible for carrying them through.

President: Gaston Thorn.

Address: 200 rue de la Loi, 1049, Brussels.

The *Council of Ministers* consists of ministers from the 10 national governments and represents the national as opposed to the Community interests. It is the body which has the power of decision in the Community. Under the Treaties many of its decisions are taken to be by qualified majority vote: since the 'Luxembourg Compromise' of 1966 majority voting has been used for minor matters only. In addition, at a meeting held in Dec. 1974, the Heads of Government decided to meet 3 times a year as the *European Council* to discuss Community and foreign policy topics. The presidency of the Council is held for a 6 month term in the following order of member states: Belgium, Denmark, Federal Republic of Germany, Greece, France, Irish Republic, Italy, Luxembourg, Netherlands, UK. From 1 July—31 Dec. 1981 (Denmark).

Address: 170 rue de la Loi, 1048, Brussels.

The *European Parliament* consists of 434 members of whom all but the 24 Greek members were elected by direct universal suffrage on 7 and 10 June 1979. France, Federal Germany, Italy and the UK each returned 81 members, the Netherlands 25, Belgium 24, Denmark 16, Ireland 15 and Luxembourg 6. Party representation in the new Parliament was as follows: Socialist 112, European People's Party—Christian Democratic Group 108, European Democratic Group (formerly European Conservative Group) 64, Communists and Allies 44, Liberal and Democratic Group 40, European Progressive Democratic Group 22, Others 20. Prior to these elections the Parliament consisted of 198 members delegated by the 9 national Parliaments. The Parliament has to be consulted over the annual budgets of the 3 Communities and a wide range of other matters. It can dismiss the Commission on a motion of censure approved by a two-thirds majority. As part of the decision in 1970 to provide the Community with its own independent financial resources, the Parliament has been given more control over the administrative budget consisting of non-mandatory expenditure, i.e., expenditure not arising directly from the Treaty or from regulations made under it. The budgetary power of the Parliament was reviewed in 1973 and was enlarged in 1975 and was first used in Dec. 1979.

President: Simone Veil.

Address: Centre Européen du Kirchberg, Luxembourg.

Annuaire—Manuel de l'Assemblée Parlementaire Européenne. Annual, from 1959

The *Court of Justice* is composed of 10 judges and 4 advocates-general, is responsible for the adjudication of disputes arising out of the application of the treaties, and its findings are enforceable in all member countries.

President: Josse Mertens de Wilmars.

Address: Palais de la Cour de Justice, Kirchberg, Luxembourg.

The *Economic and Social Committee* has an advisory role and consists of 156 representatives, employers, trade unions, consumers, etc. The *Consultative Committee*, of 84 members, performs a similar role for the ECSC.

Community Law. Provisions of the Treaties and secondary legislation may be either directly applicable in Member States or only applicable after Member States have enacted their own implementing legislation. Secondary legislation consists of: regulations, which are of general application and binding in their entirety and directly applicable in all member states; directives which are binding as to the result to be achieved within a given time, upon each Member State but leave the national authority the choice of form and method of achieving this result; decisions, which are binding in their entirety on their addressees. In addition the Council and Commission can issue recommendations and opinions, which have no binding force.

The Community's Legislative Process starts with a proposal from the Commission

(either at the suggestion of its services or in pursuit of its declared political aims) to the Council. The Council seeks the views of the European Parliament on the proposal, and the Parliament adopts a formal Opinion, after consideration of the matter by its specialist Committees. The Council may also (and in some cases is obliged to) consult the Economic and Social Committee, which similarly delivers an opinion. When these opinions have been received, the Council will decide. Most decisions are taken on a majority basis, but will take account of reserves expressed by individual member states. The text eventually approved may differ substantially from the original Commission proposal.

Community Finances. The general budget of the European Communities for 1980 was (in ECUm.; 1EUA = US\$1.31 or £0.55 on 31 Dec. 1980):

<i>Receipts</i>		<i>Expenditure</i>	
Own resources		Agriculture	11,878
Agricultural levies	2,223	Social	374
Import duties	5,668	Regional	403
VAT	7,164	Industry, energy, research	380
	15,055	Administration and miscellaneous	2,648
Miscellaneous	628		
	15,683		15,683

In addition the European Development Fund spent ECU 544m.

The *European Investment Bank* (EIB) was created by the EEC Treaty to which its statute is annexed. Its governing body is the Board of Governors consisting of ministers designated by member states. Its main task is to contribute to the balanced development of the common market in the interest of the Community by financing projects: developing less-developed regions, for modernizing or converting undertakings or developing new activities, or of common interest to several member states.

Address: 100, Boulevard Konrad Adenauer, Plateau du Kirchberg, Luxembourg.

EUROPEAN ECONOMIC COMMUNITY or COMMON MARKET.

The EEC came into being on 1 Jan. 1958, based on the treaty signed in Rome on 25 March 1957, by Belgium, France, Federal Republic of Germany, Luxembourg, Italy and the Netherlands. UK, the Irish Republic and Denmark became members on 1 Jan. 1973; Greece became a member on 1 Jan. 1981.

The Customs Union. A complete customs union between the 6 original member states was achieved on 1 July 1968 when they ceased to apply to each other any customs duties, charge having equivalent effect, or quantitative restrictions and commenced applying a common basic customs legislation and a Common Customs Tariff to non-Member Countries. The UK, Ireland and Denmark had phased out customs tariffs between each other and between themselves and the original 6 member states by 1 July 1977. Greece is to end its customs tariffs with the existing 9 member states by 1 Jan. 1986.

Freedom of movement for persons, services and capital. Under the Treaty individuals, companies and firms from one member state may establish themselves in another Member State for the purposes of pursuing an economic activity under the same conditions as are applied to nationals of that state. With a few exceptions restrictions have been ended on the transfer of capital between one Member State and another.

The Common Agricultural Policy (CAP). The objectives as set out in the Treaty are to increase agricultural productivity, to ensure a fair standard of living for the agricultural community, to stabilize markets, to assure the availability of supplies, and to ensure reasonable consumer prices. In Dec. 1960 the Council laid down the fundamental principles on which the CAP is based: a single market, which calls for common prices, stable currency parities and the harmonizing of administrative, health and veterinary legislation; Community preference, which protects the EEC single market from imports and world market fluctuations; common financing of

the European Agricultural Guidance and Guarantee Fund (EAGGF) which seeks to improve agriculture through its Guidance section, and, through its Guarantee section, to stabilize markets through a system of intervention measures, and levies and refunds on imports and exports. By 1980 common market organisations covered 96% of Community agricultural production. Greece will bring its agricultural prices into line with Community prices over a period depending on the product of up to 7 years.

The European Monetary System (EMS), whose immediate objective is to create a zone of monetary stability in Europe by closer monetary cooperation, began operating in March 1979. All member states (except the UK, 1981) limit fluctuations in the exchange rates of their currencies against a central rate denominated in ECU (European Currency Unit), a basket of the currencies of all the member states. The Greek drachma will join the ECU by 31 Dec. 1986.

External Relations are mainly dealt with as a joint Community matter when they concern trade (as a result of the Customs Union and the Common Agricultural Policy) and Aid (as a result of the European Development Fund). Following the accession of UK, Ireland and Denmark in 1973, the Community formed a free trade zone for industrial goods with the European Free Trade Association; reciprocal arrangements were made for some agricultural goods. Association agreements which could lead to accession or customs union have been made with Turkey, Cyprus and Malta. An agreement was concluded in 1976 with Canada for economic and commercial agreement in the fields of industrial trade, science and natural resources. Algeria, Morocco, Tunisia, Egypt, Israel, Jordan, Lebanon and Syria have commercial, industrial, technical and financial aid agreements with the Community. Some 60 African, Caribbean and Pacific countries (mainly former colonies of member states) have concluded the Lomé Convention, first signed in 1975 and renewed in 1979, which removes customs duties without reciprocal obligations for most of their exports to the Community, and under which ECU 5,600m. of financial and technical aid will be granted between 1980-84. An economic and commercial co-operation agreement was signed in 1980 with ASEAN.

EUROPEAN COAL AND STEEL COMMUNITY. The ECSC came into being on 10 Aug. 1952 following the ratification of a treaty signed in Paris on 18 April 1951. The original suggestion for it was made in the Schuman Plan on 9 May 1950, which proposed the pooling of Franco-German coal and steel production in a Community open to other western European countries as a first step towards a United States of Europe. (See map in *THE STATESMAN'S YEAR-BOOK*, 1958.) UK, the Irish Republic and Denmark joined the ECSC as full members on 1 Jan. 1973 and Greece on 1 Jan. 1981.

Until 1 July 1967 the *High Authority* was the executive body of the ECSC and consisted of 8 members appointed by the 6 governments plus one co-opted member. After the merger of the Executives its power passed to the single European Commission which is now responsible for the execution of the ECSC Treaty.

The Common Market for Coal and Steel. A common market for coal, iron ore and scrap was established on 10 Feb. 1953, for steel on 1 May 1953 and for special steels on 1 Aug. 1954. A harmonized external tariff on steel is between 4-8% on most products. Rules for fair competition have been established: currency restrictions, the dual-pricing system (under which prices for export and home-consumed coal and steel varied) and discriminatory transport rates based upon nationality have been abolished within the Community.

To meet the changing circumstances in the two industries, and especially to ensure that the contraction of the coal industry occurs without social or economic dislocation, there are ECSC readaption, retraining and other schemes to which the Commission makes grants. In 1979 the Commission contributed ECU67m. to the redevelopment of 34,000 workers throughout the Community.

A Common Energy Policy. Of the various forms of energy, coal falls within the competence of the ECSC, nuclear energy within that of Euratom, and all others within that of the EEC. The 1972 Paris summit set up the goal of a common energy policy; the post-1974 energy crisis has intensified the need for ensuring supplies.

The ECSC operating budget was (1979) ECU 143m.

EUROPEAN ATOMIC ENERGY COMMUNITY (EURATOM). Euratom came into being on 1 Jan. 1958 following the ratification of a treaty signed in Rome on 25 March 1957. Its task is to promote a common effort between its members in the development of nuclear energy for peaceful purposes. It is in no way concerned with the military uses of nuclear energy; indeed, the member governments are forbidden under the treaty to use nuclear materials obtained from or through the Community in national military programmes.

The execution of the treaty now rests with the *European Commission*, which is advised by a *Scientific and Technical Committee* (28 members) and the *Economic and Social Committee*. Major decisions are taken by the *Council of Ministers*.

Euratom supplements and co-ordinates research undertaken by the member states, pools scientific information and promotes the training of scientists and technicians. It promotes research (a) through its own research centres at Ispra, Italy (concentrating on the Orgel heavy-water reactor), at Geel, Belgium (the Central Nuclear Measurements Bureau), at Karlsruhe, Germany (the European Trans-uranium Institute) at Culham, Oxfordshire, UK (Joint European Torus) and at Petten, Netherlands (a general-purpose research establishment); (b) by contracting specific tasks to national centres or firms, and by 'association contracts' under which it contributes finance and personnel to joint teams; (c) by joining international projects such as the European Nuclear Energy Agency project at Winfrith Heath, England (the Dragon reactor).

Euratom has its own large Information and Documentation Centre, has set up a radioisotope information bureau and has worked out a Community policy on ownership of patents resulting from nuclear research. It has laid down basic standards for health protection throughout the Community, and worked out an insurance convention for large-scale atomic risks.

A common market for all nuclear materials and equipment came into force, and external tariffs were suspended, on 1 Jan. 1959. Since 1966 Euratom has been growing steadily less effective though attempts are still made to rationalize the research centres' operations, and co-ordinate them with national efforts.

International Links. An agreement was signed with the US Atomic Energy Commission in Nov. 1958 and widened in 1964. UK, the Irish Republic and Denmark joined Euratom on 1 Jan. 1973.

EUROPEAN FREE TRADE ASSOCIATION (EFTA)

The European Free Trade Association has 6 member countries: Austria, Iceland, Norway, Portugal, Sweden and Switzerland. A seventh country, Finland, is an associate member. The Stockholm Convention establishing the Association entered into force on 3 May 1960 and Finland became associated on 27 March 1961. Iceland joined EFTA on 1 March 1970 and was immediately granted duty-free entry for industrial goods exported to EFTA countries, while being given 10 years to abolish her own existing protective duties. Two founder members of EFTA, the UK and Denmark, left EFTA on 31 Dec. 1972 to join the EEC.

When the Association was created it had three objectives: to achieve free trade in industrial products between member countries, to assist in the creation of a single market embracing the countries of Western Europe, and to contribute to the expansion of world trade in general.

The first objective was achieved on 31 Dec. 1966, when virtually all inter-EFTA tariffs were removed. This was 3 years earlier than originally planned. Finland removed her remaining EFTA tariffs a year later on 31 Dec. 1967 and Iceland removed her tariffs on 31 Dec. 1979.

The fulfilment of the second aim was secured in 1972. On 22 Jan. 1972 the UK and Denmark signed the Treaty of Accession to the EEC whereby they became members of the enlarged Community from 1 Jan. 1973. On 22 July 1972, 5 other EFTA countries, Austria, Iceland, Portugal, Sweden and Switzerland signed Free Trade Agreements with the enlarged EEC. A similar agreement negotiated with Finland was signed on 5 Oct. 1973. Norway, whose intention of joining the EEC was reversed following a referendum, signed a similar agreement on 14 May 1973. Through these agreements virtually complete free trade in industrial goods was achieved in 16 Western European countries from 1 July 1977. The free trade agreements apply also to Greece since its accession to the EEC on 1 Jan. 1981. A multi-

lateral free trade agreement between EFTA countries and Spain, a candidate for EEC membership, came into force on 1 May 1980 and the first tariff cuts were applied on 1 June 1980.

The third objective was to contribute to the expansion of world trade. In 1959 trade between the countries then in EFTA amounted to US\$759m. and total exports were US\$6,852m. In 1979 the respective figures were US\$15,105m. and US\$98,315m. More than half EFTA trade is with the EEC.

EFTA tariff treatment applies to those industrial products which are of EFTA origin, and these are traded freely between member countries. Each EFTA country remains free, however, to impose its own rates of duty on products entering from outside EFTA or the EEC.

Generally, agricultural products do not come under the provisions for free trade, but bilateral agreements have been negotiated to increase trade in these products.

The operation of the Convention is the responsibility of a Council assisted by a small secretariat. Each EFTA country holds the chairmanship of the Council for 6 months.

Secretary-General: Charles Müller (Switzerland).

COLOMBO PLAN

The Colombo Plan was established for co-operative economic development in south and south-east Asia in 1951 as a result of a meeting of Commonwealth foreign ministers held in 1950. It seeks to improve the living standards of the people of the area by reviewing development plans and co-ordinating development assistance. Aid to member countries is negotiated and administered bilaterally. Membership comprises 20 developing countries within the region: Afghanistan, Bangladesh, Bhutan, Burma, Fiji, India, Indonesia, Iran, Kampuchea, Republic of Korea, Laos, Malaysia, Republic of the Maldives, Nepal, Pakistan, Papua New Guinea, Philippines, Singapore, Sri Lanka and Thailand; and 6 non-regional members: Australia, Canada, Japan, New Zealand, UK and USA.

The annual meetings of the Consultative Committee are also attended by observers from major international and regional organizations concerned with development. There was no Consultative Committee meeting in 1979; instead there was a meeting of Senior Officials of Colombo Plan countries held in Colombo to discuss the 'Future role of the Colombo Plan'.

Technical Co-operation. The Colombo Plan has no permanent secretariat. A small Bureau, set up in Colombo in 1951, operates under the supervision of a Council for Technical Co-operation in South and South-East Asia, representing member governments. An information unit has been attached to the Bureau since 1953. The Colombo Plan Staff College for Technician Education was established at Singapore in 1974. The Council publishes its own annual report.

During 1979, 2,054 experts were assigned to countries of the region, and 3,787 student and training places were provided. Most training is given outside the region, but the Bureau has increasingly urged members to make more use of training facilities available within the region, by adequate arrangements for the exchange of students.

External Aid. Total Colombo Plan assistance to regional member countries in 1979 exceeded US\$56.7m. In addition there is substantial private investment from countries outside the region. In 1979 UK net bilateral aid amounted to US\$490.4m., bringing the total since 1950 to US\$4,446m. Of the total expenditure in 1979, US\$58m. was on technical co-operation, bringing the total of such expenditure since 1950 to US\$413m.

ASSOCIATION OF SOUTH EAST ASIAN NATIONS (ASEAN)

History and Membership. The Association of South East Asian Nations is a regional organization formed by the governments of Indonesia, Malaysia, the Philippines, Singapore and Thailand through the Bangkok Declaration which was signed by the Foreign Ministers of ASEAN countries on 8 Aug. 1967

Objectives. The main objectives are to accelerate economic growth, social progress and cultural development, to promote active collaboration and mutual assistance in matters of common interest, to ensure the stability of the South East Asian region and to maintain close co-operation with existing international and regional organizations with similar aims. Principal projects concern economic co-operation and development, with the intensification of Intra-ASEAN trade and trade between the region and the rest of the world, joint research and technological programmes, co-operation in transportation and communications, promotion of tourism and south-east Asian studies, including cultural, scientific, educational and administrative exchanges

Organs. The highest authority in ASEAN are the Heads of Government of the Member Countries who meet as and when necessary to give directions to ASEAN

The highest policy-making body is the Meeting of Foreign Ministers, commonly known as the Annual Ministerial Meeting, which convenes in each of the ASEAN members countries on a rotational basis in alphabetical order. The Standing Committee, comprising the Foreign Minister of the country hosting the Ministerial Meeting in that particular year and the accredited ambassadors of the other member countries, carries out the work of the Association in between the Ministerial Meetings and handles the routine matters to ensure continuity and to make decisions which can not wait for the Ministerial Meetings and submit for the consideration of the Foreign Ministers all reports and recommendations of the various ASEAN committees. There are 4 specialized committees under the Standing Committee and five others under the ASEAN Economic Ministers that recommend and draw up programmes of ASEAN co-operation. These committees are responsible for the operation and implementation of ASEAN projects in their respective fields. Each ASEAN capital has an ASEAN National Secretariat. The central secretariat for ASEAN is located in Jakarta, Indonesia, and is headed by the ASEAN Secretary General, a post that revolves among the member states in alphabetical order every 2 years. Bureau directors and other officers of the ASEAN Secretariat remain in office for 3 years.

ORGANIZATION OF AMERICAN STATES

On 14 April 1890 representatives of the American republics, meeting in Washington at the First International Conference of American States, established an 'International Union of American Republics' and, as its central office, a 'Commercial Bureau of American Republics', which later became the Pan American Union. This international organization's object was to foster mutual understanding and co-operation among the nations of the western hemisphere. Since that time, successive inter-American conferences have greatly broadened the scope of work of the organization.

This led to the adoption on 30 April 1948 by the Ninth International Conference of American States, at Bogotá, Colombia, of the Charter of the Organization of American States. This co-ordinated the work of all the former independent official entities in the inter-American system and defined their mutual relationships. The purposes of the OAS are to achieve an order of peace and justice, promote American solidarity, strengthen collaboration among the member states and defend their sovereignty, territorial integrity and independence. The OAS is a regional organization of the United Nations for the maintenance of peace and security.

Membership is on a basis of absolute equality. Each country has one vote in the Council of the Organization and its organs. The member countries were (1980): Argentina, Barbados, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Commonwealth of Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Saint Lucia, Suriname, Trinidad and Tobago, USA, Uruguay, Venezuela.

The OAS has been concerned increasingly in recent years with programmes to promote Latin American economic and social development. The OAS provides specialized training for thousands of Latin Americans each year in a wide variety of development-related fields. It also carries out several missions projects each year in response to requests from member governments.

On 27 Feb. 1967 the Third Special Inter-American Conference in Buenos Aires approved the Protocol of Amendment to the Charter of the OAS, which contained new standards for inter-American co-operation and a number of structural changes in the Organization.

On 14 April 1967 the Declaration of the Presidents of America, signed in Punta

del Este, Uruguay, expressed the commitment of the American chiefs of state to promote Latin American economic integration; to join in efforts to increase substantially Latin American foreign-trade earnings; to modernize the living conditions of the rural population and raise agricultural productivity; and to expand programmes in education, science, technology and health.

On 22 Feb. 1968, in the Resolution of Maracay, the Inter-American Cultural Council launched new regional programmes for educational development and for scientific and technological development.

On 27 Feb. 1970, by ratification of more than the mandatory two-thirds of the OAS member states, the Protocol of Buenos Aires, modifying the 1948 Charter, entered into effect.

Under the amended Charter, the OAS accomplishes its purposes by means of:

(a) The *General Assembly*, which meets annually in various countries of the member states.

(b) The *Meeting of Consultation of Ministers of Foreign Affairs*, held to consider problems of an urgent nature and of common interest.

(c) Three councils of equal rank: the *Permanent Council*, which replaces the old OAS Council; the *Inter-American Economic and Social Council*; and the *Inter-American Council for Education, Science and Culture*. Functions are to direct and co-ordinate work in the areas of their competence and render the governments such specialized services as they may request. Each council is composed of 1 representative from each member state, appointed by his government.

(d) The *Inter-American Juridical Committee* which acts as an advisory body to the OAS on juridical matters and promotes the development and codification of international law. Eleven jurists, elected every 4 years by the General Assembly, represent all the American States.

(e) The *Inter-American Commission on Human Rights* which oversees the observance and protection of human rights. Seven members represent all the OAS member states.

(f) The *General Secretariat* is the central and permanent organ of the OAS.

(g) The *Specialized Conferences*, meeting to deal with special technical matters or to develop specific aspects of inter-American co-operation.

(h) The *Specialized Organizations*, intergovernmental organizations established by multilateral agreements to discharge specific functions in their respective fields of action, such as women's affairs, agriculture, child welfare, Indian affairs, geography and history, and health.

Secretary-General: Alejandro Orfila (Argentina).

Assistant Secretary-General: Valerie McComie (Barbados).

The Secretary-General and the Assistant Secretary-General are elected by the General Assembly for 5-year terms. The General Assembly approves the annual budget for the Organization, which is financed by quotas contributed by the member governments.

General Secretariat: Washington, D.C., 20006, USA.

Flag: Light blue with the OAS seal in colour in the centre.

LATIN AMERICAN ECONOMIC GROUPINGS

The Economic Commission for Latin America, an organ of the United Nations, with headquarters in Santiago, Chile, has facilitated the co-operation of two groups of countries concerning production, tariffs and trade.

Latin American Free Trade Association was concluded in Montevideo on 18 Feb. 1961 by Argentina, Bolivia, Brazil, Chile, Mexico, Paraguay, Peru and Uruguay, Colombia (3 Oct. 1961), Ecuador (20 Oct. 1961) and Venezuela (1 Sept. 1966) have joined the ALALC LAFTA Treaty. The permanent secretariat is at Montevideo. The 11 signatories held the 19th Extraordinary Conference at Acapulco, 16-27 June 1980. A Constitution was drawn up for a new Latin American Integration Association (LAIA) to take over after LAFTA expired on 31 Dec. 1980.

Central American Common Market (ODECA). On 13 Dec. 1960, at Managua, El Salvador, Guatemala, Honduras and Nicaragua concluded a general treaty on Central American integration, a protocol on the equalization of import duties and charges, and an agreement establishing the Central American Bank for Economic Integration. Costa Rica acceded in 1962 and in Sept. 1963 ratified the charter of the Banco Centroamericano de Integración Económica (in Tegucigalpa), whose capital was thereupon increased to US\$20m.

The San Salvador Charter, signed on 14 Dec. 1962, expanded these provisions, envisaging permanent political, economic, educational, defence, etc., councils. The permanent secretariat is at Guatemala City.

Total intra-ODECA trade increased from US\$8.6m. in 1960 to US\$176m. in 1966. Total USA investments in the area are about \$400m.

The Andean Group (Grupo Andino). On 26 May 1969 an agreement was signed by Bolivia, Chile, Colombia, Ecuador and Peru creating the Andean Group. Venezuela was initially actively involved but did not sign the agreement. The Group signed a further agreement on 31 Dec. 1970 on common regulations controlling foreign investments. Under the Cartagena Agreement of 1975 the development of an integrated petrochemical industry in each of the member countries was established.

Sistema Económico Latinoamericano (SELA) was created by 25 countries (not including USA) meeting at Panama, 17 Oct. 1975. Its Permanent Secretary is Jaime Moncayo, former Finance Minister of Ecuador. It held an 'extraordinary' technical meeting at Caracas, 5 Jan. 1976, to prepare for other activities, such as UNCTAD, at Nairobi in May 1976.

CARIBBEAN COMMUNITY (CARICOM)

Establishment and Functions. The Treaty establishing the Caribbean Community, including the Caribbean Common Market, and the Agreement establishing the Common External Tariff for the Caribbean Common Market, was signed by the Prime Ministers of Barbados, Guyana, Jamaica and Trinidad and Tobago at Chaguaramas, Trinidad, on 4 July 1973, and entered into force on 1 Aug. 1973. Six less developed countries of CARIFTA signed the Treaty of Chaguaramas on 17 April 1974. They were Belize, Dominica, Grenada, St Lucia, St Vincent and Montserrat, and the Treaty came into effect for those countries on 1 May 1974. Antigua acceded to Membership on 4 July 1974 and on 26 July the Associated State of St Kitts-Nevis Anguilla signed the Treaty of Chaguaramas in Kingston, Jamaica, and became a member of the Caribbean Community.

The Caribbean Community has 3 areas of activity: economic integration (that is, the Caribbean Common Market which replaces CARIFTA); co-operation in non-economic areas and the operation of certain common services; and co-ordination of foreign policies of independent member states.

The Caribbean Common Market provides for the establishment of a Common External Tariff, a common protective policy and the progressive co-ordination of external trade policies, the adoption of a scheme for the harmonization of fiscal incentives to industry; double taxation arrangements among member countries, the

co-ordination of economic policies and development planning; and a special regime for the less developed countries of the community.

Membership: Antigua, Barbados, Belize, the Commonwealth of Dominica, Grenada, Guyana, Jamaica, Montserrat, St Kitts-Nevis-Anguilla, Saint Lucia, St Vincent and Trinidad and Tobago.

Structure: The *Heads of Government Conference* is the principal organ of the Community, and its primary responsibility is to determine the policy of the Community. It is the final authority of the Community and the Common Market, and for the conclusion of treaties and relationships between the Community and international organizations and States. It is responsible for financial arrangements for meeting the expenses of the Community.

The *Common Market Council* is the principal organ of the Common Market and consists of a Minister of Government designated by each member state. Decisions in both the Conference and the Council are in the main taken on the basis of unanimity.

The *Secretariat*, successor to the Commonwealth Caribbean Regional Secretariat, is the principal administrative organ of the Community and of the Common Market. The Secretary-General is appointed by the Conference on the recommendation of the Council for a term not exceeding 5 years and may be reappointed. The Secretary-General shall act in that capacity in all meetings of the Conference, the Council, and of the institutions of the Community.

THE LEAGUE OF ARAB STATES

Origin. The formation of the League of Arab States in 1945 was largely inspired by the Arab awakening of the 19th century. This movement sought to re-create and reintegrate the Arab community which, though for 400 years a part of the Ottoman Empire, had preserved its identity as a separate national group held together by memories of a common past, a common religion and a common language, as well as by the consciousness of being part of a common cultural heritage. The leaders of the Arab movement in the 19th century and of the Arab revolt against Turkey in the First World War sought to achieve these aims through secession from the Ottoman Empire into a united and independent Arab state comprising all the Arab countries in Asia. However the 1919 peace settlement divided the Arab world in Asia (with

the exception of Saudi Arabia and the Yemen) into British and French spheres of influence and established in them a number of separate states and administrations (Syria, Lebanon, Iraq, Jordan and Palestine) under temporary mandatory control.

By 1943, however, 7 of these countries had substantially achieved their independence. An Arab conference therefore met in Alexandria in the autumn of 1944; it formulated the 'Alexandria Protocol', which delineated the outlines of the Arab League. It was found that neither a unitary state nor a federation could be achieved, but only a league of sovereign states. A covenant, establishing such a league, was signed in Cairo on 22 March 1945 by the representatives of Egypt, Iraq, Saudi Arabia, Syria, Lebanon, Jordan and Yemen. There were (1980) 21 members of the League: Algeria, Bahrain, Iraq, Jibuti, Jordan, Kuwait, Lebanon, Libya, Mauritania, Morocco, Oman, Palestine L.O., Qatar, Saudi Arabia, Somalia, Sudan, Syria, Tunisia, United Arab Emirates, P.D.R. of Yemen and Yemen Arab Republic.

Egypt's membership of the League was suspended, in accordance with a resolution passed at the Baghdad summit, in March 1979, at which time it was also agreed that the League secretariat should be moved from Cairo to Tunis. This action was taken in response to the signing of a bilateral peace treaty between Egypt and Israel.

Organization. The machinery of the League consists of a Council, a number of Special Committees and a Permanent Secretariat. On the Council each state has one vote. The Council may meet in any of the Arab capitals. Its functions include mediation in any dispute between any of the League states or a League state and a country outside the League. The Council has a Political Committee consisting of the Foreign Ministers of the Arab states.

The Permanent Secretariat of the League, under a Secretary-General (who enjoys, along with his senior colleagues, full diplomatic status), has its seat in Tunisia.

The League considers itself a regional organization within the framework of the United Nations at which its secretary-general is an observer.

Secretary-General: Chazli Klibi (Tunisia).

Flag: Dark green with the seal of the Arab League in white in the centre.

Arab Common Market. The Arab Common Market came into operation on 1 Jan. 1965. The agreement, reached on 13 Aug. 1964 and open to all the Arab League states, has been signed by Iraq, Jordan, Syria and Egypt. The agreement provides for the abolition of customs duties on agricultural products and natural resources within 5 years, by reducing tariffs at an annual rate of 20%. Customs duties on industrial products are to be reduced by 10% annually. The agreement also provides for the free movement of capital and labour between member countries, the establishment of common external tariffs, the co-ordination of economical development and the framing of a common foreign economic policy.

DANUBE COMMISSION

The Danube Commission was constituted in 1949 based on the Convention regarding the regime of navigation on the Danube, which was signed in Belgrade on 18 Aug. 1948. The Belgrade Convention reaffirmed that navigation on the Danube from Ulm to the Black Sea, with access to the sea through the Sulina arm and the Sulina Canal, is equally free and open to the nationals, merchant shipping and merchandise of all states as to harbour and navigation fees as well as conditions of merchant navigation.

The Danube Commission is composed of representatives from the countries on the Danube (1 for each of these countries), namely, Austria, Bulgaria, Hungary, Romania, Czechoslovakia, USSR and Yugoslavia. Since 1957, representatives of the Ministry of Transport from the Federal Republic of Germany have attended the meetings of the Commission as guests of the Secretariat.

The functions of the Danube Commission are to check that the provisions of the Convention are carried out, to establish a uniform buoying system on all the Danube's navigable waterways and to establish the basic regulations for navigation on the river. The Commission co-ordinates the regulations for river, customs and sanitation control as well as the hydrometeorological service and collects statistical data concerning navigation on the Danube.

The Danube Commission enjoys legal status. It has its own seal and flag. The members of the Commission and elected officers enjoy diplomatic immunity. The

Commission's official buildings, archives and documents are inviolable. French and Russian are the official languages of the Commission.

Since 1954 the headquarters of the Commission have been in Budapest.

Flag: Blue, with a red strip fimbriated white along the bottom edge, and the initials of the Commission within a wreath in the canton—Latin letters on obverse Cyrillic on reverse.

AFGHÁNISTÁN

Capital: Kábul

Population: 17·05m. (1976)

GNP per capita: US\$240 (1978)

Democratic Republic of Afghánistán

HISTORY. A military *coup* on 17 July 1973 overthrew the monarchy of King Záhir Sháh. The *coup* was led by the King's cousin and brother-in-law Mohammad Daoud who declared a Republic. King Záhir abdicated on 24 Aug. 1973. President Daoud was killed in a military *coup* in April 1978 which led to the establishment of a pro-Soviet government of the People's Democratic Party of Afghánistán.

AREA AND POPULATION. Afghánistán is situated between parallels 29° and 38° 35' N. lat., and 60° 50' and 71° 50' E. long., with a long narrow strip extending to 75° E. long. (Wákhán). For the boundaries, see THE STATESMAN'S YEAR-BOOK, 1925, pp. 654-55.

A new boundary agreement with the Soviet Union was signed in Moscow in June 1946; a joint commission completed the demarcation in Sept. 1948.

A border treaty with China was signed in 1963; the frontier was demarcated in 1964.

The area is 245,664 sq. miles (636,266 sq. km). Population, according to the (1976) Afghan estimate, is 17·05m., of which some 2·4m. are nomadic tribes. Birth rate (1970) 39 per 1,000 live births; death rate 16 per 1,000.

Estimate (1975), Kábul 749,000. Estimates of population of other towns (1975) were: Kandahár, 209,000; Herát, 157,000; Kunduz, 108,000; Charikar, 98,000; Mazár-i-Sharif, 97,000; Pulialam, 88,000; Baghlan, 85,000; Cheghcheran, 82,000; Faizabad, 77,000; Meterlam, 76,000; Qala-i-nau, 70,000; Taluqan, 67,000; Uiback, 63,000; Sherberghan, 59,000; Jalálábád, 58,000; Gardez, 54,000.

The main ethnic group are the Pashtuns. Other ethnic groups include the Tajiks, the Hazaras, the Turkomans and the Uzbeks.

CONSTITUTION AND GOVERNMENT. The 1964 Constitution was abolished by Presidential decree in 1973 and on 14 Feb. 1977 a new Constitution was adopted by the *Loya-Jirgah* (Grand Assembly). The 1977 Constitution was abrogated in April 1978 by the new Head of State, Noor Mohammad Taraki. On 16 Sept. 1979 President Taraki was ousted in a *coup* and replaced by Hafizullah Amin. In Dec. 1979 Soviet troops invaded Afghánistán and Hafizullah Amin was deposed. The pretext for the airlift of combat troops to Kábul was the Treaty of Friendship signed in Dec. 1978 between USSR and Afghánistán. In March 1981 there were up to 95,000 Soviet troops in Afghánistán.

President: Babrak Karmal.

National flag. Three equal horizontal stripes of red, black and green, with the national arms in the canton.

The official languages are Pushtu and Dari (Persian).

DEFENCE

Army. The Army is based on selective conscription with a regular cadre of officers and n.c.o.s. An agreed figure of conscripts is chosen in each province under local arrangements. A proportion of conscripts is drafted into the Labour Corps (employed mainly on public works). Call-up begins at the age of 20, and is for 2 years (1 year for conscript officers). Reserve liability is up to the age of 42. There is a reserve of officers.

The peace-time strength of the Army was about 80,000. Reserves, 150,000. It was organized in 3 armoured and 10 infantry divisions, 3 mountain infantry brigades and 1 artillery brigade. Equipment is almost entirely Russian and includes T-62, T-54 and T-34 tanks and surface-to-air missiles. Transport is mainly mechanized.

The Army had the following training establishments: a military academy (formed 1932), a school for each principal arm, a technical school, an n.c.o.s' school and a military high school (Kábul), which takes boys from the age of 10, and from which the regular element in the armed forces is mainly drawn. Selected officers receive training abroad, chiefly in USSR. In early 1981 it was impossible to give strength or deployment of the Army.

Air Force. The Air Force, which is Russian-equipped, has about 260 aircraft and 10,000 officers and men. There are 2 squadrons of Su-7 attack aircraft, 3 squadrons of supersonic MiG-21 interceptors (about 40 aircraft), 4 squadrons of MiG-17s (about 50 aircraft), 2 bomber squadrons each with about 10 twin-jet Il-28s, a helicopter attack force of about 30 Mi-24s, a transport wing with 10 twin-turboprop An-26s, about 20 piston-engined An-2s and Il-14s, 30 Mi-8 and Mi-4 helicopters and 1 or 2 turboprop Il-18s, and Yak-11, Yak-18, Aero L-39 and MiG-15UTI trainers. The main fighter station is Bagram, with facilities for the largest jet airliners and bombers. A Russian-built bomber station was completed at Shin-dand in 1963. There is a training station at Mazár-i-Sharif and an air academy at Sherpur with about 400 cadets. Large numbers of 'Guideline' and 'Goa' surface-to-air missiles are operational in Afghánistán. Strong Soviet forces in Afghánistán in 1980 included large numbers of Mi-8 assault helicopters and Mi-24 helicopter gunships, some of which may have been transferred to the Afghán Air Force.

Gendarmerie. The *gendarmerie*, about 30,000 strong, is administered by the Ministry of the Interior.

INTERNATIONAL RELATIONS

Membership. Afghánistán is a member of UN and of the Colombo Plan.

ECONOMY

Planning. The first two 5-year plans ran 1956-61 and 1962-67. The third plan (1967-72) envisaged expenditures of Afs. 33,000m. (compared with actual expenditures of 25,000m. during the second plan), but was never approved by Parliament. It was later tacitly abandoned, although some of the projects mentioned in the plan were implemented. The Minister of Planning then prepared a series of 1-year rolling plans but abandoned these in favour of a third 7-year plan which was in preparation in 1976. A 5-year plan for 1980-85 is in preparation.

Budget. In 1980-81 the budget envisaged expenditure of Afs. 33,759m. and revenue of Afs. 33,759m.

Currency. The monetary system is on the silver standard. The unit is the *afgháni*, weighing 10 grammes of silver 0.900 fine, which is subdivided into 100 *puls*. Rates of exchange fluctuate round Afs. 110 = £1; Afs. 44 = US\$1.

Banking. The Afghan State Bank (*Da Afghánistán Bānk*) is the largest of the 3 main banks and also undertakes the functions of a central bank, holding the exclusive right of note issue. Total assets of the 3 main banks were: Da Afghanistan Bank (1967), Afs. 28,074.4m.; Pashtany Tejaraty Bānk (1980), Afs. 5,682m.; Bank-i-Millī (1967), Afs. 1,410.29m.

Weights and Measures. Weights and measures used in Kábul are: Weights: 1 *khurd* = 0.244 lb., 1 *pao* = 0.974 lb., 1 *charak* = 3.896 lb., 1 *sere* = 16 lb., 1 *kharwar* = 1,280 lb. or 16 maunds of 80 lb. each. Long measure: 1 yard or *gaz* = 40 in. The metric system is in common use by the bigger cloth merchants in Kábul. Square measures: 1 *jarib* = 60 × 60 kábuli yd or $\frac{1}{4}$ acre; 1 *kulba* = 40 jaribs (area in which 2½ kharwars of seed can be sown); 1 *jarib* yd = 29 in.

Local weights and measures are in use at Kandahár, Herat and Jalalabad

ENERGY AND NATURAL RESOURCES

Minerals. Mineral resources are scattered and little developed. Coal is mined at Karkar in Pul-i-Khumri, Ishpushta near Doshi, north of Kábul and Dara-i-Suf south of Mazar (total production, 1975-76, 150,000 tonnes). Natural gas is found in northern Afghánistán around Shiberghan and Sar-i-Pol; this is now being piped to the USSR, and 57,700m. cu. metres are to be supplied by 1985. Rich, but as yet unexploited, deposits of iron ore exist in the Hajigak hills about 100 miles west of Kábul; beryllium has been found in the Kunar valley and barite in Bamian province. Other deposits include gold; silver (now unexploited, in the Panjshir valley); lapis lazuli (in Badakhshán); asbestos; mica; sulphur (near Maimana); chrome (in the Logar valley and near Herát); and copper (in the north).

Agriculture. Although the greater part of Afghánistán is more or less mountainous and a good deal of the country is too dry and rocky for successful cultivation, there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables and cereals. It is estimated that there are 14m. hectares of cultivable land in the country, of which 7,844,000 hectares are being cultivated (5.34m. hectares of this being irrigated land). Afghánistán is virtually self-supporting in foodstuffs (including wheat in 1973), apart from sugar.

In 1980 USSR signed an agreement to supply 130,000 tonnes of wheat.

The castor-oil plant, madder and the asafœtida plant abound.

Fruit forms a staple food (with bread) of many people throughout the year, both in the fresh and preserved state, and in the latter condition is exported in great quantities. The fat-tailed sheep furnish the principal meat diet, and the grease of the tail is a substitute for butter. Wool (annual production, about 10,000 tonnes, of which about 7,000 tonnes are exported) and skins provide material for warm apparel and one of the more important articles of export. Persian lambskins (Karakuls) are one of the chief exports.

Seed cotton production, 1979, was estimated at 108,000 tonnes; wheat, 2.2m.; barley, 400,000; maize, 750,000; rice, 450,000.

Livestock (1979): Cattle, 3.98m.; horses, 400,000; sheep, 23m.; goats, 3m.; poultry, 20.1m.

INDUSTRY AND TRADE

Industry. At Kábul there are factories for the manufacture of cotton and woollen textiles, leather, boots, marble-ware, furniture, glass, bicycles, prefabricated houses and plastics. A large machine shop has been constructed and equipped by the Russians, with a capability of manufacturing motor spares. There is a wool factory and there are several cotton-ginning plants; a small cotton factory at Jabal-us-Seráj and a larger one at Pul-i-Khumri. A cotton-seed oil extraction plant has been built in Lashkargah by a British firm which also has a contract for the construction of 4 factories in the north which became operative in 1972. Germans have built and equipped a large modern cotton textile factory at Gulbahar, and another has been built and equipped by the Chinese at Bagram. A large cotton plant has recently been completed in the north at Balkh.

An ordnance factory manufactures arms and ammunition, boots and clothing, etc. for the Army. There is a beet sugar plant at Baghlan (equipped with Russian machinery) and a fruit-canning factory in Kandahár. Hydro-electric plants have been constructed at Sarobi, Nangarhár, Naghlu, Mahipár, Pul-i-Khumri and Kandahár; more hydro and thermal plants are under construction.

Industries include hydro-electric projects, cement, coalmining, cotton textiles, small vehicle assembly plants, fruit canning, carpet making, leather tanning, foot-wear manufacture, sugar manufacture, preparation of hides and skins, and building. Most of these are relatively small and, with the exception of hides and skins, carpets and fruits, do not meet domestic requirements.

Commerce. Trade is supervised by the Government through the Ministries of Commerce and Finance and the Da Afghánistán Bānk. The Association of Afghan Chambers of Commerce works in close liaison with the Ministry of Commerce.

The Government monopoly controls the import of petrol and oil, sugar, cigarettes and tobacco, motor vehicles and consignment goods from bilateral trading countries. Transit agreements have been reached with Pakistan (Karachi being the most important port for the transit of Afghan imports and exports) and the USSR.

In the year ended 20 March 1977-78 Afghan imports (c.i.f.), totalled US\$319.2m. and exports (f.o.b.) US\$313.4m.

Main export commodities were karakul skins (US\$20.8m.), raw cotton (US\$ 61.4m.), dried fruit and nuts (US\$35.2m.), fresh fruit (US\$23.5m.) and natural gas (US\$39.5m.). Main items imported were petroleum products (US\$34.4m.), textiles (US\$67m.).

Total trade between Afghánistán and UK (in £1,000 sterling, British Department of Trade returns):

	1976	1977	1978	1979	1980
Imports to UK	18,508	21,865	17,927	20,276	20,174
Exports and re-exports from UK	7,577	11,427	17,524	9,567	6,818

Tourism. Owing to internal political instability there was negligible tourism in 1980.

COMMUNICATIONS

Roads. There were in 1978 over 2,500 km of asphalted road. The Americans have asphalted the Kandahár-Chaman and Kábul-Torkham roads. The Russians have constructed a road and tunnel through the Salang pass (over 11,000 ft) which was opened in Sept. 1964 and cuts 120 miles off the old road from Kábul to the north; they have continued this road to Kunduz and Sherkhan Bandar (Qizil Qala) on the Oxus. In addition, the Americans in 1966 completed the road between Kábul and Kandahár and the Russians have constructed a concrete road between Kandahár and Herát. In 1968 the Americans completed an asphalt road from Herát to the Iranian frontier at Islam Qala. With Soviet assistance a metalled road from Pul-i-Khumri to Mazár-i-Sharif was completed in 1969 and Mazár-i-Sharif to Shiberghán in 1971.

Railways. There are no railways in the country.

Aviation. On 29 June 1956 Afghánistán signed an agreement with the USA for the development of civil aviation, including the construction of the international airport at Kandahár, comprising a loan of \$5m. and a grant of \$9.56m. Kábul airport has been expanded with Russian assistance. New runways at Kábul and Kandahár airports have been completed. Provincial all-weather airports have been constructed at Herát, Qunduz, Jalálábád and Mazár-i-Sharif.

Ariana Afghan Airlines (a national airline) operates regular services to Tehrán, Istanbul, Amsterdam, Frankfurt, Rome, London, New Delhi, Tashkent and Moscow.

Bakhtar Afghan Airlines (the domestic national airline) began operations on 8 Feb. 1968 and regularly served the main internal airfields and the remoter airfields at Bamian, Chakcharan, Lashkargah, Faizabad, Khost, Maimana, Neemroz and Taleqan before 1979.

Shipping. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down the Kunar and Kábul rivers from Chitral on rafts. A port has been built at Qizil Qala on the Oxus; barge traffic is increasing on the Oxus. Three river ports on the Amu Darya have been built at Sherkhan Bandar, Tashguzar and Hayratan, linked by road to Kábul.

Post and Broadcasting. Telephones, installed in most of the large towns, numbered 31,200 in 1978. There is telegraphic communication between all the larger towns and between Kábul and Kandahár and Peshawar and Chaman. A wireless installation connects Kábul with Europe, Bombay, the Far East, America and other parts of the world. Kábul Radio broadcasts in Pushtu, Persian, Urdu, English, French, Russian and German. The first TV colour transmissions in Kábul began in mid-1978. The telecommunication system is being expanded slowly, mainly with German assistance.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. A Supreme Court was established in June 1978. If no provision exists in the Constitution or in the general laws of the State, the courts follow the Hanafi jurisprudence of Islamic law.

Religion. The predominant religion is Islam, mostly of the Sunni sect, though there is a minority of about 1m. Shiah Moslems.

Education. The number of elementary schools is rapidly increasing, but secondary schools exist only in Kábul and provincial capitals. Both elementary and secondary education are free. In 1975 there were 694,240 pupils (19,158 teachers) in primary schools and 172,263 pupils (7,835 teachers) in secondary schools. There are several teacher-training institutions in Kábul and a few elsewhere; UNESCO is supporting a 30-year expansion programme. Technical, art, commercial and medical schools exist for higher education. The Kábul University was founded in 1932 and has 9 faculties (medicine, science, agriculture, engineering, law and political science, letters, economics, theology, pharmacology). The University of Nangarhar in Jalálábád was founded in 1963. A Polytechnic in Kábul was completed in 1968. In 1974 there were 10,956 students in higher education, 7,173 in teacher-training schools and 4,516 in technical schools.

Health. In 1978 there were 1,027 doctors and 3,600 hospital beds.

ALBANIA

Capital: Tirana

Population: 2.59m. (1979)

GNP per capita: US\$740 (1978)

Republika Popullore Socialiste e Shqipërisë

HISTORY. After the death of Gjergj Kastrioti Skënderbeu (Skanderbeg), Albania's national hero, in 1468 Albania passed under Turkish suzerainty until 1912. Independence was proclaimed at Vlonë on 28 Nov. 1912, and the London conference of ambassadors decided upon its frontiers and nominated as its ruler Prince William of Wied, who arrived at Durrës on 7 March 1914, but on 3 Sept. 1914 left the country, which fell into a state of anarchy. By the secret Pact of London of 26 April 1915 provision was made for the partition of Albania; but this arrangement was repudiated on 3 June 1917, when the Italian C.-in-C. in Albania proclaimed at Gjirokastër the independence of Albania. In Jan. 1925 a republic was proclaimed and on 1 Sept. 1928 a monarchy. Ahmed Beg Zogu, President since 31 Jan. 1925, reigned as King Zog till April 1939, when, on the occupation of the country by the Italians, he fled to England. After the liberation he was deposed *in absentia* on 2 Jan. 1946. During the years 1939-44 the country was overrun by Italians and Germans. The official Albanian date of the liberation is 29 Nov. 1944.

On 10 Nov. 1945 the British, US and USSR Governments recognized the Provisional Government under Gen. Enver Hoxha, on the understanding that it would hold free elections. The elections of 2 Dec. 1945 resulted in a Communist-controlled assembly, which on 11 Jan. 1946 proclaimed Albania a republic.

In 1946 Great Britain and the USA broke off relations with Albania and vetoed its admission to the United Nations. Albania was finally admitted on 15 Dec. 1955, the USA abstaining from voting.

Because of Albania's Stalinist and pro-Chinese attitudes diplomatic relations with USSR were broken off in 1961. In 1977 Albania terminated its special relationship with China by making ideological attacks on the post-Mao Chinese leadership's foreign policy, and in July 1978 China cut off all aid to Albania.

AREA AND POPULATION. The area of the country is 28,748 sq. km (11,101 sq. miles). By the peace treaty Italy restored the island of Sazan (Saseno) to Albania. At the census of Jan. 1979 the population was, 2,590,600 (34% urban; density, 90 per sq. km). The capital is Tirana (1978 population (in 1,000), 198); other large towns are Shkodër (Shkodra, Scutari) (62.5), Durrës (Durrës, Durazzo) (61), Vlorë (Vlona, Vlonë, Vlora, Valona) (58.4), Korçë (Korça, Koritza) (50.9), Elbasan (50.7). Other towns (1975): Berat (30), Fier (28), Gjirokastër (Argyro-castro) (22), Lushnjë (21), Kavajë, 1971 (18), Qytet Stalin (formerly Kuçovë) (14).

There is a small Greek minority (1977 estimate, 50,000).

Vital statistics, 1975 (per 1,000): Births, 29.4; deaths, 6.7; marriages (1974), 7.9; divorces (1969), 0.8. Natural increase, 22.6. Life expectancy in 1979 was 69 years.

The country is administratively divided into 26 districts (*rreth*, pl. *rrethët*) (see map in THE STATESMAN'S YEAR-BOOK, 1962. N.B. The district of Ersekë has been renamed Kolonjë). Districts are subdivided into *lokaliteteve*.

The districts are for the greater part named after their capitals: exceptions: Tropojë, chief town, Bajram Curri; Mat, Burrel; Mirditë, Rrëshen; Skrapar, C'orovodë.

The Albanian language is divided into two dialects—Gheg, north of the river Shkumbi, and Tosk in the south. Many places therefore have two forms of name: Vlorë (Gheg), Vlorë (Tosk), etc., and many are known also by an Italian name, e.g., Valona. Since 1945 the official language has been based on Tosk.

CONSTITUTION AND GOVERNMENT. The political structure derived from the Constitution of 14 March 1946 as amended in 1950, 1955, 1960 and 1963. In Dec. 1976 a new Constitution was adopted, by which Albania became a 'Socialist People's Republic'. The supreme legislative body is the single-chamber People's Assembly of 250 deputies, which meets twice a year, and delegates its day-to-day functions to a Presidium composed of a chairman, 3 deputy chairmen, a secretary and 10 members. Election to the People's Assembly is by universal suffrage (at 18) every 4 years.

In the elections of 12 Nov. 1978 it was claimed that 1,436,287 of the electorate of 1,436,288 voted for the 250 candidates on the single list of the Albanian Democratic Front. (There were 3 spoiled papers.)

The Government consists of a prime minister (Chairman of the Council of Ministers), 4 deputy prime ministers, 13 ministers and the chairman of the State Planning Commission. Effective rule is exercised by the Albanian Labour (i.e., Communist) Party, founded 8 Nov. 1941, whose governing body is the Politburo.

In 1971 the Party had 68,858 full and 18,127 candidate members (women, 22%; workers, 36%; peasants, 30%; professional and managerial, 34%). In 1979 the Party had 88,000 full members and 13,500 candidates (37.5% workers, 29% farmers, 27% women).

INTERNATIONAL RELATIONS

Membership. Albania is a member of UN.

ECONOMY

Planning. For the first four 5-year plans see THE STATESMAN'S YEAR-BOOK, 1976-77. The fifth covered 1971-75, during which it is claimed that national income increased by 38%, industrial production by 52% and agricultural production by 33%. The sixth 5-year plan ran from 1976 to 1980. The seventh 5-year plan covers 1981-85. Target increases: agricultural production, 41%, industrial, 40%. Emphasis is laid on industrial expansion, especially in the oil, mining and chemical industries. It is now stated that economic policy is founded on 'the revolutionary principle of self-reliance'.

Budget. Budget figures for 1979: Revenue, 7,800m. leks (7,200m. leks from enterprises and agricultural co-operatives); expenditure, 7,750m. leks (industry, 4,800m. leks; social, 1,800m. leks; defence, 885m. leks).

Currency. The monetary unit is the *lek* of 100 *qintars*. It replaced the gold franc (*franc ar*) in July 1947. In Aug. 1965 a new *lek* was introduced: 10 old *leks* = 1 new *lek*. Exchange rates, 1981: (official) US\$1 = 4.66 *leks*; £1 = 7.12 *leks*; (tourist) US\$1 = 9.75 *leks*; £1 = 16.94 *leks*.

Banking. The Albanian State Bank was founded in 1925 with Italian aid. In 1970 savings deposits amounted to 572m. leks. In 1970 the Agricultural Bank was set up as a credit institution for agricultural co-operatives.

Weights and Measures. The metric system is in force.

ENERGY AND NATURAL RESOURCES

Electricity. There are 6 hydro-electric power plants operational and one under construction. Electric power production in 1973 was 1,603m. kwh., of which 1,127m. was hydro-electric.

Oil. The oil industry is being rapidly expanded. Output in 1973: Crude, 2,107,000 tonnes; refined, 1,596,000 tonnes. Refining capacity in 1970 was over 1m. tonnes. Oil is produced chiefly at Qytet Stalin which a pipeline connects to the port of Vlorë. Natural gas is extracted.

Minerals. The mineral wealth of Albania is considerable but is only recently being developed. In 1971 there were 8 coal, 7 chromium (1977 output 900,000 tonnes) and 6 copper mines. Ferro-nickel ores are mined and output is increasing. In 1969 extensive coal deposits were discovered at Valias, near Tirana. There is no bituminous

coal. Salt is extracted near Vlorë and bitumen mined at Selenicë. Production in tonnes (1973): Chrome ore, 611,000; copper ore, 435,000; ferro-nickel ore, 384,000; brown coal, 811,000; phosphate, 110,000; nitrogenous fertilizer, 106,000; bitumen (1964), 242,000; cement (1965), 133,600.

Agriculture. The country for the greater part is rugged, wild and mountainous, the exceptions being along the Adriatic littoral and the Korçë (Koritza) Basin, which are fertile. In 1973 a programme of land reclamation and anti-erosion measures was instituted. In 1970 arable land comprised 599,000 hectares and pasture 623,000 hectares, 283,200 hectares were irrigated.

Land is held by the State (largely forests and non-agricultural), state farms (33 in 1970 holding 100,700 hectares of arable land) and co-operatives (459 in 1973 holding 500,900 hectares). Co-operatives are divided into 'advanced' and 'ordinary'. A pension plan for collective farmers was enacted in 1972. Tractors in 1980 numbered 17,300 (in 15-h.p. units).

The yield of the main crops in 1979 was (in 1,000 tonnes): Wheat, 420; cotton, 20; tobacco, 14; potatoes, 132; sugar-beet, 260; maize, 320; fruit, 125; rice, 17; beans, 16; sunflower seeds, 26; grapes, 62.

Livestock, 1979: Cattle, 474,000; sheep, 1,163,000; goats, 665,000; pigs, 120,000; horses and mules, 65,000; poultry, 2-38m.

Forestry. 47% of the territory of Albania is forest land, of which 38% is oak forest, 26% elm and 18% pine and birch. Timber reserves reach 44.5m. cu. metres. In 1967 forests covered 1,242,100 hectares; 6,784 hectares were afforested, 10,000 hectares improved in 1967.

Fisheries. The catch in 1964 was 3,600 tonnes.

INDUSTRY AND TRADE

Industry. All industry is nationalized down to the smallest workshop. Output is small, and the principal industries are agricultural product processing, textiles, oil products and cement. Chemical and engineering industries are being built up. The metallurgical combine at Elbasan is being extended.

Labour. In 1973, 462,900 persons worked in the socialist sector of the national economy, of whom 34.7% were employed in industry. In 1976, 46% of wage-earners were women.

Minimum wages may not fall below one-third of maximum. A new labour code was introduced in 1980 normalising an 8-hour 6-day week and 12 days yearly paid holiday.

Commerce. Between 1954 and 1978 Chinese aid amounted to US\$5,000m., but economic relations have now been broken off. In July 1980 trade agreements were signed with Yugoslavia; and Albania also trades with Italy, France, Czechoslovakia and India. The establishment of joint companies with, and the acceptance of credits from, capitalist firms is forbidden by the Albanian constitution. In 1980 indebtedness to the West was US\$100m.

Exports include crude oil, bitumen, chrome, nickel, copper, tobacco, fruit and vegetables.

Total trade between Albania and UK (British Department of Trade returns, in £1,000 sterling):

Imports to UK	117	40	61	52	62	107
Exports and re-exports from UK	644	127	222	255	701	1,478

COMMUNICATIONS

Roads. There were, in 1960, 3,100 km of roads suitable for motor traffic. In 1968 tribunals were set up in towns and villages to try minor crimes which had previously been dealt with by courts.

Religion. Albania is constitutionally an atheist state. In 1967 the Government closed all mosques and churches. For details of the situation before 1967 see *THE STATESMAN'S YEAR-BOOK*, 1969-70. The population had been mainly Moslem.

INTERNATIONAL RELATIONS

Membership. Algeria is a member of UN, OAU, the Arab League, OAFEC, OPEC and the Maghreb Organization.

ECONOMY

Planning. The second 4-year development plan (1974-77) envisaged investment of DA 110,000m. The third development plan (1980-84) gives priority to education and agriculture.

Currency. The Algerian currency is the *dinar* (DA). There are in circulation banknotes of DA 5, 10, 50, 100 and 500 and coins of 1, 2, 5, 20 and 50 centimes and DA 1. Money in circulation in Dec. 1977, DA 47,634m.

Budget. The budget (including extraordinary budget) was as follows in calendar years (in DA 1m.):

	1974	1975	1976	1977	1978
Revenue	23,438	25,093	26,215	28,000	36,788
Expenditure	13,498	13,068	20,118	27,472	29,946

Banking. The Banque Centrale d'Algérie is the government emission bank. Other banks operating in Algeria are Banque National d'Algérie, Crédit Populaire d'Algérie, Banque Extérieure d'Algérie, Caisse Algérienne de Développement, Banque Algérienne de Développement.

Weights and Measures. The metric system is in use.

ENERGY AND NATURAL RESOURCES

Electricity. Production of energy in 1978 totalled 52,120m. gwh.

Oil. Two large oilfields went into production in 1957 around Edjélé and Hassi Messaoud and in 1959 at El Gassi. In 1960 about 200 wells were productive. Natural gas was discovered at Djebel Berga in 1954 and at Hassi-R'Mel in 1956. Oil pipelines from Edjélé to Skirra (Tunisia) and from Hassi Messaoud to Bougie, and a gas pipeline from Hassi Messaoud via Hassi-R'Mel to Mostaganem-Oran-Algiers, have been completed. Oil production in 1978, 57.2m. tonnes. Oil revenue in 1972, DA 3,200m. Production of natural gas in 1977 was 81,286m. cu. metres.

Minerals. Algeria possesses deposits of iron, zinc, lead, mercury, copper and antimony. Kaolin, marble and onyx, salt (110,000 tonnes in 1957) and coal are also found. Mineral output in 1977 (1,000 tonnes): Ferrous metals, 3,183; zinc, 5.7; copper, 1.5; lead, 1.4; phosphates, 1,173.

Agriculture. There exists a small area of highly fertile plains and valleys near the coast, mainly owned by self-management committees and some Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, etc. Self-management groups supplied 60% of revenue from agriculture in 1970, and held 80% of cultivated land. The greater part of Algeria is of limited value for agricultural purposes. In the northern portion the mountains are generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is accessible only with difficulty. There were an estimated 16.3m. hectares of agricultural land in 1970-71, of which 6.4m. hectares were arable; 292,000 hectares under vine and 35.3m. hectares pastures and brushlands.

Les Vallées d'Andorre— Valls d'Andorra

HISTORY AND CONSTITUTION. The political status of Andorra was regulated by the *Paréage* of 1278 which placed Andorra under the joint suzerainty of the Comte de Foix and of the Bishop of Urgel. The rights vested in the house of Foix passed by marriage to that of Béarn and, on the accession of Henri IV. to the French crown. The sovereignty is exercised jointly by the President of the French Republic and the Bishop of Urgel.

The co-princes are represented in Andorra by the '*Viguier français*' and the '*Viguier Episcopal*'. Each co-prince has set up a Permanent Delegation for Andorran affairs; the Prefect of the Eastern Pyrenees is the French Permanent Delegate.

The valleys pay every second year a due of 960 francs to France and 460 pesetas to the bishop.

A 'General Council of the Valleys' submits motions and proposals to the Permanent Delegations. Its 28 members are elected for 4 years; half of the council is renewed every 2 years.

The council nominates a First Syndic (*Syndic Procureur Général*) and a Second Syndic from outside its members.

First Syndic: Estanislau Sangra Font.

National flag: Three vertical strips of blue, yellow, red, with the arms of Andorra in the centre.

AREA AND POPULATION. The co-principality of Andorra is situated in the eastern Pyrenees on the French Spanish border. The country consists of gorges, narrow valleys and defiles, surrounded by high mountain peaks varying between 1,880 and 3,000 metres. nominated by the respective co-princes. The judge of appeal is nominated alternately for 5 years by each co-prince; the third instance (*Tercera Sala*) is either the supreme court of Andorra at Perpignan or the ecclesiastical court of the Bishop at Urgel.

Criminal justice is administered by the *Corts* consisting of the 2 Viguiers, the judge of appeal, 2 *rahonadors* elected by the general council of the valleys, a general attorney and a deputy attorney nominated for 5 years alternatively by each of the co-principalities, adjudicating several times a year. CONSTITUTION AND GOVERNMENT. Until 16 March 1949 the Constitution of the Argentine Republic was that of 1853, with modifications of 1860, 1866 and 1898. On the date mentioned a new constitution drafted by the Perón government and passed by the Constitutional Convention elected 5 Dec. 1948 came into force giving the Government great powers over the national economy. At a National Constituent Assembly held in Santa Fé Sept.–Nov. 1957 it was decided to revert to the 1853 constitution as amended up to 1898; thereafter the President and Vice-President were to be elected through electoral colleges by popular vote for 6-year terms. The President was not to be immediately re-elected. The Vice-President was to preside over the Senate. The President would be Commander-in-Chief of the Armed Services and would make appointments to all civil services and Judicial Offices. The President would be responsible with the Cabinet for the Executive. Both President and Vice-President must be Roman Catholic and of Argentine birth.

A law of 11 July 1975 provided that, should the Presidency become vacant, the president of the Senate should assume the office, but Congress should meet within 48 hours to choose a new president from among senators, deputies and provincial governors; he would serve the remainder of the interrupted term.

The National Congress consisted of a Senate and House of Deputies: the Senate with 2 representatives from the capital and each province (with a total of 46 seats), elected by popular vote for 9 years (one-third retiring every 3 years). The House of Deputies was to have 192 seats, each deputy being elected for 4 years and half the seats renewable each 2 years. The 2 Chambers meet annually from 30 Sept. to 2 May. Since 1912 voting has been free, secret and obligatory. Women were enfranchised on 9 Sept. 1947; beginning with the presidential election on 11 Nov. 1951, all women 18 years of age or older must vote. Equal suffrage was confirmed by a revisionary law of Aug. 1961.

The military leaders supported by the Navy and Air Force staged a *coup d'état* on 27 June 1966, and the temporary Revolutionary Junta of the Commanders-in-Chief of the three Armed Services deposed Dr Illia and his Government elected in 1963. A former Commander-in-Chief of the Army, Lieut.-Gen. Onganía, was appointed President and the Junta dissolved. The previous Constitution remained in force in so far as it was consistent with the statutes and objectives of the Revolution.

In Aug. 1967 a law was promulgated decreeing the registration of communists and excluding them from holding any public office, any position in employers' and workers' trade unions, and any teaching post in state and private schools.

Local Government. From 1958 until the June 1966 Revolution, apart from the period March 1962 to Oct. 1963, the governors were elected for terms of either 3 or 4 years. The Provinces elected their own Legislature and have control over their own internal affairs. After the Revolution of June 1966 the governors were appointed by the President and are responsible to him.

DEFENCE

Army. The Army is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalized citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' Army, or first line. After completing 10 years in the first line the men pass to the National Guard, and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is mobilized only in case of war. The period of continuous service, or training in the ranks with the permanent forces, is for 1 year for the Army or Air Force, and 14 months for the Navy. The reservists can be called out for training periodically.

The territory of the republic is divided into 5 military districts for administrative purposes. The Army is organized in 4 army corps; it consists of 2 armoured and 6 infantry brigades, 3 mountain brigades, 1 airborne brigade, 1 aviation and 6 air defence battalions.

In 1980 the Army was 85,000 strong, of whom 65,000 were National Service men and the remainder, an officer corps of 5,000 and 15,000 n.c.o.s, all of whom were career regulars.

The trained reserve numbers about 250,000, of whom 200,000 belong to the National Guard and 50,000 to the Territorial Guard.

Air Force. The Air Force, founded on 10 Aug. 1912 and autonomous since 4 Jan. 1945, is organized into Air Operations, Air Regions, Materiel and Personnel Commands. Air Operations Command, responsible for all operational flying, is made up of 8 air brigades, each with 1 to 4 squadrons, usually operating from a single base. No. I Air Brigade is a military air transport service, with responsibility also for LADE (state airline) operations into areas of Argentina not served by civilian companies. Its equipment includes 7 C-130E H Hercules and 9 F.27 Friendship Troopship turboprop transports, 2 KC-130H Hercules tanker transports, 5 twin-turboprop F.28 Fellowship freighters, 6 C-47s, 5 Twin Otters, 15 Guarani IIs, the Presidential Boeing 707-320B, twin-turboprop HS 748, and many older or smaller types. No. VII Air Brigade has 1 squadron with 14 armed Hughes 500M, 6 Lama, 5 Sikorsky S-58T S-61, 8 Bell 212 and 9 Bell UH-1 helicopters; a search and rescue squadron with 3 HU-16B Albatross amphibians; and a COIN training squadron of T-34 Mentors. No. VIII Air Brigade has 1 squadron with 16 Mirage IIIE fighter-bombers

and 2 Mirage IIID trainers. There is a flying school at Córdoba, equipped with piston-engined T-34 Mentors and Paris jets. Total strength of the Air Force is about 20,000 personnel and 375 aircraft.

INTERNATIONAL RELATIONS

Membership. Argentina is a member of UN, OAS and LAIA (formerly LAFTA).

ECONOMY

Budget. The financial year commences on 1 Nov. Budget receipts in 1980 33,400,000m. pesos and expenditure 37,200,000m. pesos.

Currency. The monetary system is on a gold-exchange standard, the unit for foreign transactions being, nominally, the *peso oro* (gold peso) and for domestic transactions, the *peso moneda nacional* (paper peso), legal tender for all domestic debts.

The gold peso weighs 1.6129 grammes of gold 0.900 fine; it is divided into 100 *centavos*, but gold is not in circulation. Circulation consists chiefly of paper notes (issued since 1897) ranging from 100,000 down to 50 pesos. The coins actually circulating, 1968, were steel-nickel, 25, 10, 5, 1 peso and 50 centavos. The government in 1970 introduced a 'new peso', equivalent to 100 of the present units of currency.

Due to constant inflation, the international value of the peso has fallen steadily. In Oct. 1955 it was 18 to US\$1; in March 1981 it was officially 1,240 to US\$1. The buying and selling of foreign exchange is now controlled, and with certain minor exceptions may only be through authorized institutions.

Monetary circulation 592,495m. pesos on 31 Dec. 1976. Gold and foreign-exchange reserves were equal to US\$7,900m. in May 1979.

Banking. A law promulgated 25 March 1946 nationalized the Central Bank (established in 1935), originally as an autonomous institution, but later, in Oct. 1949, placed under the Minister of Finance, who became president. Six decree-laws of Oct. 1957 have brought back a greater elasticity to the structure, especially as regards the deposits and loans of the private banks, which have regained their autonomy. The Central Bank continues the normal functions of a national institution.

On 31 July 1948 there were 44 banks, each with capital of 1m. paper pesos or over (including the Banco de la Nación, with 36% of the total assets of the banking system), consisting of 9 provincial banks, 25 domestic banks and 10 foreign banks, all of which are shareholders in the Central Bank. The Banco de la Nación (founded in 1891) has 306 branches and agencies, including one at Asunción, Paraguay. In March 1974 the Government nationalized 7 foreign banks, including subsidiaries of the Citibank and the Banco de Santander. There are 5 Stock Exchanges.

Weights and Measures. Since 1 Jan. 1887 the use of the metric system has been compulsory.

ENERGY AND NATURAL RESOURCES

Electricity. Electric power production (1972) was 25,319 kwh.

Oil. Crude oil production (1979) 27.47m. cu. metres. Investment of US\$10,000m. is envisaged by 1985 in the oil industry with the aim of achieving self-sufficiency.

Minerals. Mining is of mainly local importance. Since 1954 it has been under state control. Argentina produced 472,300 tonnes of washed coal in 1968 (Rio Turbio, with reserves of 300m. tonnes). Gold, silver and copper are worked in Catamarca, where there are also 2 tin-mines, and gold and copper in San Juan, La Rioja and the south-western territories. Iron ore (102,000 tonnes in 1972), tungsten, beryllium, mica, uranium (25 tonnes in 1972), lead (39,900 tonnes in 1972), barites, zinc (43,500 tonnes in 1972), tin (1.8m. tonnes in 1972), manganese and limestone are produced.

Agriculture. Argentina has an area of about 670,251,000 acres, of which about 41% is pasture land, 32% woodland and 11% (73.73m. acres) cultivated. It was estimated (1966) that 30m. hectares were cultivated by the country's 110,600 tractors.

Argentina's wealth is based on agriculture and livestock. She has long led the world (pre-war average, 662,000 tonnes). In 1972 production amounted to 2.58m. tonnes carcase weight.

The livestock estimate (1979) showed: Cattle, 60.17m.; sheep, 35.4m.; pigs, 3.7m.; horses, 3m. The Province of Buenos Aires has 38% of the cattle. Wool production, 1972, was 194,000 tonnes.

Wheat production usually exceeds 6m. tonnes (1973, provisional, 7.6m.), ahead of Australia but behind Canada and US. Other cereals and linseed are also important.

Crop statistics with area (in 1,000 hectares) and production (in 1,000 tonnes) are shown as follows:

	1976-77		1977-78 ¹		1978-79 ¹	
	<i>Area</i>	<i>Output</i>	<i>Area</i>	<i>Output</i>	<i>Area</i>	<i>Output</i>

The total grain and meat exports, in tonnes:

	<i>Wheat</i>	<i>Maize</i>	<i>Barley</i>	<i>Meat</i>
1976	3,154,590	3,079,965	16,297	364,424
1977	5,634,436	5,430,261	36,675	389,613
1978	1,607,567	5,894,663	7,365	435,228

Argentina's meat exports are calculated in terms of actual weight; not 'carcase weight', as is the international practice.

Cotton, potatoes, vine, tobacco, citrus fruit, olives, rice, soya, and yerba maté (Paraguayan tea) are also cultivated. There are 36 cane-sugar mills and 1 beet-sugar factory; production, 1979, about 14.12m. tonnes. Potato harvest, 1979, amounted to 1.694,000 tonnes. The area under tobacco, 1979, was 76,000 hectares; output 68,000 tonnes.

Before the Second World War the country was the largest grower and shipper of linseed (flaxseed), but, preferring to convert it into oil, exported virtually none from 1946 until April 1950, when export was resumed. Sunflower seed, first grown by Russian immigrants in 1900, now furnishes the country's most popular edible oil. There are more than 10m. olive trees, of which 48% are in Mendoza. 672,000 tonnes of groundnuts were produced in 1979 (mainly in Córdoba). Argentina is the world's largest source of tannin.

Flour-milling ranks second to refrigeration. In 1972 Argentine mills produced 427,000 tonnes of flour.

Fisheries. Fish landings in 1976 amounted to 250,400 tonnes. On 5 Jan. 1968 a government decree extended Argentina's territorial waters to 200 miles offshore. Fishing by foreign vessels inside this limit up to 12 miles from the coast would be granted.

INDUSTRY AND TRADE

Industry. Cotton yarn produced in 1972 amounted to 88,800 tonnes; mixed cotton yarn, 75,900; rayon, acetate and man-made fibre yarns, 52,150; wood pulp (1971), 206,000; paper and board (1971), 678,000; sulphuric acid, 242,000; caustic soda, 123,000; nitrogenous fertilizers, 38,000; plastics and resins, 146,000; fuel oils, 14.68m.; motor spirit, 4.5m. Cement output, 1972, was 5.5m. tonnes; pig-iron and ferro-alloys was 849,000 tonnes; crude steel, 2.15m. tonnes.

In Aug. 1974 the Government nationalized all distribution outlets of fuel and gas.

Trade Unions. According to the 1965 national census of workers' associations there are 502 trade unions with a total of nearly 1,764,700 paying members. Of these

unions 240 are connected with manufacturing industries, 5 with construction, 36 with gas, water, electricity and sanitary services, 70 with commerce, 62 with transport, storage and communications and 117 with other services. The majority of these unions are affiliated to the General Confederation of Labour. The economically active population was estimated at the end of 1964 to total 8,422,700, of which 6,623,700 were males and 1,799,000 females. The main groups are agriculture and fishing (19%), manufacturing industries (20%), commerce (12%) and other services (28%).

Legal status which confers authority to negotiate wage agreements and other privileges is granted by the Secretary of Labour (Ministry of Economy and Labour) to one union in each industry or activity. The minimum wage law provides for a twice-yearly adjustment of the minimum wage to take account of cost-of-living changes. On 1 May 1966 the minimum monthly wage for a family consisting of a man, wife and 2 children was fixed at 22,500 pesos and that for a single man at 15,750 pesos.

The Trade Union Law was revised by decree in 1966. Political activity within the unions is prohibited, finances are placed under government supervision and all strikes must be decided by a two-thirds majority obtained by secret ballot.

Commerce. Import values include charges for carriage, insurance and freight; export values are on a f.o.b. basis. Real values of foreign trade (in US\$1m.), exclusive of coin and bullion:

	1972	1973	1974	1975	1976	1977	1978	1979

Tourism. In 1974, 955,000 tourists visited Argentina, contributing about US\$110m. to the economy.

COMMUNICATIONS

Roads. In 1974 there were 309,086 km of national and provincial highways. The 4 main roads constituting Argentina's portion of the Pan-American Highway were opened to traffic in 1942. In 1976 there were 2.59m. cars and 1.1m. lorries and buses.

Railways. The system, based on the 1949 amalgamation of 18 government, British and French-owned railways, comprises 6 railways with a total route-km of 34,079 km (122 km electrified) on metre, 1,435 mm and 1,676 mm gauges. In 1980, Argentine Railways was mid-way through a 5-year modernization plan aimed at expanding its role as a bulk freight haulier and improving inter-city passenger services between principal cities. Over 10,000 km of uneconomic route has been closed under the plan.

Aviation. Commercial airlines flew a total of 26m. km in 1972, carrying 607,000 passengers. Lines operating international flights to and from Buenos Aires include BUA, Aerolineas Argentinas, Air France, Iberia, Alitalia, KLM, Swissair, SAS, Canadian Pacific Airlines, Lufthansa and PANAM.

Shipping. The merchant fleet, 31 Dec. 1973 (registered with Lloyd's), consisted of 1,453,000 GRT; traffic during 1971: vessels of 13-27m. GRT entered ports; 14m. tonnes of goods were unloaded and 10.6m. tonnes were loaded.

The state-owned ocean and river fleet (1963) included 216 vessels of over 1,000 GRT which totalled 1,200,061 GRT.

Post and Broadcasting. In 1949 the telephone service was nationalized: instruments numbered 2,584,801 in 1978. Privately owned exchanges operated 213,494 instruments. There were, in 1945, 4,382 post offices. There are (1964) 90 broadcasting stations and 10 television stations with 5.2m. viewers. Cable service to other Latin-American countries and US is provided by All-America Cables.

Cinemas (1972). Cinemas number 1,650, with seating capacity of 611,400.

Newspapers (1972). Daily newspapers numbered 162 with an aggregate daily circulation of 3,677,000. The largest circulation daily and 9 other newspapers have been closed since May 1974.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by federal and provincial courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The chief federal court is the Supreme Court, with 5 judges at Buenos Aires. Other federal courts are the appeal courts, at Buenos Aires, Bahía Blanca, La Plata, Córdoba, Mendoza, Tucumán and Resistencia. Each province has its own judicial system, with a Supreme Court (generally so designated) and several minor chambers. Trial by jury is established by the Constitution for criminal cases, but never practised, except occasionally in the provinces of Buenos Aires and Córdoba.

The death penalty was re-introduced in 1976 for the killing of government, military police and judicial officials, and for participation in terrorist activities.

The police force is centralized under the Federal Security Council.

Religion. The Roman Catholic religion is supported by the State.

In 1888, civil marriage was established in the republic. Divorce was made legal in Dec. 1954 but ceased to be so by a decree of 1 March 1956.

The Department of Worship is under the Ministry of Foreign Affairs. The tax exemption enjoyed by some religious establishments has been derogated. There are at present 2 Cardinal-Archbishops, 11 Archbishops and 46 bishops. The clergy has 10 seminaries. On 10 Oct. 1966 Argentina returned to the Vatican the right to appoint bishops and archbishops, who had been nominated by the Argentine Government since 1853.

Education. Education is free (subsidized by the central and provincial governments), secular and compulsory for children from 6 to 14 years of age. In 1970 the pre-primary schools had 11,639 teachers and 223,251 pupils; primary schools had 175,929 teachers and 3,385,790 pupils; secondary schools had 132,721 teachers and 974,826 pupils; higher schools had 22,477 teachers and 274,634 pupils. Recurring expenditure on education for the year was 1.6m. pesos, capital expenditure 166,820 pesos. This represented 14% of public expenditure, and 61% of that was spent in salaries.

There are national universities at Córdoba (founded 1613), with, 1966, 47,000 students; Buenos Aires (1821), with 81,000 students; La Plata (1897), with 57,000 students; Tucumán (1914), with 8,000 students; the National University of the Litoral, in Santa Fé, with branches in Rosario (1920), and in Corrientes (1920), with 15,000 students; the National University of Cuyo, with 14,700 students, and that of the North-East, with 4,300 students. In 1956 the Technological Institute in Bahía Blanca was raised to the status of 'Universidad del Sur'; (1968) 7,000 students. Since 29 July 1966 these formerly autonomous institutions are under the authority of the Ministry of Education.

Health. Free medical attention is obtainable from public hospitals. Many trade unions provide medical, dental and maternity services for their members and dependants. Welfare services are scanty in places distant from urban centres. A

Ministry of Social Welfare was set up in 1966. In 1971 there were 2,864 hospitals with 133,847 beds.

Population: 14.42m. (1979)

GNP per capita: US\$7,920 (1978)

HISTORY. On 1 Jan. 1901 New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania were federated under the name of the 'Commonwealth of Australia', the designation of 'colonies' being at the same time changed into that of 'states'—except in the case of Northern Territory, which was transferred from South Australia to the Commonwealth as a 'territory' on 1 Jan. 1911.

In 1911 the Commonwealth acquired from the State of New South Wales the Canberra site for the Australian capital. Building operations were begun in 1923 and Parliament was opened at Canberra on 9 May 1927 by HRH the Duke of York (afterwards King George VI). A further area at Jervis Bay was acquired in 1915.

Territories under the administration of Australia in Jan. 1977, but not included in it, comprise Norfolk Island, the territory of Ashmore and Cartier Islands, and the Australian Antarctic Territory (24 Aug. 1936), comprising all the islands and territory other than Adélie Land, situated south of 60° S. lat. and between 160° and 45° E. long.

The British Government transferred sovereignty in the Heard Island and McDonald Islands to the Australian Government on 26 Dec. 1947. Cocos (Keeling) Islands on 23 Nov. 1955 and Christmas Island on 1 Oct. 1958 were also transferred to Australian jurisdiction.

CONSTITUTION AND GOVERNMENT. *Federal Government:* Under the Australian Constitution legislative power in Australia is vested in a Federal Parliament, consisting of the Queen, represented by a Governor-General, a Senate and a House of Representatives. Under the terms of the constitution there must be a session of parliament at least once a year.

The Senate comprises 64 Senators (10 for each State voting as one electorate and as from Aug. 1974, 2 Senators respectively for the Australian Capital Territory and the Northern Territory). Senators representing the States are chosen for 6 years. The terms of Senators representing the Territories expire at the close of the day next preceding the polling day for the general elections of the House of Representatives. In general, the Senate is renewed to the extent of one-half every 3 years, but in case of disagreement with the House of Representatives, it, together with the House of Representatives, may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as practicable, of twice as many Members as there are Senators, the numbers chosen in the several States being in proportion to population as shown by the latest statistics, but not less than 5 for any original State. The numerical size of the House after the election in 1980 was 125, including the Members for Northern Territory and the Australian Capital Territory. The Northern Territory has been represented by 1 Member in the House of Representatives since 1922, and the Australian Capital Territory by 1 Member since 1949 and 2 Members since May 1974. The Member for the Australian Capital Territory was given full voting rights as from the Parliament elected in Nov. 1966. The Member for the Northern Territory was given full voting rights in 1968. The House of Representatives continues for 3 years from the date of its first meeting, unless sooner dissolved. Every Senator or Member of the House of Representatives must be a British subject, be of full age, possess electoral qualifications and have resided for 3 years within Australia. The franchise for both Houses is the same and is based on universal (males and females aged 18 years) suffrage. Compulsory voting was introduced in 1925. If a Member of a State Parliament wishes to be a candidate in a federal election, he must first resign his State seat.

Executive power in Australia is vested in the Governor-General, who is advised by an Executive Council. This is presided over by the Governor-General, and its

members hold office at his pleasure. All Ministers of State, who are members of the party or parties commanding a majority in the lower House, are members of the Executive Council under summons. A record of proceedings of meetings is kept by the Secretary to the Council. At Executive Council meetings the decisions of the Cabinet are (where necessary) given legal form, appointments made, resignations accepted, proclamations, regulations and the like made.

The policy of a ministry is, in practice, determined by the Ministers of State meeting without the Governor-General under the chairmanship of the Prime Minister. This group is known as the Cabinet. The Cabinet of the Liberal-National Country Party Coalition Government comprises the 14 senior Ministers. Other Ministers attend meetings of Cabinet only when required. Meetings of the full Ministry are held when necessary. There are 7 Standing Committees of the Cabinet comprising varying numbers of Cabinet and non-Cabinet Ministers. In Labor Governments all Ministers have been members of Cabinet. Cabinet meetings are private and deliberative and records of meetings are not made public. The Cabinet does not form part of the legal mechanisms of Government; the decisions it takes have, in themselves, no legal effect. The Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country.

The legislative powers of the Federal Parliament embrace trade and commerce, shipping, etc.; taxation, finance, banking, currency, bills of exchange, bankruptcy, insurance; defence; external affairs, naturalization and aliens, quarantine, immigration and emigration; the people of any race for whom it is deemed necessary to make special laws; postal, telegraph and like services; census and statistics; weights and measures; astronomical and meteorological observations; copyrights; railways; conciliation and arbitration in disputes extending beyond the limits of any one State; social services; marriage, divorce etc.; service and execution of the civil and criminal process; recognition of the laws, Acts and records, and judicial proceedings of the States. The Senate may not originate or amend money bills; and disagreement with the House of Representatives may result in dissolution or, in the last resort, a joint sitting of the two Houses. No religion may be established by the Commonwealth. The Federal Parliament has limited and enumerated powers, the several State parliaments retaining the residuary power of government over their respective territories. If a State law is inconsistent with a Commonwealth law, the latter prevails.

The Constitution also provides for the admission or creation of new States. Proposed laws for the alteration of the Constitution must be submitted to the electors, and they can be enacted only if approved by a majority of the States and by a majority of all the electors voting.

The 32nd Parliament was elected on 18 Oct. 1980.

House of Representatives (as at 25 Nov. 1980): Liberal Party, 54; National Country Party of Australia, 20; Australian Labor Party, 51; total 125.

State Government: In each of the 6 States (New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania) there is a State government whose constitution, powers and laws continue, subject to changes embodied in the Australian Constitution and subsequent alterations and agreements, as they were before federation. The system of government is basically the same as that described above for the Commonwealth—i.e., the Sovereign, her representative (in this case a Governor), an upper and lower house of Parliament (except in Queensland, where

the upper house was abolished in 1922), a cabinet led by the Premier and an Executive Council. Among the more important functions of the State governments are those relating to education, health, hospitals and charities, law, order and public safety, business undertakings such as railways and tramways, and public utilities such as water supply and sewerage. In the domains of education, hospitals, justice, the police, penal establishments, and railway and tramway operation, State government activity predominates. Care of the public health and recreative activities are shared with local government authorities and the Federal Government, social services other than those referred to above are now primarily the concern of the Federal Government, and the operation of public utilities is shared with local and semi-government authorities.

Administration of Territories. Since 1911, responsibility for administration and development of the Australian Capital Territory has been vested in Federal Ministers and Departments. In 1930, the ACT Advisory Council was established, with both elected and appointed Members, to advise the Minister on administration of the Territory.

Late in 1974 the Government replaced the ACT Advisory Council with a Legislative Assembly of eighteen Members all of whom are elected and on 29 June 1979 the Legislative Assembly became the House of Assembly. While the Assembly has been accorded the forms of a legislature, it continues to perform an advisory function for the Minister for the Capital Territory.

On 1 July 1978 the Northern Territory of Australia became a self-governing Territory with expenditure responsibilities and revenue-raising powers broadly approximating those of a State, although the Territory is not a State under the Constitution.

Under self-government the Legislative Assembly and Ministers of the Northern Territory have responsibility in the areas of insurance, banking, taxation, provision of credit and assistance; Public Service of the Territory; maintenance of law and order and the administration of Justice etc.; civil liberties; markets and marketing; inquiries and administrative reviews; consumer affairs; sales and leases of goods and supply of services etc.; prices and rent control; industry and regulation of businesses and professions; tourism; printing and publishing; labour relations and industrial safety; mining and minerals; land and land use; transport; environment protection and conservation; fire prevention; water resources; energy planning, public utilities and public works; local government; housing, education, health, welfare etc.; censorship; Supreme Court, agreements between the Territory and the Commonwealth, State or States.

Local Government. The system of municipal government is broadly the same throughout Australia, although local government legislation is a State matter.

Each State is sub-divided into areas known variously as municipalities, cities, boroughs, towns, shires or district councils, totalling about 900. Within these areas the management of road, street and bridge construction, health, sanitary and garbage services, water supply and sewerage, and electric light and gas undertakings, hospitals, fire brigades, tramways and omnibus services and harbours is generally part of the functions of elected aldermen and councillors. The scope of their duties, however, differs considerably, for in all States the State Government, either directly or through semi-government authorities, also carries out some or all of these types of services.

In some instances, *e.g.*, in New South Wales, a number of local government authorities combine to conduct a public undertaking such as the supply of water or electricity.

DEFENCE. The Minister for Defence has responsibility under legislation for the control and administration of the Defence Force. The Chief of Defence Force Staff is vested with command of the Defence Force. He is the principal military adviser to the Minister. The Secretary, Department of Defence is the Permanent Head of the Department. He is the principal civilian adviser to the Minister. The Chief of Defence Force Staff and the Secretary are jointly responsible for the administration of the Defence Force except with respect to matters falling within the command of the

Defence Force or any other matter specified by the Minister.

The Chief of Naval Staff, the Chief of the General Staff and the Chief of the Air Staff command the Navy, Army and Air Force respectively. They have delegated authority from the Chief of Defence Force Staff and the Secretary to administer matters relating to their particular Service.

The structure of Defence is characterized by 3 organizational types: (i) A Central Office comprising 5 groups of functional orientated Divisions: Strategic Policy and Force Development; Supply and Support; Manpower and Financial Services; Management and Infrastructure Services; and, Defence Science and Technology; (ii) the 3 Armed Services of the Defence Force, each having a Service Office element in addition to the command structure; and (iii) a small number of outrider organizations concerned with such specialist fields as intelligence and natural disasters.

Army. Overall organization and financial control of the Australian Army is vested in the Chief of General Staff. Under the Defence Force Re-organisation Act, which received the Royal Assent on 9 Sept. 1975, the Military Board, which was previously the controlling body of the Army, was abolished. The Act became effective on 1 Feb. 1976. A functional command structure, Headquarters Field Force Command, Headquarters Logistic Command, and Headquarters Training Command, with Headquarters in military districts, was introduced in 1973.

The strength of the Army was 32,298 in 1980. There is emphasis in the field force organization on the combat element and high-priority logistic units to meet the requirements for limited war and tropical warfare with light air-portable formations. The Field Force is organized on the divisional structure, on the basis of 6 battalions organized in 3 task forces each with combat and logistic support.

There is a volunteer Regular Army Emergency Reserve of 103 former members of the Regular Army, and the effective strength of the Army Reserve in 1980 was 22,718.

Training for commissioned rank is carried out at the Royal Military College and the Officer Cadet School. The Royal Military College was established in Canberra in 1911, to train young men from Australia and New Zealand for the Regular Armies of those two countries. The college, which is affiliated with the University of New South Wales, accepts young men between the ages of 17 and 20 who are qualified to enter university. The course covers 4 years and leads to the award of the university's degrees of Bachelor of Arts and Bachelor of Science.

The Officer Cadet School was established at Portsea, Victoria, in 1952. The course there takes 11 months.

Staff and command training is, in the main, carried out at the Australian Staff College, Queenscliff, Victoria and the Land Warfare Centre, Canungra, Queensland.

Expenditure on Army capital equipment was \$A74.22m. in 1978-79, \$A63.35m. in 1979-80.

Navy. The overall control of the Royal Australian Navy is vested in the Chief of Naval Staff assisted by the Deputy Chief of Naval Staff with the Chief of Naval Personnel, the Chief of Naval Technical Services and the Chief of Naval Material. Under the Defence Re-organisation Act effective from 1 Feb. 1976 the Naval Board was abolished. The command, operation and administration of the Fleet is the responsibility of the Flag Officer Commanding HM Australian Fleet. The Naval Support Commander, formerly the Flag Officer Commanding East Australia area, is responsible for the material support for the fleet.

There are also 6 British-built 'Oberon' class submarines, *Onslow*, *Otway*, *Ovens* and *Oxley* (completed in 1967-69) and *Orion* and *Otama* (completed in 1977-78). 3 US-built guided-missile destroyers, *Brisbane*, *Hobart* and *Perth* (completed in 1965-68), 1 'Daring' class destroyer, *Vampire* now used as a training ship (sister ship *Vendetta* paid off 1979), 6 destroyer escorts or 'Type 12' fast anti-submarine frigates, 3 oceanographic research and survey ships, 2 minehunters, 1 minesweeper, a destroyer tender, 12 attack class patrol craft, 6 landing craft, 1 fleet oiler, 14 auxiliary vessels, 8 service craft and 55 workboats, etc. An oceanographic research ship (*Cook*) was commissioned in Oct. 1980. HMAS *Jervis Bay* (formerly the ANL ro-ro vessel *Australian Trader*) was commissioned in 1977 as the RAN's training ship. In 1980 it was announced a fourth frigate, *Darwin*, will be delivered in 1984. In Aug. 1974 the Minister for Defence signed for the purchase of 2 'patrol frigates' of 3,500 tons with a length of 445 ft to be completed in US shipyards in 1981-82. This order was later increased to 3, the ships to be named *Adelaide*, *Canberra* and *Sydney*. In Aug. 1975 the Minister for Defence announced plans to provide a replacement fleet tanker for HMAS *Supply* in 1985. The vessel will be similar to the French 'Durance' class design and will be built by Vickers Cockatoo Dockyard in Sydney. A second 'Durance' class ship will also be built. The first was named *Success*. Fifteen patrol boats to replace the 'Attack' class are to be built over a 6-year period. The first, HMAS *Fremantle*, was built by Brooke Marine Ltd at Lowestoft, England, arrived in Australia in Aug. 1980. The remaining 14 are to be built by North Queensland Engineers and Agents at Cairns with the last due to be launched in 1985. A further 10 patrol boats will be built after the completion of the 'Fremantle' class projects. A new amphibious ship (LSH), HMAS *Tobruk*, based on an update of the British 'Sir Bedivere' class is nearing completion at Carrington slipways, Newcastle. She is due to be commissioned in mid-1980 and the acquisition of replacement patrol craft towards the end of the decade.

Naval dockyards are at Garden Island, Sydney, and Williamstown, Victoria. Naval shipbuilding is carried out at Williamstown, at Cockatoo Dock and Engineering Company, Sydney, or by private contract. The main repair base and store depots are at Sydney.

The main training establishments are HMAS *Cerberus* in Victoria, HMAS *Watson*, HMAS *Penguin* and HMAS *Nirimba* at Sydney, HMAS *Albatross* (Naval Air Station) at Nowra, NSW, and HMAS *Creswell* (Royal Australian Naval College) at Jervis Bay, ACT. Training for junior recruits is carried out at HMAS *Leeuwin* in Fremantle, WA, and Reserve training in naval establishments in all major seaboard capital cities.

The Fleet Air Arm was established in 1948. At 30 June 1980 it had 74 aircraft and consisted of 6 squadrons the operational elements of which were 1 Skyhawk, 1 Tracker and 1 Sea King squadrons embarked in HMAS *Melbourne*. The Wessex, Iroquois and Bell 206B helicopters are used in the utility search and rescue role. The 2 HS 748 aircraft are now employed in the electronic warfare training role.

The serving strength at 30 June 1980 totalled 16,961 personnel including 967 WRANS.

Navy estimates 1977-78, \$A565,172,000; 1978-79, \$A676,347,000; 1979-80, \$A851,849,000; 1980-81, \$A1,048,782,000.

Air Force. Command of the Royal Australian Air Force is vested in the Chief of the Air Staff (CAS) assisted by the Deputy Chief of the Air Staff, Chief of Air Force Personnel, Chief of Air Force Technical Services, Director-General Supply—Air Force and Assistant Secretary Resources Planning.

The CAS administers and controls RAAF units through two commands: Operational Command and Support Command. Operational Command is responsible to the CAS for the command of operational units and the conduct of their operations within Australia and overseas. Support Command is responsible to the CAS for training of personnel, and the supply and maintenance of service equipment.

Flying establishment comprises 16 squadrons, of which 2 are equipped with 20 F-111C RF 111-C strike reconnaissance aircraft. Of the others, 1 is equipped with Canberras for target flying and photographic duties, 3 with missile-armed Mirage III-O Mach-2 fighters, 2 with Orion maritime reconnaissance aircraft. There are eight transport squadrons, two with Hercules turboprop transports, 1 of the squad-

rons also operates Boeing 707 aircraft, 1 with Caribou STOL transports, 1 with a mix of fixed-wing Caribou and Iroquois helicopters, 1 with Boeing Vertol CH-47C medium lift helicopters, 2 with Iroquois helicopters, and a special transport squadron equipped with BAC One-Eleven, Mystère 20 and HS 748 aircraft. Training aircraft include piston-engined Airtrainers, built in New Zealand, Aermacchi MB 326H jets for pilot training, and HS 748 aircraft for navigator training.

Training for commissioned rank is carried out at the RAAF Academy and Officers' Training School, both located at Point Cook, Victoria. Other major training activities which lead to commissioned rank include basic aircrew training and technical and commercial cadet schemes. Basic ground training to tradesman level is conducted at RAAF technical training schools. Higher command and staff training is, in the main, carried out at the RAAF Staff College, Fairbairn, A.C.T.

The authorized service manpower ceiling for the Permanent Air Force was 22,071 at 30 June 1980. Combat aircraft totalled about 100.

Budget. In 1929, under a financial agreement between the Federal Government and States, approved by a referendum, the Federal Government took over all State debts existing on 30 June 1927 and agreed to pay \$A15-17m. a year for 58 years towards the interest charges thereon, and to make substantial contributions towards a sinking fund to extinguish existing debts in 58 years and future debts in 53 years. The Federal Government arranges or must approve all borrowing for both Federal Government and States through a loan council consisting of representatives of Federal Government and State governments. Since 1942 the Federal Government alone has levied taxes on incomes. In return for vacating this field of taxation, the States are reimbursed by a grant from the Federal Government out of revenue received.

Currency. On 14 Feb. 1966 Australia adopted a system of decimal currency. The currency unit, the *dollar* (\$) is divided into 100 *cents*. The transition period ended on 31 July 1967. Decimal system notes have been issued in denominations of \$1, 2, 5, 10, 20 and 50. Coins have been issued in denominations of 50, 20, 10, 5 and 2 cents and 1 cent.

Australian notes, issued by the note-issue department of the Reserve Bank, are legal tender throughout Australia. The total value of notes in circulation on 25 June 1980 was SA4,586.1m., of which SA4,085.2m. were held by the public. Coins are minted by the Royal Australian Mint and distributed by the Reserve Bank.

Banking. The banking system in Australia comprises:

(a) The Reserve Bank of Australia. This is the central bank which in addition to its central banking business (including the note-issue department) provides special financing facilities through the rural credits department for the processing, manufacture and marketing of primary produce.

(b) Seven major trading banks: (i) The Commonwealth Trading Bank of Australia; (ii) 6 private trading banks: The Australia and New Zealand Banking Group Ltd. The Bank of Adelaide, the Bank of New South Wales, The Commercial Bank of Australia Ltd. The Commercial Banking Company of Sydney Ltd and The National Bank of Australasia Ltd.

(c) Other trading banks: (i) 3 State Government banks - The Rural Bank of New South Wales, the State Bank of South Australia, and the Rural and Industries Bank of Western Australia; (ii) one joint stock bank - The Bank of Queensland Ltd, formerly The Brisbane Permanent Building and Banking Co. Ltd, which has specialized business in one district only; (iii) branches of 2 overseas banks - the Bank of New Zealand and the Banque Nationale de Paris, which are mainly concerned with financing trade, etc., between Australia and overseas countries.

(d) The Commonwealth Development Bank of Australia.

(e) Savings Banks.

(f) The Australian Resources Development Bank Ltd opened on 29 March 1968. Its main objective is to assist Australian enterprises in the development of Australia's natural resources, through direct loans and equity investment or by re-financing loans made by trading banks. The bank is jointly owned by the 7 major Australian trading banks.

(g) The Primary Industry Bank of Australia Ltd commenced operations on 22 Sept. 1978. The initial equity capital of the bank consists of nine shares of \$A625,000 each. Eight shares are held by the Australian Government and the 7 major trading banks while the ninth share is held equally by the 4 State banks. The main objective of the bank is to facilitate the provision of loans to primary producers on longer terms than are otherwise generally available. The role of the bank is restricted to re-financing loans made by banks and other financial institutions.

The Reserve Bank's functions and responsibilities derive from the Reserve Bank Act 1959 and the Banking Act 1959, which came into effect in 1960. They had their origins, however, in the development of the central banking role of the Commonwealth Bank, which was established in 1911 as a Government savings and trading bank.

Control of the Australian note issue was transferred from the Commonwealth Treasury to a Notes Board in 1920 and, in 1924, to the Bank. The Commonwealth Bank Act 1945 formally constituted the Bank as a central bank, and these powers were carried through into the 1959 Act establishing the Reserve Bank.

The Acts of 1959 provided for: (i) the separation of the central bank from the Commonwealth group of banking institutions and its reconstitution as the Reserve Bank of Australia; (ii) the establishment of an entirely separate Commonwealth Banking Corporation, with responsibilities for the non-central-banking elements that had developed from within the original Commonwealth Bank—namely the Commonwealth Trading Bank, the Commonwealth Savings Bank and the Commonwealth Development Bank, the latter being basically an amalgamation of the Mortgage Bank and Industrial Finance Department of the Commonwealth Bank.

At 30 June 1980 the capital of the Reserve Bank totalled \$A49.4m. and reserve funds (including a special reserve for IMF special drawing rights) \$A4,402m. The capital was distributed as follows: Central banking business, \$A40m.; rural credits department, \$2,058m. Reserve funds held were: Central banking business, \$A9m.; rural credits department, \$A64m.; rate issue department, \$A2,280. Profits for the year ended 30 June 1980 (including all departments) amounted to \$A251m.

Particulars as at 30 June 1979 for the banks under the control of the Commonwealth Banking Corporation: Commonwealth Trading Bank, capital, \$A14.9m.; reserve fund, \$A48m.; profits for the year, \$A27m. Commonwealth Development Bank, capital, \$A61.7m.; reserve fund, \$A109m.; profits for the year, \$A5m. Commonwealth Savings Bank, reserve fund, \$A262m.; profits for the year, \$A45m.

At 30 June 1980 the 13 trading banks operating in Australia provided full banking facilities at 5,088 branches and 1,009 agencies all over Australia.

The weekly average of deposits in Australia with all trading banks (under (b) and (c) above) during June 1980 amounted to \$A25,647m.; the average of advances made by the banks was \$A20,402m.; the average of total assets was \$A34,076m.

At 30 June 1980, 13 savings banks were operating in Australia. These are the 7 major savings banks being wholly owned subsidiaries of the trading banks; the Bank of New Zealand Saving Bank Ltd; and operating, with certain exceptions, in all States and Territories; the State Savings Banks in Victoria and South Australia; the Rural and Industries Bank of Western Australia, and 2 Trustee Savings Banks in Tasmania. At 30 June 1980 these savings banks provided savings facilities at 5,677 branches and 11,921 agencies throughout Australia. At end of June 1980 they held deposits in Australia amounting to \$A21,261m.

In 1979 there were 47 companies registered under the Life Insurance Act, 1945, transacting life insurance business in Australia; in addition there were 2 State government institutions. During 1978-79 premiums received were \$A1,808m. and claims, etc., paid were \$A1,199m.

Labour. The majority of wage and salary earners in Australia have their minimum wages and conditions of work prescribed in awards of industrial arbitration authorities established under federal and State legislation. However, in some States, some conditions of work (e.g., normal weekly hours of work, long-service leave, annual leave) are set down in State legislation. Practically all employees in Australia have a standard working week of 40 hours or less; paid annual leave of at least 4 weeks; and paid long-service leave (i.e., leave granted to workers who remain with one employer over an extended period of time and in certain other areas) of at least 13 weeks after 15 years' continuous service. For most occupations equal pay for males and females has been granted.

In addition to the minimum rates of pay for a standard working week prescribed in awards of industrial arbitration authorities, many wage-earners are in receipt of over-award pay and payments for overtime. At the end of Oct. 1979 it was estimated that the average weekly earnings of adult males (other than managerial, professional and higher supervisory staff) in full-time private and government employment was \$A242.60 and average weekly hours 40.9.

Employees in all States are covered by workers' compensation legislation and by certain industrial award provisions relating to work injuries.

During 1979 industrial disputes involving stoppages of work of 10 man-days or more accounted for 3,964,400 working days lost. In these disputes 1,862,900 workers were involved.

The following table shows estimates (in 1,000) of the civilian population, by employment status. The estimates are derived by the ABS from the population survey which is based on a sample of dwellings, carried out by personal interview, covering about two-thirds of 1% of the population of Australia. Prior to Feb. 1978, when monthly surveys were introduced, the surveys were conducted quarterly. The labour force estimates for Feb. 1978 and subsequent months are based on population estimates derived from the 1976 Population Census, adjusted for under-enumeration and were obtained using a new sample and revised questionnaire. Estimates for earlier periods have been revised to make them comparable with current surveys.

Trade Unions. At the end of 1979 there were 315 trade unions reporting in Australia with an estimated membership of 2,855,100. About 55% of wage and salary earners were estimated to be members of unions. In 1979 there were 32 unions with fewer than 100 members and 7 unions with 80,000 or more members. The Australian customs tariff provides for preferences to goods produced in and shipped from certain specified countries such as UK, Canada, New Zealand and Ireland. Preferences occur as a result of reciprocal trade agreements between Australia and these countries.

Australia also has bilateral agreements with a number of other countries guaranteeing reciprocal treatment in matters of trade.

The Australia-New Zealand free-trade agreement came into force on 1 Jan. 1966 in certain scheduled goods.

In addition, Australia is a signatory to the multilateral General Agreement on Tariffs and Trade (GATT).

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The judicial power of the Commonwealth of Australia is vested in the High Court of Australia (the Federal Supreme Court), in the Federal courts created by the Federal Parliament (the Federal Court of Australia, the Family Court of Australia, the Federal Court of Bankruptcy and the Australian Industrial Court) and in the State courts invested by Parliament with Federal jurisdiction.

High Court. The High Court consists of a Chief Justice and 6 other Justices, appointed by the Governor-General in Council. The Constitution confers on the High Court original jurisdiction, *inter alia*, in all matters arising under treaties or affecting consuls or other foreign representatives, matters between the States of the Commonwealth, matters to which the Commonwealth is a party and matters between residents of different States. Federal Parliament may make laws conferring original jurisdiction on the High Court, *inter alia*, in matters arising under the Constitution or under any laws made by the Parliament. It has in fact conferred jurisdiction on the High Court in matters arising under the Constitution and in matters arising under certain laws made by Parliament.

The High Court may hear and determine appeals from its own Justices exercising original jurisdiction, from any other Federal Court, from a Court exercising Federal jurisdiction and from the Supreme Courts of the States. It also has jurisdiction to hear and determine appeals from the Supreme Courts of the Territories. No appeal from the High Court to the Privy Council is permitted on questions as to the limits *inter se* of the constitutional powers of the States or the Commonwealth and the States except on the certificate of the High Court. No appeal to the Privy Council, whether special or otherwise, is permitted from a decision of Federal Courts (not being the High Court) or of the Supreme Court of a Territory. Appeal from the High Court to the Privy Council by special leave of the Privy Council is possible only in a matter in which the decision of the High Court was a decision that (a) was given on appeal from a decision of a Supreme Court of a State given otherwise than in the exercise of Federal jurisdiction and (b) did not involve the interpretation of the Constitution, a law made by the Federal Parliament or an instrument (including an ordinance, rule, regulation or by-law) made under a law made by the Parliament.

Other Federal Courts. Since 1924, 4 other Federal courts have been created to exercise special Federal jurisdiction. These are the Federal Court of Australia, the Family Court of Australia, the Australian Industrial Court (*see below*) and the Federal Court of Bankruptcy. The Federal Court of Australia, which was established in 1977 to exercise jurisdiction in a number of matters that were previously invested in either the High Court, the Australian Industrial Court, the Federal Court of Bankruptcy or State and Territory Supreme Courts, exercises both original and appellate jurisdiction. The Federal Court will ultimately take over all the original jurisdiction now conferred on the Australian Industrial Court and the Federal Court of Bankruptcy, as well as exercising jurisdiction under other Acts, and will also act as a court of appeal from State and Territory courts in relation to Federal matters. Appeal from the Federal Court to the High Court will be by way of special leave only. The State Supreme Courts have also been invested with Federal jurisdiction in bankruptcy.

State Courts. The general Federal jurisdiction of the State courts extends, subject to certain restrictions and exceptions, to all matters in which the High Court has jurisdiction or in which jurisdiction may be conferred upon it. In matters of non-Federal jurisdiction a right of appeal is still possible, as a matter of law, from the State courts direct to the Privy Council.

Industrial Tribunals. The 2 major Federal industrial tribunals of Australia are at present the Australian Industrial Court, constituted by judges, and the Australian Conciliation and Arbitration Commission, constituted by presidential members (with the status of judges) and commissioners. The Australian Industrial Court deals with questions of law, the judicial interpretation of awards, imposition of penalties, etc. Whereas the Commission's functions include settling industrial disputes, making awards, determining the standard hours of work, wage fixation, etc.

Religion. Under the Constitution the Commonwealth cannot make any law to establish any religion, to impose any religious observance or to prohibit the free exercise of any religion, nor can it require a religious test as qualification for office or public trust under the Commonwealth. The figures in the table refer to those religions with the largest number of adherents at the census of 1976. The census question on religion was not obligatory, however.

Education. Under the Federal Constitution education is a responsibility of the six State Governments, which administer their own systems of primary, secondary and technical education through government departments responsible to State Ministers. In each State, except New South Wales and South Australia, a single Education Department is responsible for these three levels of education. In New South Wales and South Australia the Education Department concentrates on primary and secondary education and a separate department is responsible solely for technical and further education.

The Australian Government provides education services in the Australian Capital Territory, Norfolk Island, Christmas Island and the Cocos (Keeling) Islands. From 1 July 1979 education in the Northern Territory became the responsibility of the Northern Territory Government. The Australian Government also has special responsibilities for student assistance, international relations in education and for supplementing the general educational provisions to meet the special needs of the Aboriginal people and migrants.

The Australian Constitution empowers the Australian Government to make grants to the States and to place conditions upon such grants. This power has been used to provide financial assistance to the States specifically for educational purposes. There are two national Education Commissions which advise the Australian Government on the needs of educational institutions throughout Australia for the purpose of financial assistance. The Schools Commission, established in 1973, advises on the provision of financial assistance to the States for government and non-government schools. The Tertiary Education Commission, which was established in 1977 to replace three former commissions (the Universities Commission, the Commission on Advanced Education and the Technical and Further Education Commission), advises on the provision to the States of total funding for universities and colleges of advanced education and of supplementary financial assistance for their institutions of technical and further education.

School attendance is compulsory throughout Australia between the ages of 6 and 15 years (16 years in Tasmania), at either a government school or a recognized non-government educational institution. In all States and Territories the opportunity for 4-year-olds to attend pre-schools, either government or voluntary organizations, is becoming more widely available. Government schools are usually co-educational and comprehensive. Non-government schools are usually single-sex and associated with religious denominations. Tuition is free at government schools, but fees are normally charged at non-government schools.

The following is a summary for 1979 of primary and secondary school education:

¹ Full-time teachers plus the full-time equivalent of part-time teaching. Pre school teachers in primary schools in Western Australia, Tasmania and Northern Territory were excluded for the first time in 1979.

² School census August. Students enrolled in pre-primary education undertaken on a sessional basis or in a recognized pre-school class of a primary secondary school in Western Australia. Tasmania and Northern Territory have been excluded for the first time in 1979.

Post-secondary education takes place at institutions of technical and further education, colleges of advanced education and universities. Education in post-secondary institutions has been free since 1974. The majority of institutions of technical

and further education are operated by State authorities and offer vocational and personal-interest courses to students, most of whom are part-time and employed. Universities and colleges of advanced education are autonomous institutions, the colleges tending to offer courses which have a more applied emphasis and are more vocationally oriented than university courses.

The major part of technical and further education (TAFE) in Australia is provided in a network of government-administered institutions. In addition, TAFE vocational courses are conducted by certain colleges of advanced education and by agricultural colleges in New South Wales and Victoria, and a large number of bodies, both statutory and voluntary, participate in the provision of adult education programmes. Enrolments in 1979 numbered 888,228 (48,703 full-time, 780,276 part-time and 59,249 external enrolments).

Teacher education usually takes place in colleges of advanced education, though a substantial number of secondary teachers and a few primary teachers receive their pre-service education in a university. Government school teachers are recruited by the State departments of education, and in the Australian Capital Territory and the Northern Territory by the Commonwealth Teaching Service. Non-government schools recruit their own teachers.

The Australian Government provides a number of schemes of assistance for students to facilitate access to education. The Secondary Allowances Scheme aims to help parents with a limited income to keep their children at school for the final 2 years of secondary education. The Assistance for Isolated Children Scheme provides special support to families whose children are isolated from schooling or are handicapped. The Adult Secondary Education Assistance Scheme provides assistance for mature-age students undertaking full-time the final year of matriculation studies. The Tertiary Education Assistance Scheme is a means-tested scheme to assist students enrolled for full-time study in approved courses at post-secondary institutions. Allowances are also available for post-graduate study and overseas study. Aboriginal students are eligible for assistance under the Aboriginal Secondary Grants Scheme and the Aboriginal Study Grants Scheme. The States also offer various schemes of assistance, principally at the primary and secondary levels.

There are a number of bodies at the national level which have an important co-ordinating, planning or funding role. These include: the Australian Education Council, comprising the Federal and State Ministers of Education, the Conference of Directors-General of Education, the Education Research and Development Committee and the Curriculum Development Centre.

Total expenditure on education in Australia in 1978-79 was estimated at \$A6,172m.

Social Security. The National Welfare Fund finances all Federal Government social and health benefits except Medibank, repatriation and certain other payments primarily of a capital nature. Total expenditure from the Fund during 1977-78 was \$A7,691m.

The following summarizes the rates and conditions of the major benefits provided at June 1979. For expenditure on these benefits during 1978-79, see table on p. 104.

Age and invalid pensions—men 65 years of age or more and women 60 years of age or more may receive an age pension. Persons 16 years of age or more who are permanently blind or permanently incapacitated for work to the extent of at least 85% may receive an invalid pension. To be paid a pension, a person must have lived in Australia for a specified period and, unless permanently blind or over 70 years of age, also satisfy an income test. The maximum rates are \$A57.90 a week in the case of the 'standard' rate pension, and in the case of the 'married' rate pension, \$A96.50 a week (\$A48.25 each). These amounts are subject to income tax. Additional amounts, subject to an income test, are paid to pensioners with dependent children. Pensioners, free of the income test, are paid to permanently blind persons and to persons 70 years of age and over. Supplementary assistance of up to \$A5 a week may be paid to a pensioner paying rent or for lodging. Supplementary assistance and additional pension for children are not taxable.

Widows' pensions—widows, divorcees, certain deserted wives, women who have been the dependant of a man for 3 years immediately prior to his death and women whose husbands are in mental hospitals or prison may, if they satisfy a residence requirement and a means test, receive a widow's pension. Such women with at least one dependent child may be paid a pension of up to \$A57.90 a week plus a mother's allowance of \$A4 a week (\$A6 if she has an invalid child requiring full-time care or a child under 6 years) plus \$A7.50 a week for each child. Persons who pay rent may also receive supplementary assistance of up to \$A5 a week. Pensions, but not mothers' allowances, additional pension for children or supplementary assistance, are subject to income tax.

Supporting parents benefit—unmarried mothers or fathers and parents who are deserted *de facto* partners, *de facto* wives of prisoners and separated spouses ineligible for widow's pension may, if they satisfy a residence requirement and a means test, receive supporting parents benefit. It is payable at the same rate as the widow's pension payable to a widow with one or more children in her care and is subject to the same income test.

Family allowance—is paid without income test to families with children under 16 years or eligible student children aged 16 years or more but under 25 years. It is not subject to income tax. Weekly rates payable are: 1 child, \$A3.50; 2 children, \$A8.50; 3 children, \$A14.50; 4 children, \$A20.50, an additional \$A7 for each additional child after the fourth. For each child or eligible student in an approved institution, the rate is \$A5 per week.

Handicapped child's allowance—payable to parents or guardians of severely physically or mentally handicapped children in the family home and needing constant care and attention. The allowance is \$A15 per week and is free of income test.

Double orphan's pension—the guardian of a child under 16 years of age or of a full-time student under 21, both of whose parents are dead, or one of whose parents is dead and the whereabouts of the other parent unknown, may receive double orphan's pension of \$A11 a week. The payment is not subject to an income test.

Unemployment and sickness benefits—are paid, subject to an income test, to persons between the ages of 16 and 65 (males) and 16 and 60 (females) who are temporarily unemployed, or temporarily incapacitated and thereby suffer loss of income. The maximum rates of benefit are \$A51.45 (single) and \$A96.50 (married). To be granted benefit a person must have resided in Australia for at least 12 months preceding his claim or intend to reside permanently in Australia. For unemployment benefit purposes unemployment must not be due to direct participation in a strike.

Medical legislation was passed in 1973 authorizing the Commonwealth Government to pay medical benefits and to enter into agreements with State Governments for the provision of free hospital services. The medical side of this scheme commenced on 1 July 1975 in all States and Territories, and provided a benefit of 85% of the schedule fee for medical services and certain other services, with a maximum patient contribution of \$A5 for any one service where the schedule fee was charged. The hospital side of the programme was introduced in the States and Territories at varying times between 1 July 1975 and 1 Oct. 1975. Patients could elect to be admitted to recognized public hospitals as private patients if they so wished; private patients were treated by the medical practitioner of their choice and were required to pay for their hospital accommodation.

From 1 Oct. 1976 free medical and hospital cover applied only to persons below a certain income level. Persons above that level contributed through a taxation levy or through payments for membership of a private health insurance fund.

From 1 July 1978 medical benefits were reduced to 75% of the schedule fee with a maximum patient payment of \$A10 for any one service. Benefits for pensioners with Pensioner Health Benefit entitlements remained at 85% of the schedule fee or the schedule fee less \$A5, whichever was the greater.

From 1 Nov. 1978, Commonwealth medical benefits were reduced to cover 40% of schedule medical fees with a maximum patient contribution of \$A20 for any one service where the schedule fee was charged. The arrangements existing for pensioners with Pensioner Health Benefit cards and their dependants were unchanged. Doctors were able to bill the Government direct for services provided to patients indentified by them as being disadvantaged and received 75% of the schedule fee as payment for the service. On 1 Sept. 1979 the 40% Commonwealth benefit was deleted, but benefits were payable for the amount (if any) by which the schedule fee exceeds \$A20. The special arrangements for eligible pensioners and disadvantaged persons remained unchanged.

Hospital. The system of standard hospital coverage, by which everyone without private insurance for hospital benefits is entitled to free standard ward accommodation in recognized hospitals with treatment by doctors engaged by the hospital continued without alteration. In Queensland those with private insurance for hospital benefits are also eligible for free standard ward coverage if they so choose.

Nursing Home Benefits. Basic nursing home benefits, which are reviewed annually, are available to qualified patients in approved nursing homes. A supplementary benefit of \$A6 a day is paid in respect of patients who require and receive extensive nursing home care. Patients who are insured with a registered hospital benefits organization receive the benefits, basic and supplementary, from the organization. Patients who are not insured are covered for benefit entitlements by the Commonwealth.

Nursing Home Type Patients in Hospitals. During 1980 some States and Territories introduced new arrangements whereby after 60 days of hospitalization non-acute, nursing home type patients are required to make a personal, uninsurable contribution towards their care and accommodation in the same manner as similar patients in nursing homes. It is anticipated that other States/Territories will follow early in 1981.

Domiciliary Nursing Care Benefit. A domiciliary nursing care benefit is payable at the rate of \$A42 a fortnight to persons who are willing and able to care, in their own homes, for aged parents or immediate relatives who would otherwise qualify for nursing home benefits. The basic criteria for the payment of the benefit are that the patient must be aged 16 years or over and be in need of continuing nursing care and receiving regular visits by a registered nurse. This benefit is not subject to a means test and is payable, under the National Health Act, in addition to any entitlements that persons may have under the Social Services Act or the Repatriation Act for pensions or other supplementary allowances.

Pharmaceutical Benefits. A comprehge of drugs and medicinal preparations is available. In general, a fee of \$A2.75 is charged for each prescription.

Service pensions—are paid, subject to a means test, to veterans on the grounds of: (a) age and (b) permanent unemployability. Wives of service pensioners are also eligible provided that they do not receive pensions from the Department of Social Security.

Disability pensions—are not subject to an income test and may be paid to veterans who have incurred incapacity as a result of service, and a separate allowance may be paid to their dependants.

AUSTRALIAN TERRITORIES

AUSTRALIAN CAPITAL TERRITORY

HISTORY. The area, now the Australian Capital Territory, was first visited by white men in 1820 and settlement commenced in 1824. Until its selection as the seat of government it was a quiet pastoral and agricultural community.

AREA AND POPULATION. The area of the Australian Capital Territory is 2,432 sq. km (including Jervis Bay area). The population at 30 June 1979 was 222,300. Previous census population:

	Males	Females	Total		Males	Females	Total
1911	992	722	1,714	1961	30,858	27,970	58,828
1921	1,567	1,005	2,572	1966	49,991	46,041	96,032
1933	4,805	4,142	8,947	1971	73,945	71,629	145,574
1947	9,092	7,813	16,905	1976	103,236	100,113	203,349
1954	16,229	14,086	30,315				

(Figures before 1961 exclude particulars of full-blood Aborigines.)

CONSTITUTION AND GOVERNMENT. The Constitution of Australia provided (Sec. 125) that the seat of government should be selected by parliament and that it should be within New South Wales but at least 161 km from Sydney. The present area was surrendered by New South Wales and accepted by the Australian Government from 1 Jan. 1911. In 1915 an additional 73 sq. km at Jervis Bay was transferred from New South Wales to the Commonwealth. In 1911 an international competition was held for the city plan. The plan chosen was that of W. Burley Griffin, of Chicago. Construction was delayed by the First World War, and it was not until 1927 that, with the transfer of parliament and certain departments, Canberra became in fact the seat of government. Most Australian Government departments now have their headquarters in Canberra.

The general administration of the Territory is in the hands of the Minister for the Capital Territory, but certain specific services are undertaken by other Federal Government Departments and Authorities. Since Sept. 1974 the Minister has been advised on matters of local concern by the ACT Legislative Assembly consisting of 18 elected members. Prior to that date this function was performed by an Advisory Council consisting of both nominated and elected members.

The Australian Capital Territory Representation (House of Representatives) Act, 1973, provided for the representation of residents of the Territory by 2 elected members in the House of Representatives. The Senate (Representation of Territories) Act 1973 provided for the election of 2 Senators from the Territory. Elections took place in Dec. 1975.

FINANCE. The receipts and outlay of the Australian Capital Territory cover the transactions of the Australian Government in the Consolidated Revenue and other funds. They also include details of the ACT public corporations.

Receipts and outlay (\$A1,000) for years ended 30 June:

	<i>Receipts</i>	<i>Capital</i>	<i>Outlay Current</i>	<i>Total</i>
1976	56,645	201,029	159,300	369,928
1977	80,286	198,288	187,335	396,577
1978	106,005	219,339	206,651	435,220
1979	98,170	163,019	222,330	392,937

The chief sources of receipts in 1978-79 were taxes, fees and fines, \$A48m.; and interest and rent, \$A29m. Capital outlay comprised gross capital formation, \$A168m., and advances to other sectors, \$A8m.

PRODUCTION. The Territory is predominantly pastoral. Livestock, 31 March 1979: 14,236 cattle, 117,294 sheep. A considerable amount of reafforestation (mostly pine) has been undertaken, the total area of commercial plantations at 30 June 1980 being 14,700 hectares. There is no secondary industry of any importance.

EDUCATION. In 1974 education in government schools became the direct responsibility of the Commonwealth Government. A School's Authority has been established to administer the Australian Capital Territory government school system. There are 66 government primary and infants schools, including 1 in the Jervis Bay area, with a total enrolment (Aug. 1979) of 24,862 pupils. Secondary education is provided at 16 secondary schools and 6 secondary colleges with an enrolment, at Aug. 1979, of 14,484 pupils. Pre-school education is provided at 71 centres with a total enrolment of 4,812 (Aug. 1979). There are also 30 non-government schools, 11 of which provide secondary education; total enrolment (Aug. 1979) 15,568. The Canberra Technical College and Bruce College of Technical and Further Education with a total enrolment of about 15,000 in 1979 provide training for apprentices and journeymen and also offer commercial and special courses.

The Canberra School of Music, opened in 1965, had 307 students in 1979.

The Canberra College of Advanced Education commenced operation in 1970. Courses are available in the schools of administrative studies, applied science, computing studies, liberal studies and teacher education. Enrolments (1979) 5,190.

The Australian National University is situated in Canberra.

NORTHERN TERRITORY

HISTORY. The Northern Territory, after forming part of New South Wales, was annexed on 6 July 1863 to South Australia and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any state, and under this provision an agreement was entered into on 7 Dec. 1907 for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on 1 Jan. 1911. For details of Constitutional development until 1978 see *THE STATESMAN'S YEAR-BOOK* 1980-81 pp. 123-24. The Commonwealth Government retained responsibility until Self-Government was granted on 1 July 1978.

AREA AND POPULATION. The Northern Territory is bounded by the 26th parallel of S. lat. and 129° and 138° E. long. Its total area is 1,346,200 sq. km. The coastline is about 6,200 km in length, the principal port being Darwin. The greater part of the interior consists of a tableland rising gradually from the coast to a height of about 700 metres. On this tableland there are large areas of excellent pasturage. The southern part of the Territory is generally sandy and has a small rainfall, but water may be obtained by means of sub-artesian bores. The climate is tropical, but varies considerably over the whole Territory.

In the coastal region, there are two main climatic divisions—the wet season, Nov. to April, and the dry season, May to Oct. Farther south the climate is of a continental type, showing a great variation between the hottest and coldest months.

The capital and seat of Government, Darwin is situated on the north coast. Darwin had an adult population of 50,612 in July 1979. The total population of the Territory is about 118,700. Other main centres include Katherine (4,500), 330 km south of Darwin; Alice Springs (16,500), in Central Australia; Tennant Creek (4,000), a rich mining centre 500 km north of Alice Springs; Nhulunbuy (3,500), a bauxite mining centre on the Gove Peninsula in eastern Arnhem Land; and Jabiru, a model town being built to serve the rich Uranium Province in eastern Arnhem Land with a planned population of 6,000. There also are a number of large self-contained Aboriginal communities.

Vital statistics for 1976: Births, 2,607; deaths, 567; marriages, 541; divorces, 423.

CONSTITUTION AND GOVERNMENT. The Northern Territory (Self-Government) Act 1978 established the Northern Territory as a body politic as from 1 July 1978, with Ministers having control over and responsibility for Territory finances and the administration of the functions of government as specified by the Federal Government by regulations made pursuant to the Act. Regulations have been made conferring executive authority for the bulk of administrative functions. Responsibility for health services was transferred on 1 Jan. 1979, and for education on 1 July 1979. Proposed laws passed by the Legislative Assembly in relation to a transferred function require the assent of the Administrator. Proposed laws in all other cases may be assented to by the Administrator or reserved by the Administrator for the Governor-General's pleasure. The Governor-General may disallow any law assented to by the Administrator within 6 months of the Administrator's assent.

The Northern Territory has federal representation electing 1 member to the House of Representatives and 2 members to the Senate.

FINANCE. The revenue and expenditure (in \$A1,000) for years ended 30 June cover the transactions the Department of the Northern Territory to 1977-78 and then for Northern Territory Government:

	1975-76	1976-77	1977-78	1978-79	1979-80
Revenue	22,290	30,383	44,234	349,400	530,000
Expenditure	302,687	56,298	66,735	348,400	528,900

The chief sources of revenue for 1975-76 were: Electricity supply, \$A5.2m.; rents and rates, \$A4.8m. Capital expenditure (excluding business undertakings) amounted to \$A55.3m.

NATURAL RESOURCES, INDUSTRY AND TRADE

Oil. In 1979-80, 7 new offshore permits were granted and applications were invited for a further 6 in the Arafura Sea. On 30 June 1980 there were 14 offshore permits covering 2,698 blocks and 7 onshore oil permits totalling 111,150 sq. km. There are 12 onshore oil permits and three oil leases under application.

Minerals. The mining industry is the Northern Territory's main industry. The main minerals produced are bauxite ore, manganese ore, copper, gold and bismuth ore. The value of all mineral production in 1979-80 was \$A369.6m.

In the Gove area of Arnhem Land a bauxite alumina project has been completed. Development costs were in excess of \$A310m. Exports of bauxite commenced in June 1971 and in 1979-80, 4.9m. tonnes of bauxite were mined (2.3m. exported). Exports of alumina totalled 1.1m. tonnes.

Manganese ore is produced on Groote Eylandt. Northern Territory production in 1979-80 was 3.7m. tonnes. The ore is shipped to Tasmania, Japan, Europe and the USA.

Shipments of iron ore from Frances Creek through the port of Darwin ceased in Dec. 1975, after the bulk loading facilities at the wharf had been badly damaged by cyclone 'Tracy'.

Mines in the Tennant Creek area are the principal producers of gold, copper and bismuth in the Northern Territory. In 1977-78 the Northern Territory production of these minerals was bismuth concentrate, 5,650 tonnes; copper, 14,911 tonnes; silver (1974-75), 1,876,974 grammes; and gold, 4,263 kg.

In the Alligator River region 250 km east of Darwin, rich deposits of uranium have been discovered at Nabarlek, Jabiru (Ranger), Koongarra and Jabiluka. This area is considered to be a uranium province of world importance.

Agriculture. General agriculture is conducted on a small scale in the Northern Territory. Small quantities of fruit, vegetables, eggs, dairy produce, poultry and pasture are produced. Seeds were produced in areas adjacent to the principal population centres. The total gross value of agricultural production for 1978-79 was \$A2,372,246. However the beef cattle industry is the main rural activity in the Northern Territory, and production depends almost entirely on export markets. Due to comparatively low production costs, the value of beef production for the year 1978-79 was \$A76,773,437. Buffalo production realized \$A500,000 (1975-76). A recent development has been an increase in the export of live cattle and buffalo to overseas countries which has provided alternative markets to producers.

Despite the depressed state of the industry, the accelerated eradication programme for tuberculosis and brucellosis is progressing satisfactorily and compensation payments are now extended to include cattle slaughtered as brucellosis reactors.

Livestock (31 March 1977): 1.7m. cattle; 1,000 sheep; 2,700 breeding sows.

Forestry. A forest development programme which commenced in 1970 has continued the multiple use management of Northern Territory forested areas; this programme included a softwood programme of 400 hectares per year, the introduction of additional suitable tree species in both arid and higher rainfall areas, conservation and management of native forests for production and recreational purposes, survey and assessment of resources, fire control activities and the creation of training opportunities for Aborigines in forestry and allied saw-milling activities.

Local production of sawn timber, mainly Cypress pine, amounted to 870 cu.

metres of pine in 1975-76. This was supplemented by 35,500 cu. metres of timber imported from interstate and overseas.

Local production of treated poles and rails amounted to 115 cu. metres. Only 280 hectares of plantation were established during the year because of complications arising from cyclone 'Tracy'.

During 1975-76 the Forestry Section of the Department of the Northern Territory redeveloped parks and open-space areas on behalf of the Darwin Reconstruction Commission.

Fisheries. The fishing industry is second only to beef cattle in Northern Territory primary industries. During 1977-78 the industry employed over 1,200 people and used vessels and equipment worth in excess of \$A58m. The major fishery is prawning, and for 1977-78 over 900 tonnes (processed weight) of prawns were exported. This represented 12% of the total Australian prawn exports and was valued at \$A8m.

The other main fishery in the Territory is scale fish, particularly Barramundi (Giant Perch). Total scale fish production for 1977-78 was 1,450 tonnes live weight, valued at \$A2m.

A major review of Northern Territory fisheries was carried out between 1973 and 1975 with assistance of a consultant resource economist and the final report contains several specific recommendations designed to increase the economic stability of fisheries.

INDUSTRY AND TRADE. In 1975-76 value added in the manufacturing industry, from 69 factories (with 4 or more persons employed) was \$A45.8m. 2,036 persons were employed in these factories. In 1977, 65 trade unions had 15,700 members.

Tourism. In 1979-80, there were 267,969 tourists contributing about \$A85m. to the economy.

National Parks and Reserves. About 43,000 sq. km have been set aside as wildlife sanctuaries under the Wildlife Conservation and Control Ordinance. They are controlled by the Chief Inspector of Wildlife who is an officer of the Department of the Northern Territory. 236,000 sq. km of Aboriginal reserves are also wild-life protected areas.

The Northern Territory Reserves Board administers some 37 national parks and reserves covering an area of over 249,926 hectares. The Board is responsible under the National Parks and Gardens Ordinance for the care, control and management of these reserves, and its functions include the preservation and protection of natural and historical features and the encouragement of public use and enjoyment of land set aside in such reserves.

COMMUNICATIONS

Roads. There are now 4,999 km of sealed road within the Northern Territory. They include three major interstate links: the Stuart Highway from Darwin to the South Australian border, the Barkly Highway, Tennant Creek to Mt. Isa, 447 km of which is in the Northern Territory, and the Victoria Highway, Katherine to the Western Australian border, a distance of 452 km. In addition to this there are 2,119 km of gravel roads, 6,464 km of formed roads and 6,715 km of unformed roads or tracks, totalling approximately 20,297 km of roads within the Northern Territory. In 1976-77 registrations of new motor vehicles included 1,451 cars, 2,784 utilities etc., 432 trucks, 38 buses and 925 motor cycles.

Railways. Services ceased from 20 June 1976 on the narrow-gauge railway from Darwin to Larrimah (510 km).

Alice Springs is connected by a narrow-gauge (869 km) and standard-gauge railway (342 km) through Port Augusta to the Australian rail network. Alice Springs is linked to the Trans-continental network by a new standard (1,435 mm) gauge railway to Tarcoola (831 km), opened in 1980. This replaced the largely narrow gauge line to Port Augusta.

Aviation. Darwin is the first port of arrival in Australia for some aircraft from Europe and Asia. In 1976-77, 237,411 passengers were carried and 6,389 tonnes of freight. There are regular inland services connecting Darwin with all the State capitals and many inland towns.

Shipping. Regular freight shipping services connect Darwin with Western Australia, the eastern States and overseas. Passenger vessels also call at Darwin at irregular intervals.

The ports of Melville Bay (Gove) and Milner Bay (Groote Eylandt) are connected with Darwin, the eastern States and overseas by regular shipping freight services.

The island and coastal communities around the coast are provided with regular freight barge services from Darwin. Some of these communities also receive a barge freight-transshipment service out of a Brisbane vessel which calls at Melville and Milner Bays, where the transshipment is effected.

EDUCATION AND WELFARE

Education. In 1977 there were 121 schools (of which 11 were private). Teachers totalled 1,513 and pupils 26,360.

Health. In 1980 there were 6 hospitals with 756 beds. Community health services are provided from 9 urban Health Centres and 62 rural Health Centres including mobile units.

AUSTRALIAN EXTERNAL TERRITORIES

AUSTRALIAN ANTARCTIC TERRITORY. An Imperial Order in Council of 7 Feb. 1933 placed under Australian authority all the islands and territories other than Adélie Land situated south of 60° S. lat. and lying between 160° E. long. and 45° E. long. The Order came into force with a Proclamation issued by the Governor-General on 24 Aug. 1936 after the passage of the Australian Antarctic Territory Acceptance Act 1933. The boundaries of Adélie Land were definitively fixed by a French Decree of 1 April 1938 as the islands and territories south of 60° S. lat. lying between 136° E. long. and 142° E. long. The Australian Antarctic Territory Act 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable and are not inconsistent with any ordinance made under the Act, in force in the Australian Antarctic Territory.

In 1968 responsibility for the administration of this Act was transferred from the Minister for External Affairs to the Minister for Supply; in 1972 responsibility was transferred to the Minister for Science.

On 13 Feb. 1954 the Australian National Antarctic Research Expeditions (ANARE) established a station on Mac-Robertson Land at lat. 67° 36' S. and long. 62° 52' E. The station was named Mawson in honour of the late Sir Douglas Mawson. Meteorological and other scientific research is conducted at Mawson, which is the centre for coastal and inland survey expeditions.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on 13 Jan. 1957 at lat. 68° 34' 36" S. and long. 77° 58' 36" E. The station was named Davis in honour of Capt. John King Davis, Mawson's second-in-command on 2 expeditions. The station was temporarily closed down in Jan. 1965 and re-opened in Feb. 1969.

In Feb. 1959 the Federal Government accepted from the US Government custody of Wilkes Station, which was established by the US on 16 Jan. 1957 on the Budd Coast of Wilkes Land, at lat. 66° 15' S. and long. 110° 32' E. The station was named in honour of Lieut. Charles Wilkes, who commanded the 1838-40 US expedition to the area, and was closed in Feb. 1969. Operations were then transferred to the new station, Casey. Construction commenced on Casey station in Jan. 1965 and was continued, mainly during summer visits, until Feb. 1969, when it was opened. The station, specially designed to withstand blizzard winds and prevent

inundation by snow, is situated 2.4 km south of Wilkes at lat. 66° 17' S. and long. 110° 32' E. It was named after Lord Casey, Governor-General of Australia 1965-69. The Antarctic Division has also operated a station, since March 1948, at Macquarie Island, about 1,370 km south-east of Hobart. Macquarie Island is a dependency of the State of Tasmania.

On 1 Dec. 1959 Australia signed the Antarctic Treaty with Argentina, Belgium, Chile, France, Japan, New Zealand, Norway, South Africa, the USSR, the UK and the USA. Poland, Czechoslovakia, German Democratic Republic, Netherlands, Romania, Brazil and Denmark have subsequently acceded to the Treaty. Poland became a full member of the Antarctic Treaty in 1977. The Treaty reserves the Antarctic area south of 60° S. lat. for peaceful purposes, provides for international co-operation in scientific investigation and research, and preserves, for the duration of the Treaty, the *status quo* with regard to territorial sovereignty, rights and claims. The Treaty entered into force on 23 June 1961. Since then the Antarctic Treaty powers have held 10 consultative meetings.

COCOS (KEELING) ISLANDS. The Cocos (Keeling) Islands are 2 separate atolls comprising some 27 small coral islands with a total area of about 14.2 sq. km, are situated in the Indian Ocean at 12° 05' S. lat. and 96° 53' E. long. They lie 2,768 km north-west of Perth and 3,685 km west of Darwin, while Colombo is 2,255 km to the north-west of the group.

The main islands in this Australian Territory are West Island (the largest, about 10 km from north to south) on which is an airport and most of the European community; Home Island, occupied by the Cocos Malay community; Direction, South and Horsburgh Islands, and North Keeling Island, 24 km to the north of the group.

Although the islands were discovered in 1609 by Capt. William Keeling of the East India Company, they remained uninhabited until 1826, when the first settlement was established on the main atoll by an Englishman, Alexander Hare. Hare left the islands in 1831, by which time a second settlement had been formed on the main atoll by John Clunies-Ross, a Scottish seaman and adventurer, who landed with several boat-loads of Malay seamen to begin commercial development of the islands' coconut palms.

In 1857 the islands were annexed to the Crown; in 1878 responsibility was transferred from the Colonial Office to the Government of Ceylon, and in 1886 to the Government of the Straits Settlement. By indenture in 1886 Queen Victoria granted all land in the islands to George Clunies-Ross and his heirs in perpetuity (with certain rights reserved to the Crown). The head of the family had semi-official status as resident magistrate and representative of the Government. In 1903 the islands were incorporated in the Settlement of Singapore and in 1942-46 temporarily placed under the Governor of Ceylon. In 1946 a Resident Administrator, responsible to the Governor of Singapore, was appointed.

On 23 Nov. 1955 the Cocos Islands were placed under the authority of the Australian Government as the Territory of Cocos (Keeling) Islands. The Cocos (Keeling) Islands Act 1955 is the basis of the Territory's administrative, legislative and judicial systems. The laws of the Colony of Singapore which were in force in the islands immediately before the transfer have, with certain exceptions, been continued in force. They can be amended, repealed or substituted by ordinances made by the Governor-General. An Administrator, appointed by the Governor-General, is the Government's representative in the Territory and is responsible to the Minister for Home Affairs. The Cocos (Keeling) Islands Council, established as the elected body of the Cocos Malay community in July 1979, advises the Administrator on all issues affecting the Territory.

In 1978 the Australian Government purchased the Clunies-Ross family's entire interests in the islands, except for the family residence. A Cocos Malay co-operative has been established to take over the running of the Clunies-Ross copra plantation (323 tonnes of copra were exported in 1979) and to engage in other business with the Commonwealth in the Territory, including construction projects.

The population of the Territory at 30 June 1980 was 487, distributed between Home Island (294) and West Island (193).

The group of atolls is low-lying, flat and thickly covered by coconut palms, and surrounds a lagoon in which ships drawing up to 7 metres may be anchored, but which is extremely difficult for navigation.

The climate is equable and pleasant, being usually under the influence of the south-east trade winds for about three-quarters of the year. However, the winds vary at times, and meteorological reports from the Territory are particularly valuable for those engaged in forecasting for the eastern Indian Ocean. The temperature varies between 21° and 32° C., the rainfall is moderate and there are occasional violent storms.

The Cocos (Keeling) Islands Act 1955-1975 is the basis of the Territory's administrative, legislative and judicial systems. The laws of the Colony of Singapore which were in force in the islands immediately before the transfer have, with certain exceptions, been continued in force. They can be amended, repealed or substituted by ordinances made by the Governor-General.

The *Singapore Ordinances Application Ordinance* 1979 had the effect of repealing all Singapore Ordinances in force in the Territory and applying the provisions of 95 selected Singapore Ordinances only to be laws of the Territory.

Administrator: C. I. Buffett, MBE.

CHRISTMAS ISLAND is in the Indian Ocean, lat. 10° 25' 22" S., long. 105° 39' 59" E. It lies 360 km S., 8° E. of Java Head, and 417 km N. 79° E. from Cocos Islands, 1,310 km from Singapore and 2,623 km from Fremantle. Area about 135 sq. km. The climate is moderate. The island was formally annexed on 6 June 1888, placed under the administration of the Governor of the Straits Settlements in 1889, and incorporated with the Settlement of Singapore in 1900. Sovereignty was transferred to the Australian Government on 1 Oct. 1958. The population (estimate, 1980), 3,184 (Europeans, 382; Chinese, 1,834; Malays, 847 and 121 others).

The legislative, judicial and administrative systems are regulated by the Christmas Island Act, 1958-73, which is administered by the Minister for Home Affairs with an Administrator, responsible for the local administration. The laws of Singapore which were in force before the transfer have been continued but can be amended, repealed or substituted by ordinances made by the Governor-General.

Extraction and export of rock phosphate and phosphate dust is the island's only industry. In Dec. 1948 Australia and New Zealand bought the lease rights of the Christmas Island Phosphate Co. and set up the Christmas Island Phosphate Commission, for which the British Phosphate Commissioners act as managing agents. The export of phosphate rock during 1979-80 was 1,430,950 tonnes, which is shipped to Australia and New Zealand; in addition, 110,227 tonnes of phosphate dust was shipped to Singapore, Malaysia and Australia and 3,000 tonnes of citraphos and calciphos was shipped to New Zealand.

There is direct radio communication with Australia and Singapore. Regular air charter flights commenced in 1974 to Australia.

At 30 June 1980 there were 575 primary and secondary pupils at the Christmas Island Area School. There is a technical school which provides commercial, apprenticeship and adult education courses, with (1979) some 587 students.

Medical, dental and hospital services are provided free of charge by the British Phosphate Commission.

Administrator: R. McN. Holten, CMG.

NORFOLK ISLAND. 29° 04' S. lat, 167° 57' E. long., area 3,455 hectares, population, approximately 1,700. The island was formerly part of the colony of New South Wales and then of Van Diemen's Land. It has been a distinct settlement since 1856, under the jurisdiction of the state of New South Wales; and finally by the passage of the Norfolk Island Act 1913, it was accepted as a Territory of the Australian Government. The Norfolk Island Act 1957 is the basis of the Territory's legislative, administrative and judicial systems. An Administrator, appointed by the Governor-General and responsible to the Minister for Home Affairs, is the senior government representative in the Territory.

The Norfolk Island Act 1979 equips Norfolk Island with responsible legislative

and executive government to enable it to run its own affairs to the greatest practicable extent. Wide powers are exercised by the Norfolk Island Legislative Assembly and by an Executive Council, comprising the executive members of the Legislative Assembly who have ministerial-type responsibilities. The Act preserves the Commonwealth's responsibility for Norfolk Island as a Territory under its authority, with the Minister for Home Affairs being the responsible Minister, and indicates the Parliament's intention that consideration will be given to an extension of the powers of the Legislative Assembly and the political and administrative institutions of Norfolk Island within 5 years.

The Assembly has legislative and executive powers over a specified range of matters. The Government will consider increasing these powers no later than 5 years after the Assembly is incorporated.

The island's Supreme Court sits as required and a Court of Petty Sessions exercises both civil and criminal jurisdiction.

The Territory Administration is financed from an annual Commonwealth grant which in 1977-78 amounted to \$A126,000 and from local revenue which for the same period totalled \$A2,020,732. A further \$A288,214 was provided by the Commonwealth during the year for the restoration and maintenance of historic structures.

Public revenue is derived mainly from the sale of postage stamps, customs duties, liquor sales and company registration and licence fees. Residents are not liable for income tax on earnings within the Territory, nor are death and personal stamp duties levied. In 1979-80 imports totalled \$A10.8m. and exports \$A1.6m.

An estimated 20,000 visitors a year travel to Norfolk. Descendants of the *Bounty* mutineer families constitute the 'original' settlers and are known locally as 'Islanders', while later settlers, mostly from Australia, New Zealand and UK, are identified as 'mainlanders'. Over the years the Islanders have preserved their own lifestyle and customs, and their language remains a mixture of West Country English and Tahitian.

The Administration subsidises a public hospital and dispensary, and health services, together with free dental services for children, are provided by qualified government officers.

Norfolk Island's public school is staffed by the New South Wales Department of Education and follows the State's education system. A bursary scheme is available to provide students with secondary education on the mainland.

A radio telephone service between the island and Sydney is maintained by the Overseas Telecommunications Commission, and there is a local automatic telephone service.

Administrator: W. P. Coleman.

HEARD AND McDONALD ISLANDS. These islands, about 2,500 miles south-west of Fremantle, were transferred from UK to Australian control as from 26 Dec. 1947. Heard Island is about 43 km long and 21 km wide; Shag Island is about 8 km north of Heard. The total area is 412 sq. km (159 sq. miles). The McDonald Islands are 42 km to the west of Heard.

TERRITORY OF ASHMORE AND CARTIER ISLANDS. By Imperial Order in Council of 23 July 1931, Ashmore Islands (known as Middle, East and West Islands) and Cartier Island, situated in the Indian Ocean, some 320 km off the north-west coast of Australia, were placed under the authority of the Commonwealth.

Under the Ashmore and Cartier Islands Acceptance Act, 1933, the islands were accepted by the Commonwealth under the name of the Territory of Ashmore and Cartier Islands, and the effective date was proclaimed by the Governor-General to be 10 May 1934. It was the intention that the Territory should be administered by the State of Western Australia, but owing to administrative difficulties the Territory was annexed to and deemed to form part of the Northern Territory of Australia (by amendment to the Act in 1938) with relevant laws of the Northern Territory, applying to the Territory of Ashmore and Cartier Islands. From 1 July 1978, responsibility for the administration of Ashmore and Cartier Islands passed to the Commonwealth portfolio of the Minister for Home Affairs.

The islands are uninhabited but Indonesian fishing boats, which have traditionally plied the area, fish within the Territory and land to collect water in accordance with an agreement between the governments of Australia and Indonesia. An automatic weather station on West Ashmore Island (completed in Sept. 1962) supplies the Commonwealth Meteorological Bureau with regular reports.

Periodic visits are made to the islands by ships of the Royal Australian Navy, and aircraft of the Royal Australian Air Force make aerial surveys of the islands and neighbouring waters.

TERRITORY OF CORAL SEA ISLANDS. The Territory was created on 30 Sept. 1969 and consists of several small islands and reefs in the Pacific ocean, off the coast of Queensland. The sole inhabitants are 3 meteorologists on Willis Island. There is an unmanned automatic weather station on Cato Island.

NEW SOUTH WALES

HISTORY. New South Wales became a British possession in 1770; the first settlement was established at Port Jackson in 1788; a partially elective Council was established in 1843, and responsible government in 1856. New South Wales federated with the other Australian states to form the Commonwealth of Australia in 1901.

AREA AND POPULATION. New South Wales is situated between the 28th and 38th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises 309,433 sq. miles (801,428 sq. km), inclusive of Lord Howe Island, 6 sq. miles (17 sq. km), but exclusive of the Australian Capital Territory (911 sq. miles, 2,359 sq. km) at Canberra and 28 sq. miles (73 sq. km), at Jervis Bay.

Lord Howe Island, 31° 33' 4" S., 159° 4' 26" E., a dependency of New South Wales, situated about 702 km north-east of Sydney; area, 1,656 hectares, of which only about 120 hectares are arable; population (30 June 1979), 250. The island, which was discovered in 1788, is of volcanic origin. Mount Gower, the highest point, reaches a height of 866 metres.

A Board at Sydney and an elected Island Advisory Committee manage the affairs of the island and supervise the Kentia palm-seed industry.

CONSTITUTION AND GOVERNMENT. Within the State there are three levels of government: the Commonwealth Government, with authority derived from a written constitution; the State Government with residual powers; the local government authorities with powers based upon a State Act of Parliament, operating within incorporated areas extending over seven-eighths of the State.

The Constitution of New South Wales is drawn from several diverse sources; certain Imperial statutes such as the Colonial Laws Validity Act (1865) and the Commonwealth of Australia Constitution Act (1900); the Australian States Constitution Act (1907); the Letters Patent and the Instructions to the Governor; an element of inherited English law; amendments to the Commonwealth of Australia Constitution Act; the State Constitution Act and certain other State Statutes; numerous legal decisions; and a large amount of English and local convention.

The Parliament of New South Wales may legislate for the peace, welfare and good government of the State in all matters not specifically reserved to the Commonwealth Government.

The State Legislature consists of the Sovereign, represented by the Governor, and two Houses of Parliament, the Legislative Council (upper house) and the Legislative Assembly (lower house).

Under legislation passed in 1978, the Legislative Council is to consist of 45 members elected by popular vote for a term of 9 years, with 15 members retiring every 3 years at the same time as the Legislative Assembly elections.

The President has an annual salary (1980) of \$A31,407; the Leader of the Opposition, \$A31,135; the Chairman of Committees, the Deputy Leader of the Government (if not a Minister) and the Deputy Leader of the Opposition (when a leader of a party), \$A19,210 each; the Deputy Leader of the Opposition (when not a leader of a party) and Government and Opposition Whips, \$A17,435 each. The President is paid an annual expense allowance of \$A3,866; the Leader of the Opposition,

\$A3,541; the Chairman of Committees, the Deputy Leader of the Government (if not a Minister) and the Deputy Leader of the Opposition (when a leader of a party), \$A2,125 each; the Deputy Leader of the Opposition (when not a leader of a party) and Government and Opposition Whips, \$A1,003 each. Other members who are not Ministers receive an annual salary of \$A14,985. All members receive an annual electoral allowance of \$A5,159. Special expenses allowances (ranging from \$A2,871 to \$A3,587) are paid to members who are not Ministers and reside in outlying electorates.

The Legislative Assembly has 99 members elected by popular vote for a period of 3 years. Voting is compulsory. British subjects above 18 years of age, having resided 6 months in Australia, 3 months in the State and 1 month in any one electoral district, are eligible for enrolment as electors. Women were enfranchised in 1902. Salaries are adjusted annually, and those given are for 1980.

The Speaker of the Legislative Assembly and the Leader of the Opposition receive a salary of \$A42,964 each; the Chairman of Committees and the Deputy Leader of the Opposition, \$A31,135 each; Government and Opposition Whips, \$A29,059 each. The Speaker and the Leader of the Opposition also receive an expense allowance of \$A6,444 each; the Chairman of Committees and the Deputy Leader of the Opposition, \$A3,541 each; Government and Opposition Whips, \$A1,672 each. Members who are not Ministers receive an annual salary of \$A24,975. All members receive an annual electoral allowance ranging from \$A8,599 to \$A13,538 according to the location of their constituencies.

The Legislative Assembly, elected on 7 Oct. 1978, consisted in Oct. 1980 of the following parties: Labor, 62; Liberal and Country Party, 32; Independent, 1.

The executive is in the hands of a Governor, appointed by the Crown, and an Executive Council consisting of members of the Cabinet. Ministers receive the following annual salaries: Premier, \$A54,546; Deputy Premier, \$A48,877; the Leader of the Government in the Legislative Council, \$A49,465; other Ministers, \$A45,968. Ministers also receive an expense allowance (Premier, \$A13,793; Deputy Premier, \$A6,896; other Ministers, \$A6,444 each). Ministers also receive an electoral allowance ranging from \$A8,599 to \$A13,538 to members of the Legislative Assembly, according to the location of their electorate; and \$A5,159 to each member of the Legislative Council.

Local Government. A system of local government extends over most of the State, including the whole of the Eastern and Central land divisions and more than two-thirds of the sparsely populated Western division. At 30 June 1980 there were 80 municipalities, and 119 corporate bodies called shires. A number of the municipalities and shires have combined to form 43 county councils, which administer electricity or water supply undertakings or render other services of common benefit.

Public Debt. In terms of the financial agreement between the Commonwealth and State Governments, the Commonwealth Government has assumed responsibility for debts of the Australian States, and contributes towards the interest thereon and sinking funds established for redemption of the debts. Loans for the States are raised by the Commonwealth Government in accordance with decisions of the Australian Loan Council.

The public debt of New South Wales at 30 June 1980 (overseas loans converted to Australian currency equivalent at current rates of exchange) comprised the following (in \$A1,000): Repayable in Australia, 4,630,824; in London, 26,548; in New York, 7,299; in Canada, 1,549; in Netherlands, 622. Interest liability for 1979-80 amounted (in \$A1,000) to 385,743, of which 2,088 was in respect of the external debt. Contributions to the sinking fund for New South Wales debt, 65,566, include 12,580 contributed by the Commonwealth Government. The net cost of securities redeemed in the year was 69,530.

Banking. There were 10 trading banks operating in New South Wales at 30 June 1980, including the Commonwealth Trading Bank and Rural Bank (Government banks) and 1 New Zealand bank. Bank advances, overdrafts, bills discounted, etc., amounted to \$A8,777.3m. A statement of other assets and liabilities of the banks in New South Wales is of little significance, as banking business is conducted on an Australia-wide basis.

Savings bank deposits at the end of June 1980 amounted to \$A6,124m., representing \$A1,194 per head of population.

INDUSTRY AND TRADE

Industry. Approximately 25% of the civilian work force in New South Wales is employed in manufacturing industries.

A very wide range of manufacturing activities is undertaken in the Sydney area, and there are large iron and steel works and associated metal fabrication works in operation in proximity to the coalfields at Newcastle and Port Kembla.

The following table shows a summary of manufacturing industries' statistics for 1978-79:

(of which jobs valued at \$A357m. were being built for government ownership), jobs completed were valued at \$A2,531m. (\$A484m. for government ownership), and jobs under construction at the end of the period were valued at \$A2,047m. (\$A630m. for government ownership).

Labour. Two systems of industrial arbitration and conciliation for the adjustment of industrial relations between employers and employees are in operation—the State system which operates within the territorial limits of the State, and the Commonwealth system, which applies to industrial disputes extending beyond State borders.

The industrial tribunals are authorized to fix minimum rates of wages and other conditions of employment. Their awards may be enforced by law, as may be industrial agreements between employers and organizations of employees, when registered.

The principal State tribunal is the Industrial Commission of New South Wales, composed of judges. The Commission is empowered to exercise all the arbitration and conciliation powers conferred on subsidiary tribunals, and has in addition auth-

ority to determine any widely defined 'industrial matter', to adjudicate in case of illegal strikes and lockouts, etc., to investigate union ballots when irregularities are alleged and to hear appeals from subsidiary tribunals. Subsidiary tribunals are Conciliation Committees for various industries, each having an equal number representing employers and employees and a Conciliation Commissioner as chairman.

The chief industrial tribunals of the Commonwealth are the Industrial Division of the Federal Court of Australia, composed of judges, and the Australian Conciliation and Arbitration Commission, composed of presidential members, and commissioners.

Most State awards and agreements prescribe a basic wage and, for each industry, margins assessed on skill, etc. Since May 1974, the State Industrial Commission has also specified a minimum wage in line with Commonwealth awards. In July 1980, the minimum wage payable in Sydney for a full week's work by an adult male or female was SA136 under both State and Commonwealth awards.

A standard working week of 40 hours is prescribed for employees in most industries. Overtime is permitted under prescribed conditions.

Trade Unions. Registration of trade unions is effected under the New South Wales Trade Union Act, 1881, which follows substantially the Trade Union Acts of 1871 and 1876 of England. Registration confers a quasi-corporate existence with power to hold property, to sue and be sued, etc., and the various classes of employees covered by the union are required to be prescribed by the constitution of the union. For the purpose of bringing an industry under the review of the State industrial tribunals, or participating in proceedings relating to disputes before Commonwealth tribunals, employees and employers must be registered as industrial unions, under State or Commonwealth industrial legislation respectively.

Commerce. The external commerce of New South Wales, exclusive of interstate trade, is included in the statement of the commerce of Australia (*see* pp. 110-12). The overseas commerce of the State is given in SA1,000 ending 30 June:

Local Government. Provision is made for local government by the subdivision of the State into cities, towns and shires. These are under the management of aldermen or councillors, who are elected by all persons 18 years and over. Local Authorities are charged with the control of all matters of a parochial nature, such as sewerage, cleansing and sanitary services, health services, domestic water supplies, and roads and bridges within their allotted areas. In addition to Government grants and subsidies, Local Authority revenue is derived from general rates, paid by landowners on the unimproved capital value of land, and by charging for some specific services. Loans for most capital works are raised subject to the provisions of the Loan Council.

Shires are mostly rural districts although most contain some urban centres not classed officially as towns.

The number and area of these subdivisions, together with the receipts and expenditure (including receipts and expenditure from loans) for the year ended 30 June 1979, were:

	No.	Area in sq. km	Receipts, ¹ \$A1,000	Expenditure, ¹ \$A1,000	Rateable values, \$A1,000

Industry. Approximately one-third of the secondary production of the State is from works processing primary products, the most important being sugar-mills, meat works, butter factories and saw-mills. There are 30 cane-crushing mills, 3 oil refineries, 1 alumina refinery, 2 sugar refineries, 47 meat works (including bacon factories) producing largely for export, 13 butter factories and many saw-mills and plywood and veneer mills. Other industries include engineering works, railway workshops, copper and nickel refining, cement, cardboard and building board manufacture, ammonia and fertilizer works and the production of various items of food, clothing and vehicles, chiefly for local use. In 1978-79 there were 2,886 establishments, with 4 or more workers, employing 91,200 males and 21,759 females, and providing goods and services worth \$A6,591m. The value of production (value added in manufacture) was \$A2,322m.

The gross value of Queensland primary production, excluding mining (in \$A1,000) during 1978-79 amounted to 2,307,411, which included crops, 1,097,281; livestock disposals, 868,396; livestock products, 241,704; forestry, 35,738; fishing, 61,268; hunting, 3,024.

Labour. Of the total population of 2.2m., 927,300 were in employment in Aug. 1980, 138,900 in manufacturing. Industrial wages and conditions are controlled partly by Federal and State authorities. A State Industrial Commission is empowered to determine all industrial matters in relation to employers and employees, to fix minimum wage-rates and other conditions of employment. An Industrial Court hears appeals and decides points of industrial law. The Australian Industrial Court, Conciliation and Arbitration Commission are superior within their jurisdictions. In Queensland most employees (62%) work under State awards; 26% under Federal awards.

Rates of wages for each occupation are prescribed by these courts. The minimum weighted average award wage for adult males was \$A180.68 and for adult females \$A163.26, at 30 June 1980, while average weekly earnings (including overtime, etc.) were \$A240.90 per employed male unit. (Average earnings are calculated on a unit

basis, as earnings are not available separately for males and females.) A standard working week of 40 hours is prescribed for most awards.

Trade Unions. Unions both of employees and employers must be registered with the State or Australian Commission. There were 75 employees' and 39 employers' unions registered with the State Commission at 31 Dec. 1979, the former comprising 349,373 and the latter 36,457 members.

Commerce. The overseas commerce of Queensland is included in the statement of the commerce of Australia (*see* pp. 110-12).

Total value of the direct overseas imports and exports of Queensland (in \$A1,000) f.o.b. port of shipment for both imports and exports:

¹ State of origin.

In 1979-80 interstate exports totalled \$A1,589.6m. and imports \$A3,282m. The chief exports overseas are minerals including alumina, coal, meat (preserved or frozen), sugar, wool, cereal grains, copper and lead, and manufactured goods. Principal overseas imports are machinery, motor vehicles, mineral fuels (including lubricants, etc.), chemicals and manufactured goods classified by material. Chief sources of imports in 1979-80 were Japan (\$A278.1m.), USA (\$A277.9m.), Singapore (\$A104.4m.); exports went chiefly to Japan (\$A1,493.9m.), USA (\$A631.7m.), UK (\$A444.3m.), EEC, excluding UK (\$A407.7m.).

The Supreme Court comprises a Chief Justice, a senior puisne judge and 13 puisne judges; the District Court, 17 district court judges. Stipendiary magistrates preside over the Lower Courts, except in the smaller centres, where justices of the peace officiate. A parole board may recommend prisoners for release.

Welfare institutions providing shelter and social care for the aged, the handicapped, and children, are maintained or assisted by the State. A maternal and child welfare service is provided throughout the State. Age, invalid, widows', disability and war service pensions, maternity allowances, family allowances, and unemployment and sickness benefits are paid by the Federal Government. CONSTITUTION AND GOVERNMENT. South Australia was formed into a British province by letters patent of Feb. 1836, and a partially elective Legislative Council was established in 1851. The present Constitution bears date 24 Oct. 1856. It vests the legislative power in an elected Parliament, consisting of a Legislative Council and a House of Assembly. The former is composed of 22 members. Every 3 years half the members retire, and the resulting vacancies are filled at a general election on the basis of proportional representation with the State as one multi-member electorate. The qualifications of an elector are, to be a natural born or naturalized British subject of at least 18 years of age and to have lived continuously in Australia for at least 6 months, in South Australia for at least 3 months and in the sub-division for which he is enrolled for at least 1 month. War service may substitute for residential qualifications in some cases. By the Constitution Act Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the general election of 25 April 1896. The qualifications for election as a member of both Houses are the same as for an elector. Certain persons are ineligible for election to either House.

The House of Assembly consists of 47 members elected for 3 years, representing single electorates. Election of members of both Houses takes place by preferential secret ballot. Voting is compulsory for those on the Electoral Roll.

The House of Assembly, elected on 15 Sept. 1979, consists of the following members: Liberal Party of Australia, 25; Australian Labor Party, 19; Australian Democrats, 1; National Country Party, 1; Independent, 1. The Legislative Council consists of 11 Liberal Party of Australia, 10 Labor and 1 Australian Democrat members.

Each member of Parliament receives \$A25,025 per annum with allowances of \$A5,000–18,500 according to location of electorate, a free pass over government railways and superannuation rights. Electors enrolled (Sept. 1979) numbered 825,586.

The executive power is vested in a Governor appointed by the Crown and an Executive Council, consisting of the Governor and the Ministers of the Crown. The Governor has the power to dissolve the House of Assembly but not the Legislative Council unless that Chamber has twice consecutively with an election intervening defeated the same or substantially the same Bill passed in the House of Assembly by an absolute majority.

Governor: Keith D. Seaman, OBE (sworn in 1 Sept. 1977).

The South Australian Liberal Ministry, in Sept. 1979 was as follows:

Premier, Treasurer, Minister of State Development and Minister of Ethnic Affairs: David Oliver Tonkin, MP.

Deputy Premier and Minister of Mines and Energy: Eric Roger Goldsworthy, MP. *Attorney-General and Minister of Corporate Affairs:* Kenneth Trevor Griffin, MLC. *Minister of Industrial Affairs and Minister of Public Works:* Dean Craig Brown, MP. *Minister of Education and Minister of Aboriginal Affairs:* Harold Allison, MP. *Chief Secretary, Minister of Fisheries and Minister of Marine:* William Allan Rodda, MP. *Minister of Local Government, Minister of Housing, Minister of Arts and Minister Assisting the Premier in Ethnic Affairs:* Charles Murray Hill, MLC. *Minister of Agriculture and Minister of Forests:* William Edwin Chapman, MP. *Minister of Environment and Minister of Planning:* David Charles Wotton, MP. *Minister of Transport and Minister of Recreation and Sport:* Michael Minell Wilson, MP. *Minister of Community Welfare and Minister of Consumer Affairs:* John Charles Burdett, MLC. *Minister of Health and Minister of Tourism:* Jennifer Lillian Adamson, MP. *Minister of Water Resources, Minister of Irrigation, Minister of Lands and Minister of Repatriation:* Peter Bruce Arnold, MP.

Ministers are jointly and individually responsible to the legislature for all their official acts, as in the UK.

Agent-General in London: J. L. Rundle (50 Strand, WC2).

Local Government. The closely settled part of the State (mainly near the sea-coast and the river Murray) is incorporated into local government areas, and sub-divided into district councils (rural areas only), municipal corporations (mainly metropolitan, but including larger country towns) and cities (more densely populated areas with a qualification of 15,000 residents in the Adelaide metropolitan area, and 10,000 in the country). The main functions of councils are the construction and maintenance of roads and bridges. Other functions include health, welfare, recreation and garbage disposal.

The number and area of the sub-divisions, together with revenue expenditure (in \$A1,000) for the year ended 30 June 1978, were:

Labour. Two systems of industrial arbitration and conciliation for the adjustment of industrial relations between employers and employees are in operation—the State system, which operates when industrial disputes are confined to the territorial limits of the State, and the Federal system, which applies when disputes involve other parts of Australia as well as South Australia.

The industrial tribunals are authorized to fix minimum rates of wages and other conditions of employment, and their awards may be enforced by law. Industrial agreements between employers and organizations of employees, when registered, may be enforced in the same manner as awards. The Commission fixed the minimum wage in July 1980 at \$A134.40.

Commerce. The commerce of South Australia, exclusive of inter-state trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth, *see pp.* 110–12.

There is a Supreme Court, which incorporates admiralty, civil, criminal, land and valuation, and testamentary jurisdiction; district criminal courts, which have jurisdiction in many indictable offences; local courts and courts of summary jurisdiction. Circuit courts are held at several places. Bankruptcy jurisdiction is administered by the State Court of Insolvency at Adelaide which is invested with jurisdiction by the Federal Bankruptcy Act. During the year ending 30 June 1979 there were 847 sequestrations and schemes under the Bankruptcy Act; 1,258 adults convicted in the higher courts in 1978 and 105,413 in the courts of summary jurisdiction in 1977-78. The total number of convicted prisoners on 30 June 1979 was 768.

In 1980 there were 13 metropolitan and 15 country colleges of further education, and 1 college of external studies. Tertiary education, including teacher education, is provided by the 2 universities and 6 colleges of advanced education. There were 155 non-government schools and colleges, most of which are associated with religious denominations (39,972 students) and 487 day care and pre-school centres with a total enrolment of 28,723 pre-school children.

Social Welfare. Age, invalidity, war, etc., pensions are paid by the Federal Government. The number of pensioners in South Australia at 30 June 1979 was: Disability and service, 62,505; age, 126,691; invalid, 20,169. There are schemes for maternity allowances, family allowances, widows, unemployment and sickness and hospital and pharmaceutical benefits.

TASMANIA

HISTORY. Abel Janzoon Tasman discovered Van Diemen's Land (Tasmania) on 24 Nov. 1642. The island became a British settlement in 1803 as a dependency of New South Wales; in 1825 its connexion with New South Wales was terminated; in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On 1 Jan. 1901 Tasmania was federated with the other Australian states into the Commonwealth of Australia.

AREA AND POPULATION. Tasmania is an island separated from the mainland by the Bass Strait with an area (including islands) of 68,330 sq. km. or 6.83m. hectares, of which 6,441,000 hectares form the area of the main island. The population at 10 consecutive censuses was:

	Population	Increase % per annum		Population	Increase % per annum
1901	172,475	1.64	1954	308,752	2.65

The census population on 30 June 1976 consisted of 204,118 males and 203,245 females. At the census of 30 June 1976, 5.7% were natives of the British Isles, 3.3% natives of other European countries and 90.3% natives of Australia and New Zealand, almost exclusively of European ancestry. The last Tasmanian Aboriginal died in 1876.

CONSTITUTION AND GOVERNMENT. Parliament consists of the Governor, the Legislative Council and the House of Assembly. The Council has 19 members, elected by adults with 6 months' residence. Members sit for 6 years, 3 retiring annually and 4 every sixth year. There is no power to dissolve the Council. Vacancies are filled by by-elections. The House of Assembly has 35 members; the maximum term for the House of Assembly is 4 years. Members of both Houses are paid a basic salary of \$A25,949 (1980-81), plus an electorate allowance, according

to the division represented. The annual allowance payable is calculated as a percentage of basic salary. The amounts vary from SA2,854 (11%) to SA9,082 (35%). Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method now being the single transferable vote in 7-member constituencies. Casual vacancies in the House of Assembly are determined by a transfer of the preference of the vacating member's ballot papers to consenting candidates who were unsuccessful at the last general election.

A Minister must have a seat in one of the two Houses; only one of the present Ministers is a member of the Legislative Council.

In addition to the salary paid to Ministers as members of either House, the following allowances are payable: Premier, in conjunction with a ministerial office, SA32,436; Deputy Premier, in conjunction with a ministerial office, SA22,056; other Ministers, SA18,164. The Leader of the Opposition in the House of Assembly receives an allowance of SA18,164. The holders of some other offices receive allowances ranging from SA1,556 to SA8,650.

An election held in July 1979 saw the return of the Labor Government. A by-election was held in Feb. 1980 after the election results of the Denison Division were declared void. The resultant composition of the House of Assembly was Labor, 19 seats; Liberal, 15 and Australian Democrats, 1.

The Legislative Council is predominantly independent without formal party allegiance; 3 members are Labor-endorsed.

Governor: Sir Stanley Burbury, KCVO, KBE.

The Labor Party Cabinet is composed as follows:

Premier, Treasurer, Minister for Energy: D. A. Lowe.

Deputy Premier, Economic Planning and Development, Tourism, Licensing: M. T. C. Barnard. *Attorney-General, Health Services, Immigration and Ethnic Affairs:* B. K. Miller. *Education, Racing and Gaming, Police and Emergency Services:* H. N. Holgate. *Construction, Industrial Relations and Manpower Planning, the Arts:* T. G. Aulich. *Main Roads and Transport, Local Government:* M. W. Field. *Primary Industry, Environment, Forests, Water Resources:* J. J. Amos. *Lands, National Parks and Wildlife, Community Welfare and Child Care, Handicapped Persons' Services:* B. K. Lohrey. *Housing, Mines, Recreation:* D. J. Baldock. *Public Health, Consumer Affairs, Administrative Services:* G. H. James.

Agent-General in London: W. A. Neilson.

Official Secretary: C. Langbant (485/9 Strand, WC2).

Local Government. For the purposes of local government, the State is divided into 49 municipal areas comprising the cities of Hobart, Launceston and Glenorchy and 46 municipalities. The cities and municipalities are managed by elected aldermen and councillors, respectively, with reference to local matters such as sanitation and health services, domestic water supplies and roads and bridges within each particular area. The chief source of revenue is rates (based on improved values) levied on owners of property.

Tasmanian Islands. Three inhabited Tasmanian islands (Bruny, King and Flinders) are organized as municipalities. Nearly 1,600 km south-east lies Macquarie Island, part of the State, and used only as an Australian research base and meteorological station.

ECONOMY

Budget. The revenue is derived chiefly from taxation (payroll tax, motor, land, stamp and death duties), and from grants and reimbursements from the Federal Government. Customs, excise, sales and income tax are levied by the Federal Government, which makes grants to Tasmania for both revenue and capital purposes. Federal Government grants to Tasmania in 1979-80 totalled SA466m. These included Financial Assistance Grants, SA273m.; specific purpose payments, SA164m.; and Capital Grants, SA29m.

Specific purpose payments are mainly used to provide essential services such as

housing, roads and schools, while Financial Assistance Grants have been paid since 1942 to compensate the State for the loss of income tax to the federal government.

Consolidated Revenue Fund receipts and expenditure, in \$A1,000, for financial years ending 30 June:

	1974-75	1975-76	1976-77	1977-78	1978-79	1979-80
Revenue	268,522	322,091	396,617	444,263	495,822	560,192
Expenditure	282,065	317,947	395,033	450,706	492,961	563,917

The public debt at current exchange rates amounted to \$A970m. at 30 June 1980.

In 1979-80 State taxation receipts amounted to \$A113.4m., of which pay-roll tax provided \$A45.9m.; motor vehicles, \$A16m.; death duties, \$A3.9m.; land tax, \$A5.1m., and stamp duties, \$A24.6m.

Banking. Trading bank activity in Tasmania is divided between 6 private banks and the Commonwealth Bank of Australia. For the month of June 1980 liabilities represented by depositors' balances averaged \$A409m. and assets represented by advances, \$A374m. The 9 savings banks operating in Tasmania are the Commonwealth Savings Bank, 2 trustee savings banks and 6 private savings banks operated by trading banks. At 30 June 1980 total savings bank deposits were \$A642m.

ENERGY AND NATURAL RESOURCES

Electricity. Tasmania has good supplies of hydro-electric power because of assured rainfall and high level water storages (natural and artificial). The Hydro-Electric Commission, Tasmania's sole commercial supplier of electricity, has been surveying water power resources of the State for many years and it is estimated that about 3m. kw. can be economically developed. By mid-1980, 1,780,400 kw. of generating plant was in commission. In 1979 the peak loading was 1,151,000 kw. A major construction project, completed in 1978, was the Gordon River scheme involving the construction of Australia's largest artificial water storage (combined area of the 2 lakes created is over 500 sq. km) and one of the nation's largest dams. Water is carried from the Lake Gordon storage by a near vertical shaft to the power station 186 metres underground, which is operated by remote control from Hobart, 160 km away. Generator capacity of the Gordon River (Stage 1) scheme is 288,000 kw. The major project under construction is the \$A530m. Pieman River Power Development, comprising 3 power stations, which is scheduled for completion in 1986.

Minerals. The assayed content of principal metallic minerals contained in locally produced concentrates for 1978-79 was (in tonnes): Zinc, 73,074; iron, 1,569,946; copper, 24,471; lead, 21,172; tin, 6,960; gold, 1,764 kg; silver, 80,918 kg. Coal production (1978-79), 252,800 tonnes.

Primary Industries. The estimated gross value of recorded production from agriculture in 1978-79 was (in \$A1,000): Livestock products, 90,518; livestock slaughtering and other disposals, 91,737; crops, 80,053; total gross value, 262,308. Estimated gross value of production in forestry, fisheries and hunting was \$A82m.

Agriculture. The area occupied by the 6,142 holdings in 1978-79 totalled 2,231,718 hectares, of which 984,700 were devoted to crops and sown pasture. The following table shows the area and production, in tonnes, of the principal crops:

	1976-77		1977-78		1978-79	
	Hectares	Production	Hectares	Production	Hectares	Production

Livestock at 31 March 1979: Sheep, 4m.; cattle, 657,000; pigs, 61,000.

Wool produced during 1978-79 was 19m. kg. valued at \$A42m. In 1978-79 butter production was 7,075 tonnes; cheese, 17,494 tonnes.

Forestry. Indigenous forests cover a considerable part of the State, and the saw-milling industry is very important. Production of sawn timber in 1979-80 was 349,700 cu. metres. 928,100 cu. metres of logs were used for milling in 1979-80 and a further 3.6m. cu. metres were used for chipping, grinding or flaking. Newsprint and paper are produced from native hardwoods, principally eucalypts.

INDUSTRY AND TRADE

Industry. The most important manufactures for export are refined metals, newsprint and other paper manufactures, pigments, woollen goods, fruit pulp, confectionery, butter, cheese, preserved and dried vegetables, sawn timber, iron ore pellets and processed fish products. The electrolytic-zinc works at Risdon near Hobart treat large quantities of local and imported ore, and produce zinc, sulphuric acid, super-phosphate, sulphate of ammonia, cadmium and other by-products. At George Town, large-scale plants produce refined aluminium and manganese alloys. During 1979-80, 3.7m. tonnes (green weight) of woodchips were produced. In 1978-79 the average employment in manufacturing establishments employing 4 or more persons was 26,066; wages and salaries (excluding proprietors drawings), \$A266m.; turnover, \$A1,401m.; value added, \$A549m.; and number operating at 30 June, 552.

Labour. The Commonwealth Industrial Court (judicial powers) and Commonwealth Conciliation and Arbitration Commission (arbitral powers) have jurisdiction over federal unions, *i.e.*, with interstate membership. The Arbitration Commission abolished the concept of the basic wage in June 1967 and made an award in terms of total wage; in June 1969 it adopted the principle of equal pay for equal work for females. The Commission adopted wage indexation in principle in May 1975 as a result of the national wage case. The Commission decided to sit quarterly to consider the national wage pending a firm decision on wage indexation. Quarterly percentage wage increases were subsequently granted in line with the increase in the consumer price index during the March, June, Sept. and Dec. quarters, 1975, the Sept. quarter, 1976 and the March quarter, 1978. Increases, based on the consumer price index, were granted for the March, June and Dec. quarters, 1976, and for all quarters, 1977, but not to the full extent of the increase in the index. In Sept. 1978 the Commission decided to adjust award wages and salaries every 6 months in relation to the last two quarterly movements of the consumer price index. The Commission sits in Oct. and April each year.

Most Tasmanian employees not covered by federal awards operate under State Industrial Boards established for the various trades by resolution of Parliament or proclamation of the Governor. Each Board consists of a Chairman appointed by the Governor with equal representation of employers and employees. The Boards have authority over minimum rates for wages or piece work, number of working hours for which the wage is payable, conditions of apprenticeship, annual leave and adjustment of wage and piece-work rates. Industrial Boards follow to a large extent the wage rates fixed by the Conciliation and Arbitration Commission; from Oct. 1968 to June 1978 they followed the quantum of increase in the minimum wage fixed by the Australian Commission but did not abolish the basic wage concept.

Commerce. Trade by sea and air in \$A1m. for years ending 30 June:

CONSTITUTION AND GOVERNMENT. Victoria, formerly a portion of New South Wales, was, in 1851, proclaimed a separate colony, with a partially elective Legislative Council. In 1855 responsible government was conferred, the legislative power being vested in a parliament of two Houses, the Legislative Council and the Legislative Assembly. At present the Council consists of 44 members who are elected for 6 years, one-half retiring every third year. The Assembly consists of 81 members, elected for 3 years from the date of its first meeting unless sooner dissolved by the Governor. Members and electors of both Houses must be aged 18 years and natural born or naturalized British subjects. Women are fully enfranchised. No property qualification is required, but judges, members of the Commonwealth Parliament and undischarged bankrupts may not be members of either House. Single voting (one elector one vote) and compulsory preferential voting apply to Council and Assembly elections. Enrolment for Council and Assembly electors is compulsory. The Council may not initiate or amend money bills, but may suggest amendments in such bills other than amendments which would increase any charge. Any Minister, with the consent of the House of which he is not a member, may sit and speak in that House to explain a bill relating to the department administered by him, but may not vote in that House. A bill shall not become law unless passed by both Houses, except that, in the event of a continued disagreement between the two Houses as to a bill passed by the Assembly, other than certain constitutional bills, the Governor having dissolved the Assembly may subsequently dissolve the Council, and if the disagreement still continues he may convene a joint sitting of the members of the Council and the Assembly; if at such joint sitting the bill in dispute is passed by an absolute majority of all members it shall become law.

Private members of both Houses receive salaries of \$A29,526 per annum, additional allowances rising from \$A6,785 to \$A9,120 (outer electorates), and a living-away-from-home allowance of \$A35 for each day of attendance for each member (not being a responsible Minister or a metropolitan member).

Members holding the following offices receive the salaries and allowances specified: The President of the Council, \$A51,671 salary and \$A3,248 expense allowance; the Speaker of the Assembly, \$A51,671 salary and \$A3,248 expense allowance; the Chairman of Committees of the Council, \$A38,974 salary and \$A1,181 expense allowance; the Chairman of Committees of the Assembly, \$A38,974 salary and \$A1,181 expense allowance; the Leader of the Opposition in the Assembly, \$A51,671 salary and \$A5,315 expense allowance; the Deputy Leader of the Opposition in the Assembly, \$A38,974 salary and \$A1,772 expense allowance; the Leader of the Third Party, \$A38,974 salary and \$A1,772 expense allowance; a member of either House who is the Parliamentary Secretary of the Cabinet, \$A38,974 salary and \$A1,772 expense allowance; the Government Whip in the Assembly, \$A34,841 salary; the Whip of any recognized Party which consists of at least 12 members of Parliament, of which Party no member is a responsible Minister, \$A32,774 salary. All members have free passes over the Victorian Railways; country members are also entitled to certain allowances for air travel.

The Legislative Assembly, elected on 5 May 1979, is composed as follows: Liberal Party, 41; Labor Party, 32; National Party, 8.

Governor: Sir Henry Winneke, KCMG, KCVO, OBE, KStJ, QC.

In the exercise of the executive power the Governor is advised by a Cabinet of responsible Ministers. Section 50 of the Constitution Act 1975 provides that the number of responsible Ministers shall not at any one time exceed 18, of whom not more than 6 may sit in the Legislative Council. No responsible Minister may hold office for more than 3 months unless he is or becomes a member of the Council or the Assembly.

Responsible Ministers receive the following amounts: The Premier, \$A59,052 salary and \$A12,401 expense allowance; the Deputy Premier, \$A54,623 salary and \$A6,200 expense allowance; 16 other responsible Ministers, \$A51,671 salary and \$A5,315 expense allowance. Each responsible Minister also receives an electorate

allowance, an electorate office allowance, a residential allowance (where applicable) and, when travelling on business of the State, a travelling allowance. The President, Speaker, Chairman of Committees in the Assembly and in the Council, Parliamentary Secretary of the Cabinet, Leader and Deputy Leader of the Opposition in the Assembly, Leader of the Opposition in the Council and Leader in the Assembly of the Third Party, also receive a travelling allowance when travelling on official business. Members of Committees receive attendance fees and certain travelling expenses when on Committee duties.

The Liberal Party Government (first appointed 7 June 1955) is as follows:

Local Government. With the exception of Yallourn Works area (26.9 sq. km) and the unincorporated areas—French Island (154 sq. km), Lady Julia Percy Island (1.3 sq. km), the Bass Strait Islands and part of Gippsland Lakes (313 sq. km) and Tower Hill Lake Reserve (5 sq. km), the State is divided (at 30 June 1978) into 211 municipal districts, namely, 65 cities, 6 towns, 7 boroughs and 133 shires. The constitution of cities, towns, boroughs and shires is based on statutory requirements concerning population, rate revenue and net annual value of rateable property.

ECONOMY

Budget. The receipts and payments (in \$A1,000) of the Consolidated Fund in the years shown (ended 30 June) were:

	1976-77	1977-78	1978-79	1979-80	1980-81 ¹
Receipts	2,955,620	3,294,891	3,543,598	3,985,502	4,442,795
Payments	2,955,620	3,294,891	3,543,598	3,953,106	4,475,191

¹ Estimates.

The principal receipt items (in \$A1,000) during 1978-79 were: Taxation, 2,261,558 (including Federal Government reimbursement, 1,090,025, but excluding 224,218 paid to special funds); railways, 188,837; other Federal Government payments, 319,030, and mining royalties, 88,142. The principal heads of expenditure were: Interest and public debt charges (including railways), 294,839; railways, 348,642; education, 1,038,563; health, hospitals and charities, 435,277.

The amount raised by taxation (exclusive of taxes collected by the Federal Government or paid to special funds but inclusive of the Federal Government reimbursements under the uniform taxation scheme), as shown in the above paragraph, was approximately \$A589.50 per head of population.

The public debt of Victoria (in \$A1m.) on 30 June 1979 was 3,428. During the year ending 30 June 1979, an amount of 432 was expended on capital works. Of this amount, 164 was spent on education, 51 on railways, 36 on water supply, irrigation and drainage, 10 on protection of the environment (including sewerage), 14 on forestry, 65 on health services, 5 on agricultural, pastoral, etc., services, 26 on cul-

ture and recreation, 21 on law, order and public safety, 11 on legislature and general administration, development and decentralization, and 29 on all other purposes. In addition to the public debt noted above, Victoria had other liabilities due to the Federal Government at 30 June 1979. These included 1,046.6 advances for housing, 11.5 special assistance loans for soldier settlement, 73.7 advance for sewerage, 65.9 for rural and dairy reconstruction, 80 for growth centres and 37.1 for land acquisition.

Banking. On 30 June 1980 there were 7.15m. operative accounts (excluding school bank accounts) in savings banks in Victoria. The total credit due to depositors amounted to \$A7,839m., made up of State Savings Bank, \$A3,872m.; Commonwealth Savings Bank, \$A1,577m.; private savings banks, \$A2,389m.

The weekly average of deposits and advances of trading banks operating in Victoria during June 1980 were as follows: Deposits, not bearing interest, \$A2,294m.; deposits, bearing interest, \$A3,512m.; total deposits, \$A5,806m.; loans, advances, and bills discounted, \$A4,524m. The weekly average of debits to customers' accounts (excluding debits to Federal and State Government accounts at City branches in State capitals) for the same period totalled \$A7,855m.

ENERGY AND NATURAL RESOURCES

Electricity. All electricity in this State for public supply is generated by the largest electricity supply authority in Australia—the State Electricity Commission of Victoria. Its supply network serves over 99% of the entire Victorian population and some New South Wales municipalities as well as irrigation settlements bordering the Murray River.

The major base load generating stations are located in the Latrobe Valley on top of a large brown coal field with estimated geological reserves of 107,847m. tonnes. Burning raw brown coal on site and with an installed generating capacity of 2,991,000 kw., these stations produce over 80% of Victoria's electricity. The chief one is Hazelwood, which was completed in 1971 with a capacity of 1.6m. kw. The total installed generating capacity of all thermal stations in Victoria is 3,542,000 kw. including the base load stations in the Latrobe Valley and smaller ones in Melbourne, and some provincial cities.

The total installed capacity of the Commission's system at 30 June 1979 was 4,945,000 kw.; it includes Victoria's share of about one-third (1,059,000 kw. at 30 June 1979) of the Snowy Mountains hydro-electric scheme in New South Wales and its half share (25,000 kw.) of the Hume hydro-electric station, shared with New South Wales. Excluding the Snowy and Hume schemes in New South Wales the installed hydro-electric capacity totalled 316,500 kw. at 30 June 1979, with Kiewa (3 stations totalling 183,600 kw.) being the chief undertaking.

Total power generated and purchased in 1978-79 was 21,276 gwh.

Oil and Natural Gas. Crude oil in commercially recoverable quantities was first discovered by the Esso BHP partnership in 1967 in 2 large fields offshore in East Gippsland in Bass Strait between 65 and 80 km from land. These fields, Halibut and Kingfish, with 5 smaller fields since discovered—Barracouta, Mackerel, Tuna, Cobia and Flounder, have been assessed as containing initial recoverable reserves of more than 2,917m. bbls of treated crude oil. Total production since 1969 from the 4 producing fields to the end of Sept. 1979 has amounted to 1,158m. bbls, leaving a balance of recoverable reserves of 1,759m. bbls.

Gippsland crude now supplies approximately 71% of Australia's refinery requirements, and during 1979 a total of 146m. bbls were produced from the 4 fields, Mackerel, Halibut, Kingfish and Barracouta. Depletion of production from the 2 major fields, Kingfish and Halibut and the smaller Barracouta field, is now expected to occur in the late-1980s.

Natural gas was discovered offshore in East Gippsland in 1965. The initial recoverable reserves of treated gas are 7,621,000m. cu. ft. Reserves are sufficient for 30 years. Following an extensive development and distribution programme, natural gas was first connected to homes and industry in Victoria in April 1969. All gas consumers in Melbourne, Geelong, Ballarat, Bendigo, Shepparton, Euroa, Benalla, Wangaratta, Wodonga, Albury and a number of towns near Melbourne, in the Latrobe Valley and in East Gippsland, are now using natural gas. At 30 June 1979 a

total of 771,203 consumers were being supplied with it. During the period 1 July 1978 to 30 June 1979 a total volume of 3,715 m. cu. metres of gas was consumed in Victoria, including commercial sales and plant usage.

Natural gas and crude oil are conveyed from the producing fields to a large treatment plant at Longford in East Gippsland from where both hydrocarbons are distributed by a network of transmission lines to tank farms and city gate distribution points.

The crude oil is then distributed to refineries in Victoria by pipeline and to other States by seagoing tankers. Natural gas is distributed to residential and industrial consumers through pipelines comprising some 1,684 km of high-pressure lines and over 13,700 km of transfer, direct high-pressure and reticulation lines.

Liquefied petroleum gas is now being produced after extraction of the propane and butane fractions from the untreated oil and gas; about 1.7 m. tonnes a year is exported by Esso and BHP, mainly to Japan.

Brown Coal. Major deposits of brown coal are located in the Central Gippsland region and comprise approximately 94% of the total reserves in Victoria. In the Latrobe Valley section of this region the thick brown coal seams underlie an area from 10–30 km wide and extend over a length of approximately 70 km from Yallourn in the west to the south of Sale in the east. Small fields have also been found at Stradbroke in the ranges on the southern flank of the Valley and in the Gelliondale-Welshpool area near the coast. On a geological basis the brown coal reserves in Central Gippsland are estimated to be in the order of 108,000 megatonnes, of which about 65,000 megatonnes are proven and the remaining 43,000 megatonnes are inferred.

About 54% of the reserves occur in areas where the overburden over the uppermost seam is less than 30.5 metres while 95% is in areas with less than 91.4 metres of overburden. The current primary use of these reserves is to fuel the major base load electricity generating stations located at Morwell and Yallourn, and larger cuts have been opened for this purpose at these localities.

Land Settlement. Of the total area of Victoria (22.76 m. hectares), 13,857,000 hectares on 30 June 1980 were either alienated or in process of alienation. The remainder (8,773,000) constituted Crown land as follows: Perpetual leases, grazing and other leases and licences, 2,378,000; reservations including forest and timber reserves, water, catchment and drainage purposes, national parks, wildlife reserves, water frontages and other reserves, plus unoccupied and unreserved including areas set aside for roads, 6,395,000. Rural establishments at 31 March 1979 numbered 48,855.

Agriculture. The following table shows the area under the principal crops and the produce of each for 3 seasons (in 1,000 units):

Season	Total crop area		Wheat		Oats		Barley		Potatoes		Hay	
	Hec- tares	Hec- tares	Tonnes	Hec- tares	Tonnes	Hec- tares	Tonnes	Hec- tares	Tonnes	Hec- tares	Tonnes

In 1978–79 there were 20,558 hectares of vines, yielding 65,201 tonnes of grapes for wine-making and 177,623 tonnes of grapes for drying or for table use. Green fodder covered 54,593 hectares, and orchards and vegetables, including potatoes and onions, occupied 44,495 hectares.

At March 1979 there were in the State 4.1 m. head of cattle, 22,750,116 sheep and 389,976 pigs. In 1978–79, 553,373 tonnes of fresh meat was produced. The wool produced in the season 1979–80 amounted to 139 m. kg. valued at \$A271 m. The quantity of butter produced in 1978–79 was 80.7 m. kg.

The gross value of Victorian primary production in (rural and non-rural) 1978–79 was \$A2,223 m.

Minerals. The recorded production of certain metals and minerals raised in Victoria for the year 1978–79 was: Gold, 26,000 grammes, value \$A129,000; coal, brown, 32.1 m. tonnes, value \$A79.6 m.

INDUSTRY AND TRADE

Industry. From the 1975-76 Census of Manufacturing Establishments onwards only a limited range of data—employment and wages and salaries—has been collected from single-establishment manufacturing enterprises with less than 4 persons employed. This procedure significantly reduces the statistical reporting obligations of small businesses. Data in respect of the larger manufacturers provides reliable information for the evaluation of trends in the manufacturing sector of the economy. From the 1977-78 census, the classification of census units to industry is based on the 1978 edition of the Australian Standard Industrial Classification. The following data relates to manufacturing establishments owned by multi-establishment enterprises, and single-establishment manufacturing enterprises with 4 or more persons employed.

The total number of manufacturing establishments in Victoria in 1978-79 (figures for 1977-78 in brackets) was 8,550 (8,571). Persons employed, including working proprietors, on the last pay day in June were males 279,270 (280,708) and females 115,613 (116,014). Salaries and wages paid were SA4,102m. (SA3,831m.), excluding drawings of working proprietors. The cost of purchases, transfers in, and selected expenses was SA11,142m. (SA9,638m.) and sales, transfers out and other operating revenue were SA18,229m. (SA16,175m.).

The preceding figures exclude gas and electricity producing and distributing establishments. In terms of persons employed the most important manufacturing activities were: Basic and fabricated metal products including transport equipment, other machinery and equipment, 151,186 (149,448); textiles, clothing and footwear, 64,029 (64,472); food, beverages and tobacco, 55,227 (58,234).

Trade Unions. There were 166 trade unions with a total membership of 747,100 operating in Victoria in Dec. 1979.

Commerce. The commerce of Victoria, exclusive of inter-state trade, is included in the statement of the commerce of Australia. *see pp. 110-12.*

The total value of the overseas imports and exports of Victoria, including bullion and specie but excluding inter-state trade, was as follows (in SA1,000):

	1974-75	1975-76	1976-77	1977-78	1978-79	1979-80 ¹
Imports	2,793,411	2,875,772	3,665,914	3,855,619	4,694,481	5,506,573

¹ Preliminary.

The chief exports¹ in 1979-80 were: Textile fibres and their wastes, meat, cereals, petroleum products and gases, dairy products, hides and skins, fruit and vegetables, road vehicles, non-ferrous metals.

The Act providing for the payment of such pensions came into operation on 18 Jan. 1901, and continued until 1 July 1909, when the Australian Invalid and Old Age Pension Act came into force. The Social Services Consolidation Act, which came into operation on 1 July 1947, repealed the various legislative enactments relating to age (previously old-age) and invalid pensions, maternity allowances, child endowment, and unemployment, and sickness benefits and while following in general the Acts repealed, considerably liberalized many of their provisions: it has since been amended. On 31 Oct. 1979 there were 356,933 aged and 54,305 invalid pensioners in Victoria, and the amount paid in pensions, including payments to wives of invalid pensioners, during 1978-79 was \$A1,023.5m.

The authorities include the Housing Commission, the Teacher Housing Authority, the Co-operative Housing Registry, and the Decentralised Industry Housing Authority which was established in April 1973 to provide housing for key personnel of industries in the country. The Co-operative Housing Registry administers distribution of finance to the co-operative building societies from loan moneys advanced by the Federal Government.

On the coming into operation of amending legislation on 24 Jan. 1979, the Housing Commission, as it was constituted, ceased to exist and was replaced by a Commission consisting of a full-time Chairman and 3 part-time members. The Director of Housing (the Permanent Head of the Ministry of Housing) is, *ex officio*, Chairman of the Commission. The Housing Advisory Council was also created under that legislation, its functions being to advise on and investigate matters affecting housing and to consult with all sections of the housing industry. The Council consists of the Director and 6 part-time members appointed by the Minister of Housing.

Since its inception in 1938, the Housing Commission had built, to 30 June 1980, 89,908 housing units, of which 49,512 had been sold. Approximately 39.7% of all construction since 1938 is located outside the Melbourne metropolitan area.

Rental charges for the year ended 30 June 1980 were \$A68,818,824, against which \$A12,766,179 was allowed in rent rebates to tenants on low incomes, including pensioners.

WESTERN AUSTRALIA

HISTORY. In 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Frederickstown. In 1827 Captain (afterwards Sir) James Stirling surveyed the coast from King George Sound to the Swan River, and in May 1829 Captain (afterwards Sir) Charles Fremantle took possession of the territory. In June 1829 Captain Stirling, newly appointed Lieut.-Governor, founded the colony now known as the State of Western Australia. On 1 Jan. 1901 Western Australia became one of the 6 federated States within the Commonwealth of Australia.

AREA AND POPULATION. Western Australia lies between 113° 09' and 129° E. long. and 13° 44' and 35° 08' S. lat.; its area is 2,525,500 sq. km.

The enumerated population at each census from 1921 was as follows¹:

	<i>Males</i>	<i>Females</i>	<i>Total</i>		<i>Males</i>	<i>Females</i>	<i>Total</i>
1921	177,278	155,454	332,732	1961	375,452	361,177	736,629

Of the census population in 1976, 832,419 were born in Australia. Married persons numbered 518,407 (260,797 males and 257,610 females); widowers, 8,776; widows, 39,610; divorced, 8,819 males and 10,167 females; never married, 291,841 males and 243,604 females. The number of males under 21 was 231,444 and of females 219,699.

Perth, the capital, had an estimated population of 883,600 at June 1979. Of this, the area administered by the City of Perth had a population of 88,850 while the population in the area for which the City of Fremantle is responsible (which includes the chief port of the State) was 23,480.

CONSTITUTION AND GOVERNMENT. In 1870 partially representative government was instituted, and in 1890 the administration was vested in the Governor, a Legislative Council and a Legislative Assembly. The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the colony reaching 60,000, it should be elective. In 1893 this limit of population being reached, the Colonial Parliament amended the Constitution accordingly.

The Legislative Council consists of 32 members, 2 members representing each of the 16 electoral provinces. Each member is elected for a term of 6 years, one-half of the members retiring every 3 years.

There are 55 members of the Legislative Assembly, each member representing one of the 55 electoral districts of the State. Members are elected for the duration of the Parliament, normally 3 years. The qualifications applying to candidates and electors are identical for the Legislative Council and the Legislative Assembly. A candidate must have resided in Western Australia for a minimum of 12 months, be at least 18

years of age and free from legal incapacity, be a British subject, and be enrolled, or qualified for enrolment, as an elector. A judge of the Supreme Court, the Sheriff of Western Australia, an undischarged bankrupt or a debtor against whose estate there is a subsisting order in bankruptcy may not be elected to Parliament. No person may hold office as a member of the Legislative Assembly and the Legislative Council at the same time. An elector must be at least 18 years of age, be a British subject free from legal incapacity, must have resided in the Commonwealth of Australia for 6 and in Western Australia for 3 months continuously and in the electoral district for which he claims enrolment for a continuous period of 1 month immediately preceding the date of his claim. Enrolment is compulsory for all qualified persons except Aboriginal natives of Australia, who are entitled but not required to enrol. Voting at elections is on the preferential system and is compulsory for all enrolled persons.

Ordinary members of the legislature are paid a salary of \$A26,041 a year, with an additional electorate allowance, ranging from \$A7,560 to \$A16,110 according to location of electorate. Members are entitled to free travel on Western Australian government railways and on the Metropolitan (Perth) Passenger Transport Trust omnibus and ferry services, and, by arrangement, once every year on government railways in other States. All members of Parliament contribute to superannuation benefits.

The Premier receives a salary, including an electorate allowance, of \$A62,304, the Deputy Premier \$A55,443, the Leader of the Government in the Legislative Council \$A53,694, and all other Ministers \$A49,824–56,294 according to location of electorate.

The Legislative Assembly, elected on 23 Feb. 1980, is composed as follows: Liberal Party, 26; Australian Labor Party, 23; National Country Party, 3; National Party, 3. The Legislative Council, one-half of which was elected on the same day, is composed of 19 Liberal Party, 9 Australian Labor Party, 3 National Country Party, 1 National Party.

Governor: Rear-Admiral Sir Richard Trowbridge, KCVO.

The Liberal–National Country Party coalition Cabinet was, at 30 June 1980:

Premier, Treasurer, and Minister Co-ordinating Economic and Regional Development: Hon. Sir Charles Walter Michael Court, KCMG, OBE, MLA.

Local Government. The only unincorporated area in mainland Western Australia is King's Park, a public reserve of about 403 hectares in Perth. Including the lord-mayoralty of Perth there were 12 cities, 12 towns and 114 shires at 30 June 1980. The executive body in each of these districts is normally an elective council, presided

over by a mayor (city and town) or a president (shire), but in certain circumstances it may be a commissioner appointed by the Governor. Their functions include road construction and repair, the provision of parks and recreation grounds, the administration of building controls and local services such as health and, in some country districts, traffic. Finance is derived largely from rates levied on property owners as well as charges for services and government grants (mainly for road construction).

ECONOMY

Budget. The revenue and expenditure (in \$A) of Western Australia in years ended 30 June, are given as follows:

ENERGY AND NATURAL RESOURCES

Minerals. The mining industry has been for many years of considerable significance in the Western Australian economy. Until the mid-1960s the major mineral produced was gold. However, in recent years gold has been displaced by iron ore, crude oil, bauxite and nickel concentrates in terms of value.

The total ex-mine value of minerals from mining and quarrying in the State in 1978-79 was \$A1,369.4m. Principal minerals produced in 1978-79 were: Iron ore, 79m. tonnes, value \$A823.8m.; crude oil, 1.7m. cu. metres, value \$A73.3m.; gold bullion, 15.1m. grammes, value \$A78.7m.; construction materials (excluding sand and gravel), value \$A25.5m.; mineral sands, 1.53m. tonnes, value, \$A59.4m.; black coal, 2.41m. tonnes, value \$A34.5m.; salt, 4.49m. tonnes, value \$A31.6m.; tin concentrates, 604 tonnes, value \$A5.49m.; nickel concentrates, 353,000 tonnes; bauxite, 12.9m. tonnes, and natural gas, 835m. cu. metres.

The livestock at 31 March 1979 consisted of 2,091,940 cattle, 30,264,660 sheep and 271,490 pigs.

INDUSTRY AND TRADE

Industry. Up to the early 1950s most of the factories in Western Australia were small and medium sized establishments supplying the local market and carrying out some processing of the State's primary products for export. Development of heavy industry and large-scale operations since the early 1950s has been associated with the establishment of a large oil refinery at Kwinana in 1954 which provided the basis for an integrated industrial complex adjacent to Perth; more recent developments have been associated with the processing of the State's vast deposits of iron ore, nickel, bauxite and mineral sands.

The following table shows manufacturing industry statistics for 1978-79¹:

Labour. The Industrial Arbitration Act Amendment Act (No. 2), 1963 which came into operation on 1 Feb. 1964, abolished the Court of Arbitration and established The Western Australian Industrial Commission and the Western Australian Industrial Appeal Court.

The Western Australian Industrial Commission consists of a President, a Chief Industrial Commissioner, a Senior Commissioner, and 'such number of other Commissioners as may, from time to time, be necessary'. There were 5 'other Commissioners' at 1 March 1980. A person shall not be appointed as President unless he is

qualified to be a Judge, and on appointment he is entitled to the status of a Puisne Judge. The President or a Commissioner sitting or acting alone constitutes the Commission and may exercise the appropriate powers of the Commission.

The Commission can inquire into any industrial matter and make an award, order or declaration relating to such matter. 'Industrial matter' means any matter affecting or relating to the work, privileges, rights, or duties of employers or employees in any industry and includes any matter relating to the wages, salaries, allowances, or other remuneration of employees or the prices to be paid in respect of their employment; the hours of employment, sex, age, qualification or status of employees and the mode, terms and conditions of employment including conditions which are to take effect after the termination of employment. The Commission may also make inquiries where industrial action has occurred or is likely to occur.

The Commission in Court Session is constituted by not less than 3 Commissioners sitting or acting together, and may make General Orders, hear matters referred by the Commission, and hear appeals from decisions of Boards of Reference.

The Full Bench is constituted by not less than 3 members of the Commission, 1 of whom is the President, and may hear matters referred by the Commission on questions of law, and appeals from decisions of the Commission.

The following table shows particulars relating to The Western Australian Industrial Commission.

The Western Australian Industrial Appeal Court consists of 3 judges, one of whom is the Presiding Judge. An appeal lies to the Court from any decision of the President, the Full Bench, or the Commission in Court Session on the ground that the decision is erroneous in law or is in excess of jurisdiction.

HISTORY. Treaties with Britain of 1882 and 1892 were replaced by a treaty of friendship which was signed on 15 Aug. 1971. Under the earlier treaties Britain had been responsible for Bahrain's defence and foreign relations. On the same day Bahrain declared its independence.

AREA AND POPULATION. The Bahrain islands form an archipelago in the Arabian Gulf, between the Qatar peninsula and the mainland of Saudi Arabia. The total area is about 255 sq. miles. Bahrain ('Two Seas'), largest island, is 30 miles long and 10 miles wide. Muharraq, to the north-east, 4 miles long and 1 mile wide, is connected with Bahrain by a causeway, nearly 1.5 miles long, carrying a motor road. Other islands are Sitra, to the east, 3 miles long and 1 mile wide; Umm An-Nassan, to the west, 3 miles by 2 miles; Jidda, also to the west, 1 mile by 0.5 mile, the Hawar group off Qatar and several islets, some uninhabited. From Sitra oil pipelines and a causeway carrying a road extend out to sea for 3 miles to a deep-water anchorage. The islands are low lying, the highest ground being a hill in the centre of Bahrain, 450 ft high.

The population in 1971 (census) was 216,815. Estimate (1980) 350,000. The majority of the people are Moslem Arabs.

Manama, the capital of the state and the commercial centre, is situated at the northern end of the largest island and extends for 1.5 miles along the shore. It has a population of 82,345 (1971 census). Estimate (1978) 114,030. Electricity from the government power-station in Manama supplies light and power in Manama, Muharraq (48,161, 1978 estimate), Hidd (6,725), Rifa'a (13,696) and Isa Town (9,573) and the villages. Water is obtained from artesian wells, and there is a piped supply in Manama, Muharraq, Isa Town, Rifa'a and most villages.

A National Assembly with a proposed 4-year life met for the first time in 1973 but was dissolved at the end of 1975. Bahrain is administered by a cabinet, which was formed in 1971 to succeed the Council of State.

The exceptions are liquor (75%) and tobacco (15%). Total revenues in 1974, BD 53m.; 1975, BD 134m.; 1976, BD 181m.; 1977, BD 249m.; 1978, BD 280m.

On 2 Jan. 1958 Manama was declared a free transit port and the former 2% transit duty was abolished, but storage charges are levied.

Oil. In 1931 oil was discovered. Operations are being conducted by the Bahrain Petroleum Co., registered in Canada but owned by US interests, under a concession granted by the Shaikh. Production of crude oil in 1979 was 18.74m. bbls. A large oil refinery on Bahrain Island, besides treating crude oil produced locally, also processes oil from Saudi Arabia transported by pipeline.

In 1975 the Bahrain Government assumed a direct 60% interest in the Bahrain oilfield and related crude oil facilities of BAPCO. Bahrain's gas reserves are 100% government-owned.

Under the terms of the agreement signed between Bahrain and Saudi Arabia in 1958, Bahrain will receive 25% of the profits on any oil produced in the Abu Saafa area of sea between Bahrain and Saudi Arabia. Aramco, which is responsible for the development of this field, began production in 1966.

Gas. There is an abundant supply of natural gas with known reserves of 9,000,000m. cu. ft.

INDUSTRY AND TRADE

Industry. Bahrain is being developed as a major manufacturing state, the first important enterprise being the Aluminium Bahrain Smelter, a company whose original shareholders included the Bahrain Government and British, Swedish, Federal German and US interests. In 1975, the government acquired a majority shareholding in the enterprise. The aluminium operation is the largest non-oil industry in the Gulf. Ancillary industries developed around aluminium smelting include the production of aluminium powder. Other projects at present under consideration include the further development of marine industries. The Arab Shipbuilding and Repair Yard (ASRY), commissioned in 1977, is now in service. The dry dock can handle up to 50 tankers (550,000 DWT each) annually. A US\$400m. petrochemical complex will go on stream in 1984.

In addition to the traditional minor industries such as boat-building, weaving,

pottery, etc., other modern industries have developed, which include the manufacture of building materials, soft drinks, drinking straws, paper bags, woollen garments, plastic and other consumer goods. There is also an important fishing industry and a fairly large farming community. The most important crops are dates and vegetables, and there is also poultry farming.

Livestock (1979): Cattle, 5,000; sheep, 3,000; goats, 13,000; poultry, 504,000.

The pearling industry for which Bahrain used to be famous has considerably declined. Only about 10 boats visit the pearl banks each year, as compared with the 600–1,000 that were employed 30 years ago.

Commerce. In 1979 imports totalled BD 916m.; exports and re-exports, non-oil, BD 912m. Chief imports were manufactured goods, machinery and transport equipment, food and live animals, chemicals.

Import of arms and ammunition and telecommunication equipment is subject to special permission; the sale of alcoholic liquor is restricted and the import of cultured pearls is forbidden.

Imports to UK	30,146	13,673	34,704	23,780	25,063
Exports and re-exports from UK	89,628	113,777	119,855	123,467	115,569

British Airways, Gulf Air, Middle East Airlines, Pakistan International Airways, Qantas, Kuwait Airways, Air India International, Singapore Airlines, UTA, Saudi Arabian Airlines, KLM, Iran Airways, Egyptair, Alia, Cyprus Airways, Ethiopian Airlines and Sudan Airways also operate to and from Bahrain. Bahrain International Airport is the Arabian Gulf's main air communication centre.

Shipping. Bahrain's traditional position as the entrepôt of the Southern Gulf has been supplemented by the development of Mina Sulman—the new modern harbour—as a free transit and industrial area. Local and international companies have developed industries in this area, which is also used as a storage centre for firms selling elsewhere in the Gulf. The facilities offered by Mina Sulman include engineering and ship repairing yards; the Basrec slipway is probably the largest between Rotterdam and Hong Kong.

On 15 Aug. 1975 Sheikh Mujibur Rahman and his family were killed; martial law was introduced on 20 Aug. and political parties were banned (including the new BKSAL) on 30 Aug. K. M. Ahmed was installed as President on 15 Aug. and replaced on 7 Nov. by former Chief Justice A. M. Sayem. Elections to parliament were promised for Feb. 1977 but postponed indefinitely in 1976. Political parties were made legal once again and requested to apply for registration in Aug. 1976.

Three political parties (JSD, Bangladesh Communist Party (pro-Soviet) and Democratic League) were dissolved in Oct. 1977. The President was confirmed in office by general election. Martial law ended in April 1979.

Parliament has one chamber of 300 members directly elected every 5 years by citizens over 18. There are 30 seats reserved for women members elected by Parliament. The judiciary is independent of the executive.

HISTORY. The kingdom of Belgium formed itself into an independent state in 1830, having from 1815 been part of the Netherlands. The secession was decreed on 4 Oct. 1830 by a provisional government, established in consequence of a revolution which broke out at Brussels, on 25 Aug. 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on 4 June 1831; he ascended the throne 21 July 1831.

By the Treaty of London, 15 Nov. 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, 19 April 1839, which established peace between King Leopold I and the King of the Netherlands, that all the states of Europe recognized the kingdom of Belgium. In the Treaty of Versailles (28 June 1919) it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation', these are abrogated and will be replaced by other treaties.

AREA AND POPULATION. Belgium is bounded north by the Netherlands, north-west by the North Sea, west and south by France, east by Federal Republic of Germany and Luxembourg. Belgium has an area of 30,519 sq. km (11,778 sq. miles). The Belgium exclave of Baarle-Hertog in the Netherlands has an area of 7 sq. km, and a population (1 Jan. 1980) of 1,108 males and 1,036 females.

By an agreement, 23 Sept. 1956, the frontier with Germany was slightly readjusted.

CONSTITUTION AND GOVERNMENT. According to the constitution of 1831, Belgium is a constitutional, representative and hereditary monarchy. The legislative power is vested in the King, the Senate and the Chamber of Representatives. The royal succession is in direct male line in the order of primogeniture.

By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under 18 years of age the two Chambers meet together for the purpose of nominating a regent during the minority.

National flag: Three vertical strips of black, yellow, red.

National anthem: Après des siècles d'esclavage (La Brabançonne; words by Jenneval, 1830; tune by F. van Campenhout, 1930).

French, Dutch and German are official languages.

Those sections of the Belgian Constitution which regulate the organization of the legislative power were revised in Oct. 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for 4 years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constituent body is similar to that which elects deputies to the Chamber; the minimum age of electors is 21 years, and the minimum length of residence required is 6 months. Women were given the suffrage at parliamentary elections on 24 March 1948. In the direct elections of members both the Senate and Chamber of Representatives the principle of proportional representation was introduced by law of 29 Dec. 1899.

Senators are elected indirectly by the provincial councils, on the basis of 1 for 200,000 inhabitants. Every addition of 125,000 inhabitants gives the right to 1 senator more. Each provincial council elects at least 3 senators. There are at present 50 provincial senators. No one, during 2 years preceding the election, must have been a member of the council appointing him. Senators are elected by the Senate itself in the proportion of half the preceding category. The senators belonging to these two latter categories are also elected by the method of proportional representation. All senators must be at least 40 years of age. They receive 900,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the royal family, are by right senators at the age of 18, but have no voice in the deliberations till the age of 25 years; this prerogative is hardly ever used.

The members of the Chamber of Representatives are elected by the electoral body. Their number, at present 212 (law of 3 April 1965), is proportional to the population, and cannot exceed one for every 40,000 inhabitants. They sit for 4 years. Deputies must be not less than 25 years of age, and resident in Belgium.

Each deputy has an annual allowance of 900,000 francs. Senators and deputies have also free railway passes.

The Senate and Chamber meet annually in October and must sit for at least 40 days; but the King has the power of convoking extraordinary sessions and of dissolving them either simultaneously or separately. In the latter case a new election must take place within 40 days and a meeting of the chambers within 2 months.

An adjournment cannot be made for a period exceeding 1 month without the consent of the Chambers.

After the revision of the Constitution by the laws of 24 Dec. 1970 and 28 July 1971 establishing three regions and two cultural councils, legislation on 'preparatory regionalization' was enacted in July 1974.

Parliament was dissolved on 15 Nov. 1978 and general elections were held on 17 Dec. 1978.

Parties in the Senate after the election: *Christelijke Volkspartij*, 29; *Parti social chrétien*, 12; *Socialistische Partij*, 13; *Parti Socialiste Belge*, 18; *Partij voor Vrijheid en Vooruitgang*, 11; Other parties, 23.

A 4-party coalition government was formed in Oct. 1980 and in March 1981 was composed as follows:

Prime Minister: Dr Wilfried Martens (CVP).

Deputy Prime Ministers: Guy Spitaels, PS (*Transport*); Willy Claes, SP (*Economic Affairs*); José Desmarets, PSC (*Planning and Middle Classes*). *Public Works and Institutional Reform (Flemish Section):* Jos Chabert (CVP). *Foreign Affairs:* Charles-Ferdinand Nothomb (PSC). *Agriculture:* Albert Lavens (CVP). *Social Security and Public Health:* Luc Dhoore (CVP). *Interior and Budget:* Guy Mathot (PS). *Foreign Trade:* Robert Urbain (PS). *Finance:* Mark Eyskens (CVP). *Employment and Labour:* Roger de Wulf (SP). *Justice and Institutional Reform (French-speaking Section):* Philippe Moureaux (PS). *Development Co-operation:* Daviel Coens (CVP). *Public Service, Scientific Policy and Environment:* Philippe Maystadt (PSC). *Pensions:* Pierre Mainil (PSC). *Posts and Telecommunications:* Freddy Willockx (SP). *Defence:* Dr Frank Swaelen (CVP). *Ministers with Community and Regional Responsibilities:* Dr Mark Galle (SP). Local Government. Belgium has 9 provinces and since the so-called 'Amalgamation Law' of 30 Dec. 1975, 589 communes (instead of 2,359). They have a large measure of autonomous government. According to the law of 15 April 1920, changed by law, 1 July 1969, all Belgians over 18 years of age without distinction of sex, who have been domiciled for at least 6 months, have the right to vote in communal elections. Proportional representation is applied to the communal elections, and communal councils are to be renewed every 6 years. In each commune there is a college composed of the burgomaster as the president and a certain number of aldermen.

DEFENCE. Belgium is a full member of NATO since 1949 and of the Eurogroup since 1968. The need to extend European armaments co-operation led to the formation of the Independent European Program Group (IEPG) in 1976. Its members include Belgium.

According to the Military Law of 30 April 1962, the Belgian Army is recruited by annual calls to the colours and by voluntary enlistments.

Compulsory service lasts 8 or 10 months for private soldiers, 13 months for voluntary reserve officers and 15 for the paracommando regiment. Duration of military obligation is 8 years for most soldiers called for compulsory service.

Army. The Army comprises as major units 1 armoured and 3 mechanized brigades (2 of which are deployed as the Belgian divisions in the Belgian corps area in the Federal Republic of Germany) and 1 paracommando regiment. There are also 3 reconnaissance and 2 motorized battalions. Total strength about 63,500 (including medical services). *Gendarmerie*, 16,300.

Equipment includes nearly 330 LEOPARD Main Battle Tanks, 135 SCORPION Light Tanks, 150 SCIMITAR Armoured Fighting Vehicles, 1,150 Armoured Personnel Carriers and 80 JPK 90mm Self-Propelled Anti-Tank Guns; Artillery Battalions are equipped with 105mm, 155mm and 203mm Self-Propelled Howitzers, LANCE Surface-to-Surface Missiles, HAWK Surface-to-Air Missiles and GEPARD Armoured Vehicles with 35mm Anti-Aircraft Guns.

Naval personnel in 1981 totalled 4,600 officers and ratings.

The naval air arm comprises 3 Alouette III general utility helicopters.

Air Force. The Air Force has a strength of about 20,000 personnel and more than

270 aircraft in 14 operational squadrons and support units. There is 1 all-weather fighter wing (2 squadrons), of F-16s; 1 fighter-bomber wing (2 squadrons) of F-104G Starfighters, which will convert to F-16s in 1982-83; 2 tactical wings with 3 squadrons of Mirage 5Bs, including Mirage 5BD two-seat trainers, and 1 squadron of Mirage 5BR photo-reconnaissance aircraft; and 1 wing (2 squadrons) equipped with 12 C-130H Hercules turboprop transports, 2 light twin-jet Falcons, 3 HS 748 twin-turboprop transports, 5 Swearingen Merlin III light turboprop transports and 2 Boeing 727. BELIZE

Capital: Belmopan

Population: 151,607 (1978)

GNP per capita: US\$840 (1978)

HISTORY. The early settlement of the territory was probably effected by British woodcutters about 1638; from that date to 1798, in spite of armed opposition from the Spaniards, settlers held their own and prospered. In 1780 the Home Government appointed a superintendent, and in 1862 the settlement was declared a colony, subordinate to Jamaica. It became an independent colony in 1884. Self-government was attained in 1964.

AREA AND POPULATION. Belize is bounded north by Mexico, west by Guatemala and south and east by the Caribbean sea. Area, 22,963 sq. km. There are 6 districts:

	<i>Sq. km</i>	<i>Population census, 1970</i>		<i>Sq. km</i>	<i>Population census 1970</i>
Corozal	1,860	15,504	Cayo	5,338	16,034
Belize	4,204	49,661	Stann Creek	2,176	13,044
Orange Walk	4,737	16,666	Toledo	4,649	8,954

Total population (census, 1970) 119,863. Estimate, 1978, 151,607. Voters on the roll numbered 33,737 in 1974. In 1977 the birth rate per 1,000 was 43.9 and the death rate 6.1; infantile mortality 40 per 1,000 births; there were 871 marriages and (1974) 19 divorces.

Main city, Belize City; population, census 1970, 39,050. Estimate, 1978, 49,749. Following the severe hurricane which struck the territory on 31 Oct. 1961 the capital Belmopan (population, 1978, 4,000) has been moved to a new site 50 miles inland; construction began in Jan. 1967 and it became the seat of government on 3 Aug. 1970. See map in the 1978-79 edition of *THE STATESMAN'S YEAR-BOOK*.

CONSTITUTION AND GOVERNMENT. Under the constitution, which came into force on 1 Jan. 1964, Belize, formerly British Honduras has a 2-chamber legislature, with a ministerial system and cabinet responsibility. The House of Representatives consists of 18 members elected by universal suffrage. The Senate consists of 8 members, 5 of whom are appointed on the advice of the Premier, 2 on the advice of the Leader of the Opposition and 1 by the Governor.

At the general elections held in Nov. 1979 the Peoples' United Party held 13 of the 18 parliamentary seats and the United Democratic Party 5 seats.

The Governor retains responsibility for defence, external affairs, internal security, the safeguarding of conditions of service of public officers, and over finance 'so long as the Government of Belize is in receipt of budgetary aid from the UK'.

In Nov. 1980 the UN called for an independent Belize. In March 1981 Britain and Guatemala agreed a formula for the resolution of the 32-year old territorial dispute over Belize. It was hoped that this will lead to a constitutional conference later in 1981.

Governor and C.-in-C.: James Patrick Ivan Hennessy, CMG, OBE.

Premier and Minister of Finance: George Price.

Flag: Blue with the arms of the Colony surrounded by a green garland on a white disc in the centre; flown in conjunction with the Union Flag.

HISTORY. The Spaniards visited the islands in 1515, but, according to a 17th-century French cartographer, they were discovered in 1503 by Juan Bermudez, after whom they were named. No settlement was made, and they were uninhabited until a party of colonists under Sir George Somers was wrecked there in 1609. A company was formed for the 'Plantation of the Somers' Islands', as they were called at first, and in 1684 the Crown took over the government.

Bermuda consists of a group of some 150 small islands (about 20 inhabited), situated in the western Atlantic (32° 18' N. lat., 64° 46' W. long.); the nearest point of the mainland, about 570 miles distant, is Cape Hatteras, N.C., and 690 miles from New York; noted for its climate and scenery; a favourite resort for Americans.

The area is 20.59 sq. miles (53.3 sq. km), of which 2.3 sq. miles were leased in 1941 for 99 years to the US Government for naval and air bases. The civil population (*i.e.*, excluding British and American military, naval and air force personnel) in 1980 was estimated at 54,893.

The 40 members of the House of Assembly are elected 2 from each of 20 constituencies under full universal, adult suffrage. The general election on 18 May 1976 resulted in the return of 26 members of the United Bermuda Party and 14 members of the Progressive Labour Party. A by-election was held on 21 Sept. 1976 resulting in a total of 25 members of the United Bermuda Party and 15 members of the Progressive Labour Party.

República de Bolivia

HISTORY. Until 1884, when Bolivia was defeated by Chile, she had a strip bordering on the Pacific which contains extensive nitrate beds and at that time the port of Cobija (which no longer exists). She lost this area to Chile; but in Sept. 1953 Chile declared Arica a free port and, although it is no longer a free port for Bolivian imports, Bolivia still has certain privileges.

AREA AND POPULATION. Bolivia is a landlocked state with an area of some 424,160 sq. miles (1,098,580 sq. km). In the series of disastrous wars in the 19th and early 20th centuries its territorial losses to each of 5 neighbouring nations reduced its area from an estimated 1.16m. sq. miles.

The following table shows the area and population of the departments (the capitals of each are given in brackets):

Following elections in July 1979 which were inconclusive an interim President was chosen with the agreement of the three parties who had polled most votes. For details of political history 1970–78 *see* THE STATESMAN'S YEAR-BOOK, 1980–81. On 1 Nov. 1979, Dr Guevara was overthrown by Col. Alberto Natusch Busch who failed to become President and Congress named Lidia Gueiler as the first woman president and was sworn in on 20 Nov. 1979. Presidential and congressional elections took place in June 1980. Dr Siles Zuazo won about one-third of the votes but on 17 July Lidia Gueiler was overthrown by a military junta led by Gen. García Meza.

The Cabinet consists of the President and 15 Ministers of State.

President: Gen. Luis García Meza.

Minister of Foreign Affairs: Mario Rolon Anaya.

The republic is divided into 9 departments, established in Jan. 1826, with 98 provinces administered by sub-prefects, and 1,272 cantons administered by corregidores. The supreme authority in each department is vested in a prefect appointed by the President.

DEFENCE. Bolivia is divided into 8 military districts, with divisional headquarters in Viacha, Oruro, Villa Montes, Camiri, Roboré, Riberalta, Santa Cruz, Cochabamba; regional HQ are located at La Paz, Sucre, Tarija, Potosí, Trinidad and Cobija.

Army. The law of 1943 provided for a permanent force of 15,000 men, including the police force and the frontier carabineers, but the standing army in 1981 numbered 20,000 men. Military service is compulsory for all males from the 19th to the 49th year. The Army consists of 13 infantry regiments, 1 motorized regiment, 1 mechanized and 4 cavalry regiments, 3 artillery regiments, a paratroop battalion (CITE) and 2 ranger regiments specially trained in anti-guerrilla warfare.

Air Force. The Air Force, established in 1923, has 3 ground attack operational training squadrons, equipped with 13 Canadian-built T-33 armed jet trainers, about 4 F-86F Sabre fighter-bombers, and 30 T-6G armed piston-engined trainers for counter-insurgency operations. Other types in service include Brazilian T-23 Uirapuru and American T-41 primary trainers, Italian SF.260M and Swiss turbo-prop-powered Pilatus PC-7 basic trainers, 1 Electra four-turboprop transport, 5 Fokker F.27 and 5 Israeli-built Arava twin-turboprop light transports, 4 Convair

580 twin-turboprop transports, 2 C-130H L-100-30 Hercules, 2 C-54, 7 C-47 and 6 Convair 440 piston-engined transports with which a military airline service is operated, and some light aircraft and helicopters. Personnel strength is about 4,000.

Navy. A small Navy exists for river and lake patrol. Strength (1980) 2,300 officers and men.

INTERNATIONAL RELATIONS

Membership. Bolivia is a member of UN, OAS, LAIA (formerly LAFTA), the Andean Group and the Amazon Pact.

External Debt. The contracted external debt was US\$3,000m., Dec. 1979.

ECONOMY

Budget. The foreign-exchange revenue is derived mainly from sales of tin and other non-ferrous metals (furnishing about 70% of export revenue in 1979), but oil and gas produced 19% of export revenue in 1979. Revenue and expenditures in 1m. *pesos bolivianos* balanced as follows: 1967, 860.4; 1968, 1,224.7; 1969, 1,265.3. In 1975 expenditure exceeded income by 142.6. Aid from USA in 1971 was about US\$20.2m.

Currency. On 1 Jan. 1963 the *peso boliviano* (\$b.) was introduced. Exchange rates were \$b.25 = US\$1 and \$b.54 = £1 in March 1981.

Banking. The Banco Central de Bolivia was established in 1911 as Banco de la Nacion Boliviana and re-organized in 1928. The Bank was nationalized in 1939. In 1945 the Banco Central de Bolivia was divided into two independent departments, the Banking Department and the Monetary Department. The latter has the sole power of note issue and must maintain a legal reserve equal to the amount of notes in circulation; 50% of such reserve must be in gold and foreign exchange and 50% in securities. At 30 June 1980 the Bank's gross gold and foreign exchange reserves amounted to US\$222.43m. and Bolivia's net reserves stood at US\$83.3m. The country also has a stand-by agreement of US\$115m. with the International Monetary Fund.

There are Argentine, Brazilian, Peruvian, US and domestic banks.

Weights and Measures. The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed.

ENERGY AND NATURAL RESOURCES

Electricity. Electric power production is expanding. Installed capacity was estimated at 428,595 kw. at the end of 1978. Estimated production from all sources (1978), 1,340,996 Mwh.

Oil and Gas. There are petroleum and natural gas deposits in the Santa Cruz-Camiri areas. A pipeline for crude oil connects Caranda (Santa Cruz) with the Pacific coast at Arica (Chile) and a natural gas pipeline to Argentina was inaugurated in May 1972. Bolivia is self-sufficient in most petroleum products. All production, refining and internal distribution is now in the hands of *Yacimientos Petroliferos Fiscales Bolivianos* (the State Petroleum Organization), the Bolivian Gulf Oil Co. having been nationalized on 17 Oct. 1969. Total production of petroleum and condensates in 1979 was estimated at 10.25m. bbls. Production of natural gas in 1979 was estimated at 1,942m. cu. metres.

Minerals. Mining is the most important industry, accounting for about 69% of the foreign-exchange earnings. About half the mineral mined is tin. Tin mines are at altitudes of from 12,000 to 18,000 ft. where few except native Indians can stand the conditions; transport is costly. Bolivian tin is extracted by shaft-mining, frequently very deep; the ore yields only 0.7% or less of tin and is very refractory; tin is exported in concentrates called *barrilla*, through Pacific ports for refining. A twin dredger has been installed by Grace & Co. to exploit alluvial deposits and another dredger is operated by Comstar. Smelting capacity was increased in 1980 and it is planned to smelt all the ores from the State Mining Co. by 1981. Tin production in 1979 was estimated at 27,300 tonnes.

A decree of 31 Oct. 1952 nationalized the mining companies of the Patiño, Hochschild and Aramayo groups, which were responsible for about 60% of Bolivia's mineral output. Provisional compensation proposed was: Patiño, US\$7.5m.; Hochschild, US\$9.25m.; Aramayo, US\$4,976,324. Agreements were concluded during 1953 for the gradual payment of compensation on a sliding scale based on prices received for Bolivian tin abroad, but a final settlement has still to be negotiated. The state industry is being run by the *Corporación Minera de Bolivia* (COMIBOL) employing about 23,000 in mining and administrative capacities.

Alluvial gold deposits in the Alto Beni region are being exploited. Co-operative mines at Tipuani produced 770 kg in 1978.

Foreign firms are seeking exploration rights for uranium and a small uranium processing plant was opened in Oct. 1980 at Cotaje (Potosi province). Large deposits of salt are found near Lake Poopó and in the south of Bolivia.

Agriculture. The extensive and still largely undeveloped region east of the Andes comprises about three-quarters of the entire area of the country, and since the agrarian reform of 1952 sugar-cane, rice and cotton have been grown in this *Oriente* in increasing abundance, reaching self-sufficiency in all these products. Output in tonnes in 1978 was: Sugar-cane, 3,246,620; rice, 88,580; coffee, 22,250; maize, 132,454; fodder maize, 198,681; potatoes, 793,000; wheat, 59,925, and cotton (lint), 17,335.

The public lands of the State have an area of about 245,000 sq. miles, of which 104,000 sq. miles are reserved for special colonization. The National Agrarian Reform Service reported in Nov. 1969 that since May 1965 it had distributed 5.5m. hectares of land in 323,046 properties.

A colony of Jewish refugees was established in 1940 at Buena Tierra, 60 miles east of La Paz and, more recently, Japanese and Okinawan settlements in the region of Santa Cruz. The Bolivian Development Corporation has a programme for relief of over-population on the barren altiplano and in 1964 resettled 1,217 families in tropical areas.

Livestock: In 1979 there were some 3.99m. head of cattle, mostly in the Santa Cruz and Beni departments; some are exported to Peru; horses, 393,000; asses, 784,000; pigs, 1.41m.; sheep, 8.7m.; goats, 3m.; poultry, 8.45m.

Forestry. Tropical forests with woods ranging from the 'iron tree' to the light *palo de balsa* are beginning to be exploited. In 1962 the Forestry Service announced proved reserves of 46.3m. hectares, plus a similar amount available for immediate development.

INDUSTRY AND TRADE

Industry. There are few industrial establishments and the country relies on imports for the supply of many consumer goods. However a new investment law passed in 1971 provides incentives and protection for new investment, both foreign and domestic, and for reinvestment in various fields including manufacturing industry, mining, agriculture, construction and tourism. The new law of hydrocarbons encourages foreign participation in developing the petroleum and natural gas resources of the State.

GDP *per capita* (1978) US\$510.

Labour. The Ministry of Planning estimated economically active population in 1970 at 1.48m., of whom 1m. were employed in agriculture, 118,300 in industrial manufacture, 35,100 in construction, 74,000 in commerce and finance, 65,000 in central and local government, 47,800 in mining and 41,900 in transport. The ban on trade unions, imposed in 1974, was lifted in 1978.

Commerce. The value of imports and exports in US\$1,000 has been as follows:

	1974	1975	1976	1977	1978	1979
Imports	471,200	510,000	536,000	552,000	848,200	928,000
Exports	627,500	449,000	545,000	556,000	640,300	793,000

Tin ore remains the principal export. Total exports, 1979, of all minerals, in concentrates, ingots or solder, were valued at US\$546m.

Bolivia having no seaport, imports and exports pass chiefly through the ports of Arica and Antofagasta in Chile, Mollendo-Matarani in Peru, through La Quiaca on the Bolivian-Argentine border and through river-ports on the rivers flowing into the Amazon. The chief imports are lard, flour, cooking oil, iron and steel products, mining machinery, pharmaceuticals, paper products and textiles.

Total trade between Bolivia and UK for 5 years (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	24,510	37,333	32,202	37,619	33,179
Exports and re-exports from UK	9,995	12,049	16,493	9,594	8,684

COMMUNICATIONS

Roads. A highway, in poor condition, 497 km long, runs from Cochabamba to the lowland farming region of Santa Cruz. La Paz and Oruro are also connected by a metalled road. Of other main highways (unmetalled) there is one from La Paz through Guaqui into Peru, another from La Paz, *via* Oruro, Potosí, Tarija and Bermejo, into Argentina, with branches to Cochabamba, Sucre and Camiri, passable throughout the year except at the height of the rainy season, and others from Villazón to Villa Montes *via* Tarija, passable during the dry season. The total length of the road system is 37,708 km (1977). Motor vehicles registered in 1979, 89,445, including 38,140 cars, 50,255 heavy goods vehicles and buses and 1,050 agricultural tractors.

Railways. In 1964 Bolivian National Railways (ENFE) was formed by the amalgamation of the Bolivian Government Railways, Bolivian Railway Co. and the Bolivian section of the Antofagasta (Chili) & Bolivia Railway. The Guaqui-La Paz Railway, formerly operated by Peru, became part of ENFE in 1973. Access to the Pacific is by 3 routes: to Antofagasta and Arica in Chile, and to Mollendo in Peru *via* Guaqui, the Lake Titicaca train ferry to Puno (Peru), then rail to the coast. Construction began in 1978 of a 150 km line linking Puno with Desaguadero on the Bolivian border which would by-pass the train ferry, though gauge difference would still prevent through running to Peru. Current network totals 3,538 km of metre gauge, comprising unconnected Eastern (1,386 km) and Western (2,152 km—65 km electrified) systems.

Aviation. The national airline is Lloyd Aéreo Boliviano; in 1978 a total of 20,620 hours were flown, carrying 1,060,044 passengers. The airline runs regular services between La Paz and Lima, São Paulo, Buenos Aires, Miami, Caracas, Salta and Arica as well as many internal services. Braniff International Airways runs regular flights between La Paz, Lima, Buenos Aires, Santiago and Asunción, linking Bolivia (*via* Lima) to the USA. Lufthansa links Bolivia with Europe. Other airlines serving Bolivia are Aerolineas Argentinas, Cruzeiro, Aero Peru, Lan Chile and Avianca.

Shipping. Traffic on Lake Titicaca between Guaqui and Puno is carried on by the steamers of the Peruvian Corporation. About 12,000 miles of rivers, in 4 main systems (Beni, Pilcomayo, Titicaca-Desaguadero, Mamoré), are open to navigation by light-draught vessels.

Post and Broadcasting. In Bolivia there were, in 1978, 458 post offices, of these, 205 provided telegraph and telephone services together with a further 245 offices for telegraph and telephone service only. There is telephone service in the cities of La Paz, Cochabamba, Oruro, Sucre, Potosí, Santa Cruz, Tarija, Camiri, Tupiza, Villazón, Ríberalta and Trinidad with (1978), 101,500 telephones. There are about 119 broadcasting stations, of which 7 are state-owned. There is a commercial government television service.

Newspapers. There are 7 daily newspapers in La Paz, and 2 in Cochabamba. Several other towns have regular newspapers devoted to local news, but most of them appear only a few times a week. An economic monthly journal *Revista Económica* and 4 daily newspapers are produced in Santa Cruz. Oruro has 2 dailies.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the Supreme Court, superior district courts (of 5 or 7 judges) and courts of local justice. The Supreme Court, with headquarters at Sucre, is divided into two sections, civil and criminal, of 5 justices each, with the

Chief Justice presiding over both. Members of the Supreme Court are chosen on a two-thirds vote of Congress.

Religion. The Roman Catholic is the recognized religion of the state; the free exercise of other forms of worship is permitted. The Catholic Church is under a cardinal (in Sucre), an archbishop (in La Paz), 6 bishops (Cochabamba, Santa Cruz, Oruro, Potosí, Riberalta and Tarija) and vicars apostolic (titular bishops resident in Cueva, Trinidad, San Ignacio de Velasco, Riberalta and Rurrenabaque).

By a law of 11 Oct. 1911 all marriages must be celebrated by the civil authorities. Divorce is permitted by a law enacted on 15 April 1932.

Education. Primary instruction is free and obligatory between the ages of 6 and 14 years. Estimates for 1974 show that 989,858 children between 6 and 14 years attended school. All illiterates between 15 and 50 years are obliged to attend literacy classes and in 1977 this represented 40% of the population.

At Sucre, Oruro, Potosí, Cochabamba, Santa Cruz, Tarija, Trinidad and La Paz are universities; La Paz is the most important of them while the San Francisco Xavier University at Sucre is one of the oldest in America, having been founded in 1624. The universities were closed on 17 July 1980, following the *coup d'état*.

Health. In 1972 there were 2,143 doctors.

GNP per capita: US\$620 (1978)

HISTORY. In 1885 the territory was declared to be within the British sphere; in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company; in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, the British Government was in favour of transferring the Protectorate to the BSA Company, but the three major chiefs of the Bakwena, the Bangwaketse and the Bamangwato went to England to protest against this proposal, and agreement was reached that their country should remain a British Protectorate if they ceded a strip of land on the eastern side of the country for railway construction. This railway was built in 1896–97.

On 30 Sept. 1966 the Bechuanaland Protectorate became an independent and sovereign member of the Commonwealth under the name of the Republic of Botswana.

AREA AND POPULATION. Botswana comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Rhodesia on the east to South-West Africa on the west. The climate is on the whole sub-tropical and the atmosphere throughout the year is very dry. Area about 222,000 sq. miles (575,000 sq. km); population, according to the census of 1971, was 630,379 (estimate, 1979, 831,000). The most important tribes are the Bamangwato (216,058), under Chief Ian Khama; the Bakgatla (31,150), under Chief Linchwe II; the Bakwena (62,251), under Chief Bonewamang P. Sechele; the Bangwaketse (71,289), under Chief Seepapitso IV; the Batawana (42,347), under Chief Letsholathebe; the Bamaletle (13,861), under Regent Kelemogile Mokgosi (brother of the late Chief Mokgosi, who died in 1966); the Batlokwa (3,711), under Acting Chief Kema Gaborone; the Barolong (10,662), under Chief Besele.

The main business centres (with estimated population, 1980) are Gaborone (54,000), Francistown (32,000), Selebi-Phikwe (29,000), Kanye (22,000), Lobatse (20,000), Mochudi (20,000), Molepolole (19,000), Mahalapye (19,000), Maun (16,000).

The seat of government is at Gaborone.

CONSTITUTION AND GOVERNMENT. The Constitution of the republic is based on the Constitution which came into effect in March 1965, with some minor alterations.

The executive rests with the President of the Republic who is responsible to the National Assembly.

The National Assembly consists of 36 members (32 elected by universal suffrage, 4 nominated by the President, the Attorney-General and the Speaker *ex-officio*). The fourth general election, held in Oct. 1978, returned 30 members of the Botswana Democratic Party, 1 Botswana People's Party and 1 Botswana National Front.

The President is an *ex-officio* member of the Assembly. If the President is already a member of the National Assembly, a by-election will be held in the constituency of that member.

There is also a House of Chiefs to advise the Government. It consists of the Chiefs of the 8 principal tribes and 4 members elected by and from among the sub-chiefs in 4 districts.

The first President of Botswana, who was re-elected 3 times, was Sir Seretse Khama, KBE, who died 13 July 1980.

President of the Republic: Dr Quett Ketumile Joni Masire.

On 18 July 1980 the Cabinet was as follows:

Vice President and Minister of Local Government and Lands: L. M. Seretse. *Finance and Development Planning:* P. S. Mmusi. *Public Service and Information:* D. K. Kwelagobe. *External Affairs:* A. M. An important part of government revenue comes from the diamond mine at Orapa (production started in 1971, 821,914 carats; 1979, P181m.) and the nickel-copper complex at Selebi-Phikwe (production started in 1974) with production (1978) 40,000 tonnes valued at P51m. An open-pit coalmine has been developed at

Morupule, and produced (1978) 315,000 tonnes valued at P4.3m. A new diamond mine at Jwaneng is expected to come into production in 1982.

Agriculture. Cattle-rearing is the chief industry, but the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall. Increasing numbers of boreholes are being established where underground supply is adequate. However the rural economy is particularly vulnerable to drought and foot and mouth disease. In 1975 a reform of land ownership, which allows for more modern land use, was announced.

The abattoir at Lobatse, opened in Oct. 1954, is of great importance to the country's economy. In 1979 the number of cattle was 3.3m.; goats, 1.2m.; sheep, 450,000; poultry, 620,000.

In 1977, 68.8% of the labour force were engaged in agriculture, 12% was employed outside Botswana, mainly in the Republic of South Africa in the mining industry and 2.9% was engaged in domestic service. República Federativa do Brasil

HISTORY. Brazil was discovered on 22 April 1500 by the Portuguese Admiral Pedro Álvares Cabral, and thus became a Portuguese settlement: in 1815 the colony was declared 'a kingdom', and on 13 May 1822 Dom Pedro, eldest surviving son of King João VI of Portugal, was chosen 'Perpetual Defender' of Brazil by a National Congress. He proclaimed the independence of the country on 7 Sept. 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on 12 Oct. 1822. He resigned in 1831 and 9 years later, his 14-year-old son Pedro, became the second Emperor of Brazil.

On 24 Jan. 1967 both houses of Congress in joint session approved the new Constitution and press law which came into force on 15 March. An amendment to the Constitution, which came into force on 30 Oct. 1969, was issued on 17 Oct. The present Constitution provides for the indirect election of the President and Vice-President by an electoral college, comprising the members of Congress and delegates from the state legislatures; it grants powers to the President to issue decree-laws on matters connected with the economy and national security; it gives the President authority to intervene in any of the 22 states without consultation with Congress and the right to declare a state of siege and to rule by decree. President and Vice-President are elected for a 6-year term and are not immediately re-eligible. The Senate is elected for 8 years, the Chamber of Deputies for 4 years.

Under the 1969 Constitution, Congress consists of a 67-member Senate and a 420-member Chamber of Deputies. The Senate is two-thirds directly elected (50% of these elected for 8 years in rotation) and one-third indirectly elected. The Chamber of Deputies is elected by universal franchise (with a literacy qualification) for 4 years.

The name of the country was changed from 'Estados Unidos do Brasil' to 'Brasil' and later to 'República Federativa do Brasil'.

Freedom of speech and press are not absolute: war propaganda, the teaching of 'subversive doctrines' and the dissemination of race or class prejudices are banned, as also are political parties opposed to democracy, the existing multi-party system or to 'fundamental human rights' which include the right to own private property. The Supreme Electoral Court on 7 May 1947 declared the Communist Party illegal and on 20 Dec. 1979 the Political Parties Statute of 1965 was amended to allow for the formation of new political parties.

The Institutional Act No. 5 issued on 13 Dec. 1968 was incorporated into the new Constitution through an amendment on 17 Oct. 1969. It was repealed by the Constitutional Amendment Number 11 of 13 Oct. 1978. The Congress renewed its session on 22 Oct. 1969 and elections were held on 15 Nov. 1970, 1974 and 1978.

Voting is compulsory for men and women between the ages of 18 and 65 and optional for persons over 65. Enlisted men and illiterates (who comprise about 40% of the adult population) may not vote.

President of the Republic: Gen. João Baptista de Oliveira Figueiredo, assumed office 15 March 1979.

Minister of Foreign Affairs: Ramiro Elysio Saraiva Guerreiro.

There are Secretaries of State at the head of the following Ministries: Finance; Justice; Interior; Foreign Affairs; Transport; Communications; Agriculture; Labour; Education and Culture; Health; Industry and Commerce; Mines and Power; Welfare and Social Security; and the Ministries of Army, Marine and Air. There is a Secretariat of Planning and General Co-ordination established in 1974 as an agency of the Presidency of the Republic and equivalent to a Ministry in charge of general co-ordination of planning in the country.

National flag: Green, with yellow lozenge on which is placed a blue sphere, containing 22 white stars and crossed with a band bearing the motto *Ordem e Progresso*.

National anthem: *Ouviram do Ipiranga* ... (words by J. O. Duque Estrada; tune by F. M. da Silva).

Local Government. Brazil consists of 22 states, 4 federal territories (Rondônia, Roraima, Amapá, Fernando de Noronha) and 1 federal district. Each state has its distinct administrative, legislative and judicial authorities, its own constitution and laws, which must, however, agree with the constitutional principles of the Union. The states may unite or split or form new states. Taxes on interstate commerce, levied by individual states, are prohibited. The governors and members of the legislatures are elected, but magistrates are appointed and are not removable from office save by judicial sentence. Rio de Janeiro and Guanabara became one state in 1975.

The National Congress issued a decree and, in Oct. 1977, the President of Republic enacted the law by which the State of Mato Grosso was divided in 2 distinct states: the State of Mato Grosso do Sul was established on 1 Jan. 1979, when its first governor took office, and the State of Mato Grosso.

² The 10,000-ton cruiser *Tamandaré* (ex-*St Louis*), of the 'St Louis' class purchased from USA in 1951 was offered for sale in 1975. The cruiser *Barroso* (ex-*Philadelphia*) of the 'Brooklyn' class, also transferred in 1951, was listed for disposal in 1973.

There are also 8 diesel-powered submarines (3 modern built in Britain and 5 old ex-US), 6 new destroyer leaders (or large frigates), the *Constituição*, *Defensora*, *Liberal* and *Niteroi*, built in Britain, and the *Independência* and *União*, built in Brazil, 12 old ex-US destroyers, 10 fleet tug type corvettes, 6 coastal minesweepers, 1 river monitor, 5 river patrol ships, 6 coastal gunboats, 1 submarine rescue ship, 2 tank landing ships, 4 transports, 18 local transports, 3 oilers, 1 repair ship, 8 survey ships, 6 survey launches, 35 minor landing craft, 4 buoy tenders, 20 auxiliaries and 13 tugs. There are also 3 floating docks.

The new construction programme is being revised to replace old US submarines and destroyers. A training ship (frigate) and a river support ship are projected.

Projected ships were to have included 1 helicopter carrier, 3 anti-aircraft frigates, 6 to 12 corvettes, 4 coastal patrol craft, 1 replenishment oiler, 18 minor landing craft, 1 survey ship and 3 tugs.

The Fleet Air Arm was formed on 26 Jan. 1965. Aircraft obtained from the USA for service on the carrier include 6 Sikorsky SH-3D and 5-SH-34J helicopters and 5 S-2A Tracker anti-submarine aircraft, the latter being operated by the Air Force (to be replaced by Navy S-2E Grumman Trackers). Three Wasp light anti-submarine helicopters were obtained from Britain in 1965, and were followed by 7 turbine-

powered Whirlwind UH5 and 6 American-built Fairchild Hiller FH 1100 light observation helicopters. Nine Westland Lynx WC 13 helicopters were provided for the destroyer leader/frigates of the 'Niteroi' class.

The active personnel in 1981 approached 45,500 (3,900 officers and 41,600 men), including 12,000 marines and auxiliary corps.

Air Force. The Air Force, formed in 1918, has been independent of the Army and Navy since 1941. It is organized in 6 zones, centred on Belém, Recife, Rio de Janeiro, São Paulo, Porto Alegre and Brasília. The 1a ALADA (air defence wing) has 13 Mirage IIIE fighters and 3 Mirage IIID trainers, integrated with Roland mobile short-range surface-to-air missile systems deployed by the Army, and a radar communications computer network. One fighter group has 2 squadrons of F-5E Tiger II supersonic fighter-bombers and two-seat F-5Bs; 2 others operate AT-26 (Aermacchi MB 326G) Xavante light jet attack trainers, licence-built in Brazil. Counter-insurgency squadrons are equipped with AT-26 Xavantes for reconnaissance and attack, and with Neiva Regente lightplanes, Universal armed piston-engined trainers, and UH-1D/H Iroquois and armed JetRanger helicopters for liaison and observation. There is an ASW group of S-2A E Trackers for shore-based and carrier-based operations; a maritime patrol squadron of EMB-111 twin-turboprop aircraft developed from the Brazilian-designed Bandeirante transport; and 3 air-sea rescue units with RC-130E Hercules reconnaissance transports, HU-16 Albatross amphibians and UH-1D Iroquois helicopters respectively. Equipment of transport units includes 1 group of C-130E H Hercules transports and KC-130H Hercules tankers; 1 group made up of a squadron of HS 748 and C-95 Bandeirante turboprop transports and a second squadron of HS 748s with large freight doors; 1 troop-carrier group with DHC-5 Buffaloes; and 6 independent squadrons with Bandeirantes and Buffaloes. The VIP transport group has 2 Boeing 737s, 13 HS 125 twin-jet light transports, some Bandeirantes, 5 Embraer Xingu twin-turboprop pressurized transports and 6 JetRanger helicopters. Training is performed primarily on locally-built Aerotec T-23 Uirapuru *ab initio* trainers, T-25 Universal basic trainers, and AT-26 Xavante armed jet basic trainers.

They are: *libra* = 1.012 lb. *avoirdupois*; *arroba* = 32.98 lb.; *quintal* = 129.54 lb.; *alqueire* (of Roi) = 1 Imperial bushel, or 40 litres; *oitava* = 55.34 grains.

ENERGY AND NATURAL RESOURCES

Electricity. Brazil's hydraulic potential capacity for electric power production is estimated at 104,450 mw., one of the largest in the world. Installed electric power in 1978 was 25,229 mw.; gross production, 112,575 gwh.; consumption, 97m. gwh. Of the total capital invested in industrial concerns (US\$1,779,786,350), 49% was foreign-owned.

Oil. There are 13 oil refineries, of which 11 are state owned. Crude oil output was 8,160,667 tonnes in 1979, of which 33% was from the continental shelf. Promising results have been obtained with the exploration of that area which in 1974 represented only 9% of all the national oil production.

The country imported substantial amounts of oil in 1979: 50,158,455 tonnes (value US\$1m: 6,721) representing 34% of total value of all Brazilian imports. Imports come mainly from Iraq and Saudi Arabia.

The government created the National Alcohol Program in 1975 with the aim of a gradual replacement of the consumption of petroleum by combustible alcohol specially from sugar-cane and cassava. About US\$5,000m. will be invested by 1985. By May 1980, 281 sugar-cane alcohol distillery projects had been approved and their authorized capacity represents 61% of the national aim for 1985 (about 11m. cu. metres). An agreement between the automotive industry and the government was signed in Sept. 1979 and it is hoped that by 1982 about 900,000 vehicles utilizing 100% alcohol-combustive will be produced.

Minerals. Brazil is the only source of high-grade quartz crystal in commercial quantities; output, 1978, 95,720 tonnes; exports in 1979, 4,727 tonnes. It is an important source of industrial diamonds (exports, 1977, 215 grammes); the second largest western producer of chrome ore (reserves of 4m. tonnes; output, 1978, 957,778 tonnes); fifth in the output of mica (370 tonnes in 1977); third in zirconium, 4,301 tonnes in 1978; she is the largest producer of beryllium, output (1974) 43 tonnes; graphite (1978), 53,603 tonnes; titanium ore (1978), 20,077 tonnes, and magnesite (1978), 409,936 tonnes. Iron is found chiefly in Minas Gerais, notably the Cauê Peak at Itabira. The Government is now opening up what is believed to be one of the richest iron-ore deposits in the world, situated in Carajás, in the northern state of Pará, with estimated reserves of 18,000m. tonnes, representing the largest concentration of high-grade (66%) iron ore in the world. Total output of iron ore, 1978, mainly from the Cia. Vale do Rio Doce mine at Itabira, was 103,896,097 tonnes. The National Iron and Steel Co. at Volta Redonda, State of Rio de Janeiro, furnishes a substantial part of Brazil's steel. Roads. There were (1978) 1,544,519 km of highways. In 1978 Brazil had 8,961,315 motor vehicles, including 4,792,344 passenger cars, 2,907,731 commercial vehicles, 873,025 lorries and tractors, 108,304 buses and minibuses. 1,173,813 motor vehicles of all types were produced in 1979.

Railways. Public railways are operated by two administrations, the Federal Railways (RFFSA) formed in 1957 and São Paulo Railways (FEPASA) formed in 1971, which is confined to the state of São Paulo. RFFSA had a route-length of 23,897 km in 1979 and FEPASA 5,107 km. Principal gauges are metre and 1,600 mm. The share of the freight market declined to a low of 15% in 1967, but subsequent heavy government investment in reconstruction and new lines, coupled with a policy of forcing bulk commodities on to rail, had raised the share to over 20% in 1974. Continued investment in new wagons, electrification, gauge-conversion, and 'export corridor' routes to the ports will further improve this figure, and some new lines are planned up to the year 2000. Except in the urban areas of

Rio de Janeiro and São Paulo, passenger traffic moving by rail is negligible. Traffic moved by RFFSA in 1979-80 amounted to 61m. tonnes. of freight and 246m. passengers. FEPASA also has a substantial investment programme under-way.

There are several important independent freight railways, including the Vitória à Minas (773 km and (1979) 39,882 ton-km of freight) and the Amapá (194 km). São Paulo has a rapid transit railway, and a similar system opened in Rio de Janeiro in 1979.

Aviation. There are 38 regular airlines (25 foreign) operating. The 4 largest Brazilian companies cover the whole territory and in 1978 they carried 10,201,000 passengers (8,771 in domestic traffic) and 1,789m. tonne-km of freight. Their commercial fleet consisted of 99 aircraft on 31 Dec. 1978. There are more than 100 taxiplane companies. The chief airline is Viação Aérea Rio Grande do Sul. (VARIG).

Shipping. Inland waterways, mostly rivers, are open to navigation over some 21,944 miles; number of vessels in 1978, 719. Rio de Janeiro and Santos are the 2 leading ports; there are 18 other large ports. Bolivia and Paraguay have been given free ports at Santos. During 1978, 34,589 vessels entered and cleared the Brazilian ports.

The Lloyd Brasileiro is owned and operated by the Government; its fleet comprised (1978), 44 vessels of 537,813 DWT. Brazilian shipping, 1978 (registered with Lloyds) amounted to 1,013 vessels of 6,175,915 DWT. Petrobrás, the government oil monopoly, took over the government tanker fleet of 26 vessels in 1958; total tanker fleet in 1978 was 165 vessels of 3,386,142 DWT.

Post and Broadcasting. Of the telegraph system of the country, about half, including all interstate lines, is under control of the Government. There were 4,323 post and telegraph offices in 1978. Telephone instruments in use, 1977, were 4,708,000. In 1976 there were 971 broadcasting and 74 television stations.

Cinemas (1977). Cinemas numbered 2,356 with a seating capacity of 1,505,620.

Newspapers (1977). There were 318 daily newspapers with a daily circulation of 1,321,000. Foreigners and corporations (except political parties) are not allowed to own or control newspapers or wireless stations. The press law of 1967 prohibits anonymous journalism and the publication of material defamatory to the armed forces and other public institutions.

JUSTICE, RELIGION, EDUCATION AND HEALTH

Justice. There is a supreme federal Court of Justice at Brasília. It has 11 judges; all are appointed by the President with the approval of the Senate. There are also federal courts in each state and the federal district and in the Territories, as well as 'electoral courts' to protect the elections, and labour tribunals. Justice is administered in the states in accordance with state law, by state courts, but in Brasília federal justice is administered. Judges are appointed for life. There are also 3,074 magistrates and 5,634 justices of the peace. In Dec. 1977 the Senate approved laws for allowing marriages to be dissolved. Brazilian citizens can apply for one divorced only during their lifetime. In the case of a marriage partner becoming mentally ill divorce proceedings cannot begin until 5 years after the illness has been proved. The death penalty was re-introduced in Sept. 1969.

Religion. The population is overwhelmingly Roman Catholic (91% at the census 1970). In 1889 connexion between Church and State was abolished; it was restored by the 1934 constitution, but again abolished in 1946.

In 1970 (census) Catholics numbered 85,472,022; Protestants, 4,814,728, and Spiritualists, 1,178,293.

Education. Elementary education is compulsory. In 1970 (census) there were 47,864,531 persons 5 years of age or over who could read and write; this was 60.33% of that age group; 50.9% of the literates were men.

There were, in 1977, 174,403 first degree school units, with 20,368,436 pupils and 893,138 teachers; 30,631 second degree units, with 2,437,701 pupils and 168,360 teachers; 4,072 third degree units, with 1,159,046 pupils and 95,758 teachers.

The Government undertakes to provide, in part, for higher or university instruction.

tion, but some institutions are maintained by the states, and some by private associations, while primary schools are chiefly maintained and supervised, either by the states or by the municipalities and private initiative. There were, in 1977, 62 official universities and 867 faculties not belonging to universities, including the University of Rio de Janeiro (founded on 7 Sept. 1920), the University of Bahia (founded in 1946), the University of Recife (1946), the University of Paraná (1946), the Rural University (1948, State of Rio de Janeiro), the University of São Paulo (1934), the University of Minas Gerais (1927), the University of Rio Grande do Sul (1934), the University of Brasília (1960) and the University of Mato Grosso (1971). There are also 11 Catholic universities in Rio de Janeiro (1946), São Paulo (1946), Rio Grande do Sul (1948), Pernambuco (1951), Minas Gerais (1958), Bahia, Paraná, Campinas, Petrópolis and Pelotas. Students in 1976 totalled 1,096,727.

BRUNEI

Capital: Bandar Seri Begawan

Population: 212,840 (1980)

GNP per capita: US\$10,640 (1978)

HISTORY. The Sultanate of Brunei was a powerful state in the early 16th century, with authority over the whole of the island of Borneo and some parts of the Sulu Islands and the Philippines. At the end of the 16th century its power had begun to decline and various cessions were made to Great Britain, the Rajah of Sarawak and the British North Borneo Company in the 19th century to combat piracy and anarchy. By the middle of the 19th century the State had been reduced to its present limits.

In 1847 the Sultan of Brunei entered into a treaty with Great Britain for the furtherance of commercial relations and the suppression of piracy, and in 1888, by a further treaty, the State was placed under the protection of Great Britain. Brunei was the only former British dependency inhabited by a Malay people that did not join the Federation of Malaysia in 1963.

AREA AND POPULATION. Brunei, on the north-west coast of Borneo, is bounded on all sides by Sarawak territory, which splits the State into two separate parts. Area, about 2,226 sq. miles (5,800 sq. km), with a coastline of about 100 miles. Estimated population in 1980 was 212,840. The 4 districts are Brunei/Muara (114,410), Seria Kuala Belait (70,520), Tutong (20,350), Temburong (7,560). The population comprised Malays (113,590), Chinese (50,310), other indigenous (23,930) and others (13,430). The capital is Bandar Seri Begawan, 9 miles from the mouth of Brunei River. The climate is of tropical marine type, hot and moist, with cool nights.

CONSTITUTION AND GOVERNMENT. On 29 Sept. 1959 the Sultan promulgated a constitution. There is a Privy Council, an Executive and a Legislative Council. On 6 Jan. 1965 the constitution was amended to provide for general elections to the Legislative Council; at the same time the Executive Council was renamed Council of Ministers. The Legislative Council consists of 20 members and a Speaker appointed by the Sultan. The Council of Ministers is presided over by the Sultan and consists of 6 *ex-officio* members and 4 other members, all of whom except one are members of the Legislative Council. The Mentri Besar, who is one of the *ex-officio* members of the Legislative Council and the Council of Ministers, is responsible to the Sultan for the exercise of executive authority in the State. As a result of negotiations in June 1978, the Sultan and the British Government signed a new treaty on 7 Jan. 1979 under which Brunei will become a fully sovereign and independent State at the end of 1983.

The official language is Malay, but English may be used for all official purposes.

The crude oil is exported directly, and only a small amount is refined at Seria for domestic uses. Natural gas is also produced at one of the biggest liquefaction plants of its kind in the world.

By the Treaty of Berlin, which followed the Russo-Turkish war of 1878, the Principality of Bulgaria and the Autonomous Province of Eastern Rumelia, both under Turkish suzerainty, were constituted. In 1885 Rumelia was reunited with Bulgaria. CONSTITUTION AND GOVERNMENT. A People's Republic was proclaimed by the National Assembly on 15 Sept. 1946, and the existing 'Tŭrnovo' Constitution of 1879 was replaced by the 'Dimitrov' Constitution in 1947. This was in turn replaced by a new constitution on 18 May 1971. This provides for a single-chamber National Assembly (*Narodno Sŭbranie*). The highest permanently operating organ of the state is the Council of State which consists of a chairman, 2 first vice-chairmen, 4 vice-chairmen, a secretary and 17 members: it is elected by the National Assembly from its members. Supreme power is vested in the National Assembly, which consists of 400 deputies elected from areas of equal population by direct, secret and universal suffrage (everybody at age of 18 being eligible to vote and hold office) for a term of 5 years; it is to meet at least three times every year. The National Assembly also elects the Council of State and the ministers who are responsible to it.

A general election was held on 27 Oct. 1946. The Fatherland Front, composed of the Workers (Communist), Agrarian, Socialist and Zveno Parties, and non-party independents, obtained 364 seats (277 of which went to the Communists) and the opposition 101. On 26 Aug. 1947 the opposition Agrarian Union was dissolved; its leader, Nikola Petkov, was sentenced to death and hanged on 23 Sept. The Socialist Party was merged with the Workers' Party in Aug. 1948, and the Zveno Party dissolved itself.

The Fatherland Front became, in 1948, a unified mass organization with individual memberships. Inside the Fatherland Front, there remain two political parties, the Bulgarian Communist Party and the Bulgarian People's Agrarian Union. Petŭr Tanchev (*1st Vice-Chairman, Council of State*) is Secretary of the Agrarian Union and Pencho Kubadinski Chairman of the Fatherland Front's National Council.

In 1976 the membership of the Communist Party was 788,221 (41% workers, 23% peasants); Young Communist League, 1.3m.; Agrarian Union, 120,000; Fatherland Front, 3,770,080.

At the elections of 30 June 1976, 99.99% of the electorate voted, and 99.92% of the votes were cast for the 400 candidates (78 women) of the Fatherland Front: there were no other candidates. The list comprised 272 Communists, 100 Agrarians and 28 independents. The President of the National Assembly is Vladimir Bonev.

There is no constitutional single Head of State, but Todor Zhivkov (*Chairman of the Council of State, 1st Secretary of the Communist Party*), performs some of the functions of a Head of State.

The highest policy-making and executive body of the Bulgarian Communist Party is its Politburo, consisting of 12 full members and 4 candidate members. The Politburo is elected by and from the Central Committee.

The Politburo was in March 1981 composed as follows: **FULL MEMBERS:** Todor Zhivkov, Gen. Ivan Mihailov, Stanko Todorov (*Chairman, Council of Ministers, i.e., Prime Minister*), Pencho Kubadinski (*Deputy Chairman, Council of Ministers*), Tano Tsolov (*1st Deputy Chairman, Council of Ministers*), Tsola Dragoicheva, Grisha Filipov (*Secretary, Central Committee*), Aleksandŭr Lilov (*Secretary, Central Committee*); Gen. Ministers not in the Politburo include: Kiril Zarev (*Deputy Chairman, Council of Ministers, Chairman, State Planning Committee*), Khristo Khristov (*Foreign Trade*), Dimitŭr Stoyanov (*Internal Affairs*), Belcho Belchev (*Finance*).

In May 1967 a second 20-year treaty of friendship, co-operation and mutual assistance with the Soviet Union was signed.

National flag: Three horizontal stripes of white, green, red, with the national emblem in the canton.

National anthem: An arrangement of Mila Rodino (Dear Fatherland), a popular patriotic song, was declared the national anthem in 1964.

Local Government. People's Councils at province and commune level are elected for terms of 30 months, to deal with all economic, social and cultural problems of their area. They also supervise the management of state and publicly owned enterprises. The Council's executive organs are Permanent Committees. 57,188 councillors and mayors were elected on 25 March 1979.

DEFENCE. There is a compulsory service of 2 years in the Army and Air Force (3 years in the Navy).

Army. In 1980 the Army had a strength of 105,000 men, organized in 8 motorized divisions and 5 tank brigades. There are 3 Army Commands (Military Regions), Sofia, Plovdiv, Sliven. Tanks, mainly T-34s and some T-54s and T-55s, numbered 1,900. Security police numbered 27,000 (5 brigades of border guards, 8 regiments of security forces).

Navy. The Navy consists of 2 *ex-Soviet* 'R' class submarines, 2 *ex-Soviet* 'Riga' class frigates, 3 *ex-Soviet* 'Poti' class corvettes, 4 *ex-Soviet* 'Osa' class missile boats, 6 *ex-Soviet* patrol vessels, 10 *ex-Soviet* torpedo boats, 2 fleet minesweepers, 4 coastal minesweepers, 12 minesweeping boats, 30 landing craft, 3 oilers, 3 survey ships, 2 salvage craft, 8 tugs and 30 auxiliaries and service craft. There are 4 squadrons of MiG-21s; about 6 squadrons of fighter/ground attack MiG-23s and MiG-17s; 2 reconnaissance squadrons of MiG-17s; some Mi-24 helicopter gunships; a total of about 20 Tu-134, Il-18, Il-14 and An-24/26 transport aircraft; 40 Mi-4, 30 Mi-2 and a few Mi-6 and Mi-8 helicopters; and L-29 Delfin, MiG-15UTI and MiG-21UTI trainers. Soviet-built 'Guideline', 'Goa' and 'Gainful' surface-to-air missiles have also been supplied to Bulgaria.

INTERNATIONAL RELATIONS

Membership. Bulgaria is a member of UN, Comecon and the Warsaw Pact.

External Debt. Agreements of 1955 and 1963 settled outstanding financial claims by the UK and USA respectively.

ECONOMY

Planning. State economic planning started in 1947. After 1964 there was a limited decentralization in planning, culminating in the economic reform of 1 Jan. 1969. Some local planning, profitability and consumer demand have been admitted, although central price regulation has been retained. The economy has been reconstructed into large trusts for each industry, each responsible for its own foreign trade.

For the first six 5-year plans *see* THE STATESMAN'S YEAR-BOOK for 1980-81. The seventh 5-year plan (1976-80) envisaged a rise in national income of 9%, and in industrial production of 55%. The eighth 5-year plan is running from 1981 to 1985.

There are also 2-year plans and a long-term perspective plan up to 1990.

Prices of consumer goods rose by 25-30% in 1979.

Budget. The revenue and expenditure of Bulgaria for calendar years were as follows (in 1m. leva):

	1971	1972	1973	1974	1975	1976	1977	1980	1981 ¹
Revenue	6,184	6,355	7,055	8,060	9,321	8,778	9,498	13,187	15,385
Expenditure	6,063	6,261	7,036	8,044	9,223	8,758	9,477	13,167	15,370

¹ Estimate.

Of the 1980 revenue 91% leva came from national economy. 1980 expenditure was: National economy, 5,777m. leva; social and education, 5,265m.; administration, 291m.

Currency. The unit of currency is the *lev* (pl. *leva*) divided into 100 *stotinki* (sing. *stotinka*). It has been linked to the Soviet rouble since May 1952. A new *lev*, equaling 10 old leva, was introduced on 1 Jan. 1962. The parity (clearing value) is 1 rouble = 1.30 leva. Official rate of exchange (March 1981) was £1 = 2.13 leva;

US\$1 = 0.879 leva. Rate of exchange for non-commercial transactions: £1 = 2.40 leva; US\$1 = 1.65 leva.

Banking. In 1947 banks were nationalized and the National Bank gained autonomy, freeing it from responsibility for state debts. In 1969 the banking system was reorganized. The National Bank became the central bank and was made responsible for issuing currency. It also plays an important part in the management of the economy: its chairman has ministerial rank. There is also a Foreign Trade Bank and a State Savings Bank. In 1978, 8.3m. depositors had savings totalling 7,130m. leva. The State Savings Bank has advanced personal loans up to 500 leva at 3.5% interest to some 500,000 users. Interest on deposits is from 1% to 3%.

Energy. Bulgaria has little oil, gas or high-grade coal and energy policy is based on the exploitation of its low-grade coal and limited water resources. Local fuels account for 32% of the power balance and water resources for 10%. The first nuclear power plant went into action in 1974 and nuclear power accounts for 20% of electric power generation. Geothermal and solar energy sources are being developed.

Electricity. A joint Romanian-Bulgarian hydroelectric station is being built on the Danube at Turnu-Magurele-Nikopol.

Oil and Natural Gas. Oil is extracted in the Balchik district on the Black Sea, in an area 100 km north of Varna and at Dolni Dubnik near Pleven. Crude oil production was 129,000 tonnes in 1977. There were 54 machine-tractor stations. 151,951 tractors (in 15-h.p. units) were in use and 23,055 combine harvesters. Collective and state farms are being incorporated into 'agricultural-industrial complexes'. There were 170 of these in 1978 with 7,738,406 hectares.

The Prosecutor General, elected by the National Assembly for 5 years and subordinate to it alone, exercises supreme control over the correct observance of the law by all government bodies, officials and citizens. He appoints and discharges all Prosecutors of every grade. The powers of this office were extended and redefined by a law of 1980 to put a greater emphasis on crime prevention and the rights of citizens.

Religion. 'The traditional church of the Bulgarian people' (as it is officially described), is that of the Eastern Orthodox Church. It was disestablished under the 1947 Constitution. CONSTITUTION. From Independence Day until 1962 Burma was a parliamentary democracy, having 2 houses, the Chamber of Deputies and the Chamber of Nationalities. The latter comprised 125 members, 62 of whom represented the central unit, 63 the states and special areas. The Chamber of Deputies had twice as many members. Both were elected for 4 years. The Head of State was the President, elected for a 5-year term, by both Chambers of Parliament in joint session.

On 29 Oct. 1958 Gen. Ne Win, the Army Chief of Staff, became prime minister of a caretaker government. The elections to the lower house, held in Feb. 1960,

gave the Pyidaungsu (Union) Party, led by U Nu, 161 out of 250 seats. On 2 March 1962 Gen. Ne Win overthrew the government of U Nu and replaced it by a Revolutionary Council. Parliament and the state councils were dissolved; the latter were reformed as 'state supreme councils' under appointed chairmen.

A new Constitution was approved by referendum in Dec. 1973. On 2 March 1974 military rule ended and Burma became a one-party socialist republic. Elections to the People's Assembly took place in Jan. and Feb. 1974. U Ne Win became President under the new Constitution and in Jan. 1978 his term of office was extended for 4 years.

On 3 March 1978 the Assembly elected a Council of Ministers:

Prime Minister: U Maung Maung Kha.

Planning and Finance: U Tun Tin. *Foreign Affairs:* U Lay Maung. *Defence:* Maj.-Gen. Kyaw Htin. *Home and Religious Affairs:* Col. Sein Lwin. *Mines:* Col. Than Tin. *Construction:* Brig.-Gen. Win Maung. *Education:* U Kyau Nyein. *Trade:* Col. Khin Maung Gyi. *Information and Culture:* U Aung Kyan Myint. *Labour and Social Welfare:* Rear-Adm. Chit Hlaing.

As from 22 April 1972, military ranks were dropped by most of the Revolutionary Council Members. From 15 March 1972, the entire governmental system was re-organized, with the Secretariat in Rangoon being abolished and with re-organized Security and Administrative Committees composed of officials and political representatives becoming the directing authority at central and regional levels.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Chief Court has supervision over all courts in the Union. It is presided over by the Chief Justice and other judges. Its present name was revived in March 1972 having been called Chief Court since 1962. All lower courts are now replaced by People's Courts formed with ordinary citizens to preside over trials, aided by former judges and magistrates acting as law officers.

Religion. The Revolutionary Government, having repealed the amendment of 1961 which made Buddhism the state religion, recognizes 'the right of everyone freely to profess and practise his religion'.

Education. After the attainment of independence the Government has adopted a centralized system of control of schools which are graded as primary, middle and high school. The medium of instruction in all schools is Burmese; English is taught as a compulsory second language in secondary schools.

Education is free in the primary, junior secondary and vocational schools; fees are charged in senior secondary schools and universities.

In 1977-78 there were 586 state high schools with 189,146 pupils, 1,262 state middle schools with 825,195 pupils and 21,999 state primary schools with 3,841,687 pupils; the total teaching staff was 111,339, of which 80,343 were in primary schools.

The Higher Education Law 1964 has decentralized the University of Rangoon. Beside the Arts and Science University, there are independent degree-giving institutes of engineering, education, medicine, agriculture, economics and commerce, and veterinary sciences. The University of Mandalay has been similarly decentralized. A foreign-languages institute in Rangoon has about 800 students learning French, German, Russian, Japanese, Chinese and Italian.

BURUNDI

Capital: Bujumbura

Population: 4.28m. (1978)

GNP per capita: US\$140 (1978)

HISTORY. Tradition recounts the establishment of a Tutsi kingdom under successive Mwamis as early as the 16th century. German military occupation in 1890 incorporated the territory into German East Africa. From 1919 Burundi formed part of Ruanda-Urundi administered by the Belgians, first as a League of Nations mandate and then as a United Nations trust territory. Elections supervised by the United Nations in Sept. 1961 resulted in a large majority for the *Unité et Progrès National* party (UPRONA). Internal self-government was granted on 1 Jan. 1962, followed by independence on 1 July 1962. An agreement, signed with Rwanda under United Nations auspices at Addis Ababa in April 1962, provided for a monetary and customs union. This union and all organizations operated jointly by the two governments were dissolved by 30 Sept. 1964.

On 8 July 1966 Prince Charles Ndirize deposed his father Mwami Mwambutsa IV, suspended the constitution and made Capt. Michel Micombero Prime Minister. On 1 Sept. Prince Charles was enthroned as Mwami Ntare V. On 28 Nov., while the Mwami was attending a Head of States Conference in Kinshasa (Congo), Micombero declared Burundi a republic with himself as president.

On 31 March 1972 Prince Charles returned to Burundi from Uganda and was placed under house arrest. On 29 April 1972 President Micombero dissolved the Council of Ministers and took full power; that night heavy fighting broke out between rebels from both Burundi and neighbouring countries, and the ruling Tutsi, apparently with the intention of destroying the Tutsi hegemony. Prince Charles was killed during the fighting and it was estimated that up to 120,000 were killed. On 14 July 1972 President Micombero reinstated a Government with a Prime Minister. On 1 Nov. 1976 President Micombero was deposed by the Army. A Supreme Military Council of the Armed Forces was established which appointed Col. Jean-Baptiste Bagaza president.

AREA AND POPULATION. Burundi extends from lat. 2½ to 4½ S. and long. 29 to 31 E., and has an area of 27,834 sq. km (10,759 sq. miles). It lies astride the main Nile-Congo dividing crest (6,000–7,000 ft) bounded on the west by the narrow plain of the Ruzizi River and Lake Tanganyika (2,534 ft). The interior is a broken plateau at an average height of about 5,000 ft, sloping eastwards down to Tanzania and the valley of the Maragarazi River. The southernmost tributary of the Nile system, the Luvironza, rises in the south of the country.

The population at the last census in 1959 was 2,213,280; but was 4.28m. in 1978. There are three ethnic groups—Hutu (Bantu, forming the great majority); Tutsi (Nilotic, less than 15%); Twa (pygmoids, less than 1%). There are some 3,500 Europeans and 1,500 Asians. In 1974 some 49,000 Tutsi refugees from Rwanda were living in Burundi.

Bujumbura, the capital, had (1976 estimate) 157,100 inhabitants. Kitega (10,000 inhabitants) was formerly the royal residence.

CONSTITUTION AND GOVERNMENT. Burundi remains a republic under the new military government but the activities of the Uprona party have been suspended. The Supreme Military Council of 30 members is headed by the President as is its 11 member Executive Committee. The President is responsible to the Supreme Military Council and the government is responsible to him. The office of Prime Minister was abolished in Oct. 1978 and the President assumed the post of Head of Government.

President of the Republic: Col. Jean-Baptiste Bagaza.

Foreign Affairs: Edouard Nzambimana.

The administrative divisions are: 8 provinces, each under a military governor

(Bujumbura, Bubanza, Muramvya, Ngozi, Gitega, Muhinga, Ruyigi and Bururi); 18 arrondissements; and 78 communes.

Flag: White diagonal cross dividing triangles of red and green, in the centre a white disc bearing 3 red green-bordered 6-pointed stars.

The national armed forces total (1981), 6,000 (there are also about 1,500 in paramilitary units) and include a small naval flotilla and air force flight of 4 Cessna 150 and Do 27 liaison aircraft and 4 Alouette III helicopters. HISTORY. The territories which now constitute Canada came under British power at various times by settlement, conquest or cession. Nova Scotia was occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632 and was finally ceded by France in 1713, by the Treaty of Utrecht; the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670; Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763; Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858. As originally constituted, Canada was composed of Upper and Lower Canada (now Ontario and Quebec), Nova Scotia and New Brunswick. They were united under an Act of the Imperial Parliament, 'The British North America Act, 1867', which came into operation on 1 July 1867 by royal proclamation. The Act provides that the constitution of Canada shall be 'similar in principle to that of the United Kingdom'; that the executive authority shall be vested in the Sovereign, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons'.

The present position of Canada in the British Commonwealth of Nations was defined at the Imperial Conference of 1926.

On 30 June 1931 the British House of Commons approved the enactment of the Statute of Westminster freeing the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus removing what legal limitations existed as regards Canada's legislative autonomy. A joint address of the Senate and the House of Commons was sent to the Governor-General for transmission to London on 10 July 1931. The statute received the royal assent on 12 Dec. 1931.

Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, Newfoundland, Rupert's Land and Northwest Territory into the Union. In 1869 Rupert's Land, or the Northwest Territories, was purchased from the Hudson's Bay Company. On 15 July 1870, Rupert's Land and the Northwest Territory were annexed to Canada and named the Northwest Territories, Canada having agreed to pay the Hudson's Bay Company in cash and land for its relinquishing of claims to the territory. By the same action the Province of Manitoba was created from a small portion of this territory and they were admitted into the Confederation on 15 July 1870. On 20 July 1871 the province of British Columbia was admitted, and Prince Edward Island on 1 July 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabaska, Assiniboia and Saskatchewan and originally parts of the Northwest Territories and admitted on 1 Sept. 1905. Newfoundland formally joined Canada as its tenth province on 31 March 1949.

In March 1981 negotiations were in progress between the Canadian government and the UK for the amendment of the British North America Act.

In Feb. 1931 Norway formally recognized the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

CONSTITUTION AND GOVERNMENT. The members of the Senate are appointed until age 75 by summons of the Governor-General under the Great Seal of Canada. Members appointed before 2 June 1965 may remain in office for life. The Senate consists of 104 senators, namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, 6 from Saskatchewan, 6 from Newfoundland, 1 from the Yukon Territory and 1 from the Northwest Territories. Each senator must be at least 30 years of age, a born or naturalized subject of the Queen and must reside in the province for which he is appointed and his total net worth must be at least \$4,000. The House of Commons is elected by the people, for 5 years, unless sooner dissolved. Women have the vote and are eligible. From 1867 to the election of 1945 representation was based on Quebec having 65 seats and the other provinces the same proportion of 65 which their population had to the population of Quebec. In the General Election of 1949 readjustments were based on the population of all the provinces taken as a whole. Generally speaking, this format for representation has prevailed in all subsequent elections with readjustments made after each decennial census. However, on 31 Dec. 1974, the law was changed so that it has reverted somewhat to the type of system that had prevailed initially. That is to say, Quebec is to be assigned a fixed number of seats in the House of Commons and the representation of the other provinces calculated by a quotient which reflects this fact.

The thirtieth Parliament, elected on 8 July 1974, comprises 264 members and the provincial and territorial representation are: Ontario, 88; Quebec, 74; Nova Scotia, 11; New Brunswick, 10; Manitoba, 13; British Columbia, 23; Prince Edward Island, 4; Saskatchewan, 13; Alberta, 19; Newfoundland, 7; Yukon Territory, 1; Northwest Territories, 1.

State of parties in the Senate (Nov. 1978): Liberals, 71; Progressive Conservatives, 17; Independent, 2; Social Credit, 1; Independent Liberal, 1; Vacant, 12; total 104.

State of the parties in the House of Commons (Feb. 1980): Liberals, 148; Progressive Conservatives, 101; New Democratic Party, 32; total, 281. Elections took place on 19 Feb. 1980.

Each minister and the Leader of the Opposition is also entitled to a \$2,000 motor vehicle allowance. The Speaker of the Senate receives a salary of \$14,100 and the Speaker of the House of Commons a salary of \$21,200; each is allowed \$3,000 in lieu of residence. DEFENCE. The Minister of National Defence has the control and management of the Canadian Forces, the Defence Research Board and all matters relating to national defence establishments and works for the defence of Canada. He is the Minister responsible for presenting before the Cabinet, matters of major defence policy for which Cabinet direction is required. Until Oct. 1973, he was responsible for the Canada Emergency Measures Organization which was renamed the 'National Emergency Planning Establishment' effective 1 April 1974, and given wider responsibilities for the co-ordination of civil emergency planning. The new organization will remain, for administrative purposes, within the Department but will report to the Privy Council Office. The Minister will continue to be responsible for certain civil emergency powers, duties and functions. The Deputy Minister is the senior public servant in the Department and the principal civilian adviser to the Minister on all departmental affairs. He is responsible for ensuring that all policy direction emanating from the Government is reflected in the administration of the Department and in military plans and operations. The Chief of the Defence Staff is the senior military adviser to the Minister and is charged with the control and administration of the Canadian Forces. He is responsible for the effective conduct of military operations and the readiness of the Canadian Forces to meet the commitments assigned to the Department by the Government. The Defence Research Board is responsible for advice to the Minister of National Defence on scientific matters relating to defence and for evaluating the contribution of science and technology to the achievement of defence objectives. Within National Defence Headquarters, the Deputy Minister and the Chief of the Defence Staff have reporting to them, the Vice Chief of the Defence Staff, 4 assistant deputy ministers as well as the Judge Advocate General, Director General Information and Director General Departmental Administrative Services.

Command Structure. The Canadian forces are organized on a functional basis to reflect the major commitments assigned by the Government. All forces devoted to a primary mission are grouped under a single commander who is assigned sufficient resources to discharge his responsibilities. Specifically, the Canadian forces are formed into 7 major entities reporting to the Chief of the Defence Staff. These are as follows:

1. *Mobile Command* provides units trained and equipped to support the United Nations or other peacekeeping operations; provides ground forces for the protection of Canadian territory; maintains combat formations in Canada for support of overseas commitments. It is comprised of 3 air-portable combat groups in Canada; the United Nations force in Cyprus; the Canadian Airborne Regiment, and 1 combat training centre. The Militia and Air Reserve components are also controlled by Mobile Command. Strength (1980), 12,675.

2. *Maritime Command.* All maritime sea forces on the Atlantic and Pacific coasts are under the Commander, Maritime Command, with headquarters in Halifax, Nova Scotia. The Maritime Commander (Pacific), who is the Deputy Commander, has his headquarters in Esquimalt, British Columbia. Maritime Command is to defend Canada against attack from the sea; provide anti-submarine defence in support of NATO; provide sea transport in support of Mobile Command. Composition of the maritime forces includes 3 submarines, 4 destroyers, 19 smaller destroyer-escorts, 3 supply ships, 6 patrol craft, 6 small support ships, 6 training vessels (*ex*-coastal minesweepers) and 34 auxiliaries and service craft. There are 16 naval reserve units in major Canadian cities which form an essential component of Maritime Command.

Active naval personnel strength in Maritime Command ships and shore establishments in 1981 was about 18% of the Regular Forces, *i.e.*, some 14,200 comprising 2,000 officers and 12,200 ratings (men and women).

3. *Air Command.* On 2 Sept. 1975, the aviation units administered by Mobile Command and Maritime Command were withdrawn and allocated to a newly-formed Air Command, which now controls all Canadian military aviation units through a single senior commander. Air Command responsibilities include maintenance of operationally-ready regular and reserve air forces to meet Canada's sovereignty requirements, participation with the USA in the air defence of North America through NORAD, and support of overseas commitments including NATO responsibilities in Europe and elsewhere. It is organized in 4 operational groups: Air Defence Group, Maritime Air Group, Air Transport Group and 10 Tactical Air Group; has reinforcement and training responsibilities to 1 Canadian Air Group (1 CAG) in Europe; and exercises command and control over Air Training Schools and the Air Reserve.

Air Defence Group, through NORAD, has entire responsibility for control of Canadian airspace. It comprises 3 squadrons of CF-101 Voodoo all-weather interceptors, armed with nuclear and conventional missiles; an electronic warfare squadron with CF-100 Mk. 5 and T-33A aircraft and 1 operational training squadron with Voodoos; eastern and western control centres and a trans-continental radar chain, integrated in NORAD through the semi-automatic ground environment (SAGE) network.

Maritime Air Group's primary responsibilities include coastal and anti-pollution patrol, fishery protection and Arctic surveillance. Its equipment includes 3 operational squadrons of Argus (being replaced with Aurora) and 1 of Tracker maritime patrol aircraft, and 2 ASW helicopter squadrons with CH-124 Sea Kings.

Air Transport Group has 2 squadrons of C-130E H turboprop transports; 1 squadron of 5 CC-137 (Boeing 707) jet transports, of which 2 can operate as flight refuelling tankers; a VIP squadron with 2 CC-132 Dash 7 four-turboprop and 7 CC-109 Cosmopolitan twin-turboprop transports and some twin-jet Falcons; and 4 dual-role transport search and rescue squadrons with twin-turboprop Buffalo and Twin Otter aircraft and helicopters. 10 Tactical Air Group has 2 squadrons of CF-5 fighters and 5 squadrons of CH-135 (Bell UH-1N) and CH-136 (Kiowa) helicopters.

4. *Training Command* plans and conducts all recruit and individual trades and classification training that is common to more than one command. The Command is also responsible for the Prairie Region, one of 6 military regions into which Canada is divided. The Command headquarters is in Winnipeg and the 9 bases within the Command are located in 7 provinces. A total of 24,239 students attended one or more of 1,258 courses conducted by the Command during 1973.

5. *Canadian Forces Communications Command (CFCC)* manages, operates and maintains strategic communications for the Canadian Forces and, in the event of emergencies, for the federal and provincial governments. The Command also provides points for interconnecting strategic and tactical networks and CFCC manages, operates and maintains the major DND automatic data processing centres.

6. *The Reserves* are composed of the Naval Reserve, the Militia and the Air Reserve.

National Defence expenditures amounted to \$3.8m. in 1977-78. Estimates for 1978-79 were \$4.1m. Strength of the Regular Forces in 1979 was 80,000.

7. Canadian Forces Europe. The Canadian Forces allocated to support NATO in Europe are part of Canadian Forces Europe. The land element is No. 4 Canadian Mechanized Brigade Group operationally responsible to the Central Army Group. The air element, No. 1 Canadian Air Group, consisting of 3 CF-104 Starfighter squadrons, is operationally assigned to No. 4 Allied Tactical Air Force. These elements are located in the Baden-Baden area of Federal Republic of Germany and are supported administratively by CFB Europe at Lahr.

Police Forces. The police forces of Canada are organized in three groups: (1) the federal force, which is the Royal Canadian Mounted Police; (2) provincial police forces—the Provinces of Ontario and Quebec have their own provincial police forces, but all other provinces engage the services of the Royal Canadian Mounted Police to perform parallel functions within their borders, and (3) municipal police forces—each urban centre of reasonable size maintains its own police force or engages the services of the provincial police, under contract, to attend to police matters.

In addition, the Canadian National Railways, the Canadian Pacific Railway Company and the National Harbours Board have their own police forces.

Royal Canadian Mounted Police. The Royal Canadian Mounted Police is a civil force maintained by the federal government. It was established in 1873, as the North-West Mounted Police for service in what was then the North-West Territories and, in recognition of its services, was granted the use of the prefix 'Royal' by King Edward VII in 1904. Its sphere of operations was expanded in 1918 to include all of Canada west of Thunder Bay. In 1920 the force absorbed the Dominion Police, and its headquarters was transferred from Regina to Ottawa, and its title was changed to Royal Canadian Mounted Police. The force is responsible to the Solicitor-General of Canada and is controlled and managed by a Commissioner who holds the rank and status of a Deputy Minister. The Commissioner is empowered under the Royal Canadian Mounted Police Act to appoint members to be peace officers in all provinces and territories of Canada.

The responsibilities of the Royal Canadian Mounted Police are national in scope. The administration of justice within the provinces, including the enforcement of the Criminal Code of Canada, is part of the power and duty delegated to the provincial governments.

All provinces except Ontario and Quebec have entered into contracts with the Royal Canadian Mounted Police to enforce criminal and provincial laws under the direction of the respective Attorneys-General. In addition, in these 8 provinces the Force is under agreement to provide police services to 194 municipalities, thereby assuming the enforcement responsibility of municipal as well as criminal and provincial laws within these communities. The Royal Canadian Mounted Police is also responsible for all police work in the Yukon and Northwest territories enforcing federal law and territorial ordinances. The 18 Operational Divisions, alphabetically designated, make up the strength of the Force across Canada; they comprise 46 sub-divisions which include 654 detachments. Headquarters Division, as well as the Office of the Commissioner, is located in Ottawa. The Force maintains liaison officers in 28 countries and represents Canada in the International Criminal Police Organization which has its headquarters in Paris.

Thorough training is emphasized for members of the Force. Recruits receive 6 months of basic training at the Royal Canadian Mounted Police Academy in Regina. This is followed by a further 6 months of supervised on-the-job training. The RCMP also operates the Canadian Police College at which its members and selected representatives of other Canadian and foreign police forces may study the latest advances in the fields of crime prevention and detection.

Many of these advances have been incorporated into the operation of the Force. A teletype system links the widespread divisional headquarters with the administrative centre at Ottawa and a network of fixed and mobile radio units operates within the provinces. The focal point of the criminal investigation work of the Force is

the Directorate of Laboratories and Identification: its services, together with those of divisional and sub-divisional units, and of 6 Crime Detection Laboratories, are available to police forces throughout Canada. The Canadian Police Information Centre at RCMP Headquarters, a duplexed computer system, is staffed and operated by the Force. Law Enforcement agencies throughout Canada have access *via* a series of remote terminals to information on stolen vehicles, licences and wanted persons.

In Oct. 1979, the Force had a total strength of 19,304 including regular members, special constables, civilian members and Public Service employees. It maintained 4,874 motor vehicles, 69 police service dogs and 151 horses.

The Force has 13 divisions actively engaged in law enforcement, 1 Headquarters Division and 2 training divisions. In addition it maintains a Marine Services and Air Services with headquarters at Ottawa. The Marine Services is comprised of 13 patrol vessels and 307 smaller craft which operate on the east and west coasts, the Great Lakes and the St Lawrence River. The Air Directorate has stations throughout Canada and maintains 27 aircraft.

Currency. The denominations of money in the currency of Canada are dollars and cents. The cent is one-hundredth part of a dollar. Subsidiary coins of the denomina-

tions of 1, 5, 10, 25 and 50 cents and \$1 are in use. The monetary standard is gold of 900 millesimal fineness (23.22 grains of pure gold equal to 1 gold dollar). The Currency Act provides for gold coins in the denominations of \$5, \$10 and \$20, which are legal tender. The British and US gold coins are also legal tender, at the par rate of exchange. The legal equivalent of the British sovereign is \$4.86 $\frac{1}{2}$.

The Bank of Canada has the sole right to issue paper money for circulation in Canada. Restrictions introduced by the 1944 revisions of the Bank Act cancelled the right of chartered banks to issue or re-issue notes after 1 Jan. 1945; and in Jan. 1950 the chartered banks' liability for such of their notes as then remained outstanding was transferred to the Bank of Canada in return for payment of a like sum to the Bank of Canada. On 31 May 1970 the Canadian dollar which was stabilized at 92.50 US cents was allowed to fluctuate. The value of the US\$ in Canadian funds was 116.39 cents and £1 sterling = Canadian \$2.62 in March 1981.

The Bank of Canada issues notes, which are legal tender, in denominations of \$1, \$2, \$5, \$10, \$20, \$50, \$100, \$500 and \$1,000. Under the terms of the Bank of Canada Act, the bank is required to sell gold in bars of 400 oz. to any person tendering legal tender. This obligation is at the present time suspended by Order-in-Council. The exportation of gold from Canada is prohibited except by licence issued by the Minister of Finance to the Bank of Canada or a chartered bank.

The Ottawa Mint was established in 1908 as a branch of the Royal Mint, in pursuance of the Ottawa Mint Act, 1901. In Dec. 1931 control of the Mint was passed over to the Canadian Government, and since that time has operated as the Royal Canadian Mint. The Mint issues silver, nickel, bronze and steel coins for circulation in Canada. In 1967, in celebration of Canada's Centennial of Confederation, a \$20 gold piece was minted, the first gold coin struck since 1919. In 1935, on the occasion of His Majesty's Silver Jubilee, the Royal Canadian Mint issued the first Canadian silver dollars. Commemorative dollars were also issued in 1939 on the occasion of the visit of King George VI and Queen Elizabeth to Canada; in 1949, when Newfoundland became the tenth Province of Canada; in 1958, the one-hundredth anniversary of the establishment of the Colony of British Columbia; in 1964, the centennial of the Charlottetown and Quebec Conferences which paved the way to confederation. The silver dollar bearing the design of the canoe manned by an Indian and a Voyageur has been issued in the years 1935-38, 1945-48, 1950-57, 1959-63, 1965, 1966 and 1972. For centennial year the Canada goose replaced the usual canoe design on the silver dollar. Because of a world-wide shortage of silver, the Government, in Aug. 1967, authorized the Mint to change the metal content of the 25-cent and 10-cent coins. Commencing in Sept. 1968, the 10-cent, 50-cent and \$1 coins were minted in pure nickel. Gold refining is one of the principal activities of the Mint. In 1978, 1,567,857 troy oz. of rough bullion were received for treatment, containing 1,277,133 oz. of fine gold and 177,565 oz. of fine silver. Coin issued: Bronze, \$8,438,788; nickel, \$71,339,943; silver, \$744,655; gold, \$18,000,900.

Banking. Commercial banks in Canada are known as chartered banks and are incorporated under the terms of the Bank Act, which imposes strict conditions as to capital, notes in circulation, returns to the Dominion Government, types of lending operations and other matters. In Sept. 1979 there were in operation 12 chartered banks incorporated under the provisions of the Bank Act, with 7,434 branches and sub-agencies in Canada and 289 branches and sub-agencies in other countries. The Bank Act is subject to revision by Parliament every 10 years. Bank charters expire every 10 years and are renewed at each decennial revision of the Bank Act. The chartered banks make detailed monthly and yearly returns to the Minister of Finance and are subject to periodic inspection by the Inspector-General of Banks, an official appointed by the Government.

The following are some particulars of the 12 chartered banks at 30 Sept. 1979: Capital paid up, \$507.3m.; rest account, \$4,459.4m.; Canadian currency deposits, \$115,607.3m.; foreign currency deposits, \$81,977.7m.; liabilities to the public, \$214,602.5m.; total assets, \$219,569.3m. Cheques cashed at the clearing-house centres of Canada for 1978 amounted to \$3,138,384.6m.

The Bank of Canada Act, passed on 3 July 1934, provided for the establishment of a central bank for the Dominion. This bank commenced operations on 11 March 1935 with a paid-up capital of \$5m. By reason of certain changes introduced into the composition of stockholders of the bank (for which see *THE STATESMAN'S YEAR-BOOK*, 1944, pp. 322-23), the Minister of Finance on behalf of Canada is the sole registered owner of the capital stock of the bank. The revised Bank Act, which came into force on 1 May 1967, requires the chartered banks, beginning Feb. 1968, to maintain a statutory cash ratio of 12% on demand deposits and 4% on other deposits, in the form of reserves with and notes on the Bank of Canada. A secondary reserve of 7% in treasury bills, government bonds, etc., is also required. All gold held in Canada by the chartered banks was transferred to the Bank of Canada along with the gold held by the Government as reserve against Dominion notes outstanding at the time of the commencement of operations of the Bank of Canada. The liability of the Dominion notes outstanding at the commencement of business of the Bank of Canada was assumed by the bank. The following are some of the particulars of the Bank of Canada as at 31 Oct. 1979: Notes in circulation, \$9,552.3m.; chartered bank deposits, \$4,614.2m.; total liabilities, \$15,133.1m.; investments, \$14,157.4m.

In Aug. 1944 the Industrial Development Bank, a subsidiary of the Bank of Canada, was set up for the purpose of providing credit in the post-war period to small industrial establishments. The statement of assets and liabilities of the Industrial Bank for the fiscal year ended 30 Sept. 1975 showed outstanding loans and investments of \$1,175.2m. The authorized, issued and paid-up capital at this date amounted to \$78m. The year ending 30 Sept. 1975 was the last year of operation of the Industrial Development Bank. During its existence from 1 Nov. 1944 to 30 Sept. 1975, the Industrial Development Bank authorized 65,000 loans for \$3,000m. to more than 48,000 businesses in Canada. It is succeeded by the Crown corporation, the Federal Business Development Bank, which was proclaimed in force on 2 Oct. 1975. In the year ending 31 March 1979, the Federal Business Development Bank authorized 12,271 loans for a total of \$668,593,000.

Weights and Measures. The legal weights and measures are the Imperial yard, pound avoirdupois, gallon and bushel; but the hundredweight is declared to be 100 lb. and the ton 2,000 lb. avoirdupois, as in the USA. The Metric Commission, established in June 1971, advises on Canada's conversion to the metric system which will be completed in 1980.

ENERGY AND NATURAL RESOURCES

Electricity. The net generation of electricity in 1979 was 352,304,082 mwh., of which utilities accounted for 317,795,205 mwh. Of the total, 243,040,606 mwh. was from hydro-electricity 75,988,084 mwh. from conventional thermal plants and 33,275,392 mwh. from nuclear plants. Demand (1979) was 294,263 mwh.

Oil and Natural Gas. With the discovery of large oilfields in Alberta, the production of petroleum became a major Canadian industry. The Interprovincial Pipeline, Canada's longest oil pipeline, moving crude oil from Edmonton, Alberta, to Montreal, Quebec, has a length in Canada of 3,605 miles. Total pipeline mileage, including mileage of American subsidiaries, is 5,996 miles. The pipeline serves Canadian refineries from Edmonton to Montreal and many in the USA. Another pipeline, Trans-Mountain, extends from Edmonton to Vancouver with a Canadian length of 825 miles and an overall length, including American mileage, of 889 miles. Eight refineries, 4 in Canada and 4 in Washington State, are served by the pipeline. At the end of 1977 Canada's oil pipeline system had 20,824 miles (33,512 km) of line in operation. Net oil deliveries in 1977 were 885,323,199 bbls

(140,671,763 cu. metres). The Trans-Canada natural gas line is the longest in the world (5,794.7 miles in 1978). It brings natural gas from the Alberta-Saskatchewan border across the prairies, through northern Ontario to Toronto, then eastward to Montreal. Natural gas pipeline mileage totalled about 88,153.6 miles (141,189.4 km) in 1977. Net deliveries of natural gas into the pipelines in 1977 was 2,481,587m. cu. ft.

Minerals. Alberta, Ontario, British Columbia, Quebec and Saskatchewan are the chief mining provinces. Total value of minerals produced in 1979 was \$26,098,267,000. Principal minerals produced in 1979 (preliminary) were as follows:

Agriculture. Though the manufacturing industries now predominate, agriculture is still very important to the Canadian economy. It contributes between 7 and 10% of

the net value of production and in 1978 accounted for about 10% of the value of commodities exported.

It is estimated that about 35% of the total land area is forested; according to the census of 1976, 259,338 sq. miles (7.2% of the total land area) is classed as occupied agricultural land.

Grain growing, dairy farming, fruit farming, ranching and fur farming are all carried on successfully. Total farm receipts (1978) \$11,887m.

The following table shows the estimated value of selected agricultural production for 1979, in Canadian \$1,000:

Wheat	1,910,412	Tobacco	289,790
Oats and barley	533,279	Cattle and calves	3,481,804

Other vegetables	310,123	Dairy products	1,688,565
Fruit	223,219	Poultry and eggs	1,003,345

Number of occupied farms (census of 1976) was 300,118.

Field Crops. In 1979, 70,910,014 acres were under principal field crops. The most valuable field crops are wheat, tame hay, oats, barley, potatoes, corn for grain, flaxseed, mixed grains, rapeseed, fodder corn, soybeans and sugar-beet.

The estimated acreage and yield of the principal field crops, by provinces, 1979 were:

Labour. In Oct. 1979 the industrial distribution of the employed was estimated as follows (in 1,000): Service, 2,997; manufacturing, 2,130; trade, 1,833; transportation, communication and other utilities, 912; construction, 709; public administration, 685; finance, insurance and real estate, 544; agriculture, 479; other primary industries, 301; total employed, 10,591; unemployed, 743.

Union returns filed for 1978 in compliance with the Corporations and Returns Act (1962), show 178 labour organizations reporting on 12,333 local union branches in Canada. Union membership in 1978 was 2.9m. 32.6% of the wage and salary

workers in major industry groups were members of reporting labour organizations, with about 76% of the organized workers members of unions affiliated with the Canada Labour Congress. Over 1m. of the union members were in international unions, which have branches both in Canada and the USA and in most cases belong to central labour organizations in both countries.

It is generally established by legislation, both federal and provincial, that a trade union to which the majority of employees in a unit suitable for collective bargaining belong, is given certain rights and duties. An employer is required to meet and negotiate with such a trade union to determine wage-rates and other working conditions of his employees. The employer, the trade union and the employees affected are bound by the resulting agreement. If an impasse is reached in negotiation conciliation services provided by the appropriate government board are available. Generally, work stoppages may not take place until an established conciliation procedure has been carried out and are prohibited while an agreement is in effect. Almost 28% of the workers affected by collective agreements are in the manufacturing industry.

Freedom of association is a civil right in Canada, and under common law workers are at liberty to join unions and participate in their activities. This right has also been guaranteed by statutes which make it an offence to interfere with freedom of association.

Certain specific minimum standards in regard to working conditions are set by law, for the most part by provincial labour legislation. Minimum wages, maximum hours of work or an overtime rate of pay after a specified number of hours, minimum weekly rest periods and annual vacations with pay are established for the majority of workers.

Workmen injured in the course of employment or disabled by industrial disease are required to receive compensation under workmen's compensation laws which apply to most employees except agricultural workers. Benefits during the period of disability for work are set by law at a proportion (now 75%) of the workman's average earnings, subject to a maximum established in each province. Benefits (which also include monthly allowances to dependants in the case of the death of a workman caused by an accident or disease arising out of his employment) are paid out of an accident fund administered by a government board in each province. The fund is made up of contributions from employers according to an annual assessment rate, varying from a few cents to several dollars per \$100 of payroll according to the hazards of the industry.

Commerce. In the past the custom tariff of Canada has been protective, with a preferential tariff in favour of the UK, the Dominions, a number of Crown Colonies, and the Irish and South African Republics. At the Imperial Economic Conference of 1932, held in Ottawa, the UK developed further the policy of preferential tariffs to the Dominions, and on the part of the latter there was a general lowering of the existing tariffs against certain lines of UK manufacturers. Canada is one of the signatories of the General Agreement on Tariffs and Trade (GATT) and of the Kennedy Round agreements.

Tourism. The number of visitors to Canada in 1977 was 33,198,495 (1976, 33,808,232). In 1977, 31,773,811 came from USA (1976, 32,230,902).

COMMUNICATIONS

Roads. The total highway mileage in Canada in 1976 was 549,462 (884,273 km). Of this total 442,615 miles (712,319 km) were surfaced and 106,453 miles (171,336 km) improved and other earth roads. Expenditure (1976) on roads, bridges, ferries, etc., reached a total of \$4,449m. Federal and provincial governments supplied \$2,905m., with the remainder contributed by municipal and other sources. Federal expenditures were chiefly devoted towards the upkeep of national-park roadways and nationally owned bridges and ferries, although for the 'Mackenzie Highway' from Grimshaw, Alberta, to Hay River, Northwest Territories, the federal government paid about 68% of the total cost. In general, however, highways are provincially controlled and maintained, and the responsibility of assisting municipalities and townships falls directly on the provinces.

The Alaska Highway is part of the Canadian highway system. For the Trans-Canada Highway see map in THE STATESMAN'S YEAR-BOOK, 1962.

Registered motor vehicles totalled 12,975,449 in 1978; they included 9,744,994 passenger cars and taxis, 2,770,798 trucks and buses and 341,381 motor cycles.

Urban Transit. In 1979 urban transit systems (motor bus, trolley coach, street car and subway operations) carried 1,094,593,460 fare passengers 347,245,150 vehicle-miles for an operating revenue of \$421,111,859. In 1978, intercity and rural bus operations

carried 33,837,301 fare passengers 121,915,986 vehicle-miles, earning revenues of \$ 142,770,591.

Railways. The total mileage of railways in Canada on 31 Dec. 1977 was 43,476. The total track mileage, including route duplicate, yardtrack and sidings, was 59,022.

Canada has 2 great trans-continental systems: the Canadian National Railway system (CN), a government-owned body which operates 22,244 miles of the total first maintrack, and the Canadian Pacific Limited (CP Rail), a joint-stock corporation with first maintrack totalling 15,589 miles (April 1980). From 1 April 1978, a government funded organization known as Via Rail took over passenger services formerly operated by CP and CN.

Selected statistics of Canadian railways for 1977: Passengers carried 23,862,260; revenue freight, 145,493,143 ton-miles; freight revenue, \$2,935,256,583; total railway operating revenues, \$3,538,093,295m.

Aviation. Civil aviation in Canada is under the jurisdiction of the federal government. The technical and administrative aspects are supervised by the Administrator of Air Transportation, while the economic functions are assigned to the Canadian Transportation Commission.

In 1979 Canadian airports handled 48,963,867 passengers, 127,066,000 kg of mail and 523·66m. kg of cargo. Operating revenue (1978) was \$2,583·3m.; operating expenditure, \$2,420·5m.

Shipping. The registered shipping on 31 Dec. 1978, including vessels for inland navigation, totalled 31,162 with a gross tonnage of 4,642,399. A total of 57,555 vessels (international shipping) visited Canadian ports in 1979, loading and unloading 230m. tonnes of cargo.

The major canals in Canada are those of the St Lawrence–Great Lakes waterway with their 7 locks, providing navigation for vessels of 25·75-ft draught from Montreal to Lake Ontario; the Welland Canal by-passing the Niagara River between Lake Ontario and Lake Erie with its 8 locks; and the Sault Ste Marie Canal and lock between Lake Huron and Lake Superior. These 16 locks overcome a drop of 582 ft from the head of the lakes to Montreal. The St Lawrence Seaway was opened to navigation on 1 April 1959 (*see* map in THE STATESMAN'S YEAR-BOOK, 1957). In 1978, traffic on the Montreal–Lake Ontario Section of the Seaway numbered 5,346 vessel transits carrying 56,942,680 cargo tonnes; on the Welland Canal Section, 6,626 transits with 65,670,992 gross tonnes. Value of fixed assets was \$777,921,614 and investments, \$34,892,056 at 31 March 1979.

Coast Guard. The Canadian Coast Guard (formed in 1962) is responsible to the Minister of Transport. In 1979 it comprised 6 heavy icebreakers; a heavy icebreaker cable repair vessel; 8 medium icebreakers aid tenders; 11 light icebreakers aid tenders; 9 aid tenders; 4 special shallow draft vessels; 2 ocean weather ships; 30 search and rescue vessels (all types and sizes); 3 hovercraft and 30 helicopters.

Post. On 31 March 1977 there were 8,392 postal facilities in operation and 5,900m. pieces of mail were processed. Gross revenue was \$945·8m.; gross expenditure, \$1,505m. for the fiscal year 1977–78.

There were 846,954 miles (1,363,186 km) of telegraph wire in Canada in 1977 (including external cable landed in Canada). There were 98·4m. miles (158,378,000 km) of telephone wire and 14,505,728 telephones on 1 Jan. 1978 (63·2 per 100 population).

Broadcasting. There were 622 originating stations operating in Canada at 31 March 1978, of which 91 were Canadian Broadcasting Corporation stations, 130 were CBC affiliates and 401 were privately owned and operated. Included were 379 AM radio stations, 138 FM radio stations, 102 television stations, 1 low power transmitter

and 2 short-wave stations. Radio and television licence fees were abolished in 1953.

Wireless 'beam' stations are operated at Montreal for direct communications with Great Britain and Australia, and a station at Louisburg, N.S., provides a long-distance service to ships.

Cinemas (1977). There were 1,094 cinemas with a seating capacity of 642,915 and 298 drive-in theatres with a capacity of 139,689 cars.

Newspapers (1977). There were 120 daily newspapers, of which 108 were in English and 12 in French.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court in Ottawa, having general appellate jurisdiction in civil and criminal cases throughout Canada. There is an Exchequer Court, which is also a Court of Admiralty. There is a Superior Court in each province and county courts, with limited jurisdiction, in most of the provinces, all the judges in these courts being appointed by the Governor-General. Police, magistrates and justices of the peace are appointed by the provincial governments.

For the year ended 31 Dec. 1977, 1,755,308 Criminal Code Offences were reported and 379,338 persons were charged.

Education. By the British North American Act each provincial government is responsible for its education system. While each system differs from the others in particulars, the general plan is similar for all provinces. Separate elementary and secondary schools for minority groups, mainly Roman Catholic, are found in most provinces. Though administration of the schools in Newfoundland has a denominational basis, they are not exclusive and a number are non-denominational. In general, education is free to the end of the secondary level. The principal sources of revenue are provincial government grants and direct taxation for school purposes. Except in Quebec the number of private schools is small; their enrolment was less than 4% of the total in elementary and secondary grades.

The federal government operates schools for Indians and Eskimos with an enrolment in 1976-77 of 33,187. An additional 38,530 attend non-federal schools.

In 1978-79, 367,968 full-time regular students were enrolled in 65 degree-granting institutions, other than purely theological institutions. In 1977-78 some 107,468 enrolled in arts and science, 28,148 in engineering, 30,230 in commercial business administration, 8,150 in medicine, 9,402 in law, 129,225 in other faculties. Another 100,529 or more students were enrolled in part-time courses.

The following statistics give information, for 1977-78, about all elementary and secondary schools, public, federal and private:

Health. Canada achieves national health insurance through a series of interlocking provincial plans which qualify the provinces for federal financial support if they meet the minimum criteria of the federal legislation with respect to comprehensiveness of coverage with regard to services, universality of coverage with regard to people, accessibility to services uninhibited by excessive user charges, portability of benefits and non-profit administration by a public agency. The federal contributions to the provinces cover about 50% of the provincial costs for the insured services of the national Hospital Insurance and Medical Care Programmes. (In the health field the federal government also furnishes the provinces with *per capita* cash contributions towards the cost of extended health care services; e.g., nursing home care, certain home care services, but the provinces do not need to meet the programme criteria described above with respect to these latter contributions.)

The Canadian approach to the development of a national health programme has been to progressively provide major segments of personal health care on a publicly financed basis to virtually the whole population, and this is achieved with the co-operation of the provinces, which exercise the primary constitutional prerogative in health matters.

The insurance programmes are designed to ensure that all residents of Canada have access to needed medical and hospital care on a prepaid basis. The insured services of the Hospital Insurance Programme, which commenced in 1958, include in-patient care (including necessary drugs, diagnostic tests, etc.), as well as elective out-patient services that vary somewhat from province to province. Complementing the protection of the Hospital Insurance Programme is the Medical Care Programme, inaugurated in 1968, which covers all medically required services rendered by medical practitioners no matter where the services are rendered, and certain surgical-dental procedures undertaken by dental surgeons in hospital. All 10 provinces and the 2 northern territories are participating in both programmes, which pro-

vide health insurance coverage for over 99% of the population (or over 23m. people).

The approach taken by Canada is one of state-sponsored health insurance. Accordingly, the advent of the programmes produced little change in the ownership of hospitals, almost all of which are owned by non-governmental non-profit corporations, and the rights and privileges of private medical practice. Patients are free to choose their own general practitioners and/or specialists without losing their insured benefits (there is a minor exception in Quebec involving only a few physicians). Except for 0.5% of the population whose care is provided for under other legislation (such as serving members of the Canadian Armed Forces), all residents are eligible, regardless of whether they are in the work force. Benefits are available without upper limit so long as they are medically necessary. Benefits are also portable during any temporary absence from Canada anywhere in the world—subject to any limitation a province may impose upon treatment electively sought outside the particular province without prior approval, though such a restriction does not pertain to emergency care.

In addition to the benefits qualifying for federal contributions, provinces are free to provide additional benefits at their own discretion. Most provinces provide such benefits, which cover a variety of services (*e.g.*, optometric care, children's dental programme, drug benefits) depending upon the province. Most provinces fund their portion of health insurance costs out of general provincial revenues. Three provinces levy premiums which meet part of the provincial costs. 1 province imposes a special income-tax surcharge and a levy on employers, and 1 province utilizes part of its sales tax revenues for this purpose. Two provinces have nominal co-charges for short-term hospital care. Three provinces have charges for long-term hospital care geared, approximately, to the room and board portion of the OAS/GIS payments mentioned under Social Welfare.

Social Welfare. The Department of Health and Welfare administers a number of social security programmes. Most notable among them, as welfare programmes, are the Family Allowances programme, introduced in 1945 and amended in 1974; the Old Age Security programme, introduced in 1952 and to which were added the Guaranteed Income Supplement in 1966 and the Spouse's Allowance in 1974; and the Canada Pension Plan which came into being in 1966. Social assistance and services programmes which are provided by the provinces and territories are cost-shared by the federal government under the Canada Assistance Plan, which was introduced in 1966.

The 1974 federal Family Allowances Act provides for the payment of a monthly Family Allowance (\$23.89 in 1977) on behalf of a dependent child under the age of 18. This allowance is paid to a parent who is a resident of Canada, who wholly or substantially maintains the child and who is either a Canadian citizen, a landed immigrant or a non-immigrant admitted to Canada for a period of not less than 1 year, during which time his or her income is subject to Canadian Income Tax. Benefits are also paid under certain prescribed circumstances to Canadian citizens living abroad. A Special Allowance is paid on behalf of a child under the age of 18 who is maintained by a welfare agency, a government department or an institution. In some cases, payment is made directly to a foster parent.

The Family Allowances Act provides for the escalation of benefits, in January of each year, based on the Consumer Price Index. It also specifies that a provincial legislature may vary the monthly federal rate payable within that province subject to the fulfilment of stipulated conditions. Only the provinces of Alberta and Quebec have exercised this option.

Generally speaking, the Canada Pension Plan and the Quebec Pension Plan are an integral part of Canada's social security system, serving as the vehicle whereby millions of members of the Canadian labour force acquire and retain, during their productive years, protection for themselves and their families against loss of income due to retirement, disability or death, regardless of where their employment may take them in Canada and, under certain circumstances, outside Canada.

The Canada Pension Plan does not operate in Quebec because the province exercised its constitutional prerogative to establish a similar provincial pension plan to operate in lieu of CPP.

The Plans cover employed members of the labour force between the ages of 18 and 70, with a small number of exceptions (e.g., a person working for his/her spouse, and members of certain religious sects who have opted out of the Plans). Both plans are funded through direct contributions and interest on the investment of excess funds. Contributions are deductible for income-tax purposes, while benefits are taxable and are adjusted annually to fully reflect increases in the Consumer Price Index.

The Old Age Security (OAS) pension is payable to persons 65 years of age and over who satisfy the residence requirements stipulated in the Old Age Security Act. The amount payable, whether full or partial, is also governed by stipulated conditions, as is the payment of an OAS pension to a recipient who absents himself from Canada. OAS pensioners with little or no income apart from OAS may, upon application, receive a full or partial supplement known as the Guaranteed Income Supplement (GIS). Entitlement is normally based on the pensioner's income in the preceding year, calculated in accordance with the Income Tax Act. The spouse of an OAS pensioner, aged 60 to 64, meeting the same residence requirements as those stipulated for OAS, may be eligible for a full or partial Spouse's Allowance (SA). As of July 1977, SA is payable, upon application, if the annual combined income of the couple is less than \$6,816. This is subject to an income test which does not include the OAS pension, the Guaranteed Income Supplement or the Spouse's Allowance.

The OAS pension is taxable; GIS and SA are not taxable. However, they must be included in computing the net income of a dependant for income-tax purposes. OAS, GIS and SA are subject to an increase every January, April, July and October to reflect increases in the Consumer Price Index.

Under the Canada Assistance Plan, the federal government pays 50% of the cost, to the provinces, of assistance to persons in need; welfare services provided to persons who are in need or likely to become in need if they do not receive such services (welfare services means services having as their object the lessening, removal or prevention of the causes and effects of poverty, child neglect or dependence on public assistance); and work activity projects which are designed to improve the employability of persons who have unusual difficulty in finding or retaining jobs or in undertaking job training.

In addition to persons in need as defined in the Plan, federal contributions may be made towards agency costs of providing welfare services to persons who are likely to become in need, if such services are not provided. The amount of federal subsidy is dependent on the proportion of eligible persons as determined by the use of an income test or a pre-determined income level for different sized families. 'Need' is defined by each province and is determined by the 'budget deficit' method, that is, the difference between an applicant's requirements and his income and resources. The rates of assistance payable are also determined by provincial authorities and are non-taxable. No systematic indexation exists; however, provinces do adjust social assistance rates from time to time in accordance with certain economic indicators. Quebec social assistance rates are indexed at the beginning of each year by the rate of change in the Quebec Pension Index.

In 1979, the Unemployment Insurance payments totalled \$4,008m. The number of beneficiaries averaged 713,426 each month for average weekly payments of \$108.63.

CANADIAN PROVINCES

The 10 provinces have each a separate parliament and administration, with a Lieut.-Governor, appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial legislatures are: the amendment of the provincial constitution, except as regards the office of the Lieut.-Governor; property and civil rights; direct taxation for revenue purposes; borrowing; management and sale of Crown lands; provincial hospitals, reformatories, etc.; shop, saloon, tavern, auctioneer and other licences for local or provincial purposes; local works and undertakings, except lines of ships, railways, canals, telegraphs, etc., extending beyond the province or connecting with other provinces, and excepting also such works as the Dominion Parliament declares are for the general good; marriages, administration of justice within the province; education.

Local Government. Under the terms of the British North America Act the provinces are given full powers over local government. All local government institutions are, therefore, supervised by the provinces, and are incorporated and function under provincial acts.

The acts under which municipalities operate vary from province to province. A municipal corporation is usually administered by an elected council headed by a mayor or reeve, whose powers to administer affairs and to raise funds by taxation and other methods are set forth in provincial laws, as is the scope of its obligations to, and on behalf of, the citizens. Similarly, the types of municipal corporations, their official designations and the requirements for their incorporation vary between provinces. The following table sets out the classifications as at 1 Jan. 1977.

ALBERTA

HISTORY. The southern half of the province of Alberta was part of Rupert's land which was granted by royal charter in 1670 to the Hudson's Bay Company. The intervention by the North West Company in the fur trade after 1783 led to the establishment of trading posts. In 1869 Rupert's land was transferred from the Hudson's Bay Company (which had absorbed its rival in 1821) to the new Dominion, and in the following year this land was combined with the former Crown land of the North Western Territories to form the Northwest Territories.

In 1882 'Alberta' first appeared as a provisional 'district', consisting of the southern half of the present province. In 1905 the Athabasca district to the north was added when provincial status was granted to Alberta.

Four parties have held office: the Liberals 1905-21; the United Farmers 1921-35; Social Credit 1935-71, and Progressive Conservative since Sept. 1971.

AREA AND POPULATION. The area of the province is 661,188 sq. km; 644,392 sq. km being land area and 16,796 sq. km water area. The population (estimate 1 June 1980) was 2,086,400; the urban population, centres of 1,000 or over, was 1,564,800 and the rural 521,600. Population of the principal cities (1 June 1979): Calgary, 560,618; Edmonton, 505,773; Lethbridge, 53,135; Red Deer, 41,371; Medicine Hat, 37,684; St Albert, 29,512; Fort McMurray, 27,784 and Grande Prairie, 22,718.

CONSTITUTION AND GOVERNMENT. The constitution of Alberta is contained in the British North America Act of 1867, and amending Acts; also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, which created the province out of the then Northwest Territories. All the provisions of the British North America Act, except those with respect to school lands and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On 1 Oct. 1930 the natural resources were transferred from the Dominion to provincial government control. The province is represented by 6 members in the Senate and 21 in the House of Commons of Canada.

The executive is vested nominally in the Lieut.-Governor, who is appointed by the federal government, but actually in the Executive Council or the Cabinet of the legislature. Legislative power is vested in the Assembly in the name of the Queen.

Members of the Legislative Assembly are elected by the universal vote of adults over the age of 18 years.

There are 79 members in the legislature (elected 14 March 1979): 74 Progressive Conservative, 4 Social Credit, 1 New Democratic Party.

Lieut.-Governor: His Hon. Frank Lynch-Staunton (sworn in 4 Oct. 1979).

Flag: Blue with the shield of the province in the centre.

The members of the Ministry (all Progressive Conservative) are as follows:

Premier, President of Executive Council: Hon. Peter Lougheed.

Provincial Treasurer: Hon. L. D. Hyndman. *Energy and Natural Resources:* Hon. C. M. Leitch. *Attorney-General and Government House Leader:* Hon. N. S. Crawford. *Hospitals and Medical Care:* Hon. D. Local Government. The local government units are City, Town, New Town, Village, Summer Village, County, Municipal District and Improvement District.

There are 12 cities in Alberta, namely: Calgary, Camrose, Drumheller, Edmonton, Fort McMurray, Grande Prairie, Lethbridge, Lloydminster, Medicine Hat,

Red Deer, St Albert and Wetaskiwin. These cities operate under the Municipal Government Act. The governing body consists of a mayor and a council of from 6 to 20 members. A city can be incorporated by order of the Lieut.-Governor-in-Council. A population of 10,000 is required.

There are no limits of area specified in the statutes for any of the different local government units. The population requirement for a Town as specified in the Municipal Government Act is 1,000 people, and the area at incorporation is that of the original village.

A Village must contain 75 separate and occupied dwellings. The Municipal Government Act requires each dwelling to have been occupied continuously for a period of at least 6 months. A Summer Village must contain 50 separate dwellings.

A rural county area is an area incorporated through an order of the Lieut.-Governor-in-Council under the provisions of the County Act. One board of councillors deal with both municipal and school affairs.

A rural Municipal District is an area which has been incorporated under the Municipal Government Act. In Municipal Districts separate boards control municipal and school affairs.

Areas not incorporated as counties or Municipal Districts are termed Improvement Districts or Special Areas. Sparsely populated, such districts are administered and taxed by the Department of Municipal Affairs of the provincial government. There are no requirements as to the minimum number of residents of a County or Municipal District.

FINANCE. The budgetary revenue and expenditure (in Canadian \$) for years ending 31 March were as follows:

ENERGY AND NATURAL RESOURCES

Oil. In 1979, 77,079,000 cu. metres of crude oil and condensate were produced with gross sales value of \$6,686.5m. Alberta produced 86% of Canada's oil output in 1979. Production of natural gas by-products was 18,755,000 cu. metres, valued at \$1,313.8m.

Major deposits of oil sands are found in areas totalling 60,000 sq. km in northern and eastern Alberta. There are 4 major deposits of oil sands, the Athabasca, Cold Lake, Peace River and Wabasca deposits. A limited part of the deposits along the Athabasca River can be exploited through open-pit mining. The rest of the Athabasca, and all the deposits in the other areas, are deeper reserves which must be developed through in situ techniques. These reserves reach depths of 760 metres.

One recovery plant, situated 25 miles north of Fort McMurray, began production in 1967. The deposit being produced is sufficiently close to the surface to permit strip mining. A second plant, to produce 20,000 cu. metres per day of synthetic crude oil, began production in 1978.

Gas. Natural gas is found in abundance in numerous localities. In 1979, 81,383m. cu. metres valued at \$4,265.1m. were produced.

Minerals. In 1978 the ultimate remaining recoverable coal resources of Alberta were estimated at 39,000m. tonnes; the proved remaining recoverable reserves were estimated at 12,000m. tonnes.

Value of total mineral production increased from \$10,087m. in 1978 to \$12,885m. in 1979.

Agriculture. Of the surveyed area of the province (about 85m. acres) approximately 70m. acres may be classed as capable of agricultural development. Up to

the present, however, only 40% of this area has been brought under cultivation.

For particulars of agricultural production and livestock, *see under CANADA*, pp. 275-277. Farm cash receipts in 1979 totalled \$2,835,669,000, of which crops contributed \$1,214m.; livestock and products, \$1,605m., and other sources, \$16m.

Forestry. Alberta has an estimated net merchantable volume of 1,700m. cu. metres of timber comprised of 700m. cu. metres of hardwood and 1,000m. cu. metres of softwood. In 1979, an estimated 1,652,000 metres of lumber were produced.

Fisheries. The lakes of the province contain whitefish, pike and tullibee. Commercial catches are marketed through the Freshwater Fish Marketing Corporation which was inaugurated in May 1969 as the result of an agreement between the federal government and the provinces for the buying and exporting of freshwater fish. Marketed value of commercially caught fish in year ending 31 March 1980 was \$2,818,573. This value includes fish not marketed through the corporation.

INDUSTRY. The leading manufacturing industries are food and beverages, petroleum refining, metal fabricating, wood industries, primary metal, chemical and chemical products and non-metallic mineral products industries. There were in 1978 approximately 2,050 manufacturing establishments, in which were employed about 73,669 persons, who earned in salaries and wages \$1,136m.

Manufacturing shipments had a total value of \$8,717.9m. in 1979. Chief among these shipments were: Food and beverages, \$2,947m.; petroleum and coal products, \$1,737m.; chemicals and chemical products, \$696m.; metal fabricating, \$511m.; primary metals \$509m.; non-metallic mineral products, \$503m.; wood, \$418m.

Total retail sales (1979, estimate) \$8,068.8m.

Tourism is of increasing importance and in 1979 contributed \$1,000m. to the economy.

COMMUNICATIONS

Roads. In 1978 there were 148,148 km of roads and highways, including 97,900 km gravelled and 12,667 km paved.

At March 1980 there were 1,783,158 motor vehicles registered, including 1,025,928 passenger cars, 459,478 public and commercial vehicles, 214,752 trailers and 44,712 motor cycles.

Railways. In Dec. 1979 the length of main railway lines was 10,958 km. A rail rapid transit network (7 km) was opened in Edmonton in 1978.

Post and Telecommunications. Alberta's modern telephone system is owned and operated by the provincial government, except in the city of Edmonton and some rural lines. There were 1,542,958 telephones in service at 31 Dec. 1979.

JUSTICE AND EDUCATION

Justice. The Supreme Judicial authority of the province is the Court of Appeal. Judges of the Court of Appeal and Court of Queen's Bench are appointed by the Dominion Government and hold office until retirement at the age of 75. There are courts of lesser jurisdiction in both civil and criminal matters. District courts have full jurisdiction over civil proceedings. A Provincial Court which has jurisdiction in civil matters up to \$1,000 is presided over by provincially appointed judges. Juvenile Courts have power to try boys 16 and under and girls 18 years of age and under for offences against the Juvenile Delinquents Act.

The jurisdiction of all criminal courts in Alberta is enacted in the provisions of the Criminal Code. The system of procedure in civil and criminal cases conforms as nearly as possible to the English system.

Education. Schools of all grades are included under the term of public school (including those in the separate school system which are publicly supported). The same board of trustees controls the schools from kindergarten to university entrance. In 1979-80 there were 417,291 pupils enrolled in elementary, junior high schools and high schools. The University of Alberta (in Edmonton), organized in 1907, had, in

1978-79, 18,117 full-time students. The University of Calgary, formerly part of the University of Alberta and autonomous from April 1966, had in 1979-80, 10,738 full-time students. The University of Lethbridge, organized in 1966, had in 1979-80, 1,419 full-time students. The full-time enrolment at Alberta's 10 public colleges totalled 11,098 students in 1979-80.

BRITISH COLUMBIA

HISTORY. Vancouver Island was organized as a colony in 1849; the mainland as far as the watershed of the Rocky Mountains was organized as a colony following a gold rush on the Fraser River in 1858. The two were united as the colony of British Columbia in 1866; this became a Canadian Province in 1871.

AREA AND POPULATION. British Columbia has an area of 948,596 sq. km. The capital is Victoria. The province is bordered westerly by the Pacific ocean and Alaska Panhandle, northerly by the Yukon and Northwest Territories, easterly by the Province of Alberta and southerly by the USA along the 49th parallel. A chain of islands, the largest of which are Vancouver Island and the Queen Charlotte Islands, affords protection to the mainland coast.

The June 1976 census population was 2,466,608; estimate (July 1980) 2,642,400.

The principal cities and their populations (1976) are as follows: Greater Vancouver, 1,166,348; Greater Victoria, 218,250; Prince George, 59,929; Kamloops, 58,311; Kelowna, 51,955; Nanaimo, 40,336; Penticton, 21,344; Port Alberni, 19,585; Vernon, 17,546; Prince Rupert, 14,754; Cranbrook, 13,510; Dawson Creek, 10,528.

CONSTITUTION AND GOVERNMENT. British Columbia (then known as New Caledonia) originally formed part of the Hudson's Bay Company's concession. In 1849 Vancouver Island and in 1858 British Columbia were constituted Crown Colonies; in 1866 the two colonies amalgamated. The British North America Act of 1867 provided for eventual admission into Canadian Confederation, and on 20 July 1871 British Columbia became the sixth province of the Dominion.

British Columbia has a unicameral legislature of 57 elected members. Government policy is determined by the Executive Council responsible to the Legislature. The Lieut.-Governor is appointed by the Governor-General of Canada, usually for a term of 5 years, and is the head of the executive government of the province.

Lieut.-Governor: The Hon. Henry P. Bell-Irving, DSO, OBE.

Flag: A banner of the arms, i.e., blue and white wavy stripes charged with a setting sun in gold, across the top of a Union Flag with a gold coronet in the centre.

The Legislative Assembly is elected for a maximum term of 5 years. Every male or female Canadian citizen 18 years and over, having resided a minimum of 6 months in the province, duly registered, is entitled to vote. Representation of the parties at 10 May 1979: Social Credit Party, 31; New Democratic Party, 26; total, 57.

The province is represented in the Federal Parliament by 29 members in the House of Commons, and 6 Senators.

The Executive Council was composed as follows, Jan. 1981:

Premier and President of the Council: William Richards Bennett.

Agent-General in London: Lawrence James Wallace (British Columbia House, 1 Regent St., London, SW1Y 4NS).

Local Government. Vancouver City was incorporated by statute and operates under the provisions of the Vancouver Charter of 1953 and amendments. This is the only incorporated area in British Columbia not operating under the provisions of the Municipal Act. Under this Act municipalities are divided into the following classes: (a) a village with a population between 500 and 2,500, governed by a council consisting of a mayor and 4 aldermen; (b) a town with a population between 2,500 and 5,000, governed by a council consisting of a mayor and 4 aldermen; (c) a city where the population exceeds 5,000 governed by a council consisting of a mayor and 6 or 8 aldermen depending on population; (d) a district where the area exceeds 810 hectares and the average density is less than 5 persons per hectare, governed by a council consisting of a mayor and 6 or 8 aldermen depending on population.

There are two other forms of local government: the regional district covering a number of areas both incorporated and unincorporated, governed by a board of directors; and the improvement district governed by a board of 3 trustees.

Revenue for municipal services is derived mainly from real-property taxation, although additional revenue is derived from licence fees, business taxes, fines, public utility projects and grants-in-aid from the provincial government.

ECONOMY

Budget. Current provincial revenue and expenditure, including all capital expenditures, in Canadian \$ for fiscal years ending 31 March:

Minerals. Copper, coal, natural gas, crude oil, molybdenum and silver are the most important minerals produced. The 1979 total of mineral production was estimated at \$2,824.9m. Total value of fuels produced in 1978 was estimated at \$1,211m.

Agriculture. Only 3.6m. hectares or 4% of the total land area is arable or potentially arable. Farm cash receipts, in 1979, reached \$635.9m.

Forestry. About 58% of British Columbia's land is forest land, with 47.8m. hectares bearing commercial forest. Over 95% of the forest area is owned or administered by the provincial government. The total cut from forests in 1979 was 76,194,000 cu. metres.

Fisheries. In 1979 the wholesale market value of fish products reached \$565.6m., a 9.3% increase on the 1978 figure.

INDUSTRY AND TRADE

Industry. The selling value of factory shipments from all manufacturing industries reached an estimated \$14,300m. in 1979.

Commerce. Exports through British Columbia customs ports during 1979 totalled \$12,700m. in value, while imports amounted to \$5,500m.

About 40% of exports through British Columbia customs ports are products from other provinces, primarily grains, potash and fuels from the Prairie Provinces. USA is the largest market for products exported through British Columbia customs ports (\$5,279.9m. in 1979) followed by Japan (\$3,393.6m.) and the EEC (\$1,688.1m.).

COMMUNICATIONS

Roads. At 30 Sept. 1980 there were 41,720 km of provincial roads and rights of way in the province, of which 17,163 km were paved and 24,557 km were gravelled.

Railways. The province is served by two transcontinental railways, the Canadian Pacific Railway and the Canadian National Railway. British Columbia is also served by the publicly owned British Columbia Railway, the Railway Freight Service of the B.C. Hydro and Power Authority, the Northern Alberta Railways Company and the Burlington Northern Inc. Their combined route-mileage of mainline track totals 7,891.4 km. In addition, 5 American railways interchange with Canadian railways at southern border points or connect by railway barge.

Aviation. International airports are located at Vancouver and Victoria. Daily inter-provincial and intraprovincial flights serve all main population centres. Small public and private airstrips are located throughout the province.

Shipping. The major ports are Vancouver, New Westminster, Victoria, Nanaimo and Prince Rupert. The volume of international shipping handled during 1979 was 59m. tonnes.

The British Columbia Ferries connect Vancouver Island with the mainland and also provide service to other coastal points. Service by other ferry systems is also provided between Vancouver Island and the USA. The Alaska State Ferries connect Prince Rupert with centres in Alaska.

Post and Broadcasting. The British Columbia Telephone Company had (1979) 1.8m. telephones in service. There were 10 television stations and 138 radio stations operating in the province in 1979. Many of these are repeater stations.

EDUCATION AND WELFARE

Education (1979-80). Education, free up to Grade XII levels, is financed jointly from municipal and provincial government revenues. Attendance is compulsory from the age of 6 to 15. There were 511,671 pupils enrolled in public schools from kindergarten to Grade XII.

Higher education (1979-80) is provided at the University of British Columbia at Vancouver (founded 1908), 32,607 students; the University of Victoria (1963), 8,362 students; Simon Fraser University (1965), Burnaby, 9,780 students; Selkirk College (1966), Castlegar, 1,027 students; Okanagan Community College (1968), Kelowna, 2,469 students; Capilano Community College (1970), Vancouver, 3,011 students; Malaspina Community College (1969), Nanaimo, 2,018 students; New Caledonia Community College (1969), Prince George, 1,321 students; Cariboo Community College (1970), Kamloops, 1,983 students; Douglas College (1970), New Westminster, 5,646 students; Fraser Valley Community College (1974), Abbotsford, 1,530 students; East Kootenay Community College (1975), Cranbrook, 474 students; Northern Lights Community College (1975), Dawson Creek, 548 students; North Island Community College (1975), Campbell River, 1,771 students; North West Community College (1975), Terrace, 563 students; British Columbia Institute of Technology (1964), Burnaby, 14,522 students; Camosun College (1971), Victoria 2,701 students.

Health. The Government operates a hospital insurance scheme giving universal coverage after a qualifying period of 3 months' residence in the province. The province has come under a national medicare scheme which is partially subsidized by the provincial government and partially by the federal government.

MANITOBA

HISTORY. The Hudson's Bay Company formed a colony on the Red River in 1812. This being part of territory annexed to Canada in 1870. The Metis colonists (part-Indian, mostly French-speaking, Catholic) objected to the arrangements for the purchase of the Company territory by Canada and the province of Manitoba was created to accommodate them. It was extended northwards and westwards in 1881 and to Hudson Bay in 1912.

AREA AND POPULATION. The area of the province is 251,000 sq. miles (652,218 sq. km), of which 211,775 sq. miles are land and about 39,200 sq. miles water. From north to south it is 761 miles and the widest point is 493 miles.

The population (June 1980 estimate) was 1,028,300. Population of the principal cities (census 1976): Winnipeg (capital), 578,000 (estimate, 1980); Brandon, 34,901; Thompson, 17,291; Portage la Prairie, 12,855; Flin Flon, 8,152.

Religion, *see* p. 284.

CONSTITUTION AND GOVERNMENT. Manitoba was known as the Red River Settlement before its entry into the Dominion in 1870. The provincial government is administered by a Lieut.-Governor and a legislative assembly of 57 members elected for 5 years. Women were enfranchised in 1916. The Electoral Division Act, 1955, created 57 single-member constituencies and abolished the transferable vote. The Electoral Divisions Act, 1979, created 27 rural electoral divisions, and 30 urban electoral divisions. The province is represented by 6 members in the Senate and 14 in the House of Commons of Canada.

Lieut.-Governor: Francis L. Jobin (sworn in 15 March 1976).

Flag: The British Red Ensign with the shield of the province in the fly.

State of parties in the Legislative Assembly (elected 11 Oct. 1977): Progressive Conservative, 32; New Democratic Party, 20; Independent, 1; Liberals, 1.

The members of the Progressive Conservative Ministry are as follows (Feb. 1981):

Premier, President of Executive Council, Minister of Dominion-Provincial Relations: Sterling R. Lyon, QC.

Deputy Premier, Energy and Mines, Minister charged with administration of Manitoba Hydro Act, Minister responsible for Manitoba Development Corporation: Donald W. Craik. *Minister without portfolio:* Edward R. McGill. *Government Services, Minister responsible for the Manitoba Public Insurance Corporation:* Warner H. Jorgenson. *Natural Resources:* Harry J. Local Government. Rural Manitoba is organized into rural municipalities which vary widely in size. Some have only 4 townships (a township is 36 sq. miles), while the largest has 22 townships. The province has 105 rural municipalities, as well as 35 incorporated towns, 40 incorporated villages and 5 incorporated cities.

On 1 Jan. 1972, the cities and towns comprising the metropolitan area of Winnipeg were amalgamated to form the City of Winnipeg. A mayor and council are elected to a central government, but councillors also sit on 'community committees' which represent the areas or wards they serve. These committees are advised by non-elected residents of the area on provision of municipal services within the community committee jurisdiction. Taxing powers and overall budgeting rest with the central council. The mayor is elected at the same time as the councillors in a city-wide vote. Revisions to the City of Winnipeg Act came into effect with the municipal elections held in Oct. 1977.

Since Jan. 1945, 17 Local Government Districts have been formed in the less densely populated areas of the province. They are administered by a provincially appointed person, who acts on the advice of locally elected councils.

In the extreme north, many communities have locally elected councils, while others are administered directly by the Department of Northern Affairs. This department provides most of the funding in all these northern settlements.

FINANCE. Revenue and expenditure (current account) for fiscal years ending 31 March (in Canadian \$):

¹ Estimates.

ENERGY AND NATURAL RESOURCES

Electricity. The total generating capacity of Manitoba's power stations is 3.6m. kw. The Manitoba Hydro system, owned by the province, provides most of this power, while the city-owned Winnipeg Hydro provides about 190,000 kw. The systems have about 397,000 customers and consumption was 11.5m. kwh. in 1980.

Oil. Crude oil production in 1979 was valued at \$48m. for the 3.7m. bbls produced.

Minerals. Total value of minerals in 1980 was about \$834m. Principal minerals mined are nickel, zinc, copper, and small quantities of gold and silver. Manitoba has the world's largest deposits of caesium ore and also produces tantalite concentrates.

Agriculture. Rich farmland is the main primary resource, although the area of Manitoba in farms is only about 14% of the total land area. In 1980 the total value of agricultural production in Manitoba was \$1,691m., with \$1,100m. from crops, \$571m. from livestock and about \$20m. from the sale of other products including furs, hides and honey.

Forestry. About 40% of the land area is wooded, of which 53,700 sq. miles is productive forest land. Total sales of wood-using industries (1980) \$390m.

Fur Trade. Value of fur production to the trapper was \$7.9m. in 1978-79, with the value of all furs exported from the wild \$18m. (1977-78).

Fisheries. From 22,000 sq. miles of rivers and lakes fisheries production was about \$16.9m. in 1979-80. Whitefish, sauger, pickerel, pike, trout and perch are the principal varieties of fish caught.

INDUSTRY AND TRADE

Industry. Manufacturing, the largest industry in the province, encompasses almost every major industrial activity in Canada. Estimated shipments in 1980 totalled \$4,250m. Manufacturing employed about 64,000 persons, paying \$808.7m. in salaries and wages in 1980. Due to the agricultural base of the province, the food and beverage group of industries is by far the largest, accounting for about 34% of the total value. The next largest segments are machinery at about 9%, metal fabricating at 12% and transportation equipment at about 7%.

Trade. Products grown and manufactured in Manitoba find ready markets in other areas of Canada, in the USA, particularly the upper midwest region, and in other countries. Export shipments to foreign countries from Manitoba in 1979 were valued at about \$998m., with about 82% going to the US. Of these, about 33% are raw materials and about 66% are processed and manufactured products.

Tourism. In 1979, Canadian, US and Manitoba tourists numbered 2.75m. contributing about \$350m. to the economy.

COMMUNICATIONS

Roads. Highways and provincial roads had a total mileage of 12,300 in 1980.

Railways. At 31 Dec. 1980 the province had 4,027 miles of railway, not including industrial track, yards and sidings.

Aviation. A total of 103 licensed commercial air carriers operate from bases in Manitoba, as well as major national and international airlines.

Post. All of the province's 701,000 telephones are dial-operated.

EDUCATION. Education is controlled through locally elected school divisions, with about 80% of the financing provided through the province. There are about 204,000 children enrolled in the province's elementary and secondary schools. The University of Manitoba, founded in 1877, in Winnipeg, had a regular student enrolment of 13,300, the University of Winnipeg, 2,580, and Brandon University (1979-80), 950, during the 1980-81 year. Expenditure on education in the 1980-81 fiscal year was \$399m.

Three community colleges, in Brandon, The Pas and Winnipeg, offer 2-year diploma courses in a number of fields, as well as specialized training in many trades. They also give a large number and variety of shorter courses, both at their campuses and in many communities throughout the province.

NEW BRUNSWICK

HISTORY. Touched by Jacques Cartier in 1534. New Brunswick was first explored by Samuel de Champlain in 1604. It was ceded by the French in the Treaty of Utrecht in 1713 and became a permanent British possession in 1763. It was separated from Nova Scotia and became a province in June 1784, as a result of the great influx of United Empire Loyalists. Responsible government came into being in 1848, and consisted of an executive council, a legislative council (later abolished) and a House of Assembly.

AREA AND POPULATION. The area of the province is 28,354 sq. miles (73,000 sq. km), of which 27,633 sq. miles (71,569 sq. km) are land area. The population (census 1976) was 677,250. Of the total population (1971) about 58% are of British origin, 37% French and the remainder are principally of Netherlands, German and Scandinavian descent, and in 1979 there were about 4,775 Indians. Census population of urban centres: Saint John, 85,956; Moncton, 55,934; Fredericton (capital), 44,248; Bathurst, 16,301; Edmundston, 12,710; Campbellton, 9,282.

Vital statistics, *see* p. 266.

Religion, *see* p. 284.

CONSTITUTION AND GOVERNMENT. The government is vested in a Lieut.-Governor and a Legislative Assembly of 58 members each of whom is individually elected to represent the voters in one constituency or riding. A simultaneous translation system is used in the Assembly. Any Canadian subject of full age and 6 months' residence is entitled to vote. As a result of the provincial election held on 23 Oct. 1978 and subsequent by-elections, the Assembly is composed of 30 Progressive Conservatives and 28 Liberals. The province has 10 members in the Canadian Senate and 10 members in the federal House of Commons.

Lieut.-Governor: Hedard J. Robichaud (appointed 8 Oct. 1971).

Local Government. Under the reforms introduced in 1967 the province has assumed complete administrative and financial responsibility for education, health, welfare and administration of justice. Local government is now restricted to provision of services of a strictly local nature. Under the new municipal structure, units include existing and new cities, towns and villages. Counties have disappeared as municipal units. Areas with limited populations have become local service districts. The former local improvement districts have become towns, villages or local service districts depending on their size.

FINANCE. The ordinary budget (in Canadian \$) is shown as follows (financial years ended 31 March):

	1976	1977	1978	1979	1980
Gross revenue	885,344,378	986,730,767	1,078,995,642	1,268,924,745	1,449,457,490
Gross expenditure ¹	866,028,571	985,877,910	1,086,747,213	1,198,129,445	1,321,661,738

¹ Excluding sinking fund instalment.

Funded debt and capital loans outstanding (exclusive of Treasury Bills) as of 31 March 1980 was \$1,417.9m. Sinking funds held by the province at 31 March 1980, \$342m. The ordinary budget excludes capital spending.

ENERGY AND NATURAL RESOURCES

Electricity. Hydro-electric and thermal power plants of the New Brunswick Electric Power Commission had a combined capacity of 2,526,576 kw. at 31 March 1980. This includes 6 units with a capacity of over 600,000 kw. at the Mactaquac hydro-electric development near Fredericton. Three units (1m. kw.) are in operation at Coleson Cove in the Lorneville area near Saint John. The 630,000 kw. nuclear plant at Point Lepreau will be completed in 1981. An additional 200,000 kw. of hydro and thermal capacity have been installed at Mactaquac and Dalhousie respectively. The Commission is interconnected with the neighbouring provinces of Nova Scotia, Quebec, Prince Edward Island and the New England states, USA. Hook-up permits exchange of power including large blocks from Churchill Falls in Labrador through Hydro-Quebec as well as with the state of Maine, USA.

Minerals. A considerable variety of metals, industrial minerals, fuels and structural materials occur in the province. These include zinc, lead, copper, cadmium, bismuth, nickel, gold, silver, cobalt, tungsten, tin, molybdenum, antimony, potash, salt, glauberite, limestone, dolomite, gypsum, oil, gas, coal, uranium, oil shale, sand, gravel, clay, peat, diatomite and marl. Not all have been explored sufficiently. 48% of the value of minerals produced in 1979, which totalled \$530m., was attributed to zinc produced from 2 mines in the Bathurst-Newcastle area: Brunswick Mining and Smelting, Heath Steele Mines Ltd. New Brunswick is now the second largest producer of zinc in Canada. A lead smelter, fertilizer plant and port facilities have been constructed at Belledune. Numerous other discoveries have been made in the area and several deposits are now in the final stages of exploration. Canada's only primary antimony producer is located at Lake George, near Fredericton, and a large low-grade tungsten-molybdenum-bismuth deposit is being developed at Mount Pleasant. Exploration and development is also in process near Sussex and Salt Springs, where potash and salt deposits have been found. Limestone and gypsum are quarried at Havelock and Hillsborough and small quantities of oil and natural gas are produced from the Stoney Creek Field south of Moncton. Coal is mined at Grand Lake and exploration is underway for other deposits of this important energy resource.

Agriculture. The total area under crops is estimated at 312,702 acres, exclusive of improved pasture land (89,515 acres). Farms numbered 3,244 and averaged 306 acres each (census 1976). Mixed farming is common throughout the province. Dairy farming is centred around the larger urban areas, and is located mainly along the Saint John River Valley and in the south-eastern sections of the province. For particulars of agricultural production and livestock, *see under CANADA*, pp. 275-277. Farm cash receipts in 1979 were approximately \$137,952,000.

Forestry. New Brunswick contains some 15.3m. acres of productive forest lands, of which 7.3m. acres is Crown-owned. The combined value of primary and secondary forest production was about \$931m. in 1978, of which wood and paper and allied industries accounted for about \$733m. In 1978 some 120 saw-mills shipped timber valued at about \$160m. Timber-using plants employ about 14,000 men for all aspects of the forest industry, including harvesting, processing and transportation. Practically all forest products are exported from the province's numerous ports and harbours near which the mills are located or sent by road or rail to the USA.

Fisheries. Commercial fishing is one of the most important basic industries of the province. Over 35 commercial species of fish and shellfish are landed, of which lobster, herring, tuna, crabs and cod are the most valuable. Landings in 1979 amounted to \$51.8m. In 1980 there were 119 fish processing plants. The gross income of fishermen in 1979 was approximately \$54m., and the total market value of fish products was approximately \$187m.

INDUSTRY. In 1980 there were 1,207 manufacturing and processing establishments, employing about 42,845 persons. New Brunswick's location, with deep-water

harbours open throughout the year and container facilities at Saint John, makes it ideal for exporting. Industries include food and beverages, paper and allied industries, timber products. About 20% of the industrial labour force work in Saint John.

TOURISM. Tourism is a major industry. During 1979, more than 4m. tourists spent over \$225m.

COMMUNICATIONS

Roads. There are about 1,400 miles of arterial highways and 1,300 miles of collector roads, 95% of which are hard-surfaced. Over 10,000 miles of local roads provide access to most areas in the province. The main highway system, including 380 miles of the Trans-Canada Highway, links the province with the principal roads in Quebec and Nova Scotia, as well as the Interstate Highway System in the eastern seaboard states of the USA. Passenger vehicles, 31 March 1979, numbered 243,301; commercial vehicles, 73,726; motor cycles, 10,903.

Railways. New Brunswick is served by main lines of both Canadian Pacific and Canadian National railways.

Post and Broadcasting. In 1979 the New Brunswick Telephone Co. Ltd had 376,514 telephones in service. The province is served by 16 radio stations. Twelve are privately owned and 4 owned by the Canadian Broadcasting Corporation. Three stations broadcast in the French language. 1 is bilingual and the CBC International Service broadcasts in several languages from its station at Sackville. The province is served by 3 television stations, 1 of which broadcasts in French.

Newspapers. New Brunswick had (1980) 6 daily newspapers, 1 in French, and 23 weekly newspapers, 7 in French or bilingual.

EDUCATION. Public education is free and non-sectarian. There are 4 universities. The University of New Brunswick at Fredericton (founded 13 Dec. 1785 by the Loyalists, elevated to university status in 1823, reorganized as the University of New Brunswick in 1859) had 5,234 students at the Fredericton campus and 626 students at the Saint John campus (Dec. 1979); Mount Allison University at Sackville had 1,446 students; the University of Moncton at Moncton, 2,779 students; St Thomas University at Fredericton, 685 students. During the period 1 July 1979 to 30 June 1980, there were 10,554 students enrolled full-time at 8 Community College campuses and at various campus training centres.

There were, in Sept. 1979, 155,819 pupils and 7,696 teachers in school buildings (Grades 1-12). Large new regional schools are absorbing numbers of small country schools; there are 35 school districts.

NEWFOUNDLAND AND LABRADOR

HISTORY. Archaeological finds at L'Anse-au-Meadow in northern Newfoundland suggest that the Vikings had established a colony there at about A.D. 1000. Newfoundland was discovered by John Cabot 24 June 1497, and was soon frequented in the summer months by the Portuguese, Spanish and French for its fisheries. It was formally occupied in Aug. 1583 by Sir Humphrey Gilbert on behalf of the English Crown, but various attempts to colonize the island remained unsuccessful. Although British sovereignty was recognized in 1713 by the Treaty of Utrecht, disputes over fishing rights with the French were not finally settled till

1904. By the Anglo-French Convention of 1904, France renounced her exclusive fishing rights along part of the coast, granted under the Treaty of Utrecht, but retained sovereignty of the offshore islands of St Pierre and Miquelon. In 1927 the Privy Council decided the boundary between Canada and Labrador.

AREA AND POPULATION. Area, 156,185 sq. miles (383,300 sq. km). In March 1927 the Privy Council decided the boundary between Canada and Newfoundland in Labrador. This area, now part of the Province of Newfoundland and Labrador, is 112,826 sq. miles. The coastline is extremely irregular. Bays, fiords and inlets are numerous and there are many good harbours with deep water close to shore. The coast is rugged with bold rocky cliffs from 200 to 400 ft high; in the Bay of Islands some of the islands rise 500 ft, with the adjacent shore 1,000 ft above tide level. The interior is a plateau of moderate elevation and the chief relief features trend north-east and south-west. Long Range, the most notable of these, begins at Cape Ray and extends north-east for 200 miles, the highest peak reaching 2,673 ft. Approximately one-third of the area is covered by water. Grand Lake, the largest body of water, has an area of about 200 sq. miles. The principal rivers flow towards the north-east. On the borders of the lakes and water-courses good land is generally found, particularly in the valleys of the Terra Nova River, the Gander River, the Exploits River and the Humber River, which are also heavily timbered.

Census population, 1976, was 557,725.

The capital of Newfoundland is the City of St John's (143,390, metropolitan area). The only other city is Corner Brook (25,198); important towns are Labrador City (12,012), Stephenville (10,284), Gander (9,301), Grand Falls (8,729), Happy Valley-Goose Bay (8,075), Windsor (6,349), Channel-Port aux Basques (6,187), Carbonear (5,026), Wabana (4,824), Bonavista (4,299), Wabush (3,769).

CONSTITUTION AND GOVERNMENT. Until 1832 Newfoundland was ruled by the Governor under instructions from the Colonial Office. In that year a Legislature was brought into existence, but the Governor and his Executive Council were not responsible to it. Under the constitution of 1855, which lasted until its suspension in 1934, the government was administered by the Governor appointed by the Crown with an Executive Council responsible to the House of Assembly of 27 elected members and a Legislative Council of 24 members nominated for life by the Governor in Council. Women were enfranchised in 1925. At the Imperial Conference of 1917 Newfoundland was constituted as a Dominion.

In 1933 the financial situation had become so critical that the Government of Newfoundland asked the Government of the UK to appoint a Royal Commission to investigate conditions. On the strength of their recommendations, the parliamentary form of government was suspended and Government by Commission was inaugurated on 16 Feb. 1934.

A National Convention, elected in 1946, made, in 1948, recommendations to H.M. Government in Great Britain as to the possible forms of future government to be submitted to the people at a national referendum. Two referenda were held. In the first referendum (June 1948) the three forms of government submitted to the people were: commission of government for 5 years, confederation with Canada and responsible government as it existed in 1933. No one form of government received a clear majority of the votes polled, and commission of government, receiving the fewest votes, was eliminated. In the second referendum (July 1948) confederation with Canada received 78,408 and responsible government 71,464 votes.

In the Canadian Senate on 18 Feb. 1949 Royal assent was given to the terms of union of Newfoundland and Labrador with Canada, and on 23 March 1949, in the House of Lords, London, Royal assent was given to an amendment to the British North America Act made necessary by the inclusion of Newfoundland and Labrador as the tenth Province of Canada.

Under the terms of union of Newfoundland and Labrador with Canada, which was signed at Ottawa on 11 Dec. 1948, the constitution of the Legislature of Newfoundland and Labrador as it existed immediately prior to 16 Feb. 1934 shall,

subject to the terms of the British North America Acts, 1867 to 1946, continue as the constitution of the Legislature of the Province of Newfoundland and Labrador until altered under the authority of the said Acts.

The franchise was in 1965 extended to all male and female residents who have attained the age of 19 years and are otherwise qualified as electors.

The House of Assembly (Amendment) Act, 1979, established 52 electoral districts and 52 members of the Legislature.

At 18 June 1979 there were 33 Progressive-Conservatives and 19 Liberals.

The province is represented by 6 members in the Senate and by 7 members in the House of Commons of Canada.

Lieut.-Governor: G. A. Winter (assumed office 4 July 1974).

Flag: White, in the hoist 4 solid blue triangles; in the fly 2 red triangles voided white, and between them a yellow tongue bordered in red.

The Progressive-Conservative Executive Council was, at 18 June 1979, composed as follows:

Premier and Inter-governmental Affairs: A. Brian Peckford.

Culture, Recreation and Youth and Environment: R. G. Dawe. *Development:* H. Neil Windsor. *Education:* Lynn Verge. *Finance:* Dr J. Collins. *Fisheries:* J. Morgan. *Forest Resources and Lands:* C. ENERGY AND NATURAL RESOURCES

Electricity. The electrical energy requirements of the province are met mainly by hydro-electric power, with petroleum fuels being utilized to provide the balance. The total amount of energy generated in the province in 1979 was 43,516m. kwh., of which approximately 97% was derived from hydro-electric facilities. The greater part of the energy produced in 1979 came from Churchill Falls, of which 35,290m. kwh. was sold to Hydro-Quebec under the terms of a long-term contract. Energy consumed in the province during 1978 totalled 8,226m. kwh. (estimate), with approximately 6,922m. kwh., or 84%, coming from hydro-electric facilities.

At 31 Dec. 1978 total electrical generating capacity in the province was 7m. kw., with hydro-electric plants accounting for 6-4m. kw., or 91%. A 75 mw hydro project started in 1978 at Hind's Lake in central Newfoundland and should be completed in 1981. It is estimated that potential additional hydro-electric generating capacity of up to 4-5m. kw. can be developed at various sites in the Labrador part of the province.

Oil. In 1977 the province consumed refined petroleum at the rate of 44,000 bbls a day with 25% of this being refined in the province. While the refining capacity of the province is 114,000 bbls per day, there is presently only one refinery being operated, a 14,000 bbls-per-day refinery at Holyrood. Offshore exploration expenditures for oil and gas have increased substantially in recent years. The province has issued exploration permits to exploration companies, which operate for their own account or represent joint ventures, covering 168,993 sq. miles offshore on the continental shelf.

In Oct 1974, two natural-gas finds off Labrador were announced. Tests of these two wells resulted in rates of flow of 13m. and 20m. cu. ft per day respectively, with some condensate and no water present. An additional natural gas find with a flow of 9.8m. cu. ft per day and significant condensates was announced in 1976. Additional drilling is required to delineate the reserves before the significance of the finds will be known.

Minerals. The mineral resources are vast but only partially documented. Large deposits of iron ore, with an ore reserve of over 5,000m. tons at Labrador City, Wabush City and in the Knob Lake area are supplying approximately half of Canada's production. Other large deposits of iron ore are known to exist in the Julianne Lake area.

There are a variety of other minerals being produced in the province in more limited amounts.

Uranium deposits in the Kaipokak Bay area near Makkovik in Labrador are presently being studied by Brinex. The Central Mineral Belt, which extends from the Smallwood Reservoir to the Atlantic coast near Makkovik, holds uranium, copper, beryllium and molybdenite potential.

Production in 1979 (provisional): Iron ore, 33m. tons (\$949.45m.); copper, 8,623 tons (\$18.42m.); zinc, 112,204 tons (\$49.08m.); asbestos, 86,000 tons (\$41.02m.); lead, 6,460 tons (\$7.7m.); silver, 364,000 troy oz. (\$4.32m.); gold, 12,000 troy oz. (\$4.14m.); cadmium, 147,000 lb. (\$479,000); gypsum, 884,000 tons (\$5.09m.); pyrophyllite (\$750,000); cement (\$8.18m.); clay products (\$450,000); sand and gravel, 5.3m. tons (\$7.95m.); stone, 750,000 tons (\$2.4m.).

Agriculture. The estimated value of agricultural products sold, including livestock, 1979, was \$23.8m.

Forestry. The forestry economy in the province is mainly dependent on the operation of 2 newsprint mills. In 1979 the value of newsprint exported from these 2 mills totalled \$253.8m. Lumber mills, saw-log operations produced 48m. f.b.m.

Fisheries. The principal fish landings are cod, flounder, redfish, Queen crabs (in shell), lobster, salmon and herring. In 1979 a yearly average of some 9,000 persons were employed by the fish-processing industry and there were 32,352 licensed full-, part-time and casual fishermen engaged in harvesting operations. Approximately 180 processing operations were active in 1979. The production of fresh and frozen fish products was estimated at \$410m. in 1979.

The total catch in 1979 was 570,666 tonnes valued at \$159.3m., of which the main items were: Cod, 216,409 tonnes (\$63.8m.); flounder, 81,004 (\$18.7m.); herring, 51,963 tonnes (\$12.2m.); redfish, 38,145 (\$5.9m.); lobster, 2,592 (\$9.1m.); salmon, 986 (\$3.2m.).

The seal fishery in 1979 had 6 large licensed and 126 small licensed vessels with 643 men who landed 71,516 pelts. The number of pelts landed by landsmen totalled 28,313.

INDUSTRY. The total value of manufacturing shipments in 1979 was \$1,031.6m. This consists largely of first-stage processing of primary resource products with two of the largest components being paper and fish products.

TRADE UNIONS. There were (1978) 395 unions representing 57,814 members of international and national unions, government employee associations as well as 16 local independent unions.

COMMUNICATIONS

Roads. In 1979 there were 8,980 km, of which 5,583 were paved.

Railways. In 1978 there were 1,457.9 km of railway, of which the Canadian National Railways operated 1,130.5 (3 ft 6 in.), the Quebec North Shore and Labrador Railway 324.8 (4 ft 8½ in.) and there were 2.4 km of private line. Car and passenger ferries operate from Port aux Basques and Argentia to North Sydney, Nova Scotia. On the island of Newfoundland, the Canadian National Railways operates a trans-island bus and rail freight service in addition to a coastal service for both passengers

and freight. In the months that the Labrador coast is ice-free, usually from June to Nov., the Canadian National Railways operates a scheduled coastal steamer service every week.

Aviation. The province is linked to the rest of Canada by regular air services provided by Air Canada, Eastern Provincial Airways, Quebecair and a number of smaller air carriers.

Shipping. In 1979 there were 1,425 ships registered in Newfoundland.

Post. There were 484 post offices open in 1979, and 15 telegraph offices in the Newfoundland and Labrador postal district. Telephone connexions in the province numbered 232,343 in 1978.

EDUCATION. The number of schools in 1979-80 was 675. The enrolment was 150,661; teachers numbered 7,817. The Memorial University, offering courses in arts, science, engineering, education, nursing and medicine, had approximately 10,000 full- and part-time students. Total expenditure for education by the Government in 1979-80 was \$341m.

Local Government. The main divisions of the province for governmental purposes are the 3 cities, the 39 towns and the 24 rural municipalities, each governed by a council and a mayor or warden. The cities have independent charters, and the various towns take their powers from and are limited by The Towns Act, and the various municipalities take their powers from and are limited by The Municipal Act as revised in 1967. The majority of municipalities comprise 1 county, but 6 counties are divided into 2 municipalities each. In no case do the boundaries of any municipality overlap county lines. The 18 counties as such have no administrative functions.

Any city (of which there are 3) or incorporated town (of which there are 39) that lies within the boundaries of a municipality is excluded from any jurisdiction by the municipal council and has its own government.

FINANCE. Revenue is derived from provincial sources, payments from the federal government under the Federal-Provincial Fiscal Arrangements and Established Programs Financing Act (the '1977 Act'). Recoveries consist generally of amounts received under various federal cost-shared programmes. Main sources of provincial revenues include income and sales taxes. Under the 1977 Act the Government of Canada makes payments designed to equalize tax revenues *per capita* available to the provinces. The 1977 Act also provides for the replacement of former cost-sharing arrangements for health and medical services and for post-secondary education with the transfer of additional personal income tax points to the provinces, plus an approximately equivalent amount in supplementary cash payments.

Provisions for debt retirement (sinking fund instalments and serial retirements) are statutorily a charge upon the revenue, money and funds of the province.

ONTARIO

HISTORY. The French explorer Samuel de Champlain explored the Ottawa River from 1613. The area was governed by the French, first under a joint stock company and then as a royal province, from 1627 and was ceded to Great Britain in 1763. A constitutional act of 1791 created there the province of Upper Canada, largely to accommodate loyalists of English descent who had immigrated after the United States war of independence. Upper Canada entered the Confederation as Ontario in 1867.

AREA AND POPULATION. The total area is about 412,600 sq. miles (1,068,630 sq. km), of which some 344,100 sq. miles (891,220 sq. km) are land area and some 68,500 sq. miles (177,420 sq. km) are fresh water.

The province extends 1,000 miles from east to west and 1,050 miles from north to south.

Ontario is bounded on the north by the waters of Hudson and James Bay, on the east by Quebec, on the west by Manitoba, and on the south by the states of New York, Pennsylvania, Ohio, Michigan, Wisconsin and Minnesota.

The population of the province (census, 1 June 1976) was 8,264,465. Census population of the principal cities (1976): Toronto (provincial capital), 633,318 (city), 2,803,101 (census metropolitan area); Hamilton, 312,003 (city), 529,371 (census metropolitan area); Ottawa (federal capital), 304,462 (city), 521,341 (census metropolitan area); London, 240,392 (city); Windsor, 196,526 (city); Kitchener, 131,870 (city), 272,158 (census metropolitan area); Sudbury, 97,604 (city), 167,705 (regional municipality).

Local Government. Local government in Ontario is divided into two branches, one covering municipal institutions and the other education.

The present municipal system dates from The Municipal Corporations Act en-

acted by The Province of Canada in 1849. It has been considerably modified in recent years with the creation of the Municipality of Metropolitan Toronto in 1954 and the launching of the Government of Ontario's local government restructuring programme in 1968. Generally, there are two levels of municipal government in Ontario. The upper level consists of 27 counties plus 12 restructured regional municipalities. The local level comprises more than 800 cities, towns and townships. Cities in the traditional county system function independently of the county in which they lie, as do 5 towns which have been separated for municipal purposes. There are no separated municipal units in regional governments.

Ontario's local municipalities are governed by councils elected by popular vote.

A city council usually consists of a mayor, aldermen and, sometimes, an executive committee known as a board of control.

Councils of towns, villages and townships usually consist of a mayor, reeve, deputy reeve, councillors and, in the case of the newer regional municipalities, one or more regional councillors who represent the area municipalities on the regional council.

County and regional government councils are federated assemblies.

A county council consists of the Reeves and deputy Reeves of the towns, villages and townships. The head of the county council is the warden, who is elected by the council from among its own members.

A regional council consists of the heads of council of the local municipalities, as well as a varying number of regional councillors, who are elected on the basis of representation, either directly or indirectly. The head of the regional council is the chairman who is elected by council but who, unlike a county warden, need not have been a council member.

No municipality in Ontario may incur long-term debts without the sanction of the tribunal created by the Provincial Legislature and known as the Ontario Municipal Board. Debenture obligations incurred by municipalities for utility undertakings (water-works and electric light and power systems) are discharged ordinarily out of revenues derived from the sale of utility services and do not fall upon the ratepayers.

Municipal councils have no jurisdiction for education beyond the collection of taxes for school purposes. Responsibility for providing, operating and maintaining school facilities, and for the supply of teachers, rests with local education authorities known as boards of education or school boards. These boards are now generally organized on a county or regional basis. Apart from some of the larger cities, local municipal school boards no longer exist.

Municipal institutions come under the jurisdiction of the Provincial Ministry of Intergovernmental Affairs. One of the principal functions of the Ministry is to advise and assist municipalities on such matters as accounting, reporting, auditing, budgeting and planning. Educational support and guidance at the provincial level is the responsibility of the Ministry of Education, which deals with the training of teachers and the formulation of curriculum. (At the university and community college level, education support services are provided by the Ministry of Colleges and Universities.)

There are considerable areas in the northernmost parts of Ontario where as yet there is little or no settlement of population. In such areas no municipal organization exists, and control for all purposes over such areas remains in the hands of the Provincial Government.

FINANCE. The gross revenue and expenditure and the net cash requirements (in Canadian \$1,000) for years ending 31 March were as follows:

SASKATCHEWAN

HISTORY. Saskatchewan derives its name from its major river system, which the Cree Indians called 'Kis-is-ska-tche-wan', meaning 'swift flowing'. It officially became a province when it joined the Confederation on 1 Sept. 1905.

In 1670 King Charles II granted to Prince Rupert and his friends a charter covering exclusive trading rights in 'all the land drained by streams finding their outlet in the Hudson Bay'. This included what is now Saskatchewan. The trading company was first known as The Governor and Company of Adventurers of England; later as the Hudson's Bay Company. In 1869 the Northwest Territories was formed, and this included Saskatchewan. In 1882 the District of Saskatchewan was formed. By 1885 the North-West Mounted Police had been inaugurated, with headquarters in Regina (now the capital), and the Canadian Pacific Railway's transcontinental line had been completed, bringing a stream of immigrants to southern Saskatchewan. The Hudson's Bay Company surrendered its claim to territory in return for cash and land around the existing trading posts. Legislative government was introduced.

AREA AND POPULATION. Saskatchewan is bounded on the west by Alberta, on the east by Manitoba, to the north by the Northwest Territories; to the south it is bordered by the US states of Montana and North Dakota. The area of the province is 251,700 sq. miles (652,000 sq. km), of which 220,182 sq. miles is land area and 31,518 sq. miles is water. The population (1980 estimate) was 969,200.

Population of principal cities (1979 estimate): Regina (capital), 153,848; Saskatoon, 144,269; Moose Jaw, 33,441; Prince Albert, 30,121; Yorkton, 15,077; Swift Current, 14,358; North Battleford, 13,884; Lloydminster, 12,960; Weyburn, 9,243; Estevan, 9,012; Melfort, 5,883; Melville, 5,140.

Vital statistics, *see* p. 266.

Religion, *see* p. 284.

CONSTITUTION AND GOVERNMENT. The provincial government is vested in a Lieut.-Governor, an Executive Council and a Legislative Assembly, elected for 5 years. Women were given the franchise in 1916 and are also eligible for election to the legislature. State of parties in Oct. 1980: New Democratic Party, 44; Progressive Conservative, 15; Unionist, 2.

Lieut.-Governor: C. Irwin McIntosh.

Local Government. The organization of a city requires a minimum population of 5,000 persons; that of a town, 500; that of a village, 100 people. No requirements as to population exist for the rural municipality and the local improvement district.

Cities, towns, villages and rural municipalities are governed by elected councils, which consist of a mayor and 6-20 aldermen in a city; a mayor and 6 councillors in a town; a mayor and 2 other members in a village; a reeve and a councillor for each division in a rural municipality (usually 6). Local improvement districts are administered by the Department of Municipal Affairs.

NATURAL RESOURCES. Agriculture used to dominate the history and economics of Saskatchewan, but the 'prairie province' is now a rapidly developing mining and manufacturing area. It is a major supplier of oil; has the world's largest deposits of potash; is the only source of helium in the 'free world' outside the USA, which limits production to internal use; and net value of non-agricultural production account for (1979 estimate) 60% of the provincial economy.

Electricity. The Saskatchewan Power Corporation generated 8,982m. kwh. in 1979.

Minerals. The 1979 mineral production was valued at \$1,835.1m., including (in \$1m.): Petroleum 720; natural gas, 15.5; coal, 22; gold, 4; silver, 3; copper, 13.8; zinc, 3.5; potash, 695.3; salt, 11; uranium, 258.

Agriculture. Saskatchewan produces normally about two-thirds of Canada's wheat. Wheat production in 1979 (in 1,000 tonnes), was 10,179 (374m. bu.) from 17m. acres; oats, 632 (41m. bu.) from 1m. acres; barley, 1,960 (90m. bu.) from 2.6m. acres; rye, 203 (80m. bu.) from 360,000 acres; rapeseed, 1,281 (57m. bu.) from 3.3m. acres; flax, 259 (10m. bu.) 8m. bu. from 800,000 acres. Livestock (Jan. 1980): Cattle, 2.17m.; swine, 660,000; sheep, 60,000. Poultry in 1979: Chickens and turkeys 11.4m. Cash income from the sale of farm products in 1979 was \$2,905,193,000. At the June 1976 census there were 66,258 commercial farms in the province, each being a holding having agricultural sales of \$2,500 or more.

The South Saskatchewan River irrigation project, whose main feature is the Gardiner Dam, was completed in 1967. It will ultimately provide for an area of 200,000 acres of irrigated cultivation in Central Saskatchewan. In 1979-80, 32,199, acres were under development.

Forestry. Half of Saskatchewan's area is forested, but only 115,000 sq. km are of commercial value at present. Forest products valued at \$162m. were produced in 1978-79. The province's first pulp-mill, at Prince Albert, went into production in 1968; its daily capacity is 1,000 tons of high-grade kraft pulp.

THE NORTHWEST TERRITORIES

HISTORY. The Territory was developed by the Hudson's Bay Company and the North West Company (of Montreal) from the 17th century. The Canadian Government bought out the Hudson's Bay Company in 1869 and the Territory was annexed to Canada in 1870. The Arctic Island lying north of the Canadian mainland was annexed to Canada in 1880 by Queen Victoria.

AREA AND POPULATION. The total area of the Territories is 1,304,903 sq. miles (3,379,700 sq. km), divided into 5 districts, namely, Inuvik, Fort Smith, Keewatin, Baffin and Yellowknife. The population on 1 Jan. 1978 was 46,386, about two-thirds of whom were Indians or Inuit (Eskimo). Main centres (census 1979): Inuvik (2,892), Fort Smith (2,234), Hay River (3,345), Frobisher Bay (2,454), Fort Simpson (1,001). Because of a transfer in governmental responsibility from Ottawa to the Territorial capital at Yellowknife, the population of Yellowknife was increased by the influx of civil servants from 3,741 in 1966 to 9,918 in 1979.

CONSTITUTION AND GOVERNMENT. The Northwest Territories comprises all that portion of Canada lying north of the 60th parallel of N. lat. except those portions within the Yukon Territory and the Provinces of Quebec and Newfoundland; it also includes the islands in Hudson Bay, James Bay and Ungava Bay except those within the Provinces of Manitoba, Ontario and Québec.

The Northwest Territories is governed by a Commissioner and a Legislative Assembly. The Council is composed of 22 members elected for a 4-year term of office. The seat of government was transferred from Ottawa to Yellowknife when it was named territorial capital on 18 Jan. 1967.

Commissioner: J. H. Parker.

Flag: Vertically, blue, white, blue, with the white of double width and bearing the shield of the Territory.

Legislative powers are exercised by the Commissioner-in-Council on such matters as taxation within the Territories in order to raise revenue, maintenance of justice, licences, solemnization of marriages, education, public health, property, civil rights and generally all matters of a local nature.

The Territorial Government has now assumed responsibility for the administration of the entire Northwest Territories.

ENERGY AND NATURAL RESOURCES

Oil and Gas. As of March 1980, 2,550 permits for oil and gas exploration were held for 723,070,483 acres, of which 33 leases were on the mainland, 2,121 were on the arctic islands and 396 on the marine coast.

Crude oil, discovered in 1920, is produced and refined at Norman Wells on the Mackenzie River; value of crude oil produced was \$6.2m. in 1978.

Minerals. Mineral production for the year 1979 was valued at \$469,815,536, of which zinc accounted for \$219,531,000; lead, \$82.85m.; gold, \$61,750,361; tungsten, \$58,484,430; silver, \$44,566,187; copper, \$1,330,685 and cadmium, \$1,302,873.

Yellowknife continues to be the centre of goldmining activity and Canada's Cominco Ltd is proceeding with plans for the construction of a lead-zinc mine, the Polaris Project, on Little Cornwallis Island in the central high arctic.

Trapping and Game. Fur produced during the 1978-79 season was valued at \$5.7m.,

primarily in wolf, fox, lynx and marten. A herd of some 6,500 buffalo is protected in Wood Buffalo National Park. Barren ground caribou are increasing, due to more effective management techniques.

Forestry. The principal trees are white spruce, jack-pine, balsam, poplar and birch. In 1976, 1.52m. cu. ft measure of lumber, 153,000 cu. ft of round timber and 270,000 cu. ft of fuelwood were cut.

Fisheries. Commercial fishing, principally on Great Slave Lake, in 1979-80 produced fish valued at \$1.2m., principally trout, char and whitefish.

CO-OPERATIVES. There are 40 active co-operatives in the Northwest Territories. They are active in handicrafts, furs, fisheries, retail stores, print shops, provision of housing, contracting for services, etc. Total revenue in 1979 was \$16,341,549.

COMMUNICATIONS

Roads. The Mackenzie Route connects Grimshaw, Alberta, with Hay River, Pine Point, Fort Smith, Fort Providence, Rae-Edzo and Yellowknife. The Mackenzie Highway extension to Fort Simpson and a road between Pine Point and Fort Resolution have both been opened.

Clearing began in 1972 for extending the Mackenzie Highway north of Fort Simpson to the arctic coast. Highway service to Inuvik in the Mackenzie Delta was opened in spring 1980, extending north from Dawson, Yukon as the Dempster Highway.

Railways. The Great Slave Lake Railway runs from Pine Point and Hay River, on the south shore of Great Slave Lake, 435 miles south to Grimshaw, Alberta, where it connects with the CN Rail's main system.

Aviation (1979). Fourteen licensed and 1 unlicensed airports are operated by the federal Ministry of Transport and there are 17 licensed and 18 unlicensed airports operated by the Government of the Northwest Territories. Two licensed and 10 unlicensed airports are operated by private owners. Regular mail, passenger and express services are maintained throughout the Territories. A seaplane base is operated by the Ministry of Transport and there are 17 private seaplane bases. Scheduled services join major points with centres in southern Canada.

Shipping. A direct inland-water transportation route for about 1,700 miles is provided by the Mackenzie River and its tributaries, the Athabasca and Slave rivers. Subsidiary routes on Lake Athabasca, Great Slave Lake and Great Bear River and Lake total more than 800 miles.

Post and Broadcasting (1978). There were 56 post offices. The CBC northern service operated radio stations at Yellowknife, Inuvik and Frobisher Bay. Virtually all communities of 500 or over were receiving television in 1978 *via* satellite. Telephone communication has been established between southern Canada and all areas in the Mackenzie district. Several arctic communities now receive telephone service *via* satellite. High-frequency telephone service is also available throughout the eastern Northwest Territories.

EDUCATION AND WELFARE

Education. In 1978-79 the Government of the Northwest Territories operated 71 schools with 592 teachers. In addition, one public school district operated at Yellowknife, one Roman Catholic separate school district at Yellowknife, and one school society operated a school at Rae-Edzo. The total enrolment was 12,288 in March, 1980, of whom about 65% were Inuit (Eskimos) and Indians. Four large and 4 small residences accommodate 439 pupils. Free correspondence courses are available to any pupil in a settlement where appropriate instruction is not available. There is a full range of courses available in the school system: academic, industrial arts, home economics, commercial, technical and occupational training. The continuing and special education programme provides courses and financial assistance to residents who have left the school system or are taking post high school training.

Health. In 1978 there were 7 hospitals in the Territories, 3 operated by the territorial government (Yellowknife, Hay River and Fort Smith) and 4 operated by the federal

government. Forty nursing stations, 6 health stations and 8 health centres were in operation.

Welfare. Welfare services are provided by professional social workers. Facilities included (1978) 5 children's receiving homes, 2 homes for the aged and 1 transit centre.

YUKON TERRITORY

HISTORY. Formerly part of the North-West Territory, the Yukon was joined to the Dominion as a separate territory in 1898.

AREA AND POPULATION. The Yukon Territory is situated in the extreme north-western section of Canada and comprises 482,515 sq. km. The population reached its peak in 1901 with 27,219. The census population in 1971 was 18,388; 1980 (estimate), 24,138. Principal centres are Whitehorse (capital), 16,362; Faro, 1,668; Watson Lake, 1,374; Dawson City, 1,109; Mayo-Elsa, 1,098.

Vital statistics, *see* p. 266.

Religion, *see* p. 284.

CONSTITUTION AND GOVERNMENT. The Yukon Territory was constituted a separate territory in June 1898. It is governed by a 5-member Executive Council (Cabinet) appointed from among the 16-member elected Legislative Assembly. The members are elected for a 4-year term. The seat of government is at Whitehorse. A federally appointed Commissioner has the final signing authority for all legislation passed by the Assembly.

Commissioner: Doug Bell.

Flag: Vertically green, white, blue, in the proportions 2 : 3 : 2, charged in the centre with the arms of the Territory.

The legislative authority of the Assembly includes direct taxation, education, property and civil rights, territorial civil service, municipalities and generally all matters of local or private nature. All other major administration including Crown lands, income tax, natural resources and particularly that which requires the spending of large sums of money, is federally controlled.

ECONOMY

Planning. Proposed economic development of the Yukon Territory into the 1980s envisages a total expenditure of about \$5,000m. Confirmed development projects include the construction of a natural gas pipeline through the territory to deliver Alaskan natural gas from Prudhoe Bay to the continental 48 states. Another confirmed project is the reconstruction and paving of 482 km of highways through south-western Yukon. Roads subject to this are the Haines Road and the Alaska Highway. Being considered is the possible opening of 5 new mines in eastern Yukon, extension of railways from southern Canada and Alaska and a proposed aluminium smelter. The federal government and Yukon Indians are currently negotiating a land claims settlement. It is anticipated these economic projects will result in a doubling of the current Yukon population by 1985.

Finance. The territorial revenue and expenditure (in Canadian \$) for fiscal years ended 31 March was:

	1974-75	1975-76	1976-77	1977-78
Revenue	46,062,417	65,368,118	73,580,104	84,483,715
Expenditure	56,481,303	69,199,232	69,516,255	78,340,311

ENERGY AND NATURAL RESOURCES

Minerals. Mining remains the main industry. Lead, zinc, copper, silver, gold and asbestos are the chief minerals. Production figures for year ending 31 Dec. 1978 were: Lead, 82,232 kg; zinc, 118,843 kg; silver, 132 kg; copper, 7,669 kg; gold, 778 grammes. The value of mining production sales in 1979 was approximately \$300m.

There were 209 land use permits issued during the 1979-80 fiscal year including 93 for government projects, 62 private road construction, 20 campsite and staging areas, 17 for quarrying, 13 for woods operations and 4 for research projects.

Forestry. The forests are part of the great Boreal forest region of Canada which stretches from the east coast of Canada into Alaska and north well above the Arctic Circle. Vast areas are covered by coniferous stands in the southern portion of Yukon with white spruce and lodgepole pine forming pure stands on wet sites and in northern aspects. Deciduous species form pure stands or occur mixed with conifers throughout forest areas.

The forest industry is small with approximately 18 active saw-mills and timber operations. Most are portable 'bush' mills although a few semi-permanent mills have been established. There are also 33 commercial cutters of fuelwood the production of which ranges from 10 cords (36 cu. metres) to 200 cords (724.9 cu. metres). Production in 1979-80 was 4,083,000 cu. metres (20,440,000 bd ft) of lumber, 1,394,000 cu. ft (17,432 cords) of cordwood and (143,000 cu. ft) of round timber including poles, pilings, building logs, mine timbers and fenceposts.

Game and Furs. The country abounds with big game, such as moose, goat, caribou, mountain sheep and bear (grizzly and black). In 1978-79, 41,580 pelts were taken for a market value of \$927,814. Lynx was the most valuable fur and made up 46% of the total harvest bringing in \$430,613 in revenues.

TOURISM. In 1979, 362,000 tourists visited the Yukon and spent \$36m.

COMMUNICATIONS

Roads. The Alaska Highway and its side roads connect Yukon's main communities with Alaska and the provinces and with adjacent mining centres. Interior roads connect the mining communities of Elsa (silver-lead zinc cadmium), Faro (lead-zinc), Cantung (tungsten) and mineral exploration properties (lead zinc-iron ore-tungsten) north of Ross River. The Dempster Highway north of Dawson City connects with Inuvik, on the Arctic coast; this highway, the first public road to be built to the Arctic ocean, was opened in Aug. 1979. The Carcross Skagway road was opened in May 1979, providing a new access to the Pacific ocean. There are 4,230 km of roads in the Territory, of which about 180 km are paved. The rest are all-weather gravel.

Railways. The 176-km White Pass and Yukon Railway connects Whitehorse with year-round ocean shipping at Skagway, Alaska. Several rail extension studies envisage the Yukon line eventually joining a transcontinental rail link.

Aviation. Commercial airlines provide services every day between Whitehorse, Watson Lake, Yellowknife, Edmonton, Winnipeg and Vancouver. Regularly scheduled air services extend from Whitehorse to Fairbanks and Juneau, Alaska; Inuvik, Northwest Territories; and interior communities of Faro, Mayo, Dawson City, Old Crow, Ross River, Haines Junction and Beaver Creek. There are several commercial bush plane operations for charter service.

Shipping. Some goods are shipped into the Territory by air or *via* the Alaska Highway, but most are containerized in Vancouver and brought up the coast by ship to Skagway, Alaska. The containers are then taken by train from Skagway to Whitehorse, and then hauled by truck to the outlying communities. Many of these

trucks then return to Whitehorse hauling ore to be shipped out. Some goods are transported within the Territory by air. Although navigable, the rivers are no longer used for shipping.

Post and Broadcasting. There are 2 radio stations in Whitehorse and 14 low-power relay radio transmitters operated by CBC. There are also 5 cable-TV channels in Whitehorse. TV channels in Whitehorse and private cable operations in Faro, Dawson City and Watson Lake. Live CBC national television is provided by the Anik satellite to virtually every community in the Territory. All telephone and telecommunications in the Territory are provided by NorthwesTel, a subsidiary of Canadian National Telecommunications. Almost all pole lines have been replaced with microwave transmission.

Newspapers. In 1981 there were 1 daily, 1 weekly and 1 two-monthly newspapers in Whitehorse. Faro has a two-monthly newspaper.

EDUCATION AND WELFARE

Education. (1979–80). The Territory had 24 schools with 5,120 pupils. In addition to the courses given in the Yukon Vocational and Technical Centre, the Yukon offers a limited number of post-secondary courses through the University of Alberta. A Yukon Teacher Education Programme started in 1977 to train local residents to obtain Bachelor of Education degrees in Education and a Teaching Certificate. The course is conducted by the University of British Columbia. The Government provides financial assistance to students requiring further education elsewhere.

Health. The health care system provides all residents with the care demanded by illness or accident. The federal government operates 1 general hospital at Whitehorse, 3 cottage hospitals, 2 nursing stations, with a total of 150 beds, and 9 health centres. The territorial government also operates a medical evacuation programme to send patients to Edmonton or Vancouver for specialized treatment not available in the Territory.

CHAD

République du Tchad

Capital: N'djaména

Population: 4.41m. (1979)

GNP per capita: US\$140 (1978)

HISTORY. France proclaimed a protectorate over Chad on 5 Sept. 1900, and in July 1908 the territory was incorporated into French Equatorial Africa. It became a separate colony in March 1920, and in 1946 one of the four constituent territories of French Equatorial Africa. On 1 Jan. 1959 Chad became an autonomous republic within the French Community and achieved full independence on 11 Aug. 1960, although the northern prefecture of Borkou-Ennedi-Tibesti remained under French military administration until 1965.

Conflicts between the central government of President François (later Ngarta) Tombalbaye and secessionist groups, particularly in the Moslem north and centre of Chad, began in 1965 and continued despite attempts at reconciliation. President Tombalbaye was assassinated on 13 April 1975 following an Army *coup d'état*. A Supreme Military Council of 9 members, under the Presidency of Gen. Felix Malloum, ruled until 29 Aug. 1978, when the Council was dissolved and Malloum formed a new government of 'national unity'.

Fighting continued between the differing groups and, following further peace conferences, Gen. Malloum resigned on 23 March 1979. An accord was finally signed in Lagos on 21 Aug. between representatives of 11 warring factions. A 22-member Transitional Government of National Unity (GUNT) was formed on 10 Nov., to prepare for elections within 18 months.

AREA AND POPULATION. Chad is bounded west by Cameroon, Nigeria and Niger, north by Libya, east by Sudan and south by Central African Republic. Area, 1,284,000 sq. km; its population in 1979 was estimated at 4,405,000. The capital is N'djaména, formerly Fort Lamy with 241,639 inhabitants in 1976, other large towns being Moundou (54,925), Sarh (54,047) and Abéché (43,125).

CHILE

Capital: Santiago

Population: 11.1m. (1980)

GNP per capita: US\$1,410 (1978)

República de Chile

HISTORY. The Republic of Chile threw off allegiance to the crown of Spain, constituting a national government on 18 Sept. 1810, finally freeing itself from Spanish rule in 1818.

AREA AND POPULATION. Chile is bounded north by Peru, east by Bolivia and Argentina, and west by the Pacific ocean. All regions except 3 extend from the Pacific to the international boundary, while the inter-provincial boundaries in most cases now follow watersheds instead of rivers, thus confining within one province the waters of a single system and avoiding jurisdictional disputes.

Many islands to the north, west and south belong to Chile, including Easter Island (Isla de Pascua; 63.9 sq. miles), discovered in 1722. The coastline is about 2,650 miles in length; the average width of the country, 120 miles. Area, 751,626 sq. km or 292,135 sq. miles.

In 1940 Chile declared, and in each subsequent year has reaffirmed, its ownership of the sector of the Antarctic lying between 53° and 90° W. long.; and asserted that the British claim to the sector between the meridians 20° and 90° W. long. overlapped the Chilean by 27°. Five Chilean bases were established in Antarctica in 1947, 1948, 1951 and 1962. A law promulgated 21 July 1955 put the Intendente of the Province of Magallanes in charge of the 'Chilean Antarctic Territory'.

Three thinly-settled southern provinces of Magallanes, Chiloé and Aysén and the northern provinces of Arica and Iquique are known as 'free zones', which implies that all commodities imported into those areas from abroad are not subject to all national import duties.

The total population at the census of 30 June 1972 was 10,044,940. Estimate (1980) 11.1m. Density per sq. km, 1972, was 13.54.

The areas of the provinces and their census populations at 30 June 1972 were as follows:

<i>Provinces</i>	<i>Area: sq. km</i>	<i>Population</i>	<i>Provinces</i>	<i>Area: sq. km</i>	<i>Population</i>
Aconcagua	10,204	181,660	Llanquihue	18,407	225,821

Vital statistics (1971): Revised birth rate 27.6 per 1,000 population; death rate, 8.4; marriage rate, 8.6; infantile mortality rate, 70.9 per 1,000 live births.

The great majority of the population is mixed or *mestizo*, due to the free inter-marriage between the early Spaniards and women of indigenous tribes; language and culture remain of European origin. The indigenous inhabitants are of 3 branches: The *Fuegians*, mostly nomadic, living in or near Tierra del Fuego;

the *Araucanians* in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers and fishermen.

The 3 leading cities, with the estimated population at 30 June 1975, are: Santiago, 3,186,000 (Greater Santiago, 3.3m.); Valparaíso, 248,972; Concepción, 169,570. Other towns, Viña del Mar, 229,000; Talcahuano, 183,591; Antofagasta, 149,720; Temuco, 138,430; Talca, 115,130; Chillán, 102,210; Valdivia, 89,500; Osorno, 71,000; Iquique, 63,600. Punta Arenas, on the Strait of Magellan, with a population of 67,600, is the southernmost city in the world. The Antarctic Territory proper is now stated to be 484,800 sq. miles.

There are 4 geographical zones in Chile—the arid 'desert' zone in the north, which for many years furnished the world's entire supply of natural nitrate of soda, 90% of its iodine and 18% of copper consumed; the agricultural 'Mediterranean' zone in the centre; the 'forest' zone to the south; and the 'Atlantic' zone in the extreme south, barren on the Pacific side, but with rich sheltered pampa on the Atlantic side.

CONSTITUTION AND GOVERNMENT. The Marxist coalition government of President Salvador Allende Gossens was ousted on 11 Sept. 1973 by the 3 Armed Services and the *Carabineros* (para-military police). These forces formed a government headed by a Junta of the 4 Commanders-in-Chief. Gen. Augusto Pinochet Ugarte, Commander-in-Chief of the Army, took over the presidency. President Allende committed suicide on the day of the *coup*.

While the Constitution of 1925 is still nominally in force, the National Congress has been dissolved, Marxist parties outlawed and all political activities banned. The new Government assumed wide-ranging powers but the 'state of siege' ended in March 1978. A new Constitution was approved by 67.5% of the voters on 11 Sept. 1980. It provides for a return to democracy after a minimum period of 8 years. Gen. Pinochet would remain in office during this period.

For details of the 1925 Constitution and earlier political history see *THE STATESMAN'S YEAR-BOOK*, 1975–76, p. 808.

The capital is Santiago, founded on 12 Feb. 1541.

National flag: Two horizontal bands, white, red, with a white star on blue square in top sixth next to staff.

National anthem: Dulce patria, recibe los votos (words by E. Lillo, 1847; tune by Ramón Carnicer, 1828).

The following is a list of the presidents since 1927:

Local Government. For the purposes of local government the Military Junta in

pursuance of its policy of administrative decentralization, has divided the republic into 13 regions (12 and Greater Santiago). Each Region is presided over by a *Gobernador*, while the provinces (25 in all) included in it are in charge of an *Intendente* who represents the central government. The provinces are divided into municipalities under an *alcalde* (mayor). All these officials are appointed by the President.

DEFENCE. Chile on 9 April 1952 signed the Military Assistance pact with the US, promising access to raw materials and armed support in defence of the Western Hemisphere.

Army. The Chilean Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 20th to the 45th year, inclusive. In many cases exemption can easily be obtained, as the supply exceeds the number that can adequately be trained. The annual intake has varied up to 20,000. Recruits are called up in their 20th year, and are trained for 24 months. After this training they pass into the reserve, which is estimated at 160,000.

Army aviation operates 6 CASA Aviocar transports.

The Army is organized in 21 infantry, 7 cavalry (3 armoured, 1 heliborne and 3 horsed), and 6 artillery regiments. Total strength (1980), about 53,000 men.

Navy. The largest ships of the Chilean Navy are as follows:

There are 2 modern diesel powered patrol submarines (British 'Oberon' class), 1 old ex-US submarine, 6 destroyers (2 British built and 4 old ex-US), 5 frigates (2 modern British 'Leander' class, *Cordell* and *Lynch*, and 3 old ex-US destroyer escort transports), 4 torpedo boats, 6 patrol vessels, 12 coastal patrol craft, 3 landing ships, 2 repair ships (ex-landing ships), 13 landing craft, 1 survey ship, 6 transports, 1 training ship, 1 antarctic patrol ship, 2 oilers, 4 floating docks and 4 tugs.

Naval personnel in 1981 totalled 28,000 (1,920 officers, 23,400 ratings, 2,680 marines).

Air Force. Approximate current strength is 11,000 personnel, with 100 first-line and 150 second-line aircraft, divided among 12 groups, each comprising 1 squadron, within 4 combat and support wings. The 1975 expenditures envisaged US\$3,169m. for defence, US\$3,687m. for education, US\$883m. for agriculture, US\$1,114m. for public works, US\$1,395m. for housing and US\$3,293m. for public health.

Currency. In Jan. 1960 a system came into force based on the *escudo* (equivalent of 1,000 *pesos*), the *centésimo* (10 *pesos*) and the *milésimo* (1 *peso*). On 29 Sept. 1975 the currency reverted to *pesos* with a value of 1,000 escudos to the new peso.

In March 1981 there were 84.92 *pesos* = £1 and 39 *pesos* = US\$1.

Minerals. The wealth of the country consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá.

Copper is the most important source of foreign exchange (about 48% of exports) and government revenues (over 30%). The copper industry, which is state-owned since July 1971, manages 5 large mines which in 1978 had proceeds returned to Chile amounting to US\$1,006.8m. On the same basis the medium and small-sized companies recorded US\$194.7m. Copper production for 1979 was 1,061,000 tonnes. Exports during 1979 were valued at US\$1,800m.

Nitrate of soda is found in the Atacama deserts. Exports were US\$46.8m. in 1978. Production was 535,300 tonnes in 1978. Iodine is a by-product: 1977 production totalled 1,922 tonnes. The use of solar evaporation as a means of reducing costs has developed the production of potassium salts as an additional by-product.

Iron ore, of which high-grade deposits estimated at over 1,000m. tons exist in the provinces of Atacama and Coquimbo, has overtaken nitrate as Chile's second mineral. Production in 1978 was 5,143,200 tonnes.

Coal reserves exceed 2,000m. tons, partially low in thermal unit. Net 1978 production was 1,115,381 tonnes.

In 1977 other minerals include molybdenum (10,940 tonnes, pure), zinc (2,826 tonnes), manganese (27,000 tonnes), lead (122 tonnes).

Agriculture. Agriculture and forestry contribute one-twelfth of the national product, although one-third of the population take part in it. Total area of land being exploited (census of 1968) was 52.4m. hectares; 14.9% for agriculture, 26.7% for pasture, 28.8% for forest; 29.6% is desert or unproductive.

Chile used to import annually about two-thirds of the foodstuffs needed, a quarter of the total imports, but this has now been reduced, by stimulating local production, to about 12% of total imports.

Some principal crops were as follows:

Crop	Area sown, 1,000 hectares	Production, 1,000 tonnes	Crop	Area sown, 1,000 hectares	Production, 1,000 tonnes
	1978-79	1978-79		1978-79	1978-79
Wheat	561	995	Potatoes	81	771
Oats	79	150	Beans	110	116
Barley	60	112	Lentils	50	32
Maize	130	489	Peas	17	15
Rice	47	181	Sugar-beet	16	679

There were in 1955 over 300 large farms, each with more than 12,250 acres, while 500,000 peasants live on less than 4 acres per family. The military government has opted in most cases to increase the number of settlements with access to individual property. The process was completed in early 1979 with some 24,000 property titles issued, a large proportion of which were in co-operative schemes.

Production of animal products in 1976 was (in 1,000 tonnes): Cattle, 162; sheep, 32; pork, 57; poultry, 60. Eggs, 1,849m.; milk, 1,205m. litres; new wool, 35,000 tonnes.

Livestock (1979): Cattle, 3.61m.; horses, 450,000; asses, 30,000; sheep, 5.95m.; goats, 600,000; pigs, 1.03m.; poultry, 22m.

Forestry. According to the Forestry Institute, by late 1978, there were 277,944 hectares of artificial forests from Maule to Magallanes, the most important species being the pine (*pinus radiata*) which covers 640,000 hectares. Eucalyptus and poplar cover some 72,000 hectares. Native species of importance amounted to 9m. hectares in 1978.

Production during 1977 amounted to about 49m. in. of sawn timber. Exports in 1978 were valued at US\$94.4m.

Paper production in 1978 was 215,000 tonnes and exports were valued at US\$157m.

Fisheries. Chile's catch of fish in 1978 was 1,829,000 tonnes, including shell fish, 125,000 tonnes. Exports of seafood in 1978 were US\$121.4m., of which fishmeal accounted for US\$105.8m.

INDUSTRY AND TRADE

Industry. A nationally-owned steel plant operates from Huachipato, near Concepción. Output, 1977, 509,300 tonnes of steel ingots. Cellulose and wood-pulp are two industries which are rapidly developing: in 1977, 1,360.8 tonnes of cellulose were produced and exports were valued at US\$90.9m.

Labour. In Sept. 1978 the 'economically active' numbered 4m. in the Santiago area. Professional and 'white-collar' workers numbered 731,900; agriculture employed 14,800; manufacturing, 334,700; mining, 5,200; construction, 83,700, and transport, 93,500.

Trade unions began in the middle 1880s.

Commerce. Imports and exports in US\$1m.:

	1974	1975	1976	1977	1978	1979

In 1978 the principal imports were (in US\$1m.): Fuels, 480; chemicals, 407; industrial equipment, 367; transport equipment, 283; spares, 228, and live animals and foodstuffs, 116. The principal exports in 1978 were (in US\$1m.): Copper, 1,202; paper and pulp, 159; timber, 94; iron ore, 80; nitrate, 47.

Total trade between Chile and UK for 5 years (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980

Exports and re-exports from UK	36,295	39,432	37,571	45,640	55,741

Tourism. There were 296,954 foreign visitors in 1977.

COMMUNICATIONS

Roads. In 1966 there were in Chile 66,000 km of highways, of which 8,847 first-class paved, 23,290 second class and 33,863 earth. There were in 1974, 235,335 automobiles, 149,642 goods vehicles, 15,682 buses and 28,833 motor cycles and scooters.

Railways. The total length of railway lines was (1980) 6,396 km, including 890 km electrified, of broad- and metre-gauge. Further electrification is in progress between Concepción and Puerto Montt (600 km). An underground railway in Santiago was opened in Sept. 1975.

Aviation. There are 7 international airports, 16 domestic airports and about 300 landing grounds. Chile is served by 19 commercial air companies (2 Chilean). In 1978, 267,300 passengers were carried into and out of Chile on international services; 237,450 passengers were carried on internal routes.

Shipping. The mercantile marine had, in 1976, 66 ships of over 100 tons (678,556 DWT) and owned by 17 companies. Valparaíso is the chief port. The free ports of Magallanes, Chiloé and Aysén serve the southern provinces. Chilean ports handled 21.9m. tons in 1974.

There are 2,185 km of navigable rivers.

Post and Broadcasting. There are 1,486 post offices and agencies. The length of telegraph lines in 1971 was 12,870 km. In 1978 there were 483,225 (Santiago, 303,318) telephones in use.

A chain of wireless stations along the coast for shore-to-ship transmission is operated by the Navy. At the end of 1974 there were some 150 commercial broadcasting stations. Three television stations are operated by the Universities and there is a national television station using NTSC 525 line colour standards. On 9 Aug. 1968 the satellite station at Longovilo, 50 miles south-west of Santiago, was inaugurated to cover transmissions (including colour) from the USA and Europe.

Cinemas (1975). Cinemas numbered 196; 61 of them are in Santiago.

Newspapers (1975). There were 80 daily newspapers.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There are a High Court of Justice in the capital, 12 courts of appeal distributed over the republic, tribunals of first instance in the departmental capitals and second-class judges in the sub-delegations. The police force had (1975) about 27,000 officers and men; it is organized and regulated by the Ministry of Defence.

Religion. The Roman Catholic religion was disestablished in 1925; it remains, however, a national Church in a state wherein 89.5% of the population are Catholics. There are 1 cardinal-archbishop, 5 archbishops, 22 bishops and 2 vicars apostolic. Latest estimates show 6.7m. Roman Catholics, 880,500 Protestants and 25,000 Jews.

Education. Education is in 3 stages: Basic (6-14 years), Middle (15-18) and University (19-23). Enrolment (1970): Pre-school (a new programme initiated in 1970), 60,360 children; primary school, 2,043,032; secondary school, 302,064.

University education is provided in the state university (founded in 1842), the Catholic University at Santiago (1888), the University of Concepción (1919), the Catholic University at Valparaíso (1928), the Universidad Técnica Federico Santa María at Valparaíso (1930), the Universidad Técnica del Estado (1952), Universidad Austral, Valdivia (1954) and Universidad del Norte, Antofagasta (1957) with a total student population of 96,000 in 1970. A decree of 30 Dec. 1980 laid down new regulations for universities including a restriction of the number of courses offered to 12. New private universities are envisaged.

Health. A national health service covered some 1.5m. employees (1977) and there are plans for an extension of the service to a further 1.5m.

HISTORY. In the course of 1949 the Communists obtained full control of the mainland of China, and in 1950 also over most islands off the coast, including Hainan.

On 1 Oct. 1949 Mao Zedong (Tse-tung) proclaimed the establishment of the People's Republic of China.

AREA AND POPULATION. China is bounded north by the USSR and Mongolia, east by Korea, the Yellow Sea and the East China Sea, with Hong Kong and Macao as enclaves on the south-east coast; south by Vietnam, Laos, Burma, India, Bhutan and Nepal; west by India, Pakistan, Afghanistan and the USSR. China is composed of 22 provinces (this figure includes Taiwan), 5 autonomous regions originally entirely or largely inhabited by national minorities (owing to the immigration of Han Chinese the original nationality is sometimes outnumbered, e.g., by 10 to 1 in Inner Mongolia), namely Inner Mongolia, Xinjiang-Uyghur, Guangxi-Zhuang, Ningxia-Hui, Tibet and 3 centrally controlled municipalities (Peking, Shanghai, Tianjin).

The capital is Peking (Beijing).

See map in *THE STATESMAN'S YEAR-BOOK*, 1968-69.

The total area is estimated at 9,597,000 sq. km (3,704,400 sq. miles).

Population at the last census (1953): 601,938,035. This figure was arrived at as follows: Direct census, 574,205,940; Taiwan, 7,591,298; Chinese resident or studying abroad, 11,743,000; Chinese 'in remote border regions', 8,397,477. Urban population, 77.3m. (13.3%); rural population, 505.3m. Official population figure in 1979 (excluding Taiwan): 970.93m., of whom 110m. urban. Chinese sources put the rate of increase for 1978 at about 1.2%. In 1979 a reduction of this rate to 1%, and to 0.5% by 1985, was officially called for. To this end family planning is vigorously pursued and in 1979 penalties were imposed on families producing more than 2 children. The legal age for marriage is 20 for women and 22 for men but couples are encouraged to postpone marriage until 25 and 27 respectively. The term 'Han' is used to distinguish ethnic Chinese from other Chinese citizens. There were 55 non-Han ethnic minorities numbering 56m. in all in 1980.

Population densities vary from 10 per sq. km in the West to over 100 per sq. km in the East.

Estimates of persons of Chinese race outside China, Taiwan and Hong Kong in 1980 varied from 15m. to 20m. China permits the emigration of a limited number of persons to Hong Kong annually. There were 70,456 in 1979.

A number of widely divergent varieties of Chinese are spoken. The official 'Modern Standard Chinese' is based on the dialect of North China, and the Government is promoting its use generally. The ideographic writing system is uniform throughout the country, and has undergone systematic simplification. In 1958 a phonetic alphabet (*Pinyin*) was devised to transcribe the characters, and on 1 Jan. 1979 this was officially adopted for use in all texts in the Roman alphabet (see also Post and Broadcasting, p. 350). The decision of press agencies to use the *Pinyin* transcription led to the supersession of the system previously widely used in English-speaking countries (Wade). Starting with *THE STATESMAN'S YEAR-BOOK*,

1979-80 new names were introduced in *Pinyin*. In this edition with a few exceptions *Pinyin* forms are used for all names. *Pinyin* forms are not used in Taiwan.

From 1949 to 1955 the country was divided into 6 large administrative regions. This system was terminated in 1955, but in 1961 was revived in the form of 6 regional Party Bureaux. These ceased to function during the Cultural Revolution. The table below shows the Provinces, Autonomous Regions and Government-controlled Municipalities grouped regionally. The cities shown in brackets are the seats of the former regional Party Bureaux.

Large towns, with population in 1977: Chongqing, 6m.; Canton (Guangzhou), 5m.; Shenyang, 4.4m.; Luda, 4.2m.; Wuhan, 3.5m.; Nanjing, 3m.; Harbin, 2.1m.

Manchuria, a term not used by the Chinese, is roughly identical with the 3 provinces of the N.E. Region.

Tibet. For events before the revolt of 1959 see THE STATESMAN'S YEAR-BOOK, 1964-65, under TIBET. After the revolt was suppressed the Preparatory Committee for the Autonomous Region of Tibet (set up 1955) took over the functions of local government, led by its Vice-Chairman, the Banqen Lama, in the absence of its Chairman, the Dalai Lama, who had fled to India in 1959. In Dec. 1964 both the Dalai and Banqen Lamas were removed from their posts and on 9 Sept. 1965 Tibet became an Autonomous Region. 301 delegates were elected to the first People's Congress, of whom 226 were Tibetans and in 1968 a Revolutionary Committee was established to administer the Region. This gave way to a People's Government in Aug. 1979. The Banqen Lama was re-elected to the Standing Committee of the Chinese

People's Political Consultative Conference in March 1978—he became one of its Vice-Chairmen in July 1979—and has made several appeals to the Dalai Lama to return to China. In 1979 the population was reported to be 1.74m. (120,000 in the capital, Lhasa) and the number of Chinese then in Tibet to be about 120,000. 4.25m. Tibetans live outside Tibet, in China, and in India and Nepal. Chinese efforts to modernize Tibet include irrigation, road-building and the establishment of light industry: more than 260 small and medium-sized factories and mines have been set up producing electric power, coal, building materials, lumber, textiles, chemicals and animal products.

In 1979, 1.6m. were engaged in agriculture, including 0.5m. nomadic herdsmen. Agricultural communes were first introduced in 1965; by 1975 it was announced that 99% of villages had formed them. In 1975 Tibet became self-sufficient in grain for the first time. There are now 16,000 km of highways, and air routes link Lhasa with Chengdu and Lanzhou.

It was officially admitted in Peking in 1980 that the administration of Tibet had been badly conducted hitherto. The borders were opened for trade with neighbouring countries, and agricultural reforms allowing for more individual autonomy within the commune system were announced.

Efforts are being made to revive Tibetan culture as part of China's new liberal policy towards minorities. Buddhist monasteries, closed in the Cultural Revolution, are now re-opening. Circulation of the Tibetan-language *Xizang Daily* now totals 38,000. By 1979 there were 6,000 primary schools, some 300 secondary schools and 4 colleges. There were more than 6,000 medical workers and nearly 500 hospitals, with a total of 4,000 beds.

CONSTITUTION AND GOVERNMENT. On 21 Sept. 1949 the 'Chinese People's Political Consultative Conference' met in Peking, convened by the Chinese Communist Party. The Conference adopted a 'Common Programme' of 60 articles and the 'Organic Law of the Central People's Government' (31 articles). Both became the basis of the Constitution adopted on 20 Sept. 1954 by the 1st National People's Congress, the supreme legislative body. The Consultative Conference continued to exist after 1954 as an advisory body. Both bodies stopped functioning in the Cultural Revolution. The People's Congress was revived in 1975 and the Consultative Conference in 1978, when Deng Xiaoping was elected as its head. In 1979 it had 1,734 members.

The 1954 Constitution was both a political and an organizational document. It indicated the steps to be taken to build a 'socialist' society, defined the structure and functions of government organs and the rights and duties of citizens appropriate in the period of transition to 'socialism'.

In Jan. 1975 the 4th National People's Congress approved a constitution, under which China was defined as a 'socialist state of the dictatorship of the proletariat'. The 1975 Constitution was a simpler document than its predecessor emphasizing the role of politics in society, especially the thought of Mao, but giving fewer organizational details. In March 1978 the 5th National People's Congress adopted a new constitution of 60 articles which revives several of the provisions of the 1954 constitution dropped in the 1975 document and eliminates much of the latter's innovatory radicalism. More administrative detail is given. Provisions (Art.45) for freedom of speech and publication were withdrawn in 1980.

The National People's Congress is the highest organ of state power. It can amend the Constitution, elects and has power to remove from office the highest State dignitaries, decides on the national economic plan, etc. The Congress elects a *Standing Committee* which supervises the State Council and whose chairman is the equivalent of head of state. The present chairman (elected March 1978) is Ye Jianying.

The Constitution provides that the Congress be elected for a 5-year term and should meet once a year. It is composed of deputies elected on a constituency basis by direct secret ballot. Any voter, and certain organizations, may nominate candidates. Nominations may exceed seats by 50–100%. 3,497 deputies were elected to the 5th Congress in March 1978.

The State Council is the executive organ of the Congress, that is, the Government. In March 1981 it consisted of the Prime Minister, Zhao Ziyang, 13 Deputy Prime Ministers: Bo Yibo (*Minister in charge of Machine Building Industry Commission*), Chen Muhua (*Minister of Economic Relations with Foreign Countries*), Fang Yi (*Minister in charge of State Scientific and Technological Commission*), Geng Biao (*Defence*), Han Guang (*Minister in charge of State Capital Construction Commission*), Huang Hua (*Minister of Foreign Affairs*), Ji Pengfei, Yuan Baohua, (*Minister in charge of State Economic Commission*), Kang Shien (*Petroleum*), Wan Li (*Minister in charge of State Agricultural Commission*), Yang Jingren (*Minister in charge of State Nationalities Affairs Commission*), Yao Yilin (*Minister in charge of State Planning Commission*), Yu Qiuli (*Minister in charge of State Energy Commission*), Zhang Aiping, and 36 other Ministers including Zhao Cangbi (*Public Security*), Li Qiang (*Foreign Trade*), Lin Hujia (*Agriculture*), Wang Bingqian (*Finance*), Jiang Nanxiang (*Education*), Qian Xinzong (*Health*), Wang Lei (*Commerce*), Wei Wenbo (*Justice*).

Since 1970 when China began to emerge from the isolation of the Cultural Revolution, her diplomatic relations have expanded considerably. On 25 Oct. 1971 the UN voted for the People's Republic to take over the China seat from the Nationalists by 76 votes to 35 with 17 abstentions. US President Nixon visited China in Feb. 1972 and in 1973 'liaison offices' were opened in the capitals of the two countries. On 1 Jan. 1979 the US recognized the Peking government as the sole legal government of China and diplomatic relations were established. In Jan.–Feb. 1979 Deng Xiaoping paid an official visit to USA. On 12 Aug. 1978 China and Japan signed a 10-year treaty of peace and friendship (ratified 22 Oct. 1978). China has announced that it will not renew its treaty of friendship with the USSR which expired in 1980.

State emblem: 5 stars above Peking's Gate of Heavenly Peace, surrounded by a border of ears of grain entwined with drapings, which form a knot in the centre of a cogwheel at the base; the colours are red and gold.

National flag: Red with a large star and 4 smaller stars all in yellow in the canton.

National anthem: 'March on, brave people of our nation' (words composed 'collectively', 1978; tune by Nie Er).

De facto power is in the hands of the Communist Party of China, which had 38m. members in 1980. There are 8 other parties, all members of the United Front headed by Deng Xiaoping. Communist Party officials hold key positions in government organs and most social, economic and cultural organizations. In mid-1966 the Party Chairman, Mao Tse-tung, launched the 'Great Proletarian Cultural Revolution' to eradicate 'revisionism' and numerous Party and State officials were dismissed. The Cultural Revolution can be taken to have terminated by April 1969 when the long-delayed 9th Party Congress was convened, although it was not officially declared to have been brought to a 'victorious conclusion' until Aug. 1977. The 9th Congress adopted a new Party Constitution which proclaimed the leading rôle of the Party in the State and designated Lin Biao as Chairman Mao's successor. A factional dispute developed, however, centred on Lin Biao (killed in an air crash in Mongolia in Sept. 1971) and in Aug. 1973 the 10th Party Congress adopted amendments to the Party Constitution, removing references to Lin Biao and the succession to Chairman Mao, and electing a new Central Committee which appointed a new Politburo and Standing Committee. In Jan. 1975 the Central Committee appointed as a vice-chairman of the Politburo Deng Xiaoping, former Party Secretary-General dismissed during the Cultural Revolution. In April 1976 a 'radical' faction in the Politburo engineered a second dismissal of Deng from all his posts, and Hua Guofeng was appointed First Party Vice-Chairman as well as Premier. On the death of Mao Tse-tung on 9 Sept. 1976 Hua became Party Chairman. In Oct. 1976 the 'radical' faction (now identified and excoriated as the 'Gang of Four': Mao's widow, Jiang

Qing, Zhang Chunqiao, Wang Hongwen and Yao Wenyuan) were placed under arrest. At the 11th Party Congress in Aug. 1977 a new Party Constitution was adopted, and a new Central Committee was elected. Changes in the leadership saw the elimination of the 'radical' faction and a second reinstatement of Deng to his Party and government posts. In Feb. 1980 Liu Shaoqi, former head of state denounced by Mao as a traitor, was posthumously reinstated, and 4 Politburo members of Maoist persuasion were dismissed. Hua Guofeng was replaced as Premier by Zhao Ziyang in Sept. 1980. The 'Gang of Four', along with Chen Boda (a former secretary of Mao), were brought to trial only on 20 Nov. 1980. At the same time the trial opened of five generals accused of complicity with Lin Biao in an attempt to seize power. All 10 accused were found guilty on 25 Jan 1981. Suspended death sentences were passed on Jiang Qing and Zhang Chungiao. The Politburo in March 1981 had 26 members, including: *Chairman and Chief of the Military Affairs Commission:* Hua Guofeng. *Vice-Chairmen:* Ye Jianying, Deng Xiaoping, Li Xiannian, Chen Yun, Hu Yaobang (*General Secretary of the Central Committee*), Zhao Ziyang (these 7 constituting the Politburo's Standing Committee); Wang Zhen, Wei Guoqing, Ulanhu, Fang Yi, Deng Yingchao, Liu Bocheng, Xu Shiyou, Li Desheng, Yu Qiuli, Zhang Tingfa, Chen Yonggui, Geng Biao, Nie Rongzhen, Ni Zhifu, Xu Xiangqian, Peng Chong, Peng Zhen; (alternate members) Chen Muhua, Seypidin.

Local Government. There are 4 administrative levels: (1) Provinces, Autonomous Regions and the municipalities directly administered by the Government; (2) prefectures and autonomous prefectures (*zhou*); (3) counties, autonomous counties and municipalities; (4) towns and rural communes. Local government after 1968 was in the hands of Revolutionary Committees. From 1 Jan. 1980 these were replaced by elected People's Congresses and People's Governments. These exist at provincial, county and commune levels and in national minority autonomous prefectures, but not in ordinary prefectures which are just agencies of the provincial government. Up to county level Congresses are elected directly.

DEFENCE. The Party Chairman is *ex officio* supreme commander of the armed forces. China is divided into 11 military regions. The military commander also commands the air, naval and civilian militia forces assigned to each region.

Conscription is compulsory but for organizational reasons selective: only some 10% of potential recruits are called up. Service is 3 years with the Army, 4 years with the Air Force and 5 years with the Navy.

Marks of rank were abolished in 1965 but uniforms distinguish officers from other ranks.

The Chinese exploded their first nuclear device in May 1964, and their twenty-fourth in Oct. 1980 and have tested guided missiles with nuclear warheads. Their first earth satellite was launched in April 1970, an eighth in Jan. 1978.

Army. The Army (PLA: 'People's Liberation Army') is divided into main and local forces. Main forces, administered by the military regions in which they are stationed but commanded by the Ministry of Defence, are available for operation anywhere and are better equipped. Local forces concentrate on the defence of their own regions. The Army consists of 185 divisions including 40 artillery, 11 armoured, 118 infantry, 3 airborne and 85 local divisions. Total strength in 1980 was 3.6m.

The security forces, including the armed police, number some 300,000.

The People's Militia consists of the Armed Militia of up to 5m. strength, the Ordinary Militia of several million, unarmed but with some basic military training, and which includes the Urban Militia, and the Civilian Production and Construction Corps of 4m.

Navy. There is a steady new construction programme of all classes of warships in modernized yards, all with advanced nuclear and missile capability. Chinese naval strength is an important element in the present and future balance of power east of Suez.

Present strength comprises 2 nuclear powered submarines, 1 submarine with ballistic missile tubes, 90 other submarines, 11 destroyers, 16 frigates, 12 patrol escorts,

170 missile boats, 20 large patrol boats, 25 fast patrol craft, 350 fast gunboats, 290 fast torpedo boats, 20 ocean minesweepers, 80 mine warfare craft, 100 coastal patrol craft, 22 survey and research ships, 40 supply ships, 18 oilers, 6 boom defence vessels, 2 repair ships, 31 landing ships, 470 landing craft, and 900 coast and river defence craft.

Active personnel in 1981 exceeded 300,000 officers and men, including 30,000 marines and 30,000 naval airmen.

Main naval bases: Qingdao (North Sea Fleet); Shanghai (East Sea Fleet); Tsam-kong (Zhanjiang) (South Sea Fleet).

The largely land-based and mainly defensive naval air force of over 700 aircraft includes MiG-17, MiG-19 and MiG-21 fighters, some 150 Il-28 torpedo bombers, Midge flying boats, Hound M14 helicopters and communications and transport aircraft.

Air Force. In 1980 the Air Force was estimated at 5,200 front-line aircraft, organized in over 100 regiments of jet-fighters and about 12 regiments of tactical bombers, plus reconnaissance, transport and helicopter units. Each regiment is made up of 3 or 4 squadrons (each 12 aircraft), and 3 regiments form a division.

Equipment is predominantly Russian in design and includes about 75 F-7 (MiG-21), 1,800 F-6 (MiG-19) and 1,500 F-5 (MiG-17) home-defence interceptors, with about 450 B-5 (Il-28) jet-bombers, nearly 100 B-6 Chinese-built copies of the Soviet Tu-16 twin-jet strategic bomber, and a few piston-engined Tu-4 (Soviet copy of Boeing B-29) strategic bombers, plus several hundred obsolete MiG-15s and a growing number of A-5 twin-jet fighter-bombers, evolved from the MiG-19. Transport aircraft include about 300 An-2, An-12, An-24, 26, 100 Li-2, 30 Il-14 and 10 Il-18 fixed-wing types, plus 300 Mi-4 and Mi-8 helicopters and 13 French-built Super Frelon heavy transport helicopters. The MiG fighters have been manufactured in China, initially under licence, and other types have been assembled there, including several hundred F-2 (MiG-15UTI) trainers.

Total strength (1980) about 490,000, including 220,000 in air defence organization.

Membership. The People's Republic of China is a member of UN.

ECONOMY

Planning. For planning history 1953-73 *see* THE STATESMAN'S YEAR-BOOK, 1973-74, p. 817.

The long-term aim of the present leadership is to transform China by the year 2000 into a modern developed economic power by the implementation of 'the 4 modernizations', *i.e.*, of agriculture, industry, defence and science and technology. In January 1980 Deng Xiaoping declared that China was aiming for a per capita GNP of US\$1,000 by the year 2000. In 1978, as a first step to the realization of the '4 modernizations', a 10-year plan (1976-85) was introduced. However this proved in practice to be over-ambitious; many of the planned targets were too high and the scale of capital construction was too great. The pursuit of the plan caused serious imbalances in the economy. Since 1979 a policy of 'readjusting, restructuring, consolidating and improving' the economy has been followed, and is scheduled to last until 1981 when a new 10-year plan will be introduced.

The more rational approach adapted to China's material and financial limitations embodied in the readjustment programme remains the foundation of Chinese economic policy. Agriculture and light industry will receive higher priority in investment compared to heavy industry. The growth rates in 1980 were lower and the 1981 targets were twice revised downwards in an effort to balance the budget. (The total value of industrial and agricultural production in 1979 rose by 8.2%.)

Budget. 1979 revenue was 110,330m. yuan; expenditure, 127,390m. yuan. Budget deficit (1980) 17,000m. yuan.

Communes pay an agricultural tax, and this accounts for almost 10% of budgetary revenue. Since 1981 state-owned enterprises have paid a business tax instead

of turning over their profits to the state. Income tax was introduced in 1980; it affects mainly foreigners. China will pay off US claims of US\$80.5m. before 1 Oct. 1984, and USA will unblock Chinese assets of the same value. Registration of British claims for loss of assets in 1949 was requested by the Foreign Compensation Commission in Jan. 1981. A credit of 450m. SDF was granted by IMF in March 1981.

China's gold and foreign exchange reserves were estimated at US\$6,000m. in 1978.

Currency. The currency is called Renminbi (RMB, *i.e.*, People's Currency). The unit of currency is the *yuan* which is divided into 10 *jiao*, the *jiao*, into 10 *fen*. The official rate of exchange is £1 = 3.39 *yuan*; US\$1 = 1.53 *yuan*; Hong Kong \$1 = 0.983 *yuan*; 1 rouble = 2.222 *yuan* (non-commercial, 1 rouble = 1.29 *yuan*).

Notes are issued for 1, 2 and 5 *jiao* and 1, 2, 5 and 10 *yuan* and coins for 1, 2 and 5 *fen*.

Banking. Banking is controlled by the People's Bank which has 30,000 branches. It is both the bank of issue and the principal commercial and domestic bank. It is also the major instrument of economic policy through which enterprises are controlled or supervised by the Government. Its president has ministerial rank.

There are 2 specialized banks: the Construction Bank and the Bank of Communications. The Bank of China, which has branches abroad (including 1 in London) is an agency of the People's Bank.

Weights and Measures. The metric system is in general use. For older units of measurement, see THE STATESMAN'S YEAR-BOOK, 1975-76, p. 826 and 1954, pp. 877-88.

ENERGY AND NATURAL RESOURCES

Electricity. In 1979 coal provided over 60% of China's energy, although there is a large hydro-electric potential in the centre and south. Generating is not centralized; local units range between 30 and 60 mw of output. Output in 1979: 281,950m. kwh.

Oil. China has made rapid progress in oil extraction and refining. There are probably about 100 oilfields, of which the largest are at Daqing, Shengli, Dagang and Karamai. Offshore resources in Bohai Bay are also being exploited. Refining capacity is estimated at 80m. tons per annum. Oil reserves may be as much as 10,000m. tonnes. Crude oil production was 106.15m. tonnes in 1979.

Gas. Natural gas is available from fields near Canton and Shanghai and in Sichuan province. Production was 14,510m. cu. metres in 1979, but is only used locally.

Minerals. *Coal.* Most provinces contain coal, and there are 70 major production centres, of which the largest are in Hebei, Shanxi, Shandong, Jilin and Anhui. Coal reserves are estimated at 200,000m. tonnes. Coal and lignite production was 635m. tonnes in 1979.

Iron. Iron ores are abundant in the anthracite field of Shanxi, in Hebei, in Shandong and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. 300m. tons of ore are estimated to be in Shanxi; the principal iron-ore reserves total about 19,840m. tons. The Daye iron deposits, near Wuhan, are among the richest in the world. Estimated output of iron ore in 1972, 75m. tonnes. The biggest steel bases are at Anshan (in Manchuria) with a capacity of 6m. tons, Wuhan (capacity 3.5m. tonnes), Baotou and Maanshan (both 2.5m. tonnes).

Tin. Tin ore is plentiful in Yunnan, where the tin-mining industry has long existed. Tin production was 15,000 tonnes in 1978.

Tungsten. China is the world's principal producer of wolfram (tungsten ore), producing 9,000 tonnes in 1978. Mining of wolfram is carried on in Hunan, Guangdong and Yunnan.

Production of other minerals in 1978 (in tonnes): Phosphate rock, 4.5m.; aluminium, 225,000; copper, 200,000; lead, 120,000; zinc, 125,000; antimony, 9,000; manganese, 2m.; (1973) sulphur, 130,000; (1967) bauxite, 350,000; (1973) salt, 18,000; (1969) asbestos, 160,000. Other minerals produced: barite, bismuth, gold, graphite, gypsum, mercury, molybdenum, silver.

Agriculture. China remains essentially an agricultural country. Some 11% of the total land area is under cultivation. Intensive agriculture and horticulture have been

practised for millennia. Present-day policy aims to avert the traditional threats from floods and droughts by soil conservancy, afforestation, irrigation and drainage projects, and to increase the 'high stable yields' areas by introducing fertilizers, pesticides and improved crops. Crop priorities: food grains; raw materials for industry (especially cotton); crops for export (especially oil seeds). Among livestock, priority is given to pig production.

In 1950 the land belonging to the feudal nobility and to monasteries and other institutions was confiscated by the State. By the end of 1952 land reform; and by the end of 1958 the socialization of agriculture was declared to be complete.

By the end of 1958 the peasant population had been organized into roughly 24,000 'communes', each consisting of a number of villages and 5,000-10,000 families. The commune took over the local government function at the village (*xiang*) level. Centralized authority was discharged down through the production 'brigade' to the production 'team' of 10-50 families. Since 1958 modifications have been made in the commune system, size reductions. There were some 50,000 in 1977. Small private plots account for 20% or more of the peasant income which averaged 83-40 yuan in 1979.

In 1974 there were estimated to be 127m. hectares of arable land. In 1977 there were 43m. tractors (15 h.p. units).

Agricultural production (in 1m. tonnes). Total grain, 1980, 311; tea (1979), 0.28; cotton, 2.2; rice, 1976, 125.5; oilseed crops, 1979, 6.4.

Livestock, 1979: Cattle, 71.35m.; sheep and goats, 183.1m.; pigs, 319.7m. Official figures for 1978: Pigs, 301,290m.; sheep, 169,940m.; horses and cattle, 93,890m. Meat production in 1979 was 10.62m. tonnes.

Forestry. Forests cover some 12m. hectares. The chief forested areas are in Heilongjiang, Sichuan and Yunnan. The most important tree is the dong (*Jatropha Curcas* L.), from which oil is produced. It grows chiefly in Sichuan. Dong-oil production amounted to 115,000 tonnes in 1948-49. Timber output in 1978 was 51.6m. cu. metres.

The most important timber product is teak. It is estimated that some 1.3m. hectares are afforested each year.

INDUSTRY AND TRADE

Industry. 'Cottage' industry is very old in the economy and persists into the 20th century. Modern industrial development began with the manufacture of cotton textiles, and the establishment of silk filatures, steel plants, flour-mills and match factories. Expanding sectors of manufacture are, steel, chemicals, cement, agricultural implements, plastics and lorries.

1979 production (in tonnes): Chemical fertilizer, 10.65m.; chemical fibres, 326,000; pig-iron, 36.7m.; cement, 73.9m.; cotton yarn, 2.63m.; 186,000 motor vehicles were produced, 126,000 tractors and 10.09m. bicycles.

34.48m. tonnes of steel were produced in 1979. 4.4m. tonnes of paper were produced in 1978.

Labour. In 1979 the non-agricultural labour force was 95m. There were some 20m. unemployed, mainly rural youth. Factory wages in 1979 averaged 59 yuan a month. Wage increases affecting 40% of the non-agricultural workforce were introduced in Oct. 1977 and in Nov. 1979. There is a 6-day 48-hour working week.

Commerce. Foreign trade, formerly conducted exclusively through national corporations under the Ministry of Foreign Trade, is now being decentralized. Trade authorities are being established in the main cities, to date Beijing (Peking), Shanghai and Tianjin, and in selected provinces, to date Guangdong and Fujian. The quasi-governmental China International Trust and Investment Corporation also handles foreign trade. Duty-free zones have been set up in the latter. Foreign firms pay a profits tax of 15%. In 1978 China reversed its policy of not accepting foreign credit and aid. A law of July 1979 permits the establishment of joint ventures with foreign firms. There is no maximum limit on the foreign share of the holdings; the minimum limit is 25%. Foreign indebtedness was about £1,400m. in 1980.

Imports include grain, raw materials and semi-manufactured products for agriculture (primarily chemical fertilizers), light industry and textiles, advanced equipment,

particularly whole plants and consumer goods. Exports include heavy industrial goods including petroleum, chemicals, minerals, machinery and equipment, light industrial goods and agricultural products.

Trade in 1979: Imports, 24,300m. yuan; exports, 21,200m. yuan.

Some 85% of China's trade is with non-Communist countries. Japan is China's biggest trading partner, and an 8-year trade agreement was signed in Feb. 1978 and extended for 5 years in March 1979. Other major trading partners are Hong Kong, Federal Republic of Germany, USA and Australia. Imports from USA totalled US\$1,720m. in 1979; exports to USA were US\$551m. Customs duties on imports and exports between Taiwan and the mainland were abolished in April 1980. Trade with USA is increasing rapidly.

Total trade between China and UK (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	86,995	104,388	110,624	137,891	153,433
Exports and re-exports from UK	68,216	62,316	91,093	213,039	169,500

In April 1978 a most-favoured-nation agreement was signed with EEC, and in 1980 the EEC extended preferential tariffs to China.

On 15 Nov. 1978 a science and technology agreement was signed by UK and China and on 4 March 1979 an agreement on economic co-operation. In July 1979 the USA and China signed a 3-year trade agreement which accords China most-favoured-nation status from 1980.

On 17 April 1980 China gained representation in the IMF, and on 15 May 1980 in the IBRD.

COMMUNICATIONS

Roads. In 1978, 35,000 km of new highway were completed, bringing the total road length to 890,000 km. 83% of communes could be reached by road in 1976. Highways are well graded but mostly unmetalled. In 1969 there were some 409,000 lorries, 60,000 cars and 30,000 buses.

In 1978, 27,900m. tonne-km of freight were transported by road.

Railways. Chinese railway history begins in 1876, when the Wusong-Shanghai line was opened. In 1976 there were some 48,000 km of railway.

The principal railways are:

(1) The great north-south trunk lines: (a) Peking-Canton Railway (over 2,300 km), *via* Zhengzhou-Wuhan-Zhuzhou-Hengyang.

(b) Tianjin-Shanghai Railway (1,500 km), *via* Pukow and Nanjing (double-tracked in July 1976).

(c) Baoji-Chongqing Railway, *via* Chengdu (1,174 km). Chongqing with the east-west route from Hengyang to the Vietnam border, and to Kunming, connecting there with the Yunnan Railway to the Vietnam border. Two further lines connect Baoji.

(2) Great east-west trunk lines: (a) Longhai Railway; Lianyungang-Xuzhou-Zhengzhou (on the Peking-Canton line) Xian-Baoji-Tianshui-Lanzhou (1,500 km). The Baoji-Lanzhou section was upgraded in 1978. (b) Lanzhou-Xinjiang Railway: Lanzhou-Yumen-Hami-Turfan-Urumqi (1,800 km); (c) Shanghai-Youyiguan (Vietnam border) *via* Hangzhou, Nanchang, Hengyang (on the Peking-Canton line), Guilin, Liuzhou and Nanning. (d) Peking-Lanzhou *via* Xining (from which a branch connects with the lines through Mongolia to the Trans-Siberian Railway), Dadong (from which a branch serves the province of Shanxi), Baotou and Yinchuan (Ningxia). (e) Zhuzhou-Guiyang (632 km). A new east-west line was opened in 1978 between Xiangfan and Chongqing.

Branches link coastal areas (e.g., Fujian province) and smaller inland centres with the main parts of the system. Surveys have been made for a new 500-km railway, linking the trunk line with the oilfield of Karamai in Xinjiang.

(3) The Manchurian system: (a) Chinese Eastern (Changchun) Railway (2,370 km), from Manzhouli on the Soviet border through northern Inner Mongolia and Manchuria *via* Qiqihar, Harbin and Mudanjiang to the Soviet border near Vladivostok. (b) South Manchuria Railway (705 km, 1,120 km with branches), Changchun-

Shenyang-Luda. (c) Peking-Shenyang Railway, with branches in Manchuria (854 km, 1,350 km with branches).

Branches give connexions with outlying parts of Manchuria and Inner Mongolia as well as international links with Korean railways. Chinese railways are all constructed to the standard gauge except for some 600 km of metre gauge in Yunnan. Trunk routes are being converted from single to double track. The route between Baoji and Chengdu (676 km) was electrified in 1975 and that between Yangpingguan (on the Baoji-Chengdu route) and Ankang in 1977.

Capacity is being expanded under the 1976-85 development plan: 6 new lines are to be built by 1985. Lines are planned to link Tibet with the Chinese network and to bridge gaps in the system such as Liuzhou-Canton, Kantang-Taiyuan and southern Xinjiang.

In 1978 the railways carried 1,070m. tons of freight.

Aviation. The Civil Aviation Administration of China (CAAC) flies routes to Pyongyang, Hanoi, Rangoon, Karachi, Tōkyō, Moscow, Teheran, Addis Ababa, Bucharest, Belgrade, Zürich, Paris, Frankfurt, Manila, New York, San Francisco, London and Hong Kong. It also provides services to Hong Kong. Its inventory includes 3 Boeing 747s, 10 Boeing 707s, 16 Tridents and 5 Il-62s. British Airways have a direct flight London-Beijing. Japan Airlines have a route from Tōkyō to Beijing (via Osaka and Shanghai). Air France Paris to Beijing (via Athens and Karachi). Pakistan Airlines Karachi to Beijing. Aeroflot Moscow to Beijing. Ethiopian Airlines Addis Ababa to Shanghai. Tarom (Romania) Bucharest to Beijing. Swissair Geneva to Peking and Shanghai. Iran Air Paris to Peking and PANAM Peking via Tōkyō.

In 1979 there were 160 internal routes with over 500 weekly flights.

Air services agreements have been signed with Bangladesh, Canada, the Federal Republic of Germany, Greece, Iraq, Italy, Japan, Laos, Nepal, the Netherlands, the Philippines, Spain, Sweden, Thailand, UK and USA.

Shipping. At the beginning of 1977 the ocean-going merchant fleet consisted of 400-450 vessels with a total DWT of 6.8m.

The major ports are at Tianjin, Shanghai, Qingdao, Luda and Canton. New ports are under construction at Changchiang, Huangpu, Qinhuangdao, Yantai and Lienyunkang. Ports cannot accommodate vessels over 100,000 GRT and most harbours have a draught limitation of 35 ft. 213m. tonnes of cargo was handled in 1979.

Inland waterways total about 136,000 km. Plans were announced in 1978 for a national transport waterway network.

Pipeline. A pipeline links the Daqing oilfield to the port of Luda and to refineries in Peking. There is a pipeline from Lanzhou to Lhasa.

Post and Broadcasting. Number of post offices of all kinds in 1958 was 67,000. The use of *Pinyin* transcription of place names has been requested for mail to addresses in China (e.g., 'Beijing' not 'Peking'; 'Tianjin' not 'Tientsin'; 'Guangzhou' not 'Canton', etc.).

In 1979 there were 99 radio broadcasting stations. In 1964 there were some 7m. radio receivers. In 1979 there were 38 television stations and in 1978 over 1m. TV receivers. Most are communally owned.

Cinemas. Cinemas numbered 1,386 in 1958.

Newspapers. In 1978 newspaper production totalled 13,080m. copies, and journals, 1,180m. copies. The Party newspaper is *Renmin Ribao* (People's Daily). In 1979 it had a daily circulation of 7m.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Six new codes of law (including criminal and electoral) came into force in Jan. 1980, which, it is claimed, will regularize the legal unorthodoxy of recent years. The new codes specify a process of repentance as a precondition for a possible reduction of sentence. There is no provision for *habeas corpus*. The death penalty is prescribed for murder and treason. Courts will no longer be subject to the intervention of other state bodies, and their decisions will be reversible only by higher courts. 'People's courts' are divided into some 30 higher, 200 intermediate and 2,000

basic-level courts, and headed by the Supreme People's Court. The latter tries cases, hears appeals, and supervises the people's courts. The Ministry of Justice, abolished in 1959, was re-established in 1979.

People's courts are composed of a president, vice-presidents, judges and 'people's assessors' who are the equivalent of jurors. 'People's conciliation committees' are charged with settling minor disputes.

There are also special military courts.

Procuratorial powers and functions are exercised by the Supreme People's Procuracy and local procuracies.

Religion. Confucianism, Buddhism and Taoism have long been practised. Confucianism has no ecclesiastical organization and appears rather as a philosophy of ethics and government. Taoism—of Chinese origin—copied Buddhist ceremonial soon after the arrival of Buddhism two millennia ago. Buddhism in return adopted many Taoist beliefs and practices. It is no longer possible to estimate the number of adherents to these faiths. A more tolerant attitude towards religion had emerged by 1979, and the Government's Bureau of Religious Affairs was reactivated.

Ceremonies of reverence to ancestors have been observed by the whole population regardless of philosophical or religious beliefs.

Moslems are found in every province of China, being most numerous in the Ningxia-Hui Autonomous Region, Yunnan, Shaanxi, Gansu, Hebei, Honan, Shandong, Sichuan, Xinjiang and Shanxi. They totalled 10m. in 1980.

Roman Catholicism has had a footing in China for more than 3 centuries. In 1979 there were about 2m. Catholics who are members of the Patriotic Catholic Association, which declared its independence of Rome in 1958, and about 1,000 priests. In 1977 there were 78 bishops and 4 apostolic administrators, not all of whom were permitted to undertake religious activity. This figure included 46 'democratically elected' bishops not recognized by the Vatican. A Catholic bishop of Peking was consecrated in Dec. 1979 without the consent of the Vatican.

Protestants are members of the All-China Conference of Protestant Churches.

Education. During the Cultural Revolution and the 'Gang of Four' period the educational system was in a turmoil of radical reformation involving a reduction in the length of courses at all levels, the substitution of class background for academic achievement as a criterion for entry to higher education, a heavy emphasis on political education, and lengthy periods of manual labour sandwiched between courses. 1977 marked the beginning of a return to a more conventional system, and by 1978 3 out of every 4 children were attending school. University entry now normally follows from secondary schooling and is dependent upon entrance examinations in which political reliability tests are accompanied by tests in academic subjects. Obligatory manual labour has been reduced to 1 month per year. In 1978 a system of 'key' schools for the best-performing pupils was set up, and it was announced that new universities and colleges would be established. It was also announced that several thousand students would be sent to Western universities. In 1979 there were 633 universities and institutes of higher education, with some 1.02m. students. In 1979 there were some 146m. pupils in 1m. primary schools, and 65m. pupils in 200,000 secondary schools.

The Academy of Sciences had in 1964 some 20 provincial branches.

TAIWAN

Capital: Taipei

Population: 17.48m. (1979)

GNP per capita: US\$400 (1978)

Republic of China

HISTORY. The island of Taiwan (Formosa) was ceded to Japan by China by the Treaty of Shimonoseki on 8 May 1895. After the Second World War the island surrendered to Gen. Chiang Kai-shek in Sept. 1945 and was placed under Chinese administration on 25 Oct. 1945. USA broke off diplomatic relations with Taiwan on 1 Jan. 1979 on establishing diplomatic relations with the Peking Government. Relations between the USA and Taiwan are maintained through the American Institute on Taiwan and the Taiwan Institute for North American Affairs, set up in 1978 and accorded diplomatic status in Oct. 1980.

AREA AND POPULATION. Taiwan lies between the East and South China Seas off the coast of Fukien province. The total area of Taiwan Island and the Penghu Archipelago is 13,895 sq. miles (35,989 sq km). Population (1979), 17.48m. (9.13m. males, 8.35m. females), of whom some 2m. are mainland Chinese who came with the Nationalist Government. There are also some 260,000 aboriginals. Population density: 485.68 per sq. km.

In 1979, birth rate was 2.44‰; death rate, 0.47‰; rate of growth, 1.97‰ per annum.

Taiwan is divided into a special municipality (Taipei, the capital, population 2.16m. in 1979), 4 municipalities (Kaohsiung, Keelung, Taichung, Tainan) and 16 counties (*hsien*): Changhua, Chiayi, Hsinchu, Hualien, Ilan, Kaohsiung,

Miaoli, Nantou, Penghu, Pingtung, Taichung, Tainan, Taipei, Taitung, Taoyuan, Yunlin.

CONSTITUTION AND GOVERNMENT. Taiwan is controlled by the remnants of the Nationalist Government. On 1 March 1950, Chiang Kai-shek resumed the presidency of the 'Republic of China', and was re-elected for his fifth 6-year presidential term in March 1972. He died 5 April 1975 and was succeeded by Dr Yen Chia-kan who was replaced in the presidential elections of 21 March 1978 by Chiang Kai-shek's eldest son Chiang Ching-kuo. There are 3 political parties: the ruling Kuomintang (1.5m. members in 1976), which has a youth movement (China Youth Corps) of over 1m. members, the Young China Party and the China Democratic Socialist Party.

The National Assembly was elected in 1947. In 1978 it had 1,221 delegates. The National Assembly operates through 5 *yuan* or councils. The highest administrative organ is the Executive Yuan, headed by the premier, which includes a number of ministers. The highest legislative body is the Legislative Yuan, elected in 1948, which at the end of 1978 numbered 386 members. The National Assembly, Legislative Yuan and Control Yuan are elected bodies. Their terms of office have been extended indefinitely. As the number of original delegates dwindled, regulations introduced in 1966 and 1972 provided for the election of additional members to the National Assembly and Legislative Yuan, and elections were held in 1969, 1972 and 1975. Elections scheduled for Dec. 1978 were postponed in the wake of the US termination of diplomatic relations. Until Dec. 1980. The Kuomintang won 120 seats and independents, 26. There is also a Provincial Assembly of which the current Sixth Assembly with 77 members was elected on 19 Nov. 1977.

A political campaign by the journal *Mei-li Tao* and the Presbyterians calling on the Kuomintang to abandon its claim to represent all China and hold representative elections resulted in the sentencing of the prime movers at a court-martial in March 1980.

State emblem: A 12-pointed white sun in a blue sky.

National flag: Red with a blue first quarter bearing the state emblem in white.

National anthem: 'San Min Chu I', words by Dr Sun Yat-sen; tune by Cheng Mao-yun.

Prime Minister: Y. S. Sun.

Vice-Premier: Hsu Ching-chung. *Foreign Minister:* Shen Chang-huan. *Minister of National Defence:* Gen. Kao Kuei-yuan. *Minister of the Interior:* Chiu Chang-huan. *Minister of Finance:* Philip C. C. Chang. *Governor of Taiwan:* Lin Yang-kan.

DEFENCE. Army. The Army, which embodies the remnants of the forces which escaped to Taiwan with Chiang Kai-shek at the end of the civil war in 1949, numbered about 310,000 in 1980. It was reorganized, re-equipped and trained by the USA and now consists of 2 armoured, 12 infantry, 6 light infantry divisions, 2 armoured cavalry regiments and 2 airborne brigades. There is a conscription system for 2 years and reserve liability. Strong garrisons (about 80,000 men) are maintained on the Pescadores and the offshore islands of Quemoy and Matsu. US supplies of military equipment were resumed in 1980 after a moratorium in 1979. US forces were withdrawn by 1 May 1979.

Navy. Most of the 200 vessels in naval service are former US Navy ships now well over 30 years old and overdue for replacement. There are 2 diesel powered patrol submarines, 22 destroyers, 11 frigates, 3 escort vessels, 2 fast missile craft, 14 coastal minesweepers, 1 coastal minelayer, 8 minesweeping boats, 9 torpedo boats, 14 coastal patrol craft, 2 dock landing ships, 1 amphibious flagship, 27 landing ships, 22 landing craft, 2 repair ships, 4 surveying ships, 12 support ships, 2 transports, 7 oilers, 1 supply ship, 10 tugs, 5 floating docks and 25 service craft.

There are also 7 coastguard cutters (customs).

Active personnel in 1981 exceeded 7,100 naval officers and 28,000 ratings; 3,000 marine officers and 26,000 men.

The Navy has 12 anti-submarine torpedo helicopters and operational control of 2

squadrons of Air Force anti-submarine warfare Tracker aircraft; and the Marine Corps operates a number of observation aircraft and helicopters.

Air Force. The Nationalist Air Force is equipped mainly with aircraft of US design, including F-5E fighters built in Taiwan. It has 15 squadrons of F-104G Starfighters, F-5A B E supersonic fighter-bombers, and F-100 Super Sabre fighter-bombers, and 1 tactical reconnaissance squadron of RF-104G Starfighters. The transport squadrons are equipped with about 30 C-119Gs and 10 C-123 Providers. There is a naval co-operation squadron with S-2A Trackers. Search and rescue units operate Albattross amphibians and Iroquois helicopters, and there are other helicopter and large training elements. Total strength in 1980: 67,000 personnel and 385 combat aircraft.

INTERNATIONAL RELATIONS. By a treaty of 1 Dec. 1954 the USA was pledged to protect Taiwan, but this treaty lapsed 1 year after the USA established diplomatic relations with the People's Republic of China on 1 Jan. 1979. In April 1979 the US Congress approved a law to maintain privileged relations between USA and Taiwan.

The People's Republic took over the China seat in the UN from the Nationalists on 25 Oct. 1971.

ECONOMY

Planning. Taiwan is predominantly agricultural. Government policy is to 'develop industry through agriculture and expand agriculture through industry'. Regional planning was carried out through a series of 4-year plans, of which the sixth (1973-76) was terminated in 1975 because of difficulties arising from the international economic situation. The current 6-year programme (1976-81) envisages a GNP annual growth rate of 8.5% (growth in 1979, 8.03%). Emphasis is on heavy industry; there is some restriction of private spending.

Budget. The financial year ends 30 June. There are 2 budgets, the national together with a special defence budget (partly secret) and the provincial (*i.e.*, for Taiwan proper). For 1978-79 revenue was NT\$275,106m. (including NT\$199,345m. from taxation) and expenditure, NT\$243,722m. (including NT\$95,354m. on administration and defence, NT\$41,828m. on education and research and NT\$29,707m. on social affairs relief).

Currency. In 1945 the existing currency was converted into notes of the Bank of Taiwan. Taiwan dollars were linked to Chinese national currency at a fixed rate of exchange. When the Gold Yuan entered upon its last phase in early 1949, the Taiwan currency was detached and linked to the US\$. Exchange rates (March 1980): £1 = NT\$78.50; US\$1 = NT\$36.

Banking. The Central Bank of China (reactivated in 1961) regulates the money market, manages foreign exchange and issues currency. The former Bank of China, a foreign exchange bank with branches in New York, Chicago, Tōkyō, Osaka, Panama and Bangkok, was reorganized in 1972 as a private bank for export financing and renamed the China International Commercial Bank (capital NT\$1,000m.).

República de Colombia

HISTORY. The Vice-royalty of New Granada gained its independence of Spain in 1819, and was officially constituted 17 Dec. 1819, together with the present territories of Panama, Venezuela and Ecuador, as the state of 'Greater Colombia', which continued for about 12 years. It then split up into Venezuela, Ecuador and the republic of New Granada in 1830. The constitution of 22 May 1858 changed New Granada into a confederation of 8 states, under the name of Confederación Granadina. Under the constitution of 8 May 1863 the country was renamed 'Estados Unidos de Colombia', which were 9 in number. The revolution of 1885 led the National Council of Bogotá, composed of 2 delegates from each state, to promulgate the constitution of 5 Aug. 1886, forming the Republic of Colombia, which abolished the sovereignty of the states, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances. A decree of May 1928 abolished their right to borrow abroad without the sanction of the central government.

AREA AND POPULATION. Colombia is bounded north by the Caribbean sea, north-west by Panama, west by the Pacific ocean, south-west by Ecuador and Peru, north-east by Venezuela and south-east by Brazil. The estimated area of the republic as given to the United Nations is 1,138,914 sq. km (456,535 sq. miles). It lies between lat. 12° 30' N. and 4° 30' S., and between long. 67° and 79° W. of Greenwich. It has a coastline of about 2,900 km, of which 1,600 km are on the Caribbean sea and 1,300 km on the Pacific ocean. The area 1,138,914 sq. km (as estimated by the census bureau) and population 26.5m. according to the estimate of 24 Oct. 1978, were as follows:

CONSTITUTION AND GOVERNMENT. The legislative power rests with a Congress of 2 houses, the Senate, of 112 members, and the House of Representatives, of 199 members, both elected for 4 years. In 1968 a congressional committee unanimously approved a constitutional amendment providing for progressive reductions in the membership of Congress to 90 senators and 162 representatives by 1974. Congress meets annually at Bogotá on 20 July. Women were given the vote, which is now open to citizens of either sex, over 18 years of age, on 25 Aug. 1954.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards. Congress elects, for a term of 2 years, one substitute to occupy the presidency in the event of a vacancy during a presidential term. There are 13 Ministries. The Governors of Departments and the Mayor of Bogotá are nominated by the national government.

A National Economic Council, functioning since May 1935, went through several transformations, becoming in 1954 a Directorate of Planning.

DEFENCE. On 17 April 1952 Colombia signed the Military Assistance pact with the USA.

Army. Military service is compulsory between the years of 18 and 30. Service with the colours is for 1 year. From 30 to 45 years of age the citizens are on the reserved lists, classified in 1st, 2nd and 3rd classes, with the obligation of presenting

themselves on being called up. The permanent Army consists of 10 infantry and 1 training brigades, artillery, cavalry, engineer and motorized troops and the usual services. The peace effective is 53,000 men; reserves 500,000. Number of national police, about 50,000.

Colombia was the only Latin American country participating in the Korean war, with a regiment of 1,000 men (three times relieved).

Navy. Colombia has 2 new Federal German-built 1,200-ton diesel-electric powered patrol submarines, 4 Italian-built midget submarines; 2 destroyers completed in Sweden in 1958; 1 old (1944) *ex-US* destroyer; 2 old *ex-US* frigates (small DE and APD types); 3 old patrol vessels (*ex-US* fleet tugs); 4 river gunboats; 3 surveying vessels; 9 coastguard patrol vessels; 10 patrol motor launches; 1 oiler; 4 small transports, 1 training ship, 5 service craft, and 12 tugs. Personnel (1981), 700 officers and 6,500 men. The Navy has also a battalion of marines with 1,500 officers and men.

Air Force. Formed in 1922, the Air Force has been independent of the Army and Navy since 1943, when its reorganization began with US assistance. In 1980 it had about 275 aircraft, including a squadron of Mirage 5-COA fighter-bombers, 5-COR reconnaissance aircraft and 5-COD two-seat operational trainers; a squadron of 8 B-26 piston-engined bombers; a transport group equipped with 2 C-130s, 2 HS 748s, 4 Twin Otters, 19 C-47s, 5 C-54s and a small number of Arava, Otter, Beaver and Porter light transports; a presidential F-28 Fellowship jet transport; and a maritime reconnaissance and rescue unit with helicopters. Many of the transports are flown by the Air Force operated airline SATENA. Thirty Cessna T-41D primary trainer/light transports were delivered in 1968 and were followed by 10 T-37C jet advanced trainers to supplement piston-engined T-34s and T-33A armed jet trainers. Latest deliveries include 6 T-38A jet trainers for operation by the Military Air Academy. Total strength is about 3,800 personnel.

Its note issues must be covered by a reserve in gold of foreign exchange of 25% of their value.

There are 25 domestic commercial banks of importance and 5 foreign banks (English, Canadian, American, French and Franco-Italian); but a high percentage of all commercial bank deposits are with the 4 largest domestic banks, which have branches throughout the country. External debt (1979) US\$4,026m.

Weights and Measures. The metric system was introduced in 1857, but in ordinary commerce Spanish weights and measures are generally used; according to new definitions by the Ministry of Development, *e.g.*, *botella* (750 grammes), *galón* (5 *botellas*), *vara* (70 cm), *arroba* (25 lb., of 500 grammes; 4 *arrobas* = 1 quintal).

ENERGY AND NATURAL RESOURCES

Electricity. Capacity of electric power (1973) is 2,795,000 kw. Electric power produced in 1976, 13,717,170 kwh. There is increasing utilization of natural gas.

In Oct. 1954 the Department of Valle del Cauca established a local power corporation closely modelled on the Tennessee Valley Authority.

Oil. Petroleum production in 1977 was 50m. bbls (of 42 gallons) and 1976, 53.4m. bbls.

Minerals. Colombia is rich in minerals; gold is found chiefly in Antioquia and moderately in Cauca, Caldas, Tolima, Nariño and Chocó; output in 1979, 265,600 troy oz., highest in South America.

Other minerals are silver (99,300 troy oz. in 1979), copper, lead, mercury, manganese, emeralds and platinum (first discovered in Colombia in 1735 and the largest deposit in the world); production of platinum, 1977, 26,000 troy oz. The working of the government-controlled emerald mines has been resumed. The chief mines are those of Muzo and Chivor.

The Government holds the monopoly, which is leased to the Banco de la República, for extracting salts from the outstanding Zipaquirá mines (several hundred feet in depth and several hundred square miles in area) and for evaporating many sea salt pans; salt production in 1977 was 180,890 tons of land salt from the Zipaquirá mines and 435,542 tons of sea salt from Manaure and Galerazamba on the Caribe coast. Colombia's coal reserves are estimated at 4,100m. tonnes; production (1975) 10m. short tons.

Agriculture. Very little of the country is under cultivation, but much of the soil is fertile and is coming into use as roads improve. The range of climate and crops is extraordinary; the agricultural colleges have different courses for 'cold-climate farming' and 'warm-climate farming'. Some 6m. acres are described as arable, 96m. pasture and 148m. forest.

Colombia is the second largest producer of coffee and ranks first in the output of mild coffee, demand for which is unaffected by over-production in Brazil. Crops are grown by smallholders, and are picked all the year round. The rubber tree grows wild, and its cultivation has begun; output is a few hundred tons. Fibres are being exploited, notably the 'fique' fibre, which furnishes all the country's requirements for sacks and cordage; output about 12,000 tons. Tolú balsam is cultivated, and copaiba trees are tapped but are not cultivated. Tanning is an important industry. 12m. sq. ft of hides being exported in 1965.

COMOROS

Capital: Moroni

Population: 297,800 (1976)

GNP per capita: US\$180 (1978)

Etat Comorien

HISTORY. In the referendum held separately on each of the 4 islands on 22 Dec. 1974, 95.56% of the Comorans voted for independence, but the vote on Mayotte was 65% against independence. To avoid the expected separation of Mayotte, the Comoran Chamber of Deputies voted for an immediate unilateral declaration of independence on 6 July 1975. The next day it converted itself into the National Assembly and elected Ahmed Abdallah, President of the Executive Council since 26 Dec. 1972, as President of the new state. France retained responsibility for Mayotte, while the other 3 islands thus achieved *de facto* independence.

On 3 Aug. a *coup* mounted by the principal opposition parties, led by Ali Soilih, deposed President Abdallah. The following day a National Revolutionary Council, led by Prince Said Mohammad Jaffar, took office and abolished the National Assembly. On 10 Aug. the Revolutionary Council established a National Executive Council with Prince Said as its President. The four parties formed a coalition, the Front National Uni, which attempted unsuccessfully to persuade the Mayotte administration (the *Mouvement populaire mahouais*, led by Marcel Henry) to reunite with the other islands.

France recognized the independence of the 3 islands on 1 Jan. 1976. The next day the Executive Council and the Revolutionary Council elected Ali Soilih President.

The Revolutionary Council was superseded by a National Institutional Council to oversee the actions of the Government.

A new referendum was held on 8 Feb. 1976 on Mayotte, which resulted in a 99.4% vote for retaining the island's links with France. In another referendum on 11 April Mayotte voted against remaining an Overseas Territory of France, preferring to become an Overseas Department. France has promised to implement the electorate's wishes accordingly. The UN recognized the State of Comoro as representative of the whole group. (For history prior to independence see THE STATESMAN'S YEAR-BOOK, 1976-77, p. 849.) All statistics prior to 1977 include Mayotte.

AREA AND POPULATION. The Federal and Islamic Republic of the Comoros consists of 3 islands in the Indian ocean between the African mainland and Madagascar. The majority of the population throughout the islands speak Kiswahili, but a small proportion speak French or Arabic. On the 3 islands of the Comoro State, the majority of the population are Moslem, with about 2,000 Christians.

COSTA RICA

República de Costa Rica

Capital: San José

Population: 2.19m. (1979)

GNP per capita: US\$1,540 (1978)

HISTORY. The republic of Costa Rica (the 'Rich Coast') has been independent since 1821, although it formed, from 1824 to 1838, part of the Confederation of Central America.

AREA AND POPULATION. The area is estimated at 50,898 sq. km (19,652 sq. miles). The population at the census of 14 May 1973 was 1,871,780, compared with 800,875 shown in the 1950 census.

The area and official estimate of population for 1 July 1979 (2,192,410) was as follows:

<i>Province</i>	<i>Population</i>	<i>Area (sq. km)</i>	<i>Capital</i>	<i>Population</i>
San José	812,184	4,957.09	San José	250,079
Alajuela	378,580	9,718.10	Alajuela	38,630
Cartago	238,213	3,031.14	Cartago	25,345
Heredia	155,565	2,673.49	Heredia	26,863
Guanacaste	209,863	10,199.58	Liberia	20,408
Puntarenas	260,118	11,302.21	Puntarenas	32,028
Limón	137,887	9,218.39	Limón	48,415

Vital statistics for calendar years:

	<i>Marriages</i>	<i>Births</i>	<i>Deaths</i>
1975	14,683	58,140	9,685
1976	14,769	59,746	9,293
1977	15,422	63,519	8,907

Crude birth rate, 1976, was 29.7 per 1,000 population; crude death rate, 4.6; infantile death rate, 33.2 per 1,000 live births; crude marriage rate, 7.3 per 1,000 population. Males exceeded females by 14,200.

The population of European descent, many of them of pure Spanish blood, dwell mostly around the capital of the republic, San José, and in the principal towns of the provinces. Limón, on the Caribbean coast, and Puntarenas, on the Pacific coast, are the chief commercial ports. The United Fruit Co., who in 1941 abandoned their banana plantations on the Atlantic coast in favour of large new plantations on the Pacific coast, have constructed ports at Quepos and Golfito. The Standard Fruit Co. and others have cleared land since 1958 in the Atlantic coast area and now have 2,325 acres producing some 4.2m. stems a year. There are some 15,000 West Indians, mostly in Limón province. The indigenous Indian population is dwindling and is now estimated at 1,200.

Spanish is the language of the country.

CONSTITUTION AND GOVERNMENT. The Constitution, promulgated on 7 Dec. 1871, has been modified very frequently, last in 1949. The Constitution forbids the establishment or maintenance of an army. The legislative power is normally vested in a single chamber called the Legislative Assembly, which since 1962 consists of 57 deputies, 1 for every 25,214 inhabitants, elected for 4 years. The President is elected for 4 years; the candidate receiving the largest vote, provided it is over 40% of the total, is declared elected, but a second ballot is required if no candidate gets 40% of the total. By the election law of 18 Jan. 1946 all citizens who are 20 years of age are entitled to vote; married men and teachers, from the age of 18. Women over 21 were enfranchised in 1949. Elections are normally held on the

first Sunday in February. Voting for President, Deputies and Municipal Councillors is secret and compulsory for all men under 70 years of age. Independent non-party candidates are barred from the ballot.

President: Rodrigo Carazo Odio, elected 5 Feb. 1978 and assumed office 8 May 1978.

Elections for the Legislative Assembly took place on 5 Feb. 1978: Opposition Party, 27; National Liberation Party, 25; People United, 3; Popular Front, 1; Cartago Agricultural Union, 1.

The administration is carried on by 13 ministers, appointed by the President. The powers of the President are limited by the constitution, which leaves him the power to appoint and remove at will members of his cabinet. All other public appointments are made jointly in the names of the President and of the minister in charge of the department concerned.

National flag: Five unequal stripes of blue, white, red, white, blue, with the national arms on a white disc near the hoist.

National anthem: Noble patria, tu hermosa bandera (words by J. M. Zeledón, 1903; tune by M. M. Gutiérrez, 1851).

DEFENCE

Army. The Army was abolished in 1948, and replaced by a Civil Guard reputed to be 5,000 strong. There has never been compulsory military service or training.

Navy. The republic has 1 fast patrol craft and 1 armed tug on the Atlantic coast and 5 small coastal patrol craft for revenue purposes and 3 smaller craft on the Pacific coast. Personnel (1981) 50 officers and men.

Air Wing. The Civil Guard operates a small air wing equipped with 3 Otter STOL utility transports, plus a few lightplanes and helicopters.

INTERNATIONAL RELATIONS

Membership. Costa Rica is a member of UN and OAS.

ECONOMY

Budget. The budget for 1980 balanced at 8,029m. colones. Of the 1980 total, 33% will be used for repayment of the public debt.

The income-tax law of 10 March 1972 raised the maximum rate to 50% for personal incomes of 350,000 colones and over, and to 40% for corporate incomes of 1m. colones and over.

Central government debt on 31 Dec. 1972 was 2,628m. colones. Debt service required 214.5m. colones in 1973.

Currency. The unit of currency is the *colone* (C). The official rate in March 1981 was C8.57 = US\$1; 18.75 = £1. The official rate is used for all imports on an essential list and by the Government and autonomous institutions and a free rate is for all other transactions.

The currency is chiefly notes. The Banco Central in 1951 printed and placed in circulation new notes for 5, 10, 20, 50, 100, 500 and 1,000 colones, replacing old notes previously issued by the Banco Nacional. Silver coins of 1 colone, 50 centimos and 25 centimos were in 1935 replaced by coins (2 and 1 colones and 50 and 25 centimos) made up of 3 parts copper and 1 part nickel, and given the same value as the subsidiary silver currency. There are copper coins (and chromium stainless steel coins) of 10 and 5 centimos.

Banking. By a law passed on 28 Jan. 1950 a Central Bank was established for the organization and direction of the national monetary system and of dealings in foreign exchange, the promotion of facilities for credit and the supervision of all banking operations in the country. The bank has a board of 7 directors appointed by the Government, including *ex officio* the Minister of Finance and the Planning Office Director. On 31 Dec. 1974 it had foreign exchange of US\$43.3m., compared with US\$61.2m. in Dec. 1973; circulating media on 31 Dec. 1969 totalled 992.7m. colones.

In June 1948 the 3 small commercial banks were compulsorily nationalized; they held deposits of 1,005.3m. colones at 31 Aug. 1970 (962.1m. at 31 Dec. 1970).

The National Insurance Institute (*Instituto Nacional de Seguros*) is a Government organization, created in 1924, which has a monopoly of new insurance business.

Weights and Measures. The metric system is legally established; but in the country districts the following old Spanish weights and measures are found: *libra* = 1.014 lb. avoirdupois; *arroba* = 25.35 lb. avoirdupois; *quintal* = 101.40 lb. avoirdupois, and *fanega* = 11 Imperial bushels.

ENERGY AND NATURAL RESOURCES

Electricity. Electricity, derived from water power in the highlands, is increasingly used as motive power. Output, 1975, was 1,263m. kwh.

Minerals. Gold output is about 3,000 troy oz. per year. Salt production from sea water is about 10,000 tonnes annually. Haematite ore was discovered on the Nicoya Peninsula late in 1960 and sulphur near San Carlos in 1966. The United Nations have offered US\$1m. towards a 3-year mining survey.

Agriculture. Agriculture is the principal industry. The cultivated area is about 1m. acres; grass lands cover 1.8m. acres; forests and woodlands, 9,855,000 acres. There are thousands of square miles of public lands that have never been cleared, on which can be found quantities of rosewood, cedar, mahogany and other cabinet woods. The principal agricultural products are coffee, bananas, sugar and cattle. Coffee normally accounts for about half the country's foreign-exchange earnings. Cocoa, maize, sugar, tobacco, rice and potatoes are commonly cultivated. The distillation of spirits is a government monopoly.

Coffee production in 1978-79 was 104,941.1 tonnes. Sugar production (1978-79) 2,307,041 tonnes.

Dairy-farming and cattle-raising are substantial pursuits. In 1979 cattle numbered 2.1m. and pigs 226,000.

Costa Rica is the seat of the Inter-American Institute of Agricultural Sciences, with headquarters at Turrialba.

INDUSTRY AND TRADE

Industry. A Ministry of Industry was formed in 1961, but industry is still on a small scale, though the Industrial Development and Protection Law of 1959 affords several facilities and advantages. Main manufactured goods are foodstuffs, textiles, fertilizers, pharmaceuticals, furniture, cement, tyres, canning, clothing, plastic goods, plywood and electrical equipment.

Industrial production was valued at 16.03m. colones in 1978, compared with 1.499m. in 1972.

Labour. As Costa Rica is still essentially an agricultural country, the organization of labour has made progress only in the larger centres of population, and even there it is not a strong movement. There are two main trade unions, *Rerum Novarum* (anti-Communist) and *Confederación General de Trabajadores Costarricenses* (Communist). It is estimated that they have under 10,000 members each. In addition there were (1963) 284 other trade unions and 34 employers' organizations.

Commerce. The value of imports into and exports from Costa Rica in 5 years was as follows in US\$ (8.60 colones = US\$1):

	1975	1976	1977	1978	1979
Imports	693,969,367	770,412,000	1,021,430,406	1,165,730,038	1,396,812,332
Exports	455,960,193	555,405,000	828,163,886	864,906,915	934,391,357

The value (in US\$1m.) of the principal imports in 1978 were: Machinery, including transport equipment, 359.2; manufactures, 381.8; chemicals, 189.6; fuel and mineral oils, 117.6; foodstuffs, 72.4.

Chief exports (in US\$1m.) in 1977 were: Manufactured goods and other products, 324.4; coffee, 307.4 (mostly to Federal Republic of Germany and USA); bananas, 169.9 (to USA); sugar, 15.9; cocoa, 15.6.

Total trade between Costa Rica and UK (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	496	1,378	1,801	3,123	5,424
Exports and re-exports from UK	8,614	10,647	11,799	9,752	8,302

Tourism. There was a total of 340,442 visitors in 1978.

COMMUNICATIONS

Roads. In 1978 there were about 26,993 km of all-weather motor roads open. On the Costa Rica section of the Inter-American Highway it is possible to motor to Panama during the dry season. The Pan-American Highway into Nicaragua is metalled for most of the way and there is now a good highway open almost to Puntarenas. Motor vehicles, 1978, numbered 179,941.

Railways. The nationalized railway system (*Ferrocarriles de Costa Rica*), totalling 785 km (228 km electrified) of 1,067 mm gauge, connect San José with Limón, the Atlantic port, and San José with Puntarenas, the Pacific port.

Aviation. Passenger movement in and out of Costa Rica is almost entirely by air via the local company, LACSA, PANAM and TACA. LACSA links San José by daily services with all the more important towns. The international airport at Juan Santamaría was opened in June 1955.

Shipping. In 1978, 1,473 ships entered and cleared the ports of the republic (Puerto Limón, Puntarenas and Golfito); combined cargo, 1,918,500 tonnes.

Post and Broadcasting. A telephone service covering (1978) 145,069 subscribers operates in and between San José and 6 other provincial centres; it has been transferred to a government *Instituto Costarricense de Electricidad*, which is installing a nationwide automatic system, and will eventually control all telecommunications.

The commercial wireless telegraph stations are operated by *Cia Radiográfica Internacional de Costa Rica*. The stations are located at Cartago, Limón, Puntarenas, Quepos and Golfito. The Government has 19 wireless telegraph stations in its local network. The principal or central station at San José also maintains international radio-telegraph circuits to Nicaragua, Honduras, San Salvador and Mexico. The Government has 202 telegraph offices and 88 official telephone stations. The official list of broadcasting stations shows 28 long-wave stations and 7 short-wave stations. Television was inaugurated in May 1960; there were 5 stations and 155,000 receivers in 1976.

Cinemas (1979). Cinemas numbered 106, with seating capacity of 105,000.

Newspapers (1979). There were 6 daily newspapers all published in San José.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the Supreme Court, 4 appeal courts and the Court of Cassation. There are also subordinate courts in the separate provinces and local justices throughout the republic. Capital punishment may not be inflicted.

Religion. Roman Catholicism is the religion of the State, which contributes to its maintenance but controls the Church Patronage and insists on lay instruction in history, economics and similar subjects; there is entire religious liberty under the constitution, but religious appeals are forbidden in current political discussions. The Archbishop of Costa Rica has 4 bishops at Alajuela, Limón, San Isidro el General and Tilarán.

Protestants number about 40,000.

Education. Costa Rica has a very low illiteracy rate. Elementary instruction is compulsory and free; secondary education (since 1949) is also free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1979 there were 3,361 public primary schools with 15,748 teachers and administrative staff and 379,925 enrolled pupils; there were 215 public and private secondary schools with 169,297 pupils. The University of Costa Rica, founded in San José in

1843, has 2,337 professors in 13 faculties and 38,629 students. A medical school was opened in 1961. The budget for 1971 provides Q250m. for public education. Since 1944 English has been taught in all secondary schools.

Social Welfare. The labour code of 1943 provides considerable protection for the workers, while a system of social insurance against sickness covering 756,347 workers in 1968, old age and death covering 68,949, is gradually being extended throughout the country.

República de Cuba

HISTORY. Cuba, except for the brief British occupancy in 1762–63, remained a Spanish possession from its discovery by Columbus in 1492 until 10 Dec. 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris, which ended the struggle of the Cubans against Spanish rule. Cuba thus became an independent republic, but the United States stipulated under the 'Platt Amendment' (abrogated by Roosevelt in 1934) that Cuba must enter into no treaty relations with a foreign power, which might endanger its independence. A convention which assembled on 5 Nov. 1900 adopted the first constitution of the republic on 21 Feb. 1901.

The revolutionary movement against the Batista dictatorship, led by Dr Fidel Castro, started on 26 July 1953 (now a national holiday). It achieved power on 1 Jan. 1959 when Batista fled the country.

An invasion force of émigrés and adventurers landed in Cuba on 17 April 1961; the main body was defeated at the Bay of Pigs (Las Villas province) and mopped up by 20 April.

The US Navy blockaded Cuba from 22 Oct. to 22 Nov. 1962.

AREA AND POPULATION. The island of Cuba forms the largest and most westerly of the Greater Antilles group and lies 135 miles south of the tip of Florida, USA. It has an area of 44,206 sq. miles (114,524 sq. km); the Isle of Youth (formerly Isle of Pines) has 1,180 sq. miles, and other islands about 1,350 sq. miles. Estimated population in 1978 was 9.73m.

	abdicated 1 Jan. 1959

President: Dr Fidel Castro Ruz became President of the Council of State on 3 Dec. 1976. He is also President of the Council of Ministers and First Secretary of the Cuban Communist Party. From Jan. 1980 he took overall charge of Defence, Interior, Health and Culture.

Dr Castro on 2 Dec. 1961 proclaimed 'a Marxist-Leninist programme adapted to the precise objective conditions existing in our country'. The provisional *Organizaciones Revolucionarias Integradas* (ORI) were established as an intermediate stage towards a single (communist) party, and gave way to the *Partido Unido de la Revolución Socialista* (PURS). This brought together the *Partido Socialista Popular*, *Movimiento de 26 Julio* and (Students') *Directorio Revolucionario*. The PURS in turn became (3 Oct. 1965) the *Partido Comunista de Cuba*. The Communist Party had been outlawed by Batista in 1954, but legally reinstated after the revolution.

National flag: 3 blue, 2 white stripes (horizontal); a white 5-pointed star in a red triangle at the hoist.

National anthem: Al combate corred bayameses (words and tune by P. Figueredo, 1868).

Local Government. The country is divided into 14 provinces and 169 municipalities. Local Government is the responsibility of the organizations of Peoples' Power. Elections were held in 1976 and 1979 for delegates to the provincial municipal assemblies and to the national assembly.

DEFENCE. The chief of the armed forces is *Comandante en Jefe* Fidel Castro, and his brother *Gen. de Ejército* Raúl Castro Ruz, First Vice-President of the Council of State and Minister of Defence.

On 13 Nov. 1963 conscription was introduced for all men between the ages of 17 and 45 (3 years); women of the 17-35 age groups may volunteer (for 2 years).

Army. The strength was 180,000 officers and men in 1980. Reserves are estimated at 90,000.

The Army is organized in 15 infantry brigades, 3 armoured brigades and 8 independent battalions. It has over 600 Russian-built tanks. Para-military forces total 18,000 and the People's Militia, 100,000.

Navy. The Navy consists of 2 *ex-Soviet* diesel-powered submarines, 26 missile boats, 14 patrol vessels, 18 torpedo boats, 10 fast gunboats, 3 inshore minesweepers, 12 motor launches, 14 coastguard vessels, 12 survey vessels, 7 landing craft and 10 service craft. The large majority of these 128 craft are former units of the Soviet Navy. Personnel in 1981 totalled 6,000 officers and ratings. Three old patrol frigates, 1 patrol escort (PCER), an ancient gunboat and 2 auxiliary coastguard cutters were operationally discarded in 1973 although one of the frigates still exists as a harbour hulk. The USA is still in possession of the Guantánamo naval base, but the Cuban Government refuses to accept the nominal rent of US\$5,000 per annum.

Air Force. The Air Force has been extensively re-equipped with aircraft supplied by USSR and in 1980 had a strength of some 16,000 officers and men and 200 combat aircraft. About 8 interceptor and 3 ground-attack squadrons fly MiG-23, MiG-21, MiG-19 and MiG-17 jet fighters. There is a squadron of An-26 twin-turboprop transports, some An-24 twin-turboprop transports, and about 30 Mi-8 and Mi-4 helicopters, Zlin 326 piston-engined trainers and MiG-15UTI and MiG-23U jet trainers. Many An-2M biplanes are operated by the Air Force, mainly on agricultural duties. Soviet-built surface-to-air ('Guideline' and 'Goa') and coastal defence and liaison ('Samlet') missiles are in service.

INTERNATIONAL RELATIONS

Membership. Cuba is a member of the UN and COMECON.

ECONOMY

Planning. The Cuban economy is now centrally planned. Since July 1972 Cuba has been a member of the Council for Mutual Economic Assistance (COMECON) and, since Jan. 1974, of the two COMECON international banks. Cuba has very large reserves of nickel and a guaranteed market in the USSR; output is currently some 36,000 tons per annum but it is to be increased to 60,000 tons after 1980. Sugar remains the mainstay of the economy. Investment in this and other agricultural sectors (rice, coffee, and dairy products) has recently been relatively high but output generally has failed to respond. Some items of food and clothing are rationed.

Budget. Revenue in 1980 was 7,584.3m. pesos and expenditure, 7,580.8m. pesos.

Currency. The Cuban *peso* has been tied to the French franc since early 1972. In March 1981, the sterling-peso rate was £1 = 1.68 *pesos*. The gold content is 0.888671 gramme of fine gold, thus 1 troy oz. of fine gold = 35 *pesos*. The law of 7 Nov. 1914, established that the monetary unit was a gold *peso* (equal to the US gold dollar) of 1.6718 grammes (1.5046 grammes fine) divided into 100 *centavos*. The old gold *pesos* and all US currency are no longer legal tender.

Copper-nickel coins of 40, 20, 5 and 1 *cent* are issued. Notes are for 100, 50, 20, 10, 5 and 1 *peso*.

Banking. On 23 Dec. 1948 the president signed the law creating a central bank (with capital of US\$10m.) and which began operating on 27 April 1950.

On 14 Oct. 1960 all banks were nationalized, except the Royal Bank of Canada and the Bank of Nova Scotia, which were bought out later. All banking is now carried out by the National Bank of Cuba, through its 250 agencies. In 1964, 1.6m. small savings accounts totalled US\$738m.

All insurance business was nationalized in Jan. 1964.

Weights and Measures. The metric system of weights and measures is legally compulsory, but the American and old Spanish systems are much used. The sugar industry uses the Spanish long ton (1.03 tonnes) and short ton (0.92 tonne). Cuba sugar sack = 329.59 lb. or 149.49 kg. Land is measured in *caballerias* (of 13.4 hectares or 33 acres).

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity 1979 was 2,052 mw. Production in 1979 was 8,084m. kwh.

Minerals. Iron ore abounds, with deposits estimated at 3,500m. tons, of which 90% were held as reserves by American steel interests but are now controlled by the Cuban Mining Institute; output (tonnes), wrought iron (1971), 111,107; steel (1979), 327,792.

Output of copper (1979) was 2,840 tonnes; refractory chrome (1979), 28,200 tonnes. Other minerals are nickel (1979: 32,324 tons nickel content), cobalt, silica and barytes. Gold and silver are also worked. Cuba has a small output of petroleum (1978: 6.4m. tonnes). Salt output from the solar evaporation of sea water was 122,487 tonnes in 1979.

All mineral resources were nationalized in 1960.

Agriculture. In May 1959 all land over 30 *caballerias* was nationalized and has since been turned into state farms. In Oct. 1963 private holdings were reduced to a maximum of 5 *caballerias* (approximately 67 hectares). By 1960, 764 co-operative farms had been formed, and by late 1966 almost 65% of farm land was state-owned; the balance being in private hands.

In 1979 the total cultivated land included state-owned, 3,398,200 hectares, and in the private sector, 475,400 hectares.

The staple products are tobacco and sugar, of which latter Cuba is the world's second largest producer; with its by-products it furnishes nearly 80% by value of the national exports. The 1979-80 crop (estimate) was 6.6m. tonnes. There are 150 mills, including 40 of the largest, which were taken over from US interests, and which represent 39% of total capacity. Coffee, cotton, maize, rice and potatoes are grown.

Production of other important crops in 1979 was (in tonnes): Tobacco, 30,000; rice, 500,000; maize, 95,000; coffee, 27,000.

Tobacco is grown mainly in the Vuelta-Abajo district, near Pinar del Río. Coffee is grown chiefly in the province of Oriente.

Output of henequén fibre in 1964 was 233,919 tons. A fast-growing fibre, *kenaf*, originally from India, soft in texture, is replacing jute for sacking; the tobacco industry uses *majagua*, another local fibre, while a third fibre, *yarey*, from palms is also used. 200,000 tonnes of potatoes were produced in 1978. A nitrate plant has been built at Nuevitas and a large British-built urea plant at Cienfuegos. The principal fruits exported are pineapples, citrus fruit, tomatoes and pimientos. A rice cultivation plan began in 1967 in the south of Havana province. Cultivation is highly mechanized and the area so far sown produces two crops a year.

Despite the devastation caused by hurricane Flora in Oct. 1963, citrus fruit production, 112,000 tons in 1964, was some 11.4% above 1963. In 1978 production was 280,000 tonnes.

In 1962, 2,105 *caballerias* were allocated to cotton; cotton produced, 1964, was 2,653 tons against 13,000 tons in 1962.

In 1979 the livestock included 1.85m. pigs; 847,000 horses; 356,000 sheep; 99,000 goats; 5.84m. head of cattle.

Forestry. Cuba has extensive forest lands. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins and oils. Cedar is used locally for cigar-boxes, and mahogany is exported. During the re-forestation campaign of 1959-60, 34,000 eucalyptus saplings were planted over 1,120 *caballerias*. Cedars, mahogany, *majagua*, teca, etc., are also being raised and planted out. In 1979 saplings planted included: Eucalyptus, 2,315; pine, 31,540; *majagua*, 4,060; mahogany, 2,269; cedar, 2,105; casuarina (1978), 10,610.

INDUSTRY AND TRADE

Industry. Production in 1979 was: Textiles, 150,467 sq. metres; cement, 2,612,800 tonnes; wheat flour, 169,524 tonnes; gasoline, 872,030 tonnes; 301,944 tyres; 193,089 tubes; shoes, 13,759,000 pairs; paint, 47,273 hectolitres; soft drinks, 1,379.2m. hectolitres; cigarettes, 17,379m.; fertilizers, 1,745,566 tonnes; cigars, 295,156,000.

Trade Unions. All workers have a right to join a trade union. The Workers' Central Union of Cuba, to which 23 unions are affiliated, had 2m. members in 1978.

Commerce. Imports and exports (including bullion and specie) for calendar years (in US\$1m.):

	1975	1976	1977	1978
Imports	3,883	4,066	4,188	4,687
Exports	3,677	3,573	3,537	4,346

Cuba's principal exports are sugar, minerals, tobacco and fish, which in 1974 were planned to furnish 86%, 6.4%, 2.7% and 2.3% respectively by value. The main imports from non-Communist countries are chemicals and engineering and electrical machinery and transport equipment.

Sugar accounts for approximately 80% of the exports. In 1973 over 2m. tons were sold in free world markets, the balance going mainly to Eastern Europe under long-term guaranteed price contracts. Tobacco, fish and nickel are the other major exports. Most trade is with Eastern Europe, particularly with the USSR which supplies approximately 50% of total Cuban imports.

Total trade between Cuba and UK (British Department of Trade returns, in £1,000 sterling):

	1975	1976	1977	1978	1979	1980
Imports to UK	6,318	25,602	9,732	7,960	14,970	26,208
Exports and re-exports from UK	36,977	42,925	27,455	27,625	36,112	35,272

COMMUNICATIONS

Roads. There are 31,204 km of highways open to traffic, including the Central Highway, traversing the island for 760 miles from Pinar del Río to Santiago. On 31 Dec. 1958 passenger automobiles numbered 143,828; hire cars, 29,710; coaches and buses, 4,306; lorries, 42,480; others, 12,987.

Railways. There were (1978) 5,325 km of public railway (mainly 1,435 mm gauge) owned by the National Railways (*Ferrocarriles Nacionales de Cuba*) formed on nationalization in 1960. In addition, the large sugar estates have 9,441 km of lines on 1,435, 914 and 760 mm gauges.

Aviation. The state airline CUBANA operates all internal services, and from Havana to Mexico City, Madrid, Berlin, Montreal, Prague, Tripoli and Baghdad, and also to Lima, Panama, Kingston, Bridgetown, Port of Spain, Georgetown. The other regular foreign services are Mexican, Spanish, Soviet, Czech, East German, Canadian and Angolan. In Dec. 1977 the first charter flights since 1960 started operating between USA and Cuba.

Shipping. The coastline is over 3,500 miles long and has many fine harbours. The merchant marine, in 1980, consisted of 66 sea-going vessels of over 825,000 DWT.

Post and Broadcasting. There are 3,545 miles of public and 8,902 miles of private telegraph wires. Cuba has 103 broadcasting stations and 2 television stations. Radio receiving sets, 1974, numbered 909,000; television sets, 300,000. The national telephone system (1978) had 321,054 instruments.

Cinemas (1972). There are 439 cinemas with seating capacity of 294,300.

Newspapers (1976). The government-controlled press includes 1 morning and 1 evening newspaper in Havana.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There is a Supreme Court in Havana and 7 courts of appeal (1 in each provincial capital and 1 in Holguín). The provinces are divided into judicial districts, with courts for civil and criminal actions, with municipal courts for minor offences. The civil code guaranteed aliens the same property and personal rights as are enjoyed by nationals.

The 1959 Agrarian Reform Law and the Urban Reform Law passed on 14 Oct. 1960 have placed certain restrictions on both. Revolutionary Summary Tribunals will have wide powers.

Religion. There is no state Church, though Roman Catholics predominate. There is a bishop of the American Episcopal Church in Havana; there are large congregations of Methodists in Havana and in the provinces. Protestants numbered 265,000 in 1962; they have been organized as the Cuban Council of Evangelical Churches.

Education. Education is compulsory (between the ages of 6 and 14) and free, and now available everywhere. The 1953 census showed that 22.8% of all those over 10 years of age were illiterate. It is claimed that the Year of Education (1961), in which higher-education students went out to all parts of the country, reduced this to 3.9%. In 1964 illiteracy was officially declared to have been completely eliminated.

In 1977 the 4 universities had 122,546 students and 9,934 teaching staff. There were (1977) 1,846,075 pupils and 82,250 teachers at primary schools; 642,624 pupils

The Camilo Cienfuegos school city in the Sierra Maestra was designed for 12,000 boys and 8,000 girls by 1970 (1965: 4,000, total). In 1974 the V. I. Lenin vocational school opened as a forerunner of 6 such schools.

There were (1978) about 40,000 students at the 4 universities.

Health (1964). There were 4,855 posts for doctors, 154 hospitals with 47,861 beds. The 1965 health budget was \$140.5m.

Free medical services are provided by the state polyclinics, though some doctors still have private practices. All serious tropical diseases are effectively kept under control, and virtually all children under the age of 15 have been vaccinated against poliomyelitis.

Kypriaki Dimokratia— Kıbrıs Cumhuriyeti

HISTORY. About the middle of the 2nd millennium B.C. Greek colonies were established in Cyprus and later it formed part of the Persian, Roman and Byzantine empires. In 1193 it became a Frankish kingdom, in 1489 a Venetian dependency and in 1571 was conquered by the Turks. They retained possession of it until its cession to England for administrative purposes under a convention concluded with the Sultan at Constantinople, 4 June 1878. On 5 Nov. 1914 the island was annexed by Great Britain and on 1 May 1925 given the status of a Crown Colony.

For the history of Cyprus from 1931 to 1958 see *THE STATESMAN'S YEAR-BOOK*, 1958, pp. 237–38, and 1959, p. 236.

On 1 April 1955 the Greek Cypriots embarked on a guerrilla struggle against the British. On 19 Feb. 1959, following discussions in Zürich between the Greek and Turkish Foreign Ministers, an agreement was signed in London by the Prime Ministers of Great Britain, Greece and Turkey, and by the representatives of the Greek Cypriots and Turkish Cypriots. This agreement was implemented on 16 Aug. 1960, when Cyprus became an independent republic. By treaties between the Republic of Cyprus, Great Britain, Greece and Turkey both Enosis and partition are precluded; and Britain retains sovereignty over the areas containing her military bases in the island.

When President Makarios proposed some incisive modifications of the Zürich–London agreements, violent clashes between Greek and Turkish Cypriots broke out on 22 Dec. 1963. First, a joint force of British, Greek and Turkish troops and later a UN peace force were sent to Cyprus. A UN mediator on 26 March 1965 submitted proposals for a settlement of the Cyprus problem. These were accepted by Greece and the Greek Cypriots, but rejected by Turkey; thereupon the mediator, Dr Galo Plaza (Ecuador), resigned. The UN General Assembly on 17 Dec. 1965 called upon all states to respect the sovereignty, unity, independence and territorial integrity of Cyprus and to refrain from any intervention.

In June 1968 representatives of the Greek and Turkish Cypriots started talks in Cyprus aimed at finding a solution to the Cyprus problem but without success.

On 15 July 1974 a *coup* was staged in Cyprus by the men of the Greek ruling junta, for the overthrow of President Makarios. The President left the island and the *coup* was short-lived. On 23 July power was handed over to the President of the House of Representatives, Glafcos Clerides, in accordance with the Constitution. He acted as President until the return of President Makarios on Dec. 7.

Turkey invaded the island on 20 July, eventually landing 40,000 troops supported with heavy armament and tanks. In two military operations 20–30 July and 14–16 Aug. the Turkish troops managed to occupy 40% of the northern part of Cyprus. As a result 200,000 Greek Cypriots fled to live as refugees in the south. The Cyprus crisis was raised in the UN and the General Assembly unanimously adopted resolutions calling for the withdrawal of all foreign troops from Cyprus and the return of refugees to their homes, but without result.

On 13 Feb. 1975 at a special joint meeting of the executive council and legislative assembly of the Autonomous Turkish Cypriot Administration a Turkish Cypriot Federated State was proclaimed. Rauf Denktash was appointed President and he declared that the state would not seek international recognition. The proclamation was denounced by President Makarios and the Greek Prime Minister but welcomed by the Turkish Prime Minister.

AREA AND POPULATION. The island lies in the eastern Mediterranean, about 50 miles off the south coast of Turkey and (at the nearest points) 65 miles off the coast of Syria. Area 3,572 sq. miles (9,251 sq. km); about 150 miles is greatest length from east to west, and about 60 miles is greatest breadth from north to south. Populations by religions:

Religion	1931	1946	1956	1960	1973
Greek Orthodox	276,573	361,199	416,986	441,656	498,511
Turkish Moslem	64,238	80,548	92,642	104,942	116,000
Others	7,148	8,367	19,251	26,968	17,267
Total	347,959	450,114	528,879	573,566	631,778

Population estimate (1979) 624,600, of which 82% are Greek Cypriot (Armenian, Maronite and Latin minorities included) and 18% Turkish Cypriot. Principal towns with populations (1978 estimate): Nicosia (the capital), 121,500 (Greek Cypriots); Limassol, 102,400; Famagusta, 39,400 (1975); Larnaca, 28,900.

As a result of the Turkish invasion and the occupation of part of Cyprus, 200,000 Greek Cypriots were displaced and forced to find refuge in the south of the island. The urban centres of Famagusta, Kyrenia and Morphou were completely evacuated.

Vital statistics. The birth rate per 1,000 population in 1978 was 19.3%; death rate, 8.4%; infantile mortality per 1,000 live births, 17.1%.

CONSTITUTION AND GOVERNMENT. The legislative power is exercised by the House of Representatives of 50 members, of whom 35 were elected by the Greek community and 15 by the Turkish community. As from Dec. 1963 the Turkish members have ceased to attend.

On 13 Dec. 1959 Archbishop Makarios was elected President of the Republic, having received 144,501 votes (against 71,753 cast for the candidate sponsored by the Left). Dr Fazil Kuchuk was elected Vice-President unopposed; he resigned on 4 Jan. 1964. On 13 Feb. 1975, Rauf Denktash the Turkish-Cypriot leader announced the formation of a Turkish-Cypriot state within a federal republic.

In the presidential elections of 25 Feb. 1968 Archbishop Makarios was re-elected President of the Republic, having received 220,911 votes (against 8,577 cast for the opposition candidate and 16,215 abstentions). When he died in Aug. 1977 Spyros Kyprianou became acting President and was proclaimed President on 31 Aug. 1977 and was elected for a 5-year term on 26 Jan. 1978.

Flag: White with a copper-coloured outline of the island with 2 green olive-branches beneath.

The elections held on 5 Sept. 1976 returned 19 Democratic Front, 9 Akel Party (Communists), 4 EDEK (Socialist Party), 3 Independent. The Turks have not participated in the proceedings of the House since Dec. 1963.

On 16 Feb. 1961 the House of Representatives decided by 41 to 9 votes to apply for membership of the Commonwealth. Cyprus was admitted on 13 March.

The President reshuffled the Council of Ministers in Sept. 1980:

Foreign Affairs: Nicos A. Rolandis. *Interior and Defence:* Christodoulos Veniamin. *Finance:* Afxentis Afxentiou. *Minister to the President:* Stelios Katsellis. *Commerce and Industry:* Constantinos Kittis. *Education:* Nicolaos Konomis. *Communications and Works:* George Hadjicostas. *Agriculture and Natural Resources:* Nicos Pattichis. *Labour and Social Insurance:* George Stavrinakis. *Health:* George Tombazos. *Justice:* Andreas Demetriades. *Deputy Minister of the Interior:* Petros Stylianou.

The Turkish-Cypriot Security Force consisted of about 4,500 men supported by some T-34 tanks.

INTERNATIONAL RELATIONS

Membership. Cyprus is a member of UN, the Commonwealth and the Council of Europe.

ECONOMY

Planning. Under the Emergency Action Plan of 1977-78 the Government invested about £C45m. in restoring and building up manufacturing, agriculture, housing, transport and communications. The resulting budget deficit was met mainly from external aid, foreign and domestic borrowing. Private sector investment at £C127m. met 130% of its required achievement. The Plan aimed at turning output towards foreign markets.

A third plan was launched in 1979 for 3 years; expenditure, 1979, £C34.8m. Agriculture and irrigation have been emphasized (expenditure, 1977-78, £C20.3m.; 1979 (planned) £C15.2m.).

Budget. Revenue and expenditure for calendar years (in £C):

The GDP of manufacturing industries in 1978 was estimated at £C70m.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Under the Constitution and other legislation in force the following judicial institutions are established: The Supreme Court of the Republic, the Assize Courts and District Courts.

The Supreme Court is composed of 5-7 judges (at present 7), one of whom is the President. The Supreme Court adjudicates exclusively and finally: on all constitutional and administrative law matters, including any recourse that any law or decision of the House of Representatives or the budget is discriminatory against either of the two Communities; on any conflict of competence between state organs, questions of unconstitutionality of any law or decisions on any question of interpretation of the Constitution in case of ambiguity, as well as recourses for annulment of administrative acts, decisions or omissions. The Supreme Court is the highest appellate court in the republic and has jurisdiction to hear and determine all appeals from any court. It has exclusive jurisdiction to issue orders in the nature of *habeas corpus*, *mandamus*, prohibition, *quo warranto* and *certiorari* and in admiralty and matrimonial matters.

There are 6 assize courts and 6 district courts, 1 for each district. The assize courts have unlimited criminal jurisdiction and power to order compensation up to £C800. The district courts exercise original civil and criminal jurisdiction, the extent of which varies with the composition of the Bench. In civil matters (other than those within the original jurisdiction of Supreme Court) a District Court composed of not less than 2 and not more than 3 judges has unlimited jurisdiction. A President or a Senior District Judge sitting alone has jurisdiction up to £C3,000, and a District Judge sitting alone up to £C1,000, and is also empowered to deal with any action for the recovery of possession of any immovable property, and certain other specified matters. In criminal matters the jurisdiction of a District Court is exercised by its members sitting singly and is of a summary character. A President, a Senior District Judge or a District Judge sitting alone has power to try any offence punishable with imprisonment up to 3 years, or with a fine up to £C500 or with both, and may order compensation up to £C500.

Religion. See Area and Population, p. 381.

Education. Until 31 March 1965 each community in Cyprus managed its own schooling through its respective Communal Chamber. Intercommunal education had been placed under the Minister of the Interior, assisted by a Board of Education for Intercommunal Schools, of which the Minister was the Chairman. In 1965 the Greek Communal Chamber was dissolved and a Ministry of Education was established to take its place. Intercommunal education has been placed under this Ministry.

Greek-Cypriot Education. Elementary education is compulsory and is provided free in 6 grades to children between 6 and 13 years of age. In some towns and large villages there are separate junior schools consisting of the first three grades. Apart from schools for the deaf and blind and the Lambousa School for juvenile offenders, there are also 7 schools for handicapped children. The Ministry runs 88 kindergartens for children from low-income families; most pre-primary education is privately run. There were 439 primary schools (including privately run institutions) with 54,309 pupils and 2,260 teachers in 1978-79.

Secondary education is free for the first 3 years and is fee-paying for the rest, although senior pupils can be wholly or partially exempt from payment. The secondary school is 6 years, 3 years at the gymnasium followed by 3 years at the lykeion. There were 3 types of lykeia: classical, science, economic. There are 5- to 6-year technical schools. In 1978-79 there were 91 secondary schools with 2,770 teachers and 48,886 pupils.

Post-secondary education is provided at the Pedagogical Academy, which organizes 3-year courses for the training of pre-primary and primary school teachers, and at the Higher Technical Institute, which provides 3-year courses for technicians in civil, electrical and mechanical engineering. There is also a 2-year Forestry College (administered by the Ministry of Agriculture), a Hotel and Catering Institute and a 3-year Nurses' School and 1-year School for Health Inspectors (Ministry of

Health). Adult education is conducted through youth centres in rural areas, foreign language institutes in the towns and private institutions offering courses in business administration and secretarial work.

In 1976-77, 12,275 students were studying in universities abroad, mainly in Greece and the UK.

Turkish-Cypriot Education. The Office of Education of the Turkish Community of Cyprus caters for some 18% of the island's population and (1976) administered 10 kindergartens, 167 elementary schools (16,014 pupils), 18 secondary schools (7,190 pupils), 6 technical schools (735 pupils) and 1 teacher-training college (13 students). There were 43 evening institutes for adult education.

Greek is the language of 80% of the population and Turkish of 18%. English is widely spoken. English and French are compulsory subjects in secondary schools. Illiteracy is largely confined to older people.

Social Security. The administration of the social-security services in Cyprus is in the hands of the Ministry of Labour and Social Insurance, with the Ministry of Health providing medical services through public clinics and hospitals on a means test, except medical treatment for employment accidents, which is given free to all insured employees and financed by the Social Insurance Scheme.

Social Insurance. The island's Social Insurance Scheme, which covers compulsorily both employees and self-employed persons, provides, in the case of employees, cash benefits for sickness, unemployment, maternity, marriage (females only), old-age, widowhood and death and cash benefits with free medical treatment for employment accidents and occupational diseases as well as for invalidity cases.

Annual Holiday Scheme. An Annual Holidays with Pay Law, introduced in 1967, provides for a minimum of 9 days paid leave to all workers in the island. The law is implemented by means of regular contributions by employers into a fund administered by Government. Employers offering more than 9 days' paid leave by collective agreement or otherwise may be exempted from paying contributions into the fund.

Termination of Employment Scheme. A Termination of Employment Law also enacted in 1967 provides for the establishment of a Redundancy Fund to which all employers contribute 0.5% of their pay-roll. The law provides for a minimum period of notice to employees, from 1 to 4 weeks according to length of service; for compensation on arbitrary dismissal; for redundancy payments.

Československá
Socialistická Republika

HISTORY. The Czechoslovak State came into existence on 28 Oct. 1918, when the Czech *Národní Výbor* (National Committee) took over the government of the Czech lands upon the dissolution of Austria-Hungary. Two days later the Slovak National Council manifested its desire to unite politically with the Czechs. On 14 Nov. 1918 the first Czechoslovak National Assembly declared the Czechoslovak State to be a republic with T. G. Masaryk as President (1918–35).

The Treaty of St Germain-en-Laye (1919) recognized the Czechoslovak Republic, consisting of the Czech lands (Bohemia, Moravia, part of Silesia) and Slovakia. To these lands were added as a trust the autonomous province of Subcarpathian Ruthenia.

This territory was broken up for the benefit of Germany, Poland and Hungary by the Munich agreement (29 Sept. 1938) between UK, France, Germany and Italy.

In March 1939 the German-sponsored Slovak government proclaimed Slovakia independent, and Germany incorporated the Czech lands into the Reich as the 'Protectorate of Bohemia and Moravia'. A government-in-exile, headed by Dr Beneš, was set up in London in July 1940.

Liberation by the Soviet Army and US Forces was completed by May 1945.

Territories taken by Germans, Poles and Hungarians were restored to Czechoslovak sovereignty. Subcarpathian Ruthenia was transferred to the USSR.

Elections were held in May 1946, at which the Communist Party obtained about 38% of the votes.

A coalition government under a Communist Prime Minister, Klement Gottwald, remained in power until 20 Feb. 1948, when 12 of the non-Communist ministers resigned in protest against infiltration of Communists into the police.

In Feb. a predominantly Communist government was formed by Gottwald. In May elections resulted in an 89% majority for the government and President Beneš resigned.

In the first months of 1968 mounting pressure for liberalization culminated in the overthrow of the Stalinist President and Party Secretary, Antonín Novotný, and his associates. Under a new leadership the Communist Party introduced in April 1968 an 'Action Programme' of far-reaching political and economic reforms.

Soviet pressure to abandon this programme was exerted between May and Aug. 1968, and finally, Warsaw Pact forces occupied Czechoslovakia on 21 Aug. The enforced Moscow agreement of 26 Aug. bound the Czechoslovak government to a policy of 'normalization' (*i.e.*, abandonment of most reforms) and to the stationing of Soviet forces on Czechoslovak soil. This situation was confirmed by the Czechoslovak-Soviet 'Status of Forces Agreement' of 16 Oct. In 1969–1970 Soviet pressure led to extensive changes in the Party and Government. In Oct. 1969 Czechoslovakia repudiated its condemnation of the Warsaw Pact invasion.

A Czechoslovak-Soviet 20-year Treaty of Friendship, Co-operation and Mutual Assistance was signed in May 1970. Since 1977 a dissident civil rights movement 'Charter 77' has been active despite official efforts to suppress it.

On 11 Dec. 1973 the German Federal Republic and Czechoslovakia signed a treaty normalizing relations and annulling the Munich agreement of 1938. This was ratified by both countries' parliaments in July 1974.

CONSTITUTION AND GOVERNMENT. For details of previous constitutions, see THE STATESMAN'S YEAR-BOOK, 1968-69, pp. 927-28.

Since 1 Jan. 1969 Czechoslovakia has been a federal socialist republic consisting of two nations of equal rights: the Czech Socialist Republic (the Czech lands, previously Bohemia, Moravia and part of Silesia), and the Slovak Socialist Republic (Slovakia). Each Republic is governed by a National Council (the Czech with 200 deputies, the Slovak with 150), which delegates to an overall Federal Assembly responsibility for constitutional and foreign affairs, defence and important economic decisions. The Federal Assembly consists of the Chamber of Nations, which has 75 Czech and 75 Slovak delegates elected by their respective National Councils, and the Chamber of the People, which has 200 deputies elected by national suffrage.

The previous constitution (1960) remains in force where not specifically superseded, but since 1971 deputies are elected for a 5-year term so as to coincide with Communist Party congresses. Minimum age of voters is 18, of deputies, 21 years. At the elections of 22-23 Oct. 1976 a single list of National Front candidates was presented. Turnout was 10,617,152 from an electorate of 10,649,621 (99·7%). 99·97% of the votes were cast for the official candidates.

President of the Republic: Gustáv Husák (born 1913). *President of the Federal Assembly:* Alois Indra.

The *de facto* primary source of power is the Communist Party of Czechoslovakia, of which the Communist Party of Slovakia (*First Secretary*: Josef Lenárt) is a constituent part. Communists head the National Front, which incorporates the remaining political parties (Czechoslovak Socialist Party, People's Party) and the trade unions and youth organizations. The Communist Party had 1.5m. members in 1979 (45% workers, 27% women). In March 1981 the Presidium consisted of Gustáv Husák (*General Secretary*); Vasil Bil'ak; Peter Colotka (*Deputy Prime Minister*); Václav Hůla (*Deputy Prime Minister and Chairman, State Planning Committee*); Alois Indra; Antonín Kapek; Josef Kempný; Josef Korčák (*Deputy Prime Minister*); Josef Lenárt; Karel Hoffman (*Chairman, Central Council of Trade Unions*); Lubomír Štrougal (*Prime Minister*).

The security forces and frontier guards are organized in regiments and brigades respectively; total strength, 36,000.

The Warsaw Pact invasion of Aug. 1968 brought an estimated 500,000 occupation troops into the country. By early 1970 this number had been reduced to 80,000 Soviet troops, the presence of which is legalized by the Czech-Soviet 'Status of Forces' Agreement of Oct. 1968.

INTERNATIONAL RELATIONS

Membership. Czechoslovakia is a member of UN, COMECON and the Warsaw Pact.

ECONOMY

Planning. For the first five 5-year plans see THE STATESMAN'S YEAR-BOOK, 1978-79, p. 385. Economic reforms of the period 1965-68 were abandoned after the Soviet

intervention of 1968, and the economy reverted to the traditional communist centrally planned type. In 1978 and 1980 some rationalizations in the planning system, economic levers (profits, prices, wages) and organization of labour were applied.

The sixth 5-year plan for 1976–80 envisaged an increase of 32–34% in industrial, and of 14–15% in agricultural, production but these aims were not met. The 7th 5-year plan has reduced targets and covers 1981–5.

Budget. Budgets for calendar years (in Kčs. 1m.):

	1972	1973	1974	1975	1976	1977	1978
Revenue	223,503	242,258	263,755	278,113	292,165	280,786	286,267
Expenditure	216,569	237,200	259,185	273,774	290,071	278,301	283,912

Main items of the 1978 budget were (in Kčs. 1,000m.): Revenue: from the economy, 236; direct taxes, 37. Expenditure: national economy, 127; culture, health and social services, 130; defence, 21; administration, 6.

Currency. The monetary unit in the Czechoslovak Republic is the *koruna* (Kčs.) or crown of 100 *haler*. Notes in circulation: Kčs. 10, 20, 50, 100, 500. Coin: 5, 10, 20, 50 *halers*, and Kčs. 1, 2, 5. The *koruna* is based on a gold content of 0.123426 gramme of pure gold and pegged on the rouble at Kčs. 1.80 = R.1. The International Monetary Fund did not approve this change of the par value, and Czechoslovak membership was terminated in 1954, and ceased to be a member of the International Bank. The official rates of exchange are £1 = Kčs. 9.80; US\$1 = Kčs. 5.64; 1 Soviet rouble = Kčs. 8. Tourist rate: £1 = Kčs. 17.06.

It was announced in 1974 that the USA was to return gold seized by Germany (18.4 tonnes), and Czechoslovakia was to pay compensation for nationalized US property. However the Czechoslovak Federal Assembly refused to ratify this agreement. US moves in 1980 to sell the gold to obtain compensation for nationalized property were protested by the Czechoslovak government.

Banking. For previous banking history see THE STATESMAN'S YEAR-BOOK, 1971–72, pp. 858–59. The central bank and bank of issue is the State Bank (Státní Banka), which controls foreign exchange reserves, and is a savings bank and a commercial credit bank to enterprises, except foreign trade enterprises. These are financed by the Commercial Bank (Obchodní Banka) which carries out all foreign trade transactions. The Trade Bank (Živnostenská Banka) provides banking services for private foreign clients, and maintains branches abroad. There is also an Investment Bank (Investiční Banka), one of whose functions is to manage foreign securities. 'Foreign exchange points' (e.g., hotels) have partial foreign exchange authorization.

REIGNING QUEEN. *Margrethe II*, born 16 April 1940; married 10 June 1967 to Prince Henrik, born Count de Monpezat; *offspring:* Crown Prince Frederik, born 26 May 1968; Prince Joachim, born 7 June 1969. She succeeded to the throne on the death of her father, King Frederik IX, on 14 Jan. 1972.

Mother of the Queen: Queen Ingrid, born Princess of Sweden, 28 March 1910.

Sisters of the Queen: Princess Benedikte, born 29 April 1944 (married 3 Feb. 1968 to Prince Richard of Sayn-Wittgenstein-Berleburg); Princess Anne-Marie, born 30 Aug. 1946 (married 18 Sept. 1964 to King Constantine of Greece).

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male descendant of Swein Estridsen the Danish Diet elected to the throne Christian I, Count of Oldenburg, in whose family the royal dignity remained for more than 4 centuries, although the crown was not rendered hereditary by right till 1660. The direct male line of the house of Oldenburg became extinct with King Frederik VII on 15 Nov. 1863. In view of the death of the king, without direct heirs, the Great Powers signed a treaty at London on 8 May 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse-Cassel, niece of King Christian VIII of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction 31 July 1853. Linked to the constitution of 5 June 1953, a new law of succession, dated 27 March 1953, has come into force, which restricts the right of succession to the descendants of King Christian X and Queen Alexandrine, and admits the sovereign's daughters to the line of succession, ranking after the sovereign's sons.

Subjoined is a list of the kings of Denmark, with the dates of their accession, from the time of election of Christian I of Oldenburg:

CONSTITUTION AND GOVERNMENT. The present constitution of Denmark is founded upon the 'Grundlov' (charter) of 5 June 1953.

The legislative power lies with the Queen and the *Folketing* (Diet) jointly. The executive power is vested in the Queen, who exercises her authority through the ministers. The judicial power is with the courts. The Queen must be a member of the Evangelical-Lutheran Church, the official Church of the State. The Queen cannot assume major international obligations without the consent of the *Folketing*. The *Folketing* consists of one chamber. All men and women of Danish nationality of more than 18 years of age and permanently resident in Denmark possess the franchise and are eligible for election to the *Folketing*, which is at present composed of 179 members; 135 members are elected by the method of proportional representation in 17 districts. In order to attain an equal representation of the different parties, 40 *tillægsmandater* (additional seats) are divided among such parties which have not obtained sufficient returns at the district elections. Two members are elected for the Faroe Islands and 2 for Greenland. The term of the legislature is 4 years, but a general election may be called at any time.

The *Folketing* must meet every year on the first Tuesday in October. Besides its legislative functions, it appoints every 6 years judges who, together with the ordinary members of the Supreme Court (*Højesteret*), form the *Rigsret*, a tribunal which can alone try parliamentary impeachments. The ministers have free access to the House, but can vote only if they are members.

Folketing, elected 23 Oct. 1979: 68 Social Democrats, 10 Radical Liberals, 22 Conservatives, 11 Socialist People's Party, 6 Centre Democrats, 5 Christian People's Party, 22 Liberals, 6 Left Socialists, 20 Progress Party, 5 Single-Tax Party, 2 Faroe Islands and 2 Greenland representatives.

The executive (called the State Council (*Statsraadet*) when acting with the Queen presiding) is a minority Social Democratic government, was in March 1981 as follows:

Prime Minister: Anker Jørgensen.

Foreign Affairs: Kjeld Olesen. *Finance:* Svend Jakobsen. *Economy:* Ivar Nørgaard. *Industry:* Erling Jensen. *Ecclesiastical Affairs and Greenland:* Tova Lindbo Larsen. *Social Affairs:* Ritt Bjerregaard. *Agriculture:* Bjoern Roemar Westh. *Fisheries:* Karl Hjortnaes. *Transport and Communications:* Jens Risgaard Knudsen. *Education:* Dorte Bennedsen. *Culture and Nordic Affairs:* Lise Østergaard. *Defence:* Poul Søgaard. *Labour:* Svend Auken. *Housing:* Erling Olsen. *Inland Revenue:* Mogens Lykketoft. *Energy:* Poul Nielson. *Interior:* Henning Rasmussen. *Justice:* Ole Espersen. *Environment:* Erik Holst.

The ministers are individually and collectively responsible for their acts, and if impeached and found guilty, cannot be pardoned without the consent of the *Folketing*.

In 1948 a separate legislature (*Lagting*) and executive (*Landsstyre*) were established for the Faroe Islands, to deal with specified local matters and in 1979 a separate legislature (*Landsting*) and executive (*Landsstyre*) were established for Greenland, also to deal with specified local matters.

National flag: Red with white Scandinavian cross (Dannebrog).

National anthems: Kong Kristian stod ved højen Mast (words by J. Ewald, 1778; tune by J. E. Hartmann, 1780) and Der er et yndigt land.

Local Government. For administrative purposes Denmark is divided into 275 municipalities (*kommuner*); each of them has a district council of between 5 and 25 members, headed by an elected mayor. The city of Copenhagen forms a district by itself and is governed by a city council of 55 members, elected every 4 years, and an executive (*magistraten*), consisting of the chief burgomaster (*overborgmesteren*) and 6 burgomasters, appointed by the city council for 4 years. There are 14 counties (*amtskommuner*), each of which is administered by a county council (*amstråd*) of between 13 and 31 members, headed by an elected mayor. All councils are elected directly by universal suffrage and proportional representation for 4-year terms. A third council, the Metropolitan Council, with a constitution similar to the counties was established 1 April 1974. The Metropolitan Council is responsible for overall development within Metropolitan Copenhagen.

The counties and Copenhagen are superintended by a ministry of interior affairs. The municipalities are superintended by 14 local supervision committees, headed by a County Prefect (*amtmand*) who is a civil servant appointed by the Queen.

DEFENCE. The Danish military defence is organized in accordance with the Defence Act of 1969 (amended April 1973 and prolonged March 1977) and the overall organization of the Danish Armed Forces comprises the Defence Command, the Army, the Navy, the Air Force and inter-service authorities and institutions. To this should be added the Home Guard, which is an indispensable part of Danish military defence. The Home Guard is based on the Home Guard Act of 1961 (at the latest amended May 1973).

In accordance with the Defence Act the Chief of Defence has full command of the three services: the Army, the Navy and the Air Force. The Chief of Defence, the Chief of Defence Staff and the Chiefs of the Army, the Navy and the Air Force and their staffs, are integrated in the Defence Command.

The Minister of Defence is assisted by a Defence Council consisting of the Chief of Defence, the Chief of Defence Staff, the Chief of Danish Operational Forces, and the Chiefs of the Army, the Navy and the Air Force.

The Constitution of 1849 declared it the duty of every fit man to contribute to the national defence, and this provision is still in force. According to the Personnel Act, 1969 (amended April 1973), the military personnel comprises officers, n.c.o.s and privates. Private personnel are provided by enlistment and by recruiting of volunteers. Selection of conscripts takes place at the age of 19 years, and the conscripts are normally called up for 9 months service $\frac{1}{2}$ –1 $\frac{1}{2}$ years later. Afterwards conscripts may be recalled for refresher training or musters.

The covering force reserve numbers about 13,000 men and comprises a standing force, and a supplementary force consisting of men newly released from service. This force is part of the field army reserve which numbers 41,000. The standing force number about 21,000 men organized in standing brigade units, headquarters units and support units. The brigade units are organized in 5 mechanized infantry brigades. The field army is equipped with 200 medium battle tanks and about 650 armoured personnel carriers as well as artillery including 72 self-propelled howitzers. The local defence units consist of about 24,000 men organized in 21 infantry battalions and 7 artillery battalions. The men of the latest annual service groups form the troops of the line, while those of the previous years form the local defence, the reserve and the reserve for the Home Guard. The mobilization units of the field army and the local defence force will total about 65,000 men.

Navy. The Navy comprises the fleet and coast-defence which includes several permanent fortifications. The fleet includes 6 submarines, 5 frigates, 5 ocean escorts (for fishery protection and surveying duties), 2 corvettes, 10 fast missile craft, 6 fast torpedo boats, 4 ocean minelayers, 3 coastal minelayers, 8 coastal minesweepers, 2 torpedo recovery vessels, 23 patrol vessels, 8 coastal patrol launches, 2 oilers and the royal yacht. The Naval Air Arm comprises 8 helicopters (one is carried in each of the ocean escorts).

Air Force. The operational units of the Air Force comprise 2 surface-to-air missile battalions and 6 flying squadrons with a total of 116 aircraft.

The air defence force consists of the 2 surface-to-air missile battalions and 2 all-weather air-defence squadrons with a unit establishment of 20 CF-104G/F-104G Starfighters.

The fighter bomber force comprises 3 squadrons with a unit establishment of 20 F-100D F Super Sabres and F 35 Drakens, and 1 reconnaissance squadron with a unit establishment of 16 RF 35 Drakens. The F-100s are being replaced by F-16s in 1980-82.

In addition the Air Force has a number of supplementary units, including 1 transport squadron (C-130s and C-47s), 1 helicopter rescue squadron (S-61As), the control and warning system.

Total strength of the Air Force (1980) about 7,500, and the mobilization force about 8,600 men.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The lowest courts of justice are organized in 84 tribunals (*byretter*), where cases are dealt with by a single judge. The tribunals at Copenhagen have 32 judges, Aarhus 13, Odense 10, Aalborg 9, and the other tribunals have 1 to 4. Cases of greater consequence are dealt with by the superior courts (*Landsretterne*); these courts are also courts of appeal for the above-named cases. Of superior courts there are two: *Østre Landsret* in Copenhagen with 43 judges, *Vestre Landsret* in Viborg with 20 judges. From these an appeal lies to the Supreme Court (*Højesteret*) in Copenhagen, composed of 15 judges. Judges under 70 years of age can be removed only by judicial sentence.

In 1978, 10,953 men and 867 women were convicted of crimes and delicts, fines not included. On 31 Dec. 1979, 1,348 men and 33 women were in the state prisons.

Religion. At the Reformation in 1536 the Danish Church ceased to exist as a legally independent unit, a part of the Roman Catholic Church, and became instead a Lutheran Church under the direction of the State. Since that time the State has, in one form or another, continued to exercise supreme authority in the affairs of the Church, and has regulated these by the passing of laws, by royal decree, or other appropriate means. The great majority of Danish citizens (about 90%) belongs to the National Church. Administratively, Denmark is divided into 10 dioceses each with a Bishop who, within the framework of the law, is the supreme diocesan authority in ecclesiastical affairs. The Bishop together with the Chief Administrative Officer of the county make up the diocesan governing body, responsible for all matters of ecclesiastical local finance and general administration. Bishops are appointed by the Crown after an election at which the clergy and parish council members of the diocese have had the opportunity of voting for the candidates nominated. Each diocese is divided into a number of deaneries (about 107 in the whole country) each with its Dean and Deanery Committee, who have certain financial powers. Local government at parish level (there are about 2,200 parishes in all) is in the hands of Parish Councils, who are elected for a 4-year period of office.

Since the Constitution of 1849 complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

Education. Education has been compulsory since 1814. The *folkeskole* (public primary and lower secondary school) comprises a pre-school class (*bornehaveklassen*), a 9-year compulsory basic school and 1-year voluntary tenth form. Compulsory education may be fulfilled either through attending the public *folkeskole* or private schools or through home-instruction, the only requirement being that the instruction given should be comparable to that offered in the *folkeskole*. *Folkeskolen* are mainly municipal and no fees are paid. In the year 1977-78, 2,272 primary and lower secondary schools had 807,502 pupils and employed 55,428 teachers. 13% of the total number of schools were private schools and they were attended by 6% of the total number of pupils in the primary and lower secondary schools. The 9-year compulsory basic school is in practice not streamed. However, a certain differentiation may take place in the eighth and ninth form as well as in the voluntary tenth form.

Examination after finishing the primary and lower secondary school is voluntary. After the termination of the eighth and ninth form the pupils may sit for the leaving examination of the *folkeskole* (*folkeskolens afgangsprøve*). After the termination of the tenth form the pupils may sit for either the leaving examination of the *folkeskole* (*folkeskolens afgangsprøve*) or the extended leaving examination of the *folkeskole*.

Under certain conditions the pupils may continue their education either in a 3-year gymnasium ending with *studentereksamen* or in the 2-year higher preparatory school ending with the *højere forberedelseseksamen*. There were (1977-78) 126 of these upper secondary schools with 59,290 pupils and 5,556 teachers.

Social Security. The main body of Danish social welfare legislation is consolidated in 9 acts concerning (1) health insurance, (2) daily cash benefits, (3) disablement pensions, (4) old age pensions, (5) widows pensions, (6) employment injuries insurance, (7) employment services and unemployment insurance, (8) social assistance including assistance to handicapped, rehabilitation, child and juvenile guidance, care of the aged and sick, and (9) family allowances.

Health insurance, covering the entire population, provides free medical care, substantial subsidies for certain essential medicines together with some dental care and a funeral allowance. Hospitals are primarily municipal and the hospital treatment is normally free. Wage-earners are granted daily sickness allowances, others can have limited daily sickness allowances. Daily cash benefits are granted in the case of temporary incapacity for work because of illness, injury or childbirth to all persons who earn an income derived from personal work. The benefit is paid at the rate of 90% of the average weekly earnings. There is a maximum rate of 1,612 kroner a week.

Disablement and old-age pensions cover the entire population. Entitlement to benefits at the full rates is subject to the condition that the beneficiary has been ordinarily resident in Denmark for a number of years (40). For a shorter period of residence, the benefits are reduced proportionally. The basic amount of the old-age pension in 1979 was 46,248 kroner to married couples and 25,176 to single persons.

Various supplementary allowances, depending on age and income, may be payable with the basic amount. Persons over 67 years of age are entitled to the basic amount. The pensions to a married couple are calculated and paid to the husband and the wife separately. Invalidity pension is payable, having regard to the degree of disability, at a rate of up to 57,552 kroner to a single person. The rate of the widow's pension corresponds more or less to that of the old-age pension. Invalidity and widow's pensions may be subject to income regulation.

Employment injuries insurance provides for disablement or survivors' pensions and funeral allowances. The scheme covers practically all employees.

Employment services are provided by regional public employment agencies. The insurance against unemployment provides daily allowances. The unemployment insurance funds had at 1 June 1977 a membership of about 1,373,907 full-time workers.

The *Social Assistance Act* applies to the field of social legislation which rules the individually granted benefits in contrast to the other fields of social legislation which apply to fixed benefits.

Total social expenditure, including hospital and health services, amounted in the financial year 1977 to 67,901m. kroner.

DOMINICAN REPUBLIC

Capital: Santo Domingo
Population: 5·66m. (1978)
GNP per capita: US\$910 (1978)

República Dominicana

HISTORY. On 5 Dec. 1492 Columbus discovered the island of Santo Domingo, which he called La Española; for a time it was called Hispaniola. The city of Santo Domingo, founded by his brother, Bartholomew, in 1496, is the oldest city in the Americas. The western third of the island—now the Republic of Haiti—was later occupied and colonized by the French, to whom the Spanish colony of Santo Domingo was also ceded in 1795. In 1808 the Dominican population, under the command of Gen. Juan Sánchez Ramírez, routed an important French military force commanded by Gen. Ferrand, at the famous battle of Palo Hincado. This battle was the beginning of the end for French rule in Santo Domingo and culminated in the successful siege of the capital. Eventually, with the aid of a British naval squadron, the French were forced to capitulate and the colony returned again to Spanish rule, from which it declared its independence in 1821. It was invaded and held by the Haitians from 1822 to 1844, when they were expelled, and the Dominican Republic was founded and a constitution adopted. Independence day 27 Feb. 1844. Great Britain, in 1850, was the first country to recognize the Dominican Republic. The country was occupied by American Marines from 1916 until 1924. In 1936 the name of the capital city was changed from Santo Domingo to Ciudad Trujillo; and back again in 1961.

AREA AND POPULATION. The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the Republic of Haiti. It consists of the National District (containing the capital, Santo Domingo; population, census 1970, 817,067), and 26 provinces.

Area is 48,442 sq. km (18,700 sq. miles) with 870 miles of coastline, 193 miles of frontier line with Haiti (marked out in 1936).

The populations of the 26 provinces at the 1970 census were:

La Altagracia	87,180	Puerto Plata	185,800

The population is partly of Spanish descent, but is mainly composed of a mixed race of European and African blood.

CONSTITUTION AND GOVERNMENT. A new Constitution was promulgated on 28 Nov. 1966.

The President is elected for 4 years, by direct vote. In case of death, resignation or disability, he is succeeded by the Vice-president. There are 12 secretaries of state, a judicial adviser with secretary-of-state rank and 2 ministers without portfolio in charge of departments. Citizens are entitled to vote at the age of 18, or less when married.

Recent Presidents have been: Gen. Rafael Leonidas Trujillo Molina, 1930-38, 1942-52 (assassinated 30 May 1961); Héctor Bienvenido Trujillo Molina, 1952-60; Dr Joaquín Balaguer, 4 Aug. 1960-62; Lic. Rafael Bonnelly, 18 Jan. 1962; Professor Juan Bosch, 27 Feb.-25 Sept. 1963 (deposed); Dr Héctor Gracia Godoy, 3 Sept. 1965-1 July 1966; Joaquín Balaguer, 1 July 1966-15 Aug. 1978.

President: Antonio Guzman (elected 26 May 1978).

The country's first free elections for nearly 40 years were held in Dec. 1962 when Juan Bosch was elected President with a clear majority, after which a new Constitution was approved on 29 April 1963. Bosch was overthrown by a military *coup d'état* in Sept. 1963 and the declared aim of the Constitutionalist side in the Civil War of April Sept. 1965 was the restoration of Bosch as President and a return to the 1963 Constitution.

On 29 April 1965 USA landed a force of 44,000 Marine and Army, later assisted by Organization of American States contributions. The capital remained divided between these forces and various rival factions of nationals. A provisional government was eventually installed on 3 Sept. 1965.

Until elections on 1 June 1966 there was government by decree. The voting on 16 May 1974 was 924,779 votes for Dr Joaquín Balaguer (Reformist Party).

The Supreme Court consists of a president and 8 judges chosen by the Senate, and the procurator-general, appointed by the executive; it supervises the lower courts. Each province forms a judicial district, as does the *Distrito Nacional*, and each has its own procurator fiscal and court of first instance; these districts are subdivided, in all, into 72 municipalities and 18 municipal districts, each with one or more local justices. ECUADOR

Capital: Quito

Population: 7·81m. (1979)

GNP per capita: US\$910 (1978)

República del Ecuador

HISTORY. The Spaniards under Francisco Pizarro founded a colony after their victory at Cajamarca (16 Nov. 1532). Their rule was first challenged by the rising of 10 Aug. 1809. Marshal Sucre defeated the Spaniards at Pichincha in 1821, and in 1822 Bolívar persuaded the new republic to join the federation of Gran Colombia. The Presidency of Quito became the Republic of Ecuador by amicable secession 13 May 1830.

AREA AND POPULATION. Ecuador is bounded on the north by Colombia, on the east and south by Peru, on the west by the Pacific ocean. The frontier with Peru has long been a source of dispute between the two countries. The latest delimitation of it was in the treaty of Rio, 29 Jan. 1942, when, after being invaded by Peru, Ecuador ceded the latter over half her Amazonian territories. Ecuador unilaterally denounced this treaty in Sept. 1961. *See* map in THE STATESMAN'S YEAR-BOOK, 1942. Fighting between Peru and Ecuador began again in Jan. 1981 over this border issue but a ceasefire was agreed in early Feb.

No definite figure of the area of the country can yet be given, as a portion of the frontier has not been delimited. One estimate of the area of Ecuador is 270,670 sq. km, excluding the litigation zone between Peru and Ecuador, which is 190,807 sq. km.

Ecuador has 3 distinct zones: the *Sierra* or uplands of the Andes, consisting of high mountain ridges with valleys, with 2·57m. of the population and high-priced farming land; the *Costa*, the coastal plain between the Andes and the Pacific, with 2·02m., whose permanent plantations furnish bananas, cacao, coffee, sugar-cane and many other crops; the *Oriente*, the upper Amazon basin on the east, consisting of tropical jungles threaded by large rivers.

The population is predominantly of Amerindians, with small proportions of people of European or African descent.

The official language is Spanish. The Amerindians of the highlands speak mainly the Quechua language; in the Oriental Region various tribes have languages of their own.

Ecuador's first census of population was taken on 29 Nov. 1950; it showed a total of 3,202,757 (1,594,803 males and 1,607,954 females). The census was hampered by strong opposition from the Indian villages. The working population was given as 1,940,628. Census population in 1974, 6,521,710.

The population (census at 8 April 1974) was distributed by provinces (capitals in brackets):

<i>Provinces</i>	<i>Area (sq. km)</i>	<i>Population 1974</i>

CONSTITUTION AND GOVERNMENT. On 22 June 1970 President José María Velasco Ibarra assumed dictatorial powers, following months of strife between student and security forces. For details of governments 1963–70, see *THE STATESMAN'S YEAR-BOOK, 1974–75*, pp. 875–76. On 15 Feb. 1972 President Velasco Ibarra was deposed. A National Military Government under Brig.-Gen. Guillermo Rodríguez Lara was formed and the 1945 Constitution reintroduced. President Rodríguez Lara resigned in Jan. 1976 and a military Junta assumed power until the 1979 elections. A new Constitution came into force on 10 Aug. 1979.

called 'Colon', situated in the Pacific ocean about 600 miles to the west of Ecuador and comprising 15 islands. The provinces are administered by governors, appointed by the Government, their sub-divisions, or cantons, by political chiefs and elected cantonal councillors, and the parishes by political lieutenants. The Galapagos Archipelago is administered by the Ministry of National Defence.

INTERNATIONAL RELATIONS

Membership. Ecuador is a member of UN, OAS and LAIA (formerly LAETA).

ECONOMY

Budget. Estimated revenue and expenditure for 1981 was 53,600m sucres.

The division of the budget under main heads was, for 1976 (in 1m sucres): Education and social development, 4,487; defence, 2,592; public works, 1,834; economic development including agriculture, 2,050.

Net international reserves, 31 Dec. 1980, were US\$857m.

Currency. The monetary unit is the *sucre*, divided into 100 *centavos*. In circulation are a pure nickel 1-sucre and copper-nickel and copper-zinc 50-, 20-, 10- and 5-centavo pieces. The currency consists mainly of the notes of the Central Bank in denominations of 5, 10, 20, 50, 100, 500 and 1,000 sucres. In March 1981 the US\$1 stood at 28.10 sucres and the £ at 54.38 sucres in the official exchange.

Banking. The Central Bank of Ecuador, at Quito, with a capital of 20m sucres, is modelled after the Federal Reserve Banks of US, through branches opened in 12 towns it now deals in mortgage bonds. On 31 July 1970 the Central Bank had gold and foreign-exchange reserves worth US\$62m. Banks must hold cash equal to 21% of sight, short-term and savings deposits.

All commercial banks must be affiliated to the Central Bank, the commercial banks, 31 Oct. 1967, had capital and reserves of 463m sucres and total assets of 4,536m sucres. In circulation, Dec. 1972, 7,321m sucres.

The Bank of London and Montreal, Ltd. had branches in Quito and Guayaquil.

Weights and Measures. By a law of 6 Dec. 1856 the metric system was made the legal standard but the Spanish measures are in general use. The quintal is equivalent to 101.4 lb.

The meridian of Quito has been adopted as the official time.

ENERGY AND NATURAL RESOURCES

Electricity. In 1980, total capacity of hydraulic and thermal plants was 950,000 kw. Estimated output was 2,000m. kwh.

Oil. Production of crude petroleum in 1979 was 78.2m. bbls; (1978) 73.7m. New drilling along the coast has had some success, but Ecuador has to import some crude oil. Drilling near the river Putumayo started in 1967, and oil is reported to have been found in commercial quantities.

Of 53 wells drilled in 1973 only 6 were dry. Proven oil reserves (1980, estimate) 2,000m. bbls.

Minerals. A few firms are engaged in stoping mineralized vein material for copper, gold, silver, lead and zinc. Production is small: that of silver was 2 tonnes in 1972.

The country has some copper, iron and lead. There are coal deposits in the Biblián area, but their exploitation has so far proved uneconomic. Output of sea salt in 1970 was 40,000 tonnes.

Agriculture. Ecuador is divided into two agricultural zones: the coast and lower river valleys, where tropical farming is carried on in an average temperature of from 18° to 25° C.; and the Andean highlands with a temperate climate, adapted to grazing, dairying and the production of cereals, potatoes, pyrethrum and vegetables suitable to temperate climes. Some wheat has to be imported.

124,000 acres of rich virgin land in the Santo Domingo de los Colorados area has been set aside for settlement of smallholders.

Excepting the two agricultural zones and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 sq. miles on the Pacific slope extending from the sea to an altitude of 5,000 ft on the Andes, and the Amazon Basin below the same level containing 80,000 sq. miles, nearly all virgin forest, are rich in valuable timber, but much of it is still not commercially accessible.

The staple export products are bananas, cacao and coffee. These make up over 82% of her exports: the value of the bananas being some 46%. The production of wheat is increasing. Sugar is becoming important: some tea is being produced, mostly for export. Main crops, in 1,000 tonnes, in 1979: Rice, 303; wheat, 19; potatoes, 545; maize, 217; coffee, 102; barley, 26; cocoa, 78; bananas, 2,391.

Livestock (1979): Cattle, 2.5m.; sheep, 2.3m.; pigs, 3.4m.

Fisheries. Fisheries and fish product exports were valued at US\$9.6m. in 1970; of these, shrimps comprised about half.

INDUSTRY AND TRADE

Industry. The Industrial Development Law of 1965 has stimulated the establishment of new industries, including textiles, refrigerators, pharmaceuticals, tinned food, batteries, etc. In 1971 there were 1,053 manufacturing units employing 50,000 people who earned 1.1m. sucres. Value of gross output, 11,172m. sucres. Cement output, 1972, from the country's 3 plants was 482,000 tonnes. Production (in tonnes) of sawn wood was 792,000; fuel oils, 691; motor spirit, 407; sugar, 275.

GNP *per capita* (1975) US\$635.

Commerce. Imports and exports for calendar years, in US\$1m.:

	1976	1977	1978	1979	1980
Imports (c.i.f.)	860.7	1,288.7	1,630	1,997	1,552
Exports (f.o.b.)	1,127.3	1,189.4	1,494	2,192	2,471

Of the total exports (1980) bananas were US\$211.1m.; cocoa, US\$211m.; coffee, US\$143.7m.

USA furnished 35% of imports in 1970 and took 43% of the exports.

Total trade between Ecuador and UK (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	2,540	4,978	4,275	6,210	8,844
Exports and re-exports from UK	23,260	59,522	33,035	33,483	30,930

Tourism. There were 240,000 visitors in 1979, mainly from South American countries.

COMMUNICATIONS

Roads. There are 17,195 km of roads of all types in this mountainous country, but most are narrow and subject to landslides. A trunk highway through the coastal plain is under construction which will link Machala in the extreme south-west with Esmeraldas in the north-west and with Quito and the northern section of the Pan-American Highway.

In 1971 there were 30,000 passenger cars and 44,300 commercial vehicles.

Railways. A 1,067 mm gauge line runs from San Lorenzo through Quito to Guayaquil and Cuenca, total 965 km.

Aviation. The following international lines operate: Air France, Avianca, Braniff, British Caledonian, Ecuatoriana de Aviación, KLM, Lufthansa, Iberia, LAN Chile, and Aerovías Peruanas. They connect Quito with Panama, Bogotá (Colombia), Guayaquil, New York and Europe. All the leading towns are connected by an almost daily service, but landing fields are small.

Shipping. Ecuador has 7 seaports, of which Guayaquil is the chief. The merchant navy comprises 39,964 tons of seagoing and 21,232 tons of river craft. In 1970 ships totalling 8,88m. GRT entered Ecuadorean ports, unloading 1,52m. tons, and loading 1,77m. tons.

There is river communication, improved by dredging, throughout the principal agricultural districts on the low ground to the west of the Cordillera by the rivers Guayas, Daule and Vinces (navigable for 200 miles by river steamers in the rainy season).

Post and Broadcasting. Quito is connected by telegraph with Colombia and Peru, and by cable with the rest of the world. The main towns in the country are connected by radio-telephone. There are over 300 radio stations.

In 1978 there were 221,578 telephones in use, 76,143 in Quito and 66,394 in Guayaquil; most were operated by the Government; 80.6% were automatic. Television was inaugurated in 1960 in Guayaquil, in 1961 in Quito and in 1967 in Cuenca. In 1971 there were 1.7m. radio receivers and 280,000 television receivers.

Cinemas (1974). Cinemas numbered about 185 with total seating capacity of 114,600.

Newspapers (1971). There were 22 daily newspapers with an aggregate daily circulation of 283,000; 7 papers in Quito and Guayaquil have the bulk of the circulation.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Supreme Court in Quito is the highest tribunal and consists of 5 justices and the Minister Fiscal. Of the 15 superior courts, 4 are composed of 6 judges and 11 of 3 judges each. There are numerous lower courts. The popular jury was abolished in 1928, and criminal cases are heard before a 'special jury' consisting of 1 judge and 3 members of the Ecuadorean bar, appointed annually by the superior courts. Capital punishment and all forms of torture are prohibited under the constitution, as are imprisonment for debt and contracts involving personal servitude or slavery. Substantial amendments expediting judicial procedure were introduced in 1936, and salaries for all judicial officials replaced remuneration by fees.

Religion. The state recognizes no religion and grants freedom of worship to all. Civil registration of births, deaths and marriages is obligatory. Divorce is permitted. Illegitimate children have the same rights as legitimate ones with respect to education and inheritance.

The Catholic Church has 1 cardinal, 3 archbishops and 18 bishops. A *modus vivendi* was concluded with the Holy See on 24 July 1937, governing the relations between the Catholic Church and the State. Protestants numbered 19,200 in 1966.

Education. Primary education is free and in principle obligatory. Private schools, both primary and secondary, are under some state supervision. There were (1976–77) primary schools with 1,318,475 pupils; secondary schools with 431,226 pupils and universities with 170,173 students.

Social Welfare. From 1 May 1964 social benefits are extended to professional men, artisans and domestic workers; and to agricultural workers from 1 May 1965. The Ministry of Social Welfare and Labour was in 1967 divided into the Ministries of Social Welfare and of Public Health. In 1970 there were 199 hospitals with 14,024 beds.

ARAB REPUBLIC OF EGYPT

Capital: Cairo

Population: 40·98m. (1979)

GNP per capita: US\$400 (1978)

HISTORY. On 1 Feb. 1958 President Nasser of Egypt and President Kuwatly of Syria proclaimed in Cairo the union of their countries, under one head of state, with a common legislature, a unified army and one flag.

On 8 March the Kingdom of Yemen federated with the United Arab Republic under the name of the United Arab States.

On 26–28 Sept. 1961 Syria broke away and resumed its independence. President Nasser accepted the situation on 29 Sept.

On 26 Dec. 1961 Egypt also declared the union with Yemen terminated; but in Nov. 1962 concluded a defence pact with the republican regime.

On 13 Aug. 1964 the UAR, Iraq, Kuwait, Jordan and Syria signed a document forming an Arab Common Market, which aims at the free movement of the currency and products of the member countries. The market was to come into being on 1 Jan. 1965, but this has not taken place.

Following President Sadat's visit to Israel in Nov. 1977 and considerable political activity including the Camp David (USA) summit in Sept. 1978 a Peace Treaty was signed between Israel and Egypt in Washington on 26 March 1979 and ratified in Sinai on 26 April 1979.

AREA AND POPULATION. The total area of Egypt is about 386,198 sq. miles (1m. sq. km), but the cultivated and settled area, that is, the Nile valley, delta and oases, covers only about 13,500 sq. miles (35,500 sq. km). Canals, roads, date plantations, etc., cover 1,900 sq. miles; 2,850 sq. miles constitute the surface of the Nile, marshes and lakes.

Egypt is divided into two districts—'Wagh-el-Bahari'. Lower Egypt and 'El-Saïd'. Upper Egypt.

The following table gives the total area, and the results of the census taken in 1966 and estimates for 1976:

Vital statistics for 1971: Births, 1,479,000; deaths, 445,000.

CONSTITUTION AND GOVERNMENT. A provisional Constitution was proclaimed on 25 March 1964 and a new Constitution on 11 Sept. 1971.

The Constitution defines the UAR as 'a democratic socialist state' and the Egyptian people as 'part of the Arab nation'; with Islam as a state religion and Arabic as the official language. The national economy is directed by the State; the 3 sectors of state, co-operative and private ownership are supervised and controlled by the people. 'Freedom of belief is absolute; freedom of the press, printing and publication is guaranteed within the limits of the law'. Public education is free at all stages.

In May 1980 amendments to the 1971 Constitution were agreed by referendum.

The People's Assembly is elected by universal suffrage and has 360 members; the President of the Republic may appoint up to 10 additional members. The President of the Republic is nominated by the People's Assembly and confirmed by plebiscite for a 6-year term. He is the supreme commander of the armed forces and presides over the defence council.

The Constitution is supplemented by the Charter of 21 May 1962, which sketches the principles and aims of the regime since the overthrow of the monarchy on 23 July 1952; and by the Statute of the Arab Socialist Union of 7 Dec. 1962; and by the Oct. paper, presented by President Sadat in April 1974, which envisages development from now until 2000. This organization has been created as 'the socialist vanguard' for safeguarding and furthering the 'socialist revolution' on all levels of local, district and national administration.

General elections took place on 7 and 14 June 1979 for 372 of the 382 seats in the People's Assembly. There were about 11m. registered voters and voting was compulsory for men. The National Democratic Party gained 330 seats; Socialist Labour Party, 29; Liberal Socialist Party, 3; Independents, 10. In addition 10 members were nominated by the President.

Army. Service in the Army is compulsory for all male citizens at the age of 18. The Army comprised (1980) 2 armoured divisions, 3 mechanized infantry divisions, 5 infantry divisions, 3 independent armoured and 8 independent infantry brigades, 1 parachute brigade, 2 airborne brigades, 7 artillery brigades and 6 commando groups. Its tank strength (1980) was about 1,680, mainly USSR. Total strength is about 320,000 men; reserves totalled about 500,000.

Naval personnel in 1981 exceeded 17,500 officers and men, including the Coast-guard, but not reserves of about 12,000.

Air Force. Until 1979, the Air Force was equipped largely with aircraft of USSR design, but current re-equipment involves aircraft bought in the West, as well as some supplied by China. Current strength is about 27,000 personnel and 360 combat aircraft, of which the interceptors are operated by an independent Air Defence Command, in conjunction with many 'Guideline', 'Goa' and 'Gainful' missile batteries. There are about 23 Tu-16 twin-jet strategic bombers, some equipped to carry 'Kelt' air-to-surface missiles. The main strike force includes some Il-28 twin-jet bombers, and about 60 Su-7B and 18 Su-20 supersonic fighter-bombers. Other interceptor ground attack fighter divisions are equipped with 45 Mirage IIIs, 14 Mirage 5s, 35 F-4E Phantoms, 40 F-6s (Chinese-built MiG-19s), about 95 MiG-21s and 30 MiG-17s. INTERNATIONAL RELATIONS

Membership. Egypt is a member of UN, OAU, the Arab League and OAPFC.

ECONOMY

Planning. A 'permanent council of national production' was established in 1952.

The 10-year development plan 1973-83 envisages an initial investment by the public and private sectors of £E8,400m.

In 1961-62 a number of sweeping socialist measures were carried out, which contributed largely to the Syrian defection in Sept. 1961. In addition to the nationalization of banks, insurance companies, etc., about 1,000 private businessmen had their property confiscated by Jan. 1962. In 1963 complete nationalization was enforced

of all cotton exporting and ginning firms, pharmaceutical factories and some 400 other companies in which the State had previously held a half-share. Share owners were compensated by government bonds redeemable over 15 years at 4% interest.

Budget. Ordinary revenue and expenditure for fiscal years ending 30 June, in £E1,000:

	1976 ¹	1977 ¹	1978 ¹	1979 ¹
Revenue	5,976	5,503	6,516	10,249
Expenditures	5,976	5,503	6,516	12,929

¹ Estimates.

Currency. By decree of 18 Oct. 1916 (20 Zi-El-Higga 1934), the monetary unit of Egypt is the gold Egyptian pound of 100 *piastres* of 1,000 *millièmes*. Coins in circulation are 20, 10, 5, 2 piastres (silver); 2, 1 piastre, 5 millièmes, 1 millième (bronze). Gold coins are no longer in circulation. Silver coin is legal tender only up to £E1, and bronze coins up to 10 piastres. The Treasury issues 5- and 10-piastre currency notes. Bank-notes are issued by the National Bank in denominations of 5, 10, 25 and 50 piastres, £E1, 5, 10, 20, and 100.

In March 1981, £1 sterling = £E1.53; US\$ = £E1.449.

Banking. On 18 Aug. 1960 a Central Bank of Egypt was established by decree. It manages the note issue, the Government's banking operations and the control of commercial banks. At the same date the National Bank founded in 1898 ceased to be the central bank and became a purely commercial bank. The position of the bank at 31 Dec. 1976 was (in £E): Capital and reserves, 28,778,550; investments, securities and other investments, 78,252,590; discounts, advances and sundry debit balances, 607,652,637; deposits, 525,853,275.

Weights and Measures. In 1951 the metric system was made official with the exception of the *feddân* and its subdivisions.

Capacity. *Kadah* = 1/96th *ardeb* = 3.36 pints. *Rob* = 4 *kadahs* = 1.815 gallons. *Keila* = 8 *kadahs* = 3.63 gallons. *Ardeb* = 96 *kadahs* = 43.555 gallons, or 5.44439 bu., or 198 cu. decimetres.

Weights. *Rotl* = 144 dirhems = 0.9905 lb. *Oke* = 400 dirhems = 2.75137 lb. *Qantâr* or 100 *rotls* or 36 *okes* = 99.0493 lb. 1 *Qantâr* of unginned cotton = 315 lb. 1 *Qantâr* of ginned cotton = 99.05 lb. The approximate weight of the *ardeb* is as follows: Wheat, 150 kg; beans, 155 kg; barley, 120 kg; maize, 140 kg; cotton seed, 121 kg.

Surface. *Feddân*, the unit of measure for land = 4,200.8 sq. metres = 7,468.148 sq. pics = 1.03805 acres. 1 sq. pic = 6.0547 sq. ft = 0.5625 sq. metre.

ENERGY AND NATURAL RESOURCES

Electricity. Electricity generated in 1969 was 7,316m. kw.

Oil. The first commercial discovery of oil in the Middle East outside Iran was made in Egypt in 1909, but production long remained low and often insufficient to meet Egypt's domestic requirements. In 1979 production was rising again and with the newly-regained Sinai oilfields was 25.5m. tonnes. In 1976 a major exploration effort was being mounted and the Egyptian Government hoped that, as a result, production will reach 1m. bbls a day by 1981.

Policy is controlled by the Egyptian General Petroleum Corporation (EGPC) a wholly state-owned corporation answerable to the Minister of Petroleum. EGPC is whole or part-owner of the various production and refining companies and controls supplies to the domestic marketing companies.

In 1978, 24,299,000 tonnes of crude petroleum and 11,362,000 tonnes of refined products were produced.

Minerals. Production (1973 in tonnes): Phosphate rock, 553,000; iron ore, 656,000; marine salt, 454,000.

Agriculture. Rain seldom falls in Upper Egypt, and only at irregular intervals in Cairo, where the average for the year is no more than 1.2 in. At Alexandria the average is 8 in.

The cultivated area of Egypt proper was estimated in 1971 at 10.74m. feddâns (1 feddân = 1.038 acres) and of this 4,869,000 feddâns were under winter crops, 5,012,000 under summer crops and 613,000 under Nile crops.

The Agricultural Reform Decree of Sept. 1952 limits agricultural ownership to 200 feddâns, reduced to 100 feddâns in July 1961. Foreigners were debarred in 1963 from owning any land. Holdings in excess of this limit will be redistributed: compensation, equivalent to 10 times the rental value of the land, will take the form of 3% (from 1958: 1½%) bonds redeemable within 30 years (from 1958: 40 years). All national *waqfs* are to be dissolved.

Irrigation occupies a predominant place in the economic development of the country. The Aswân reservoir can now hold up to 5,500m. cu. metres of water, and the Gebel Aulia reservoir, completed in 1937, holds 2,000m. cu. metres. Barrages have been erected at Esna, Nag' Hammâdi, Asyût and Zifta, and at the bifurcation of the Nile below Cairo. Nag' Hammâdi barrage, completed in 1930, ensures full basin supplies even in low flood to Gîrga province, and will facilitate perennial irrigation when basin lands are converted. Asyût barrage, having been remodelled, will meet the greater demands of the area it now commands. The Esna barrage now secures basin irrigation to lands in Qena province. New barrages (Mohamed Ali barrages) have been completed at the bifurcation of the Nile below Cairo to replace the existing structures which, built in 1861, are now unable to meet the conditions following the increase in summer supplies, the reclamation of large areas of waste lands and the earlier watering of food crops.

On 8 Nov. 1959 the United Arab Republic and Sudan concluded agreements on the sharing of the Nile waters (after construction of the Aswân High Dam), and trade, payments and Customs dues. The agreement provides that from the time the High Dam started to store water (15 May 1964) Sudan will be entitled to 18,500m. cu. metres of the total annual flow and Egypt to 55,500m.

In 1979 the area (1,000 hectares) and production (1,000 tonnes) were: Wheat, 584(1,856); barley, 45(122); beans (dry), 7(13); lentils, 9(9); onions, 21(536); maize, 791(2,938); millet, 171(635); sugar-cane, 105(8,488).

The rice crop was 2.3m. tonnes in 1977.

Livestock (1979): 1.95m. cattle, 2.3m. buffaloes, 1.7m. sheep, 1.4m. goats, 105,000 camels and 15,000 pigs.

Fisheries. The catch of the Egyptian sea, Nile and lake fisheries in 1957 amounted to 102,600 tonnes. In 1952 there were 48,947 men and 16,347 boys engaged in fishing and 11,739 boats used for fishing.

Suez Canal. The Suez Canal was opened for navigation on 17 Nov. 1869. By the convention of Constantinople of 29 Oct. 1888 the canal is open to vessels of all nations and is free from blockade, except in time of war, but the UAR Government did not allow Israeli ships to use the canal until May 1979, when the embargo was lifted. It is 173 km long (excluding 11 km of approach channels to the harbours), connecting the Mediterranean with the Red Sea. Its minimum width is 197 ft at a depth of 33 ft, and its depth permits the passage of vessels up to 38 ft draught.

In 1976 a 2-stage development project was started. The first stage which was completed in 1980 allowing vessels, of up to 150,000 tons, fully loaded, and up to 370,000 tons in ballast to pass through the canal and give a draught of 53 ft.

During the war with Israel in June 1967 Egypt blocked the Canal. The canal was cleared and re-opened to shipping on 5 June 1975. This is part of a programme to develop and rebuild the whole area of Suez to make it one of the largest tax-free industrial zones. Canal toll fees reached £E230m. in 1976, and in 1978 21,266 vessels (248·26m. tons) went through the canal.

On 1 Jan. 1981 charges were increased by 30%. The first tunnel below the canal, located 10 miles north of Suez City, was completed on 30 April 1980.

EL SALVADOR

Capital: San Salvador

Population: 4.36m. (1979)

GNP per capita: US\$600 (1978)

República de El Salvador

HISTORY. In 1839 the Central American Federation, which had comprised the states of Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica, was dissolved, and El Salvador declared itself formally an independent republic in 1841.

AREA AND POPULATION. El Salvador is the smallest and most densely populated of the Central American states. Its area (including 247 sq. km of inland lakes) is estimated at 21,393 sq. km (8,236 sq. miles) with population (census 1971) of 3,712,622. Census (1979) 4,364,539. The capital is San Salvador (914,662 inhabitants in 1979).

A Treaty was signed in Peru on 30 Oct. 1980 settling the border dispute between El Salvador and Honduras which caused 4 days of fighting in July 1979.

The republic is divided into 14 departments, each under an appointed governor. Their areas (in sq. km) and populations at census 1971 were:

<i>Department</i>	<i>Area</i>	<i>Population</i>	<i>Department</i>	<i>Area</i>	<i>Population</i>
San Salvador	892	681,656	La Paz	1,155	194,196
Santa Ana	1,829	375,186	Chalatenango	2,507	186,003
San Miguel	2,532	337,325	Ahuachapán	1,281	183,682
Usulután	1,780	304,369	Marazán	1,364	170,706
La Libertad	1,650	293,076	San Vicente	1,175	160,534
Sonsonate	1,133	239,688	Cuscatlán	766	158,458
La Unión	1,738	230,103	Cabañas	1,075	139,312

Important towns (with population census 1971) are: Santa Ana, 96,306; San Miguel, 59,304; Mejicanos, 54,916; Delgado, 44,367; Nueva San Salvador, 35,106; Sonsonate, 33,562.

There has been considerable emigration into nearby states. There are no tribal Indians. The language of the country is Spanish.

CONSTITUTION AND GOVERNMENT. The latest Constitution was enacted in Jan. 1962, slightly amending that of 1950. The Executive Power is vested in a President elected for a non-renewable term of 5 years, with Ministers and Under-Secretaries appointed by him. The Legislative power is an Assembly of 52 members elected by universal suffrage and proportional representation for a term of 2 years. The judicial power is vested in a Supreme Court, of a President and 9 magistrates elected by the Legislative Assembly for renewable terms of 3 years; and subordinate courts.

A new *Partido de Conciliación Nacional* won all the seats of a new Assembly elected on 17 Dec. 1961. Its president, Dr Eusebio Cordon, was elected Provisional President of the Republic when it promulgated the new Constitution on 25 Jan. 1962. In Presidential elections on 29 April, Col. J. A. Rivera was returned without opposition and held office 1962-67. The elections of 13 March 1966 resulted in 31 *Partido de Conciliación Nacional* being elected against the opposition *Partido Demócrata Cristiano* (15) and various minor parties (6).

At the elections held 20 Feb. 1977 Col. Carlos Humberto Romero, of the ruling *Partido de Conciliación Nacional*, was elected President but on 16 Oct. 1979 Col. Romero was deposed in a *coup*. Col Jaime Abdul Gutiérrez and Col. Arnolfo Majano stated that a joint civilian military Junta would rule the country.

The Junta consisted of Col. Gutiérrez and Col. Majano and 3 civilians: Dr Guillermo Manuel Ungo, Román Mayorga Quiroz and Mario Antonio Andino.

In Dec. 1980 the junta was re-organized and on 22 Dec. José Napoleón Duarte, a Christian Democrat, was sworn in as President and Col. Jaime Abdul Gutiérrez became Vice-President.

In March 1981, there was continuing fighting between government forces and guerrillas and it was estimated that 9,000 people were killed in 1980 as a result of the violence.

National flag: Blue, white, blue (horizontal); the white stripe charged with the arms of the republic.

National anthem: Saludemos la patria orgullosos (words by J. J. Cañas; tune by J. Aberle).

DEFENCE

Army. The Army is organized in 3 territorial divisions of 3 infantry brigades, 1 artillery brigade, 1 air defence battalion, 1 engineer battalion, 1 parachute battalion, and 1 cavalry squadron. Total strength (1980), 7,000 men. There are also the National Guard, the National Police and the Treasury Police. Strength, 5,000.

Navy. The Navy includes 2 patrol boats, 2 cutters and 3 other small coastguard craft. Personnel in 1981 totalled 130 officers and men.

Air Force. The Air Force underwent a major re-equipment programme in 1974-75, with most aircraft coming from Israel and US aid for transport units. Combat squadron now has 4 Super Mystère and 17 Ouragan jet fighter-bombers. Transports include 6 C-47s, 2 C-118 DC-6s and 4 Israeli-built light twin-engined Aravas, plus 3 Lama and 1 Alouette III light helicopters. Training types include 9 Israeli-built Magister jets, and about 12 piston-engined T-41Cs, T-6s and T-34s. A few Cessna liaison aircraft are also in service. Strength totalled about 150 personnel and 60 aircraft in 1980.

INTERNATIONAL RELATIONS

Membership. El Salvador is a member of UN and OAS.

Banking. There are 6 native commercial banks, including the Banco Salvadoreño (paid-up capital, 6m. colones). The Bank of London and Montreal and the Citi-bank are the only foreign institutions. The Central Reserve Bank of El Salvador, constructed in 1934 out of the Banco Agricola Comercial, was nationalized on 20 April 1961. A stock exchange was officially inaugurated in Oct. 1962 with the declared intention of promoting investments in Central America; it began operations on 17 Aug. 1964 with a capital of 100,000 colones subscribed by 360 shareholders. Its activities have been limited.

Weights and Measures. On 1 Jan. 1886 the metric system was made obligatory. But other units are still commonly in use, of which the principal are as follows: *Libra* = 1.014 lb. av.; *quintal* = 101.4 lb. av.; *arroba* = 25.35 lb. av.; *fanega* = 1.5745 bushels.

ENERGY AND NATURAL RESOURCES

Electricity. El Salvador's biggest national enterprise, begun in 1950, is the construction of a 200-ft high dam across the (unnavigable) Lempa River, 35 miles north-east of San Salvador, designed to double the country's electric-power resources, from 31,000 to 78,000 kw. Production in 1975, 935.3m. kwh.; consumption, 831.9m. kwh.

Oil. Production of petrol lubricants and other petroleum derivatives during 1970 totalled C15.8m.

Minerals. The mineral output of the republic is now negligible, but the Ministry of Public Works has recently started to investigate 2 new silver mines in the department of Morazán.

Agriculture. El Salvador is predominantly agricultural: 32.5% of its total area is used for crops and 30.2% for pasture. Area devoted to coffee is about 308,000 acres, almost entirely owned by nationals. 50% of the working population is engaged in agriculture.

Production (1977, in 1m. quintales, 46 kg each): Coffee, 2.8; cotton, 1.6; maize, 8.2. A little rubber is exported.

Livestock (1979): 1.4m. cattle, 560,000 pigs, 4,000 sheep, 14,000 goats.

Forestry. In the national forests are found dye woods and such woods as mahogany, cedar and walnut. Balsam trees also abound: El Salvador is the world's principal source of this medicinal gum.

Fisheries. In 1978, shrimp exports were valued at US\$10m. (1977, US\$10.5m.).

INDUSTRY AND TRADE

Industry. Total production was valued at C550.2m. in 1972, which included: Footwear and clothing, C61.3m.; textiles, C70.2m.; food, C157.7m.; chemicals, C42.

Labour. A decree of Aug. 1950 permits the formation of trade unions except among agricultural workers and those engaged in seasonal work such as coffee-milling and sugar-refining; trade-union posts must be filled by natives, not foreigners.

Commerce. The imports (including parcels post) and exports have been as follows in calendar years in 1,000 colones:

	1971	1972	1973	1974	1975	1976
Imports	619,500	691,400	934,423	1,408,548	1,495,734	1,794,700
Exports	569,500	694,000	895,745	1,156,188	1,281,387	1,801,800

Of total exports, coffee furnishes about 20% by weight and 51% by value. The coffee is of the 'mild' variety; it is sold in bags of 60 kg, but trade statistics use a bag of 69 kg.

In 1976 US took 587.9m. colones of exports and furnished 512.3m. colones of the imports. The chief imports are normally wheat, flour, fuel-oil, fertilizers, machinery, vehicles and iron and steel manufactures. The other Central American Republics, the Federal Republic of Germany, Japan, the Netherlands and the UK are also important trading partners.

Total trade between El Salvador and UK for 5 years (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	1,603	3,138	2,607	3,517	2,889

Aviation. International air traffic is expanding and in 1972 there were 80 flights a week. The airport at Ilopango, 5 miles from San Salvador, is equipped to handle jet aeroplanes and a new international airport at Cuscatlán opened in 1979.

Shipping. The principal ports are La Unión, La Libertad and Acajutla, all on the Pacific. Passengers (and some freight) use the Guatemalan port of Puerto Barrios on the Atlantic, reaching El Salvador by rail or road.

Post and Broadcasting. The telephone and telegraph systems are government-owned; the radio-telephone systems are partly private, partly government-owned. Telephone instruments, 1978, 70,400. Two radio transmitting and receiving stations at San Salvador maintain communications with Latin America. El Salvador has, 1965, over 500,000 wireless receiving sets. In 1973, there were 3 commercial television channels and 2 educational channels sponsored by the Ministry of Education.

Cinemas (1976). Cinemas numbered 65.

Newspapers (1970). There are 4 daily newspapers in San Salvador and 1 each in Santa Ana and San Miguel.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the Supreme Court of Justice, courts of first and second instance, besides minor tribunals. Magistrates of the Supreme Court and courts of second instance are elected by the Legislative Assembly for a renewable 3-year term.

An anti-Communist law, effective 29 Sept. 1962, has made the propagation of totalitarian or Communist doctrines an offence punishable by imprisonment; supplementary offences, contrary to democratic principles, are punished by prison terms of from 3 to 7 years.

Religion. The dominant religion is Roman Catholicism. Under the 1962 Constitution churches are exempted from the property tax; the Catholic Church is recognized as a legal person, and other churches are entitled to secure similar recognition. There is an archbishop in San Salvador and bishops at Santa Ana, San Miguel, San Vicente, Santiago de María and Usulután.

Education. Education is free and obligatory. In 1929 the State took over control of all schools, public and private, but the provision that the teaching in government schools must be wholly secular was removed in 1945.

In Dec. 1970 there were 2,892 (2,937 in 1972) primary schools (state, municipal and private), with 531,309 (869,065 in 1974) pupils and 14,193 teachers. Secondary education was given at 860 schools (86,853 pupils). The national university and the Catholic University had 186,500 students in 1974.

Social Welfare. The Social Security Institute now administers the sickness, old age and death insurance, covering industrial workers and employees earning up to C700 a month. Employees in other private institutions with salaries over this amount are included but are excluded from the medical and hospital benefits.

EQUATORIAL GUINEA

Capital: Malabo

Population: 325,000 (1978)

GNP per capita: US\$330 (1976)

República de Guinea Ecuatorial

HISTORY. The Republic of Equatorial Guinea became independent on 12 Oct. 1968 after having been a Spanish colony (Territorios Españoles del Golfo de Guinea) until 1959. From 1959 to 1963 the territory was made into two Spanish provinces with a status comparable to the metropolitan provinces. From 1964 to 1968 this Equatorial Region became an autonomous entity still retaining the status of two Spanish provinces, but with a certain amount of internal self-government. Serious political disturbances in Rio Muni occurred in March–April 1969. This led to the partial withdrawal of the Spanish community. Agreements for co-operation in education and economic development were signed with Spain in 1971, 1972 and 1979. While under the first President (1968–79) the republic depended heavily on the Soviet bloc including Cuba and the People's Republic of China, Spanish economic, technical and social co-operation has become essential since the overthrow of his régime in Aug. 1979.

AREA AND POPULATION. The total area is 28,051 sq. km (10,831 sq. miles). Total population, 245,989 (1960 census); 1978 estimate, 325,000.

The republic consists of 2 provinces: (1) the continental Rio Muni (26,017 sq. km including the adjacent islets of Corisco, Elobey Grande and Elobey Chico which cover 17 sq. km). The administrative and economic capital is Bata (3,548 inhabitants in 1960). Total population was 183,377, including 2,864 Europeans at the census of 1960; 1970 estimate, 290,000; (2) the island of Bioko, formerly Fernando Póo and Macías Nguema (2,034 sq. km including Pagalu, formerly Annobón, 17 sq. km). The capital is Malabo, formerly Santa Isabel, which is also the capital of the republic (19,869 inhabitants in 1960). Total population at the census of 1960 was 62,612 (including 1,415 for Pagalu), including 4,220 Europeans; 1968 estimate about 70,000–80,000 with a significant increase of Nigerian plantation workers, but there has been considerable withdrawal of Nigerian workers because of the deterioration of economic conditions since independence. In 1976 the colony of Nigerian citizens was expelled.

The majority of the Rio Munian population is Fang (Pámues in Spanish). Along the coast and in the islets are the Combes, the Bengas, the Bujebas, etc.

In Bioko the aborigines are called Bubis. These are now a minority (perhaps 15,000). Other ethnic groups are the Fernandinos (descendants of English-speaking Creoles), the Fangs, coast people from Rio Muni and formerly naturalized migrant workers from Nigeria, Cameroon and São Tomé. A fluctuating mass of plantation workers were about twice as numerous as the Equatorial Guineans. Pagalu is peopled by descendants of slaves brought by the Portuguese; they still speak a Portuguese patois. Pidgin English was the lingua franca in Bioko in spite of the official Spanish. Because of political and economic difficulties about 150,000 citizens are reported to live in neighbouring countries and Spain.

CONSTITUTION AND GOVERNMENT. Following the referendum of 11 Aug. and the elections of 22 and 29 Sept. 1968, Equatorial Guinea has become a sovereign state consisting of two provinces. The republic is administered by a President who is chief of the armed forces and head of government.

The first Assembly elected in 1968 was dissolved in 1971. The first President was

appointed for life on 14 July 1972. A new Constitution was adopted in July 1973. All power rested with the Life President, Macías Nguema, and the nominal autonomy of the provinces did not exist. On 3 Aug. 1979 the President was overthrown by a 'revolutionary military council'. A 10-member cabinet has been established and the country is under military rule.

President: Lieut.-Col. Teodoro Obiang Nguema Mbasogo.

First Vice-President, Foreign Affairs: Capt. Florencio Maye.

Second Vice-President, Labour: Eulogio Eyo Riqueza.

National flag: Three horizontal stripes of green, white, red; a blue triangle based on the hoist; in the centre the national arms.

DEFENCE. Under President Macías the *Guardia Nacional* consisted mainly of Fang soldiers with Cuban and Chinese military advisers. Total strength about 1,000. Since the 1979 *coup*, Moroccan troops and Spanish military and police personnel have replaced them.

INTERNATIONAL RELATIONS

Membership. Equatorial Guinea is a member of UN, OAU and is an ACP state of EEC.

ECONOMY

Budget. Spanish subsidies normally balance the budget since 1979.

Currency. In July 1973 the Guinean *peseta* was redesignated the *Ekuele*.

Banking. The Banco Central de Guinea Ecuatorial in Malabo was established in 1969 with Spanish technical and financial assistance.

NATURAL RESOURCES

Agriculture. The chief products are cocoa (71,000 hectares in 1979), coffee (17,000 hectares) and wood; in 1979 production was about 3,000 tonnes of cocoa, most of it high-grade exported to Spain and the US. Production declined by 56% 1965-76. Coffee, of mediocre quality, is chiefly a Fang product. Production (1975) 7,200 tonnes and is gradually decreasing. With the departure of Nigerian workers, Fang labourers from Rio Muni were recruited forcibly in 1976 and were still on the island of Bioko in late 1979.

Livestock (1979): Cattle, 4,000; sheep, 34,000; goats, 8,000; poultry, 85,000.

Forestry. Wood was almost entirely exported from Rio Muni to Spain and the Federal Republic of Germany (337,438 tonnes to Spain in 1967). Production ceased in 1969 but is slowly recovering (920,000 tonnes in 1973). Plantations in the hinterland have been abandoned by their Spanish owners and except for cocoa, commercial agriculture is under serious difficulties.

INDUSTRY AND TRADE

Industry. Bioko has very few industries. Electricity production in 1967: Bioko, 9.47m. kwh.; Rio Muni, 5.7m. kwh. Rio Muni has no industry except lumbering. In Bioko a fish-processing industry is developing. Hopes based on the 4-year development plan (1964-68) have not materialized. Post-independence political conditions have not been conducive to private investment.

Trade. In 1965 Equatorial Guinea exported 330,100 tonnes (value, 1,635.6m. pesetas; 1966, 1,817m.), of which 326,000 tonnes to Spain (value, 1,581.6m. pesetas). In 1970 total exports were 1,741m. EG pesetas, of which 91% went to Spain. Imports were 1,472m. EG pesetas, of which 80% came from Spain. In 1975 cocoa exports were US\$13.4m. and coffee, US\$7m.

Total trade between Equatorial Guinea and UK (British Department of Trade returns, in £1,000 sterling):

	1978	1979	1980
Imports to UK	65	—	—
Exports and re-exports from UK	742	604	54

COMMUNICATIONS

Roads. Bioko had a good tarmac road network, but Rio Muni had few surfaced roads; the main artery is Mbini-Bata-Micomeng-Ebebiyin. Road reconstruction is envisaged.

Aviation. An international airfield exists in Malabo (28,029 passengers in 1967). Bata has more modest facilities (15,031 passengers in 1967). The line Madrid-Malabo-Bata is subsidized by Spain. Links with Douala (from Santa Isabel) and Libreville (Gabon) exist.

Shipping. Malabo is the main port. The other ports are Luba, formerly San Carlos (bananas, cocoa) in Bioko and Bata, Kogo and Mbini (wood) in Rio Muni. A new harbour in Bata has been completed. In 1966 in the 5 ports 141,600 tonnes were unloaded and 429,000 loaded.

Post and Broadcasting. Estimated number of telephones (1969), 1,451. In 1977 there were 80,000 radio and 1,000 TV receivers.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Constitution guarantees an independent judiciary. The Supreme Tribunal is the highest court of appeal and is located at Malabo.

Religion. The population of Equatorial Guinea is nominally Roman Catholic (227,517 in 1966) with influential Protestant groups in Santa Isabel and Rio Muni. By order of the President most churches were closed in 1975 and in June 1978 the Roman Catholic Church was banned. Since 1979, religious services have been restored.

Education. There were in 1974, 35,977 pupils enrolled in 559 primary schools with 630 teachers. In 1976 there were 3,984 pupils and 115 teachers in secondary schools, 370 students and 29 teachers at technical schools and 169 students and 21 teachers at teacher-training establishments.

Health. In 1967 there were 16 hospitals and dispensaries with 1,637 beds. In 1975 there were only 5 doctors, 2 midwives and 248 nursing personnel.

ETHIOPIA

Capital: Addis Ababa

Population: 30·4m. (1979)

GNP per capita: US\$120 (1978)

HISTORY. The ancient empire of Ethiopia has its legendary origin in the meeting of King Solomon and the Queen of Sheba. Historically, the empire developed in the centuries before and after the birth of Christ, at Aksum in the north, as a result of Semetic immigration from South Arabia. The immigrants imposed their language and culture on a basic Hamitic stock. Ethiopia's subsequent history is one of sporadic expansion southwards and eastwards, checked from the 16th to early 19th centuries by devastating wars with Moslems and Gallas. Modern Ethiopia dates from the reign of the Emperor Theodore (1855-68).

Menelik II (1889-1913) defeated the Italians in 1896 and thereby safeguarded the empire's independence in the scramble for Africa. By successful campaigns in neighbouring kingdoms within Ethiopia (Jimma, Kaffa, Harar, etc.) he united the country under his rule and created the empire as it is today.

In 1936 Ethiopia was conquered by the Italians, who were in turn defeated by the Allied forces in 1941 when the Emperor returned.

The former Italian colony of Eritrea, from 1941 under British military administration, was in accordance with a resolution of the General Assembly of the UN, dated 2 Dec. 1950, handed over to Ethiopia on 15 Sept. 1952. Eritrea thereby became an autonomous unit within the federation of Ethiopia and Eritrea.

This federation became a unitary state on 14 Nov. 1962 when Eritrea was fully integrated with Ethiopia.

A provisional military government assumed power on 12 Sept. 1974 and deposed the Emperor. The deposed Emperor Hailé Selassié I, was born 23 July 1892; crowned King (Negus), on 7 Oct. 1928, proclaimed Emperor, after the death of the Empress Zauditu, on 2 April 1930, and crowned on 2 Nov. 1930. He married in 1911 Menen, who died on 15 Feb. 1962. The Emperor died on 27 Aug. 1975. There are a son and a daughter surviving. On 25 Jan. 1931 the eldest son, Asfa Wossen, was proclaimed Crown Prince and heir to the throne. On 14 April 1974 the Emperor named his grandson, Prince Zare Yacob as Crown Prince, but following the military takeover Asfa Wossen was invited to be crowned King, but this offer was later rescinded.

In early 1978 a reversal of the position in the armed struggle in the Ogaden area of Ethiopia with Somali forces took place. After an offensive mounted with strong USSR and Cuban support the area was recaptured and in March Somalia withdrew all troops from the area. Control was re-established by Ethiopia later in 1978 and nationalist guerrillas were pushed back.

AREA AND POPULATION. The total area of the Empire is approximately 395,000 sq. miles or 1m. sq. km (Ethiopia 350,000, Eritrea, 45,000).

The official estimate of the population in 1979 was 30·4m.

The dominant race of Ethiopia, the Amhara, inhabit the central Ethiopian highlands. To the north of them are the Tigréans, akin to the Amhara and belonging to the same Christian church, but speaking a different, though related, language. Both these races are of mixed Hamitic and Semitic origin, and further mixed by inter-marriage with Galla and other races. The Gallas, some of whom are Christian, some Moslem and some pagan, comprise about 40% of the entire population, and are a pastoral and agricultural people of Hamitic origin. Somalis, another Hamitic race, inhabit the south-east of Ethiopia, in particular the Ogaden desert region. These like the closely related Afar people, are Moslem. The Afar stretch northwards from Wollo region into Eritrea.

The country is divided into 15 administrative regions, each under a Chief Administrator, and under the administrative control of the Minister of the Interior. Each region is divided into about 7 districts under a district administrator. All revenues collected in the regions are under the control of the Minister of Finance.

Other large towns (population, 1974): Dire Dawa, in Hararge, 72,860; Nazret, in Shoa, 50,550.

CONSTITUTION AND GOVERNMENT. On 24 Nov. 1974 the Provisional Military Government announced that on 23 Nov. it had executed 60 former military and civilian leaders including Gen. Aman Andom who was Chairman of the Provisional Military Administrative Council.

On 3 Feb. 1977 it was announced that Brig.-Gen. Teferi Bante, the Chairman of PMAC and 6 other members of the ruling military council were executed.

Chairman of the Provisional Military Administrative Council: Lieut.-Col. Mengistu Haile Mariam.

National flag: Three horizontal stripes of green, yellow and red.

National anthem: Ityopya, Ityopia Kidemi (tune by Daniel Yohannes, 1975).

DEFENCE

Army. The Army, trained by British officers from 1947 to 1951 and by Swedish officers until 1964, comprises 14 infantry divisions, including 12 tank battalions, 1 light infantry division, 4 parachute commando brigades, 30 artillery and 2 engineering battalions. It is recruited by voluntary enlistment. Five artillery battalions, 5 anti-aircraft batteries, 2 combat engineer battalions, an airborne infantry battalion and ancillary service, make up the ground forces to a total of 225,000 in 1980. This includes a People's Militia of around 150,000. This force was still being expanded in Oct. 1977.

A US military advisory and administrative group, established since 1954, working down to divisional level, was asked by the Ethiopian Government to disband in April 1977. Ethiopia's military rulers have moved away from US military assistance since they came to power and now rely on USSR for most of their military aid. Large amounts of USSR military equipment have been sent to help her in her conflict with Somalia over the Ogaden desert region. Ethiopian officers are trained at the National Military Academy, Harar, and at the National Military Training Centre, Holletta, near Addis Ababa.

Navy. The Navy, with headquarters at Addis Ababa, consists of 4 ex-Soviet fast missile boats, 2 ex-Soviet fast torpedo boats, 1 training ship (1,768 tons; ex-US seaplane tender), 1 ex-Netherlands coastal minesweeper, 4 patrol craft (ex-US coastguard motor gunboats), 4 new patrol boats, 1 ex-Yugoslav submarine chaser, 4 harbour defence craft, 2 landing craft and 4 minor landing craft. The Naval Base and College is at Massawa.

Personnel, in 1981, totalled 1,200 officers and men. It is presumed that Soviet advisers remain embarked in the 6 attack craft recently acquired until Ethiopian naval officers and ratings have sufficient expertise to operate independently the missiles and torpedoes.

Air Force. The Air Force, trained originally by Swedish and American personnel, has its headquarters at Debre Zeit, near Addis Ababa. It includes a training school

and a central workshop. Before fighting with Somalia began, there were 1 bomber, 1 ground-attack, 2 day-fighter ground-attack and 1 fighter reconnaissance combat squadrons, equipped with Canberras, F-5s, F-86s and T-28Ds, and 1 transport squadron equipped with jet-augmented C-119Ks, C-54s, C-47s and Do 28D Sky-servants. USSR equipment since supplied is reported to include 24 MiG-23, 50 MiG-21 and 20 MiG-17 fighters. Training aircraft include two-seat F-5Bs, T-33 jet advanced trainers and piston-engined Cessna 310s, T-28s and Saab-91s. More than 30 Agusta-Bell 204, Alouette III, UH-1H, Mi-6 and Mi-8 helicopters are in service. Personnel, 3,000 officers and men.

The frontier guard patrols the Somalia border, and commando police units are being employed to assist the Army and police in border patrols and anti-terrorist operations in Eritrea. Total paramilitary force, 20,000.

INTERNATIONAL RELATIONS

Membership. Ethiopia is a member of UN, OAU and is an ACP state of EEC.

ECONOMY

Planning. The third 5-year plan (1969-73, which was extended to 1974) involved a total expenditure of EB2,865m. (of which EB565m. for industry and EB624m. for transport and communications) and hoped to achieve a growth rate of 6% per annum. Actual growth rate was below 4% and the fourth 5-year plan was replaced in 1975 by a policy statement embodying a package approach to rural development. In 1978 a new development plan was launched envisaging growth of 6% in 1979-80 and 7% in 1980-81.

Budget. Revenue and expenditure estimates for financial years (ended 7 July) were as follows (in EB1m.):

	1975-76	1976-77	1977-78	1978-79	1979-80
Revenue	1,331	1,466	1,601	2,119	2,365
Expenditure	1,331	1,466	1,601	2,119	2,365

Of the estimated revenue in 1979-80, EB1,327m. is expected to come from taxes and EB417m. from external assistance. Of the 1979-80 expenditure, EB1,655m. is on current account and EB710m. for capital expenditure.

Currency. The Ethiopian *birr*, divided into 100 cents, is the unit of currency; it is based on 5.52 grains of fine gold. It consists of notes of EB1, 5, 10, 50 and 100 denominations, and bronze 1-, 5-, 10- and 25-cent coins. The former dollar notes were replaced by the new *birr* in Oct. 1976. Currency is issued by the National Bank, and, as at 30 Sept. 1975, was notes, EB673.7m.; coins, EB169.7m. The note issue, under the Banking Proclamation of 1963, must be backed by gold and foreign securities in the international reserve fund to at least 25% of its value. Foreign currency reserves stood at US\$108.5m. in June 1979. *Birr* 4.44 = £1 sterling; *Birr* 2.01 = US\$1 (in March 1981).

Banking. The State Bank was renamed the National Bank of Ethiopia in Oct. 1963, when its commercial activities were transferred to the newly established Commercial Bank of Ethiopia. At the same time another new bank, the Investment Bank of Ethiopia, was set up with a capital of EB10m., of which the Government held the majority of shares. In Sept. 1965 it became the Ethiopian Investment Corporation, which is a substantial shareholder in a number of industrial and other ventures.

The Investment Corporation has now been merged with the Development Bank of Ethiopia and the two are now known as the Agricultural and Industrial Development Bank, SC.

Two Italian banks have subsidiaries in Asmara, and one has a subsidiary in Addis Ababa. The Addis Ababa Bank Share Co. is connected with National & Grindlays Bank Ltd.

On 1 Jan. 1975 the Government nationalized all banks, mortgage and insurance companies.

Weights and Measures. The metric system of weights and measures is officially in

use. Traditional weights and measures vary considerably in the various provinces: the principal ones are: *Frasilla* = approximately 37½ lb.; *gasha*, the principal unit of land measure, which is normally about 100 acres but can vary between 80 and 300 acres, depending on the quality of the land.

ENERGY AND NATURAL RESOURCES

Electricity. Installed electricity generating power of the Ethiopian Electric Light and Power Authority was 185 mw in 1972 and production in 1977 totalled 427m. kwh.

Oil. A Russian built state-owned oil refinery at Assab came on stream in 1967 with a capacity of 600,000 tonnes of crude.

Minerals. Ethiopia has little proved mineral wealth. Salt (122,000 tonnes in 1974) is produced mainly in Eritrea, while a placer goldmine is worked by the Government of Adola in the south. Gold production, in 1974, was 15,754 troy oz. Small quantities of other minerals are produced including platinum. The potash deposits in the Dankali salt plains in the north-east part of the country were investigated by 2 US companies in 1966–70 but no exploitation has taken place. Japanese interests were engaged in the exploitation of significant copper deposits near Asmara, but the mine was closed down in March 1974 as a result of damage caused by ELF dissidents. A natural gas-strike was made offshore near Massawa in Dec. 1969, but it was not exploited. Traces of gas and oil have been found in south-east Ethiopia.

Agriculture. Coffee is by far the most important source of rural income. Harari coffee (long berry Mocha) is cultivated in the east; Abyssinian coffee is produced in Kaffa and the surrounding provinces, much of it growing wild.

Teff (*Eragrostis abyssinica*) is the principal food grain, followed by barley, wheat, maize and durra. Pulses and oilseeds are imported for local consumption and export. Cane sugar is an important crop.

Production (1978 in 1,000 tons): Maize, 800; sorghum, 713; barley, 600; coffee, 190; raw sugar, 146.

Livestock (1979): 25.9m. cattle, 23.2m. sheep, 17.1m. goats; smaller numbers of donkeys, horses, mules and camels. Hides and skins and butter (ghee) are important for home consumption and export. Sheep, cattle and chickens (53m.) are the main providers of meat. All agricultural land was nationalized in March 1975, and a radical land reform was carried out. Tenants were given possessory rights to the land they tilled, absentee landlords were abolished, and a ceiling on landholding was instituted.

INDUSTRY AND TRADE

Industry. The most important products of the small but growing industries are cotton yarn (9,600 tons in 1978) and fabrics, cement (100,000 tons), sugar, salt, cigarettes, canned foodstuffs, beer, building materials, footwear, pharmaceuticals, tyres and paint. Most industry is centred around Addis Ababa and Asmara. Industry around Asmara has been severely hit by actions of Eritrean guerrillas.

Commerce. Coffee is by far the most important export, followed by pulses, oilseeds, hides and skins. Imports are textiles, foodstuffs, vehicles, machinery, manufactured goods and petroleum products. Coffee exports, 1973, were 76,082 tonnes.

Imports and exports (in Ebi.m.) for 6 years (ending 9 Dec.):

	1974	1975	1976	1977	1978	1979
Imports	555.7	644.9	729.5	727.8	942.7	1,149.2
Exports	593.2	497.8	580.6	689.0	633.6	877.6

In 1978 the main supplying countries were: Italy (14%), Japan (11%), Federal Republic of Germany (10%), Saudi Arabia (8%), UK (7%).

The chief items of import in 1978 were: Machinery and transport equipment (EB300.3m.), petroleum products (EB129.3m.). The main items of export were: Coffee (EB502.3m.), hides and skins (EB66.3m.), pulses (EB17.3m.).

Total trade between Ethiopia and UK (British Department of Trade returns, in £1,000 sterling):

	1975	1976	1977	1978	1979	1980
Imports to UK	3,762	14,913	4,689	4,471	12,947	10,281
Exports and re-exports from UK	8,709	12,584	19,111	17,091	16,039	20,962

COMMUNICATIONS

Roads. Loans totalling EB83.75m. have been made between 1951 and 1968 by the International Bank and the International Development Agency for 3 programmes for improving and extending the road system. A fourth programme began in 1968 and is being financed by EB190m. in foreign loans and was completed in 1972. A fifth programme is near completion with a projected cost of EB60m. A sixth programme, estimated to cost EB133m., is underway which will include about 400 km of gravel-surfaced feeder roads. The Highway Authority now maintains some 7,600 km of roads and is engaged in constructing another 850 km of all-weather roads. Chief motor roads: Massawa-Asmara-Sudan; Asmara-Dessie-Addis Ababa; Asmara Gondar-Addis Ababa; Addis Ababa-Jimma; Addis Ababa-Lekemti; Addis Ababa-Nazareth; Dire-Dawa-Hargeisa; Dessie-Assab; Addis Ababa-Adola.

Estimated number of motor vehicles (1976): Cars, 63,100; lorries and trucks, 7,000; buses, 3,500; tractors, 3,000.

Railways. The Franco-Ethiopian Railway Co., owned by the 2 governments, operates the line (782 km, metre gauge) from Jibuti to Addis Ababa. Through running from Jibuti has been suspended for some years, but trains run in Ethiopia when terrorist activity permits.

Aviation. Ethiopian Air Lines, formed in 1946, provides services to Cairo, Athens, Frankfurt, London, Khartoum, Lagos, Accra, Rome, Nairobi, Entebbe, Kinshasa, Kigali, Dar es Salaam, Jibuti, Aden, Paris, Douala, Jedda, Peking, Seychelles, Bombay, San'a and Abu Dhabi, in addition to internal services. The following airlines operate through Asmara and Addis Ababa: Alitalia, Kenya Airways, Air India, Lufthansa, China Airline, Aeroflot, Air-France, British Airways and Air Jibuti.

Shipping. A state shipping line was established in 1964. In May 1973 it owned 4 cargo vessels and 2 tankers.

Post and Broadcasting. The postal system serves 301 offices, mainly by air-mail. All the main centres are connected with Addis Ababa by telephone or radio telegraph. International telephone services are available at certain hours to most countries in Europe, North America and India. Number of telephones (1978), 78,691 and 194 telex subscribers (1972).

The Ethiopian Broadcasting Service makes sound broadcasts on the medium and short waves in English, Amharic and in the vernacular languages spoken within the country. Radio Voice of the Gospel, owned by the Lutheran World Federation, was nationalized in March 1977 and renamed Radio Voice of Revolutionary Ethiopia. It broadcasts from Addis Abba in English, French, Amharic, Arabic, Somali and Afar. Television was introduced in 1964 and programmes broadcast from Addis Ababa for a radius of about 100 miles to the south and south-east of the capital and in Asmara from June 1977.

Cinemas (1974). There were 31 cinemas, with seating capacity of about 25,600.

Newspapers. In Addis Ababa there are 1 English, 1 French and 1 Amharic dailies, and in Asmara 2 Italian dailies, 1 part-Tigrinya, part-Arabic, and 1 Amharic weekly. All the papers are government-controlled and have small circulations, varying between 2,000 and 20,000.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The legal system is said to be based on the Justinian Code. A new penal code came into force in 1958 and Special Penal Law in 1974. Codes of criminal procedure, civil, commercial and maritime codes have since been promulgated.

The extra-territorial rights formerly enjoyed by foreigners have been abolished, but any person accused in an Ethiopian court has the right to have his case transferred to the High Court, provided he asks for this before any evidence has been taken in the court of first instance.

Provincial and district courts have been established, and High Court judges visit the provincial courts on circuit. The Supreme Imperial Court at Addis Ababa is presided over by the Chief Justice.

Police. In 1948 the regular police force of the capital and some provincial cities was amalgamated with the irregular territorial forces under the provincial governors-general. The total force now numbers about 32,000 officers and other ranks.

Religion. Since the conversion of the Amharas to Christianity in the 4th century they have retained their connexion with the Alexandrian Church through the Abuna, or Metropolitan who was always an Egyptian Copt, and who was appointed and consecrated by the Coptic Patriarch of Alexandria. Both the Egyptian and Ethiopian Coptic Churches are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451). After the restoration of the Emperor relations between the Ethiopian and Egyptian churches were strained until the summer of 1948, when an agreement was reached which envisaged the appointment of an Ethiopian Archbishop, and in Jan. 1951 Abuna Basilios (who died in 1970) was elected Archbishop of Ethiopia. A further agreement in 1959 made the Ethiopian Church autocephalous, and Basilios assumed the rank of Patriarch, with seniority immediately after the Patriarch of Alexandria. Abuna Theophilos was elected to the Patriarchate by an electoral college representing clergy, laity and Government and consecrated by the Ethiopian Archbishops in May 1971. In Aug. 1976 the third Patriarch, Abuna Tekle Haimanot, was invested. Christianity is predominant in the following provinces in the north: Tigré, Gondar, Gojjam, Shoa. Wollo province in the north-east is half Christian, half Moslem. In the southern half of the country the provinces of Hararge and Arussi have Moslem majorities, while all the other southern provinces have considerable Moslem minorities. In addition, the province of Gamu Gofa on the Kenya border and parts of Sidamo and Arussi have considerable pagan elements. Eritrea is half Moslem and half Christian. Each province now forms a diocese.

Islam is widely practised in the south and east of the Empire. Moslem minorities are found in Addis Ababa and in other commercial centres. The rite is mainly shafeitic. Harar is the most important Moslem centre. There are mosques and government schools for Moslems in most towns.

Education. In the academic year 1971-72 there were more than 2,600 primary, secondary and church schools providing education for 872,000 pupils. Higher education is co-ordinated under the National University, chartered in 1961. The University College, the Engineering, Building and Theological Colleges are in Addis Ababa, the Agricultural College in Harar and the Public Health College in Gondar. It is intended to develop these provincial colleges into universities in their own right. In 1971-72 the University of Asmara had 1,500 students. Altogether they provided tuition for about 5,884 students.

Since the military takeover in 1974 education has been in a state of flux. A campaign, known as *zemetcha*, lasting from Dec. 1974 to July 1976, was launched, in which all higher academic institutions were closed and the students sent into the countryside to preach the revolution. Academic institutions are now in operation again, although it is not clear if numbers have recovered to a pre-1974 level.

The main language of instruction from the secondary level upwards is English. A national adult literacy campaign was launched in 1979 with the aid of UNESCO. In Sept. 1980 it was claimed that 7m. adults, 70% of them women, had taken or were taking basic literacy or follow-up courses. Follow up courses provide basic education in such fields as agriculture, health, home economics, handicrafts and co-operatives, as well as ideology.

Health. In 1972 there were 350 doctors and 8,415 hospital beds.

FALKLAND ISLANDS AND DEPENDENCIES

Capital: Stanley

Population: 1,776 (1979)

HISTORY. France established a settlement in 1764 and Britain a second settlement in 1765. In 1770 Spain bought out the French and drove off the British. In 1806 Spanish rule was overthrown in Argentina, and the Argentinians claimed to succeed Spain in the French and British settlements in 1820. The British objected and reclaimed their settlement in 1832 as a Crown Colony.

AREA AND POPULATION. The Crown Colony is situated in the South Atlantic Ocean about 480 miles north-east of Cape Horn. The numerous islands cover 4,700 sq. miles. The main East Falkland Island, 2,610 sq. miles; the West Falkland, 2,090 sq. miles, including the adjacent small islands. The Dependency of South Georgia lies 800 miles south-east of the Falklands, has an area of 1,450 sq. miles; the South Sandwich group, 470 miles south-east of South Georgia, has an area of 130 sq. miles.

The population of the Falkland Islands on 31 Dec. 1979 was 1,776. The only town is Stanley, in East Falkland, with a population of just over 1,000. The population of South Georgia varies with the season, but the resident population in 1979 was 22 (males).

The South Shetlands are uninhabited.

South Georgia, once a base for whaling and sealing operations, is now occupied by members of the British Antarctic Survey at the base at King Edward Point.

The population of the Falkland Islands is nearly all of British descent, with about 80% born in the islands.

CONSTITUTION AND GOVERNMENT. The Colony is administered by a Governor, assisted by an Executive Council consisting of the Chief Secretary and Financial Secretary, both *ex-officio*; 2 members elected by the Legislature and 2 appointed members; and a Legislative Council composed of the Chief Secretary and Financial Secretary, both *ex-officio*; 3 elected members representing Stanley, 1 elected member from the East Falkland and 1 from the West Falkland and 1 representing the Camp as a whole.

Governor and Commander-in-Chief: R. M. Hunt, CMG.

Chief Secretary: F. E. Baker, OBE.

Flag: British Blue Ensign with arms of Colony on a white disc in the fly.

Expenditure	1,013,235	1,131,045	1,382,744	1,792,780	1,936,078	2,284,320

¹ Estimates.

Chief source of revenue (estimate, 1980-81): Internal revenue, £783,820; posts and telecommunications, £237,140; municipal services, £200,190; investment, £275,010; customs, £150,000.

DEVELOPMENT. The economy is entirely dependent on the production of wool for export. A comprehensive economic survey, published in 1976, drew attention to the potential for exploitation of fish, kelp and possibly oil, and made recommendations for various areas of development. Work on implementing many of the long-term and short-term recommendations has begun, notably feasibility studies in horticultural expansion, tourism, investigations into commercial fishing and fish drying, tanning of hides and skins, and potential oil development as well as improvements to internal communications—roads, radio telephone system, educational and medical facilities.

TRADE. Total imports, 1978, amounted to £1,447,502 and exports to £2,502,251.

COMMUNICATIONS

This includes Stanley schools, Darwin Boarding School and settlement schools, as well as pupils taught by itinerant teachers in rural areas. 17 children were being educated abroad.

The government medical department employs the following: 3 registered medical practitioners; 4 registered nurse midwives; 8 partially trained nurses; 1 laboratory and X-ray technician and 1 dental surgeon. There is 1 general hospital situated in Stanley with 27 beds. There is also a routine emergency flying doctor service operating to the outlying farm settlements.

WILD LIFE. The Falkland Islands and South Georgia are noted for their outstanding wild life, including penguin and seal. Four Nature Reserves have been declared and 18 Wild Animal and Bird Sanctuaries gazetted. The brown trout introduced between 1947 and 1952 can now be found in nearly all the rivers.

FIJI

Capital: Suva

Population: 618,979 (1979)

GNP per capita: US\$1,440 (1978)

HISTORY. The Fiji Islands were discovered by Tasman in 1643 and visited by Capt. Cook in 1774, but first recorded in detail by Capt. Bligh after the mutiny of the *Bounty* (1789). In the 19th century the search for sandalwood, in which enormous profits were made, brought many ships. Deserters and shipwrecked men stayed on; fire-arms salvaged from wrecks were used in native wars, new diseases swept the islands, and rum and muskets became regular articles of trade. Tribal wars became bloody and general until Fiji was ceded to Britain on 10 Oct. 1874, after a previous offer of cession had been refused. British administrators produced order out of chaos, and since then there has been steady political, social and economic progress. Fiji gained independent status on 10 Oct. 1970.

AREA AND POPULATION. Fiji comprises about 322 islands and islets (about 106 inhabited) lying between 15° and 22° S. lat. and 174° E. and 177° W. long. The largest is Viti Levu, area 4,010 sq. miles; next is Vanua Levu, area 2,137 sq. miles. The island of Rotuma (18 sq. miles), about 12° 30' S. lat., 178° E. long., was added to the colony in 1881. Total area, 7,055 sq. miles (18,272 sq. km).

A population census is taken every 10 years. Total population (census, Dec. 1977), 601,485; 1979 (estimate) 618,979. The 1979 total population consisted of the following: 275,737 Fijians; 300,179 Indians; 10,763 Part Europeans; 3,518 Europeans; 7,644 Rotumans; 4,579 Chinese; 5,739 other Pacific Islanders; 820 others.

Suva, the capital, is on the south coast of Viti Levu; population (1979), 64,000. Suva was proclaimed a city on 2 Oct. 1953.

Vital statistics, 1978:

	<i>Fijians</i>	<i>Indians</i>	<i>Others</i> ¹	<i>Total</i>
Births	6,953	9,329	899	17,181
Deaths	1,037	1,329	190	2,556

¹ Includes Europeans, Part-Europeans, Rotumans, Other Pacific Islanders and Chinese.

CONSTITUTION AND GOVERNMENT. Fiji became an independent nation within the Commonwealth on 10 Oct. 1970. This had been agreed at a constitutional conference held in London in April 1970. There is a Lower House, the House of Representatives, which consists of 52 elected members and an Upper House, the Senate, of 22 members (8 nominations by the Council of Chiefs, 7 by the Prime Minister, 6 by the Leader of the Opposition and 1 by the Rotuma Council).

At elections held in Sept. 1977 for the 52 seats in the House of Representatives the Alliance Party won 36 seats, two factions of the National Federation Party won 15 seats and there was 1 independent.

Local Government. The Fijian Administration, established in 1876, had jurisdiction over all Fijians.

Fiji is divided into 13 provinces, each with its own council. Elections to these councils in 90 constituencies were conducted for the first time in 1967 on a full adult franchise amongst Fijians.

The councils have wide powers to make by-laws and draw up their own budget subject to confirmation by the Fijian Affairs Board. Each council has its own treasury and levies rates to raise its revenue. These provincial rates vary from \$F6 to \$F9 per annum for every male adult, but those maintaining 5 or more children pay lower rates until their children become taxpayers. A start has been made, however, to change over to a system of land rating based upon the unimproved value of Fijian-owned land. This is considered to be more equitable and related to ability to pay.

These newly elected councils held their inaugural and 1968 budget meetings

towards the end of 1967, when the chairman for each of these 13 councils was also elected from among its members. Members were elected for 2 years and new elections were held in 1969.

At the apex of the Fijian Administration is the Great Council of Chiefs presided over by the Minister for Fijian Affairs and Rural Development. The Council of Chiefs consists of 22 Fijian members elected to the House of Representatives, 30 representatives, elected by the Provincial Councils and 15 representatives nominated by the Minister for Fijian Affairs and Rural Development.

The Council of Chiefs advises the Government generally on Fijian affairs.

Governor-General: Ratu Sir George Cakobau, GCMG, GCVO, OBE.

Prime Minister: Ratu Sir Kamisese Mara, KBE.

Flag: Light blue with the Union Flag in the canton and the shield of Fiji in the fly.

DEFENCE. The Fiji Military Forces Ordinance, 1949, provides for the maintenance of a small regular force, with territorial units and trained reserves. This force, comprising 2 infantry battalions, numbers (1980), 1,300.

Navy. A naval squadron has been raised to perform fishery protection, surveillance, hydrographic surveying and coastguard duties. Present strength is 3 coastal mine-sweepers (*ex-US MSC*) and 1 survey craft. Naval personnel in 1981 numbered 20 officers and 140 ratings. The naval base is HMFS *Viti* in Suva.

INTERNATIONAL RELATIONS

Membership. Fiji is a member of the UN, the Commonwealth, the Colombo Plan and is an ACP state of the EEC.

ECONOMY

Budget. The financial year corresponds with the calendar year. All figures are in S Fijian.

	1976	1977	1978	1979	1980
Revenue	128,785,048	151,700,000	161,600,000	198,476,000	223,543,000

For budget purposes, revenue and expenditure are divided into two parts: Operating and Capital Operating. Revenue comes mainly from taxation, customs and excise duty, licences and fees. In 1978, of the total revenue collected over SF59m, was derived from customs and excise duty and over SF77m, from income tax collections. The total capital expenditure in 1978 was SF49,542,112.

Barclays International has a branch in Suva.

The National Bank of Fiji had, at the end of 1978, deposits amounting to SF29,177,274 due to 190,621 accounts. The headquarters are at Suva, and there are 58 agencies, 4 branches and 3 sub-branches throughout Fiji.

NATURAL RESOURCES

Agriculture. Some 600,000 acres of land are in agricultural use. Sugar-cane is the principal cash crop, accounting for more than two-thirds of Fiji's export earnings; one quarter of the population depend on it directly for their livelihood. Copra, Fiji's second major cash crop, provides coconut oil and other products for export and employs nearly as many workers as the sugar industry. Ginger is the third major

export crop replacing bananas which has declined through disease and hurricane. Other agricultural products include rice, cocoa, maize, tobacco and a variety of fruits and vegetables.

Fiji has a small but fast developing livestock industry.

Livestock (1979): Cattle, 170,000; horses, 39,000; goats, 55,000; pigs, 18,000; poultry, 870,000.

Forestry. Fiji supplies the bulk of its own timber requirements. A comprehensive pine scheme has been implemented with the aim of planting 186,000 acres by 1988. So far some 59,954 acres have been planted with a further 13,000 acres being developed a year. The Government provides extension and research services, agricultural subsidies, training and marketing services.

INDUSTRY AND TRADE

Industry. Major industries include 4 large sugar-mills, the goldmines (92,300 grammes in 1979) and 3 mills which process copra into coconut oil and coconut meal. There is a great variety of light industries.

COMMUNICATIONS

Roads. There is a principal highway round Viti Levu, the distance from Suva to Lautoka *via* Ra, Tavua and Ba (King's Road) being 166 miles and *via* Navua and Sigatoka and Nadi (Queen's Road) being 156 miles. Branch roads run 34 miles along the Sigatoka Valley, 18 miles to Nadarivatu and Navai, 5½ miles to Vatukoula Goldfields, 35 miles to Serea and 7 miles to Vunidawa.

On Vanua Levu highways are in the neighbourhood of Labasa (Nasea) and Nasavusavu (Valeci). There are highways, 92 miles south and 36 miles west of Labasa. A highway extends to Buca Bay, 45 miles east of Nasavusavu. Coastal roads connect villages and plantations on parts of the islands of Taveuni and Ovalau. Work is now complete on the reconstruction of the new bitumen surfaced highway between Suva and Nadi except for the section between Deuba and Sigatoka. The construction of a new gravel surfaced highway on Vanua Levu to link the towns of Nasavusavu and Labasa is almost complete.

Total road mileage is 2,019, of which 218 are sealed (paved), 1,663 are gravelled and 138 are unimproved.

Railway. There is a private 2-ft-gauge railway (Fiji Sugar Corporation's Railway) of 400 miles from Tavua to Sigatoka serving most of the sugar-cane producing area.

Aviation. Fiji provides an essential staging point for long-haul trunk-route aircraft operating between North America, Australia and New Zealand. Under the South Pacific Air Transport Council, which comprises the UK, Australia, New Zealand

and Fiji, the international airport at Nadi has been developed and administered. Fourteen other airports are in use for domestic services.

Long-haul services touching Nadi airport are operated by JAL (Tōkyō, Auckland), Air New Zealand (Auckland, Pago Pago, Honolulu, Los Angeles), Qantas (Sydney, Honolulu, San Francisco; Sydney, Tahiti, Mexico), Union de Transports Aériens (Sydney, Nouméa, Tahiti, Los Angeles), Canadian Pacific Airlines (Vancouver, Honolulu, Auckland, Sydney), Continental Airlines (West Coast, USA, Hawaii, Fiji, Australia).

Domestic and regional services are operated by Air Pacific (Tonga, also including Australia (Brisbane) and New Zealand (Auckland), Vanuatu, Solomon Islands, Kiribati, Tuvalu, Western Samoa); Polynesian Airlines (Western Samoa) and Air Nauru. Fiji Air provides a domestic island service.

Shipping. In 1977, 167 vessels of 6,298 net tons were registered. Suva has 4 slipways of 100, 200, 500 and 1,500 tons, and there are 3 shipbuilding and repair firms.

Post. There are 35 post offices and 158 agencies. Overseas postal communications are excellent. There is a daily air service to the major countries of the world and frequent dispatches by sea to UK, Australia, New Zealand and North America. Overseas telephone and telegram services are available through the Commonwealth cable to most countries except those in the South Pacific, which are served by direct radio circuits. The automatic telex network operates through New Zealand into the international telex system. There are ship-to-shore radio facilities. There were 47,500 telephones in 1979.

Cinemas. In 1979 there were 48 cinemas with a seating capacity of 28,100.

JUSTICE, RELIGION AND EDUCATION

Justice. Fijian courts have been abolished and merged into the magistrates' court.

Police. The Royal Fiji Police Force had (1979) a total strength of 1,363.

Religion. The 1976 census showed: Christians, 299,960; Hindus, 234,520; Muslims, 45,247; Confucians, 731.

Education (1980). School attendance is not compulsory in Fiji. There were 828 schools scattered over 56 islands, staffed by 6,500 teachers, of whom about 88·4% were trained. HISTORY. Since the Middle Ages Finland was a part of the realm of Sweden. In the 18th century parts of south-eastern Finland were conquered by Russia, and the rest of the country was ceded to Russia by the peace treaty of Hamina in 1809. Finland became an autonomous grand-duchy which retained its previous laws and institutions under its Grand Duke, the Emperor of Russia. After the Russian revolution Finland declared itself independent on 6 Dec. 1917. The Civil War began in Jan. 1918 between the 'whites' and 'reds', the latter being supported by Russian bolshevik troops. The defeat of the red guards in May 1918 consequently meant freeing the country from Russian troops. A peace treaty with Soviet Russia was signed in 1920.

On 30 Nov. 1939 Soviet troops invaded Finland, after Finland had rejected territorial concessions demanded by the USSR. These, however, had to be made in the peace treaty of 12 March 1940, amounting to 32,806 sq. km and including the Carelian Isthmus, Viipuri and the shores of Lake Ladoga.

When the German attack on the USSR was launched in June 1941 Finland again became involved in the war against the USSR. On 19 Sept. 1944 an armistice was signed in Moscow. Finland agreed to cede to Russia the Petsamo area in addition to cessions made in 1940 (total 42,934 sq. km) and to lease to Russia for 50 years the Porkkala headland to be used as a military base. Further, Finland undertook to pay 300m. gold dollars in reparations within 6 years (later extended to 8 years). The peace treaty was signed in Paris on 10 Feb. 1947. The payment of reparations was completed on 19 Sept. 1952. The military base of Porkkala was returned to Finland on 26 Jan. 1956.

CONSTITUTION AND GOVERNMENT. Finland is a republic according to the Constitution of 17 July 1919.

Parliament consists of one chamber of 200 members chosen by direct and proportional election, in which all Finnish citizens (men or women) who are 18 years have the vote (since 1969). The country is divided into 15 electoral districts with a representation proportional to their population. Every citizen over the age of 20 is eligible for Parliament, which is elected for 4 years, but can be dissolved sooner by the President.

The President is elected for 6 years by a college of 300 electors, elected by the votes of the citizens in the same way as the members of Parliament.

President of Finland: Dr Urho Kekkonen (elected 15 Feb. 1956, re-elected 15 Feb. 1962, 15 Feb. 1968, mandate extended by special law to March 1978 on 17–18 Jan. 1973 and re-elected 15 Feb. 1978 for a further 6-year term).

State of Parties for Parliament elected on 18–19 March 1979: Conservative 47; Liberals, 4; Swedish Party, 10 (including 1 for Coalition of Åland); Centre, 36; Rural, 7; Social Democratic Party, 52; Communists, 35; Christian League, 9.

The Council of State (Cabinet), appointed by the President in May 1979 was composed as follows:

Prime Minister: Mauno Koivisto.

Agriculture and Forestry: Taisto Tähkämaa. *Foreign Affairs:* Paavo Väyrynen. *Justice:* Cristoffer Taxell. *Deputy Prime Minister and Minister of Interior:* Eino Uusitalo. *Interior (Deputy):* Johannes Koikkalainen. *Defence:* Lasse Äikäs. *Finance:* Ahti Pekkala. *Economics and Finance:* Pirkko Työläjärvi. *Education:* Pär Stenbäck. *Education (Deputy):* Kalevi Kivistö. *Communications:* Veikko Saarto. *Trade and*

Industry: Ulf Sundqvist. *Social Affairs and Health:* Sinikka Luja-Penttilä. *Social Affairs and Health (Deputy):* Katri-Helena Eskelinen. *Labour:* Arvo Aalto. *Foreign Trade:* Esko Rekola.

National flag: White with a blue Scandinavian cross.

National anthem: Maamme: Swedish: Vårt land (words by J. L. Runeberg, 1843; tune by F. Pacius, 1948).

Finnish and Swedish are the official languages of Finland.

Local Government. For administrative purposes Finland is divided into 12 provinces (*lääni*, Sw.: *län*). The administration of each province is entrusted to a governor (*maaherra*, Sw.: *landshövding*) appointed by the President. He directs the activities of the provincial office (*lääninhallitus*, Sw.: *länsstyrelse*) and of local sheriffs (*nimismies*, Sw.: *länsman*). In 1979 the number of sheriff districts was 227.

The unit of local government is the commune. Main fields of communal activities are local planning, roads and harbours, sanitary services, education, health services and social aid. The communes raise taxes independent from state taxation. Two different kinds of communes are distinguished: Urban communes (*kaupunki*, Sw.: *stad*) and rural communes. In 1980 there were altogether 464 communes, of which 84 were urban and 380 rural. In all communes communal councils are elected for terms of 4 years; all inhabitants (men and women) of the commune who have reached their 18th year are entitled to vote and eligible. The executive power is in each commune vested in a board which consists of members elected by the council and one or a few chief officials of the commune. Several communes often form an association for the administration of some common institution, e.g., a hospital or a vocational school.

The autonomous county (*landskap*) of Åland has a county council (*landsting*) of one chamber, elected according to rule corresponding to those for parliamentary elections. In addition to its provincial governor it has a county board with executive power in matters within the field of the autonomy of the county.

CONSTITUTION AND GOVERNMENT. The Constitution of the Fifth Republic, superseding that of 1946, came into force on 4 Oct. 1958. It consists of a

preamble, dealing with the Rights of Man, and 92 articles.

Emphasis is placed on the rôle of the President of the Republic. 'He sees that the Constitution is respected; he ensures, through his arbitration, the regular functioning of public powers as well as the continuity of the state. He is the guarantor of national independence' (Art. 5). He is elected by direct universal suffrage for a 7-year term (Art. 6). He nominates and dismisses the Prime Minister and the other members of the government (Art. 8). He can dissolve the National Assembly after consultation with the Prime Minister and the presidents of the assemblies (Art. 12). He appoints to all military and civil offices of the Republic (Art. 13). 'When the institutions of the Republic, the independence of the nation, the integrity of its territory or the fulfilment of its international commitments are threatened with immediate and grave danger, and when the regular functioning of constitutional public powers is interrupted, the President of the Republic takes the measures demanded by the circumstances, after official consultation with the Prime Minister, the presidents of the assemblies and the Constitutional Council' (Art. 16).

Previous Presidents of the Fifth Republic: Charles de Gaulle, 8 Jan. 1959–28 April 1969 (resigned); Alain Poher (interim) 28 April 1969–20 June 1969; George Pompidou, 20 June 1969–2 April 1974 (died); Alain Poher (interim) 2 April 1974–27 May 1974.

'The government determines and conducts the policy of the nation' (Art. 20); 'the government may ask parliament for authority to take, by decrees and within a limited period, such measures as are normally within the province of the law' (Art. 38). Ministers must not be members of parliament (Art. 23). Votes of censure can only be carried by a majority of the members constituting the Assembly (Art. 49). The 2 ordinary sessions in autumn and spring are curtailed to a total of 5 months (Art. 28).

The 'Constitutional Council' has to uphold the fairness of the elections and act as a guardian of the constitution. It is composed of 9 members, 3 of whom are nominated by the President of the Republic, 3 by the President of the National Assembly and 3 by the President of the Senate. In addition, past Presidents of the Republic are, by right, members of the Constitutional Council (Art. 56).

The Senate is composed of 305 members, of which one-third is elected every 3 years (for a 9-year term); it comprises 287 Senators representing Metropolitan Departments, 8 Overseas Departments, 1 Mayotte (*collectivité particulière*), 3 Overseas Territories, and 6 Frenchmen residing outside France. Following partial elections in Sept. 1980, the Senate was composed of 41 *Rassemblement Pour la République* (Gaullists); 52 *Parti Républicain* (Giscardians); 67 *Union Centrist*; 26 *Gauche démocratique*; 13 *Mouvement des Radicaux de Gauche* (MRG); 69 *Parti Socialiste*; 23 *Parti communiste*; 13 *non-inscrits* (unaffiliated), with 1 seat vacant. In 1983 the Senate will be enlarged to 316 members.

The National Assembly comprises 491 members, composed of 474 representing Metropolitan constituencies, 11 Overseas Departments, 1 Mayotte (*collectivité particulière*), and 5 Overseas Territories. Elections took place in March 1978, resulting in a new composition of 153 RPR (Gaullists), 137 *Union de la Démocratie Française* (Giscardians and Centrist Union), 10 MRG, 104 *Parti socialiste*, 86 *Parti communiste*, and 1 far left.

President of the Republic: Valéry Giscard d'Estaing; elected 19 May 1974. Assumed office 27 May 1974.

The Cabinet, as in March 1981:

Prime Minister: Raymond Barre.

Justice: Alain Peyrefitte.

Defence and Co-operation: Robert Galley.

There are also 18 Secretaries of State.

National flag: The Tricolour of three vertical stripes of blue, white, red.

National anthem: La Marseillaise (words and tune by C. Rouget de Lisle, 1792).

Local Government: For administrative purposes metropolitan France is divided into 22 regions for national development work, for planning and for budgetary policy. Each Region has an appointed Prefect as its executive head aided by an indirectly-elected Regional Council.

There are 96 *départements* within the 22 regions each with an appointed Prefect as the executive head, and a *Conseil Général* who is directly elected.

The *arrondissement* (324 in 1975) and the *canton* (3,509 in 1975), have (1981) little administrative significance, although the departmental prefects have a sub-prefect in each *arrondissement*.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1975, in the 96 metropolitan departments, 36,394 communes. Most of them (31,593) had less than 1,500 inhabitants, and 16,550 had less than 300, while 229 communes had more than 30,000 inhabitants. A law of 16 July 1971 causes the smallest *communes* either to merge or to re-group themselves into combined administrative units of 'communes' or into urban communities. The local affairs of the commune are under a Municipal Council, composed of from 9 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 6 years by French citizens of 21 years or over after 6 months' residence.

Each Municipal Council elects a mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the prefect.

In Paris the *Conseil de Paris* is composed of 109 members elected from the 20 *arrondissements* which have been grouped in 9 sectors for this purpose.

DEFENCE. The President of the Republic exercises command over the Armed Forces. He is assisted by the research organization of the High Council of Defence (*Conseil Supérieur de la Défense Nationale*) and two Committees (*Comité de Défense* and *Comité de Défense restreint*) which formulate directives. The Prime Minister is responsible for the national defence, he exercises his military responsibilities through the General Secretariat of National Defence (SGDN). Under the Prime Minister's authority, the *Comité d'Action Scientifique de Défense* co-ordinates research.

On 5 July 1969 the Army Ministry was replaced by the Ministry of State for National Defence which is responsible for the Army, Air Force and Navy. In addition to the powers of the Army Ministry, the Ministry of State prepares general directives for negotiations relating to defence. It has SGDN at its disposal for exercising these powers. It is assisted by the Departmental Assistant for Weapons, the Secretary-General for Administration, the Chief of Staff of the Armed Forces and the Chiefs of Staff of the 3 Armed Forces—Army, Navy and Air.

In 1962 the Armed Forces were reorganized in 3 groups: (1) nuclear strategic forces, (2) operational forces, (3) home defence forces.

French forces are not formally committed to NATO.

Army. The Army consists of regular officers and n.c.o.s, long-term n.c.o.s and soldiers, and conscripts serving 12 months.

The peace-time units comprise infantry, armoured troops and cavalry, artillery, engineering, signals, transport, matériel, naval infantry and artillery. In addition, there are the Foreign Legion, mountain and airborne troops and other specialized units.

In 1980 the effective strength of the Army was 321,320 all ranks.

Higher military instruction is provided in 3 stages: the staff school (*École d'État-major*) for officers of formation staffs; the *École Supérieure de Guerre* for officers earmarked for the higher command; the *Institut des Hautes Études de Défense Nationale* where high-ranking officers and civilians study together the problems of national defence.

Light Army Aircraft. Formed in 1952, the *Aviation Légère de l'Armée de Terre* (ALAT) is a well-equipped force, with 75 light aeroplanes and more than 550 helicopters for observation, reconnaissance, combat area transport, liaison and supply duties. Effective strength, 1979, 6,450.

The *Gendarmerie* is an integral part of the Army but also co-operates with the civil administration in maintaining public order. Effective strength, 1980, 79,486.

Navy. The Navy is under the supreme direction of the Minister of Defence, being administered by the Chief and Deputy Chiefs of Naval Staff.

All naval aircraft and coastal defences are under the control of the Navy, and have been reorganized in 3 coast 'naval frontier' districts (with headquarters in Cherbourg, Brest and Toulon), in relation to the aircraft attached to the active fleet.

The French Navy is manned partly by conscription but mainly by voluntary enlistment. In 1981 the active personnel was 69,000 officers and men, including 9,000 in the Naval Air Arm.

The following is a summary of the strength of the fleet at the periods shown:

One more nuclear-powered ballistic-missile submarine, 3 nuclear-powered fleet (torpedo armed) submarines, 3 guided missile destroyers and 8 *avisos* (escorts) are under construction. A prototype nuclear-powered helicopter carrier, 4 more nuclear-powered fleet, torpedo-armed (hunter-killer) submarines, 6 fast missile craft and 14 minehunters are projected.

The naval air arm, known usually as *Aéronavale*, has 2 squadrons of nationally designed Etendard IV-M transonic fighter-bombers, 1 squadron of Etendard IV-P reconnaissance fighters, 2 squadrons of US-built Crusader all-weather fighters, 3 squadrons of Alizé turboprop anti-submarine aircraft, 5 maritime reconnaissance squadrons with Atlantic and Neptune aircraft and 3 anti-submarine and assault squadrons with Super Frelon and Sikorsky HSS-1 helicopters. Strength is 320 aircraft comprising 235 fixed-wing and 85 helicopters.

Air Force. Formed as the *Service Aéronautique* in April 1910, the *Armée de l'Air* is organized in 7 major commands. Its bases and installations were regrouped and modernized in 1967. The *Commandement des Forces Aériennes Stratégiques* (CFAS) commands the nuclear deterrent force. The *Commandement de la Force Aérienne Tactique* (FATAC) directs the tactical air forces, commands the air force reserve and is responsible for support of the ground forces. Under FATAC the 1st *Commandement Aérien Tactique* (1^o CATAC) controls tactical air units based in eastern France; the 2nd *Commandement Aérien Tactique* (2^o CATAC) controls the reserve forces and the air component of the *Force d'Intervention*. The *Commandement du Transport Aérien Militaire* (COTAM) is responsible for air transport operations and for the training and transport of airborne forces. The *Commandement Air des Forces de Défense Aérienne* (CAFDA) controls air defence forces. The *Commandement des Écoles de l'Armée de l'Air* (CEAA) is responsible for training the personnel for all branches of the Air Force. The *Commandement des Transmissions* has responsibility for communications and electronic warfare. Finally, the *Commandement du Génie de l'Air*, made up mainly of Army personnel, undertakes airbase construction and maintenance under Air Force control.

The home-based French Air Force is divided territorially among 4 metropolitan air regions (Metz, Villacoublay, Bordeaux, Aix-en-Provence); overseas, small air units are integrated into the local joint-service commands. There are about 40 combat squadrons plus about 30 transport, helicopter and support squadrons, and the Air Force uses a total of 66 bases.

The strategic, tactical and air defence forces are equipped entirely with jet aircraft. The CFAS has 33 first-line Mirage IV supersonic nuclear bombers, and 14 reserves, deployed in 2 wings (each 3 squadrons) supported by 11 C-135F refuelling tanker transports. Twelve Mirage IVs are equipped for reconnaissance missions. The 1^o CATAC deploys 7 wings (20 squadrons), consisting of about 180 Mirage III-E and 5F ground-attack and III-R reconnaissance fighters, and 120 Jaguar strike aircraft, plus 2 OCUs equipped with Mirage III-Bs and Jaguars. The air defence forces have 4 wings, with 7 squadrons of Mirage F.1 multi-mission fighters and 2 squadrons of Mirage III-Cs. The COTAM is equipped with 3 wings of turboprop Transall C.160 and Noratlas piston-engined transports, supplemented by 2 groups of DC-8, Caravelle, Nord 262, Mystère 20 and M.S. 760 Paris aircraft. Other units are equipped with Broussard observation and general-purpose monoplanes, and about 125 Alouette II III and Puma helicopters. Training aircraft include CAP-10 piston-engined primary trainers, Magister jet basic trainers, Alpha Jet, Mystère IV (to be

replaced with Alpha Jets) and Mirage III-B advanced trainers, and two-seat Jaguars.

Total personnel (1980), 103,460; 460 combat aircraft.

ECONOMY

Planning. The post-war reconstruction and expansion of the French economy began under the guidance of the first 'Monnet plan' (1947-50), named after the then director of the planning office, Jean Monnet. This was followed by the second and third plans (1954-57, 1958-61), an intermediate plan for 1960 and 1961, the fourth plan, 1962-65, fifth plan, 1966-70, sixth plan, 1971-75, and seventh plan, 1976-80.

Currency. The unit of currency is the *franc*. Coins are issued for 5, 10, 20 and 50 centimes, 1, 2, 5 and 10 francs; and bank-notes for 10, 50, 100 and 500 francs. In March 1981. £sterling = 11.05 *francs*; US\$1 = 4.99 *francs*.

Banking. The *Banque de France*, founded in 1800, and placed under the authority of a state-appointed Governor in 1806, has the monopoly (since 1848) of issuing bank-notes throughout France. Note circulation on 2 Jan. 1980 was 129,276m. francs.

On 2 Dec. 1945 a law was passed to nationalize the *Banque de France* and the 4 (from 1966, 3) principal deposit banks. It also established a new body, the National Credit Council, formed to regulate banking activity and consulted in all political decisions on monetary policy. This new body comprises 45 members nominated by the Government; its president is the Minister for the Economy, its vice-president is the Governor of the *Banque de France* which as a Central Bank puts monetary policy into effect and supervises its application.

The rest of the banking system comprises the deposit banks, the popular banks, the *Crédit agricole*, the *Crédit mutuel*, the *Banque française du commerce extérieur* and the various financial establishments. The deposit banks are (i) those nationalized in 1945: *Crédit Lyonnais* (founded 1863), *Banque Nationale de Paris* (founded by amalgamation 1966) and the *Société Générale* (founded 1864), and (ii) the non-nationalized banks, the principal ones being: *Crédit Industriel et Commercial*, *Crédit Commercial de France*, the *Banque de Paris et des Pays-Bas* and the *Crédit du Nord*. Total deposits and short- and medium-term bonds held by the banks on 2 Jan. 1980 was 1,057,589m. francs.

The state savings organization (*Caisse nationale d'épargne*) is administered by the post office on a giro system. On 2 Jan. 1980 the private savings banks (*Caisses d'épargne et de prévoyance*), numbering about 500 had 335,499m. francs in deposits: the state savings banks had 162,399m. francs in deposits. Deposited funds are centralized by a non-banking body, the *Caisse de Dépôts et Consignations*, which finances a large number of local authorities and state aided housing projects, and carries an important portfolio of transferable securities.

Weights and Measures. The metric system is in general use.

The principal plants are situated in Basse Seine (production in tonnes, 1972), 31.2m.; Mediterranean, 24.6m.; Atlantic, 15.4m.; Alsace, 12.6m., and Nord, 9m.

There has been considerable development of the production of natural gas and sulphur in the region of Lacq in the foothills of the Pyrenees. Production of natural gas was 7,695m. in 1977 and 7,869m. in 1978.

Employment (1975). Out of an economically active population of 21,061,215 persons, there are 2.01m. engaged in agriculture; 1,841,083 in building and public works; 6,327,818 in other manufacturing industries; 829,289 in transport; 3,632,478 in business, banking and insurance; 3,543,881 in services; 2,522,544 in commerce. In 1979, there were 21,486,426 employed (39.4% female), of whom 1,455,681 were foreign workers; there were 1,503,994 unemployed.

Trade Unions. The main unions considered as nationally representative are the CGT (Confédération Générale du Travail), which was founded in 1895 and has about 2.35m. members; the CGT FO (Confédération Générale du Travail-Force Ouvrière) which broke away from the CGT in 1948 as a protest against Communist influence therein and has about 900,000 members; the CFTC (Confédération Française des Travailleurs Chrétiens), which was founded in 1919 and has about 225,000 members following its break-away in 1964 from the main body of the union which continues under the new name of CFDT (Confédération Française Démocratique du Travail) and has about 890,000 members; the CGC (Confédération Générale des Cadres) formed in 1944 which only represents managerial and supervisory staff and has about 300,000 members.

Membership is estimated because unions are not required to publish figures; some publish none, others define 'membership' in different terms.

Except for the CGC unions operate within the framework of industries and not of trades. Their main fields of influence are: CGT—steel, metallurgy, building, chemicals, mining, printing, ports and dockyards, electricity and gas, railways; CGT FO—Civil service, Paris transport, agricultural and food trades, banking, insurance, electrical engineering, building and civil engineering, clothing, leather and hides; CFDT—metallurgy, rubber, oil, textiles, electrical engineering, banking, insurance; CFTC—mining, banking, insurance, air traffic control, oil, glass, pottery.

Railways. As from 1 Jan. 1938 all the independent railway companies were merged with the existing state railway system in a Société Nationale des Chemins de Fer Français, in which the State holds 51% of the shares.

In 1979, the State railway totalled 34,444 km (9,863 km electrified) of 1,435 mm gauge, and ran 53,560m. passenger-km and 70,680m. tonne-km. A new railway for high-speed trains is under construction between Paris and Lyon, the first section due to open in 1981. In addition to the main network, there are some 2,000 km of independent or state-run minor railways.

The Paris transport network consisted in 1980 of 278 km of underground railway (métro) and regional express railways and 2,096 km of bus routes. In 1978 it carried 1,104m. passengers on the métro and 709m. by bus.

In 1978 there were 8,623 km of navigable rivers, waterways and canals, (of which 1,583 km accessible to vessels over 3,000 tons) with a total traffic of 91.56m. tonnes.

Post and Broadcasting. In 1977 the receipts on account of posts, telegraphs and telephones amounted to 56,275m. francs.

On 31 Dec. 1978 the telephone system (government-owned) had 19.87m. subscribers; the Paris region (including the Paris and Seine-et-Marne, Yvelines, Essonne, Hauts-de-Seine, Seine-Saint-Denis, Val-de-Marne and Val-d'Oise departments) accounted for 4,153,586 in 1978.

Radio and television broadcasting was reorganized under the Act of 7 Aug. 1974 which replaced the Office de Radiodiffusion Télévision Française with 4 broadcasting companies, a production company and an audio-visual institute. Organization, development, operation and the maintenance of networks and installations became the responsibility of the Public Broadcasting Establishment. Radio programmes are broadcast from 298 transmitters (including 260 VHF) by 3 stations: *France Inter*, *France Musique* and *France Culture*. Television programmes are broadcast from 325 transmitters and 4,661 relay stations on 3 channels. There were about 18.22m. sets in use in 1980 (of which 7.6m. in colour).

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Since 1976, 469 *tribunaux d'instance* (10 in overseas departments), under a

single judge each and with increased material and territorial jurisdiction, have replaced the former *juges de paix* (1 in each canton); and 181 *tribunaux de grande instance* (6 in overseas departments) have taken the place of the 357 *tribunaux de première instance* (1 in each *arrondissement*).

The *tribunaux de grande instance* usually have a collegiate composition, however a law dated 10 July 1970 has allowed them to administer justice under a single judge in some civil cases.

All petty offences (*contraventions*) are disposed of in the Police Courts (*Tribunaux de Police*) presided over by a Judge on duty in the *tribunal d'instance*. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges who administer both criminal and civil justice. An Act of 29 Dec. 1972 established that there is only 1 judge; in some cases, the correctional courts may consist of a single judge each. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who either dismisses the case or sends it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge.

The Conciliation Boards (*Conseils des Prud'hommes*) composed of an equal number of employers and employees deal with small trade and industrial disputes. Commercial litigation goes to the Commercial Courts (*Tribunaux de Commerce*) composed of tradesmen and manufacturers elected for 2 years. The judges hold office for 2 years and they can be re-elected; 3 years for the President.

When the decisions of any of these Tribunals are susceptible of appeal, the case goes to one of the 34 Courts of Appeal (*Cours d'Appel*), (including 3 in overseas departments and 1 in an overseas territory), composed each of a president and a variable number of members.

The Courts of Assizes (*Cours d'Assises*), composed each of a president, assisted by 2 other magistrates who are members of the Courts of Appeal, and by a jury of 9 people, sit in every *département*, when called upon to try very important criminal cases. The decisions of the Courts of Appeal and the Courts of Assizes are final; however, the Court of Cassation (*Cour de Cassation*) has discretion to verify if the law has been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment, and the cases have to be tried again by a Court of Appeal or a Court of Assizes.

A State Security Court has been established by 2 laws dated 15 Jan. 1963. It is usually composed of 3 civilian judges, including the president, and 2 judges of general or field officer rank, and has jurisdiction to deal with subversion in peace-time.

On 24 Jan. 1973 the first Ombudsman (*médiateur*) was appointed for a 6-year period.

The French penal institutions consist of: (1) *maisons d'arrêt et de correction*, where persons awaiting trial as well as those condemned to short periods of imprisonment are kept; (2) central prisons (*maisons centrales*) for those sentenced to long imprisonment; (3) special establishments, namely (a) schools for young adults, (b) hostels for old and disabled offenders, (c) hospitals for the sick and psychopaths, (d) institutions for recidivists. Special attention is being paid to classified treatment and the rehabilitation and vocational re-education of prisoners including work in open-air and semi-free establishments. There are 2 penal institutions for women.

Juvenile delinquents go before special judges and courts; they are sent to public or private institutions of supervision and re-education.

The population at 1 April 1980 of all penal establishments was 37,481 men and 1,276 women.

Religion. No religion is officially recognized by the State. Under the law promulgated on 9 Dec. 1905, which separated Church and State, the adherents of all creeds are authorized to form associations for public worship (*associations culturelles*). The law of 2 Jan. 1907 provided that, failing *associations culturelles*, the buildings for public worship, together with their furniture, would continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but in each case there was required an administrative act drawn up by the *prefet* as regards buildings belonging to the State or the departments, and by the *maire* as regards buildings belonging to the communes.

There are 18 archbishops and 92 bishops of the Roman Catholic Church, with (1974) 43,557 clergy of various grades and 45.3m. church members. The Protestants of the Augsburg confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is in Paris. In 1975 communicant Protestants numbered 750,000. There were (1978) about 2m. Moslems.

Education. The primary, secondary and higher state schools constitute the 'Université de France'. The Supreme Council of 84 members has deliberative, administrative and judiciary functions, and a Consultative Committee advise respecting the working of the school system, but the inspectors-general are in direct communication with the Minister. For local education administration France is divided into 25 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education. Each is under a Rector, and each is provided with academy inspectors, 1 for each department.

By decree of 6 Jan. 1959 the whole system of public instruction was reorganized and the structure of the Ministry of National Education has consequently been modified. A further Education Act was passed on 11 July 1975. Compulsory education is now provided for children of 6–16. The educational stages are as follows:

1. Non-compulsory pre-school instruction for children aged 2–5, to be given in infant schools or infant classes attached to primary schools.

2. Compulsory elementary instruction for children aged 6–11, to be given in primary schools and certain classes of the *lycées*. It consists of 3 courses: preparatory (1 year), elementary (2 years), intermediary (2 years). Physically or mentally handicapped children are cared for in special institutions or special classes of primary schools.

3. *Enseignement du Second Degré*, for pupils aged 11–18:

(a) *Enseignement du 1^{er} cycle du Second Degré*; 4 years of study in the *lycées*, *Collèges d'Enseignement Secondaire* or *Collèges d'Enseignement Général*.

(b) *Enseignement du Second Cycle*:

Long, général or *professionnel* provided by the *lycées* and leading to the *baccalauréat* or to the *baccalauréat de technicien* after 3 years.

Court, professional courses of 3, 2 and 1 year are taught in the *lycées d'enseignement professionnel*, or the specialized sections of the *lycées*, CES or CEG.

The following table shows the various types of schools in 1977–78 and the numbers of enrolled pupils:

The state schools in 1978 had 64,676 nursery, 172,969 primary, 18,908 special school, 143,572 secondary and 44,624 secondary technical school and 65,797 grammar school (*lycée*) teachers.

Higher Instruction is supplied by the State in the universities and in special schools, and by private individuals in the free faculties and schools. The law of 12 July 1875 provided for higher education free of charge. This law was modified by that of 18 March 1880, which granted the state faculties the exclusive right to confer degrees. A decree of 28 Dec. 1885 created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of 10 July 1896.

The law of 12 Nov. 1968 laying down future guidelines for higher education redefined the activities and working of universities. Bringing several disciplines together, 780 units for teaching and research (UER—Unités d'Enseignement et de Recherche) were formed which decided their own teaching activities, research programmes and procedures for checking the level of knowledge gained. They and the other parts of each university must respect the rules designed to maintain the national standard of qualifications.

The UERs form the basic units of the 62 Universities, 6 Universities Centres and 3 National Polytechnic Institutes, all of which have university status. They are grouped geographically into 23 *académies* with student populations in 1977-78 as follows:

<i>Academie</i>	1977-78	<i>Academie</i>	1977-78	<i>Academie</i>	1977-78

In 1977-78 there were also 94,700 students in preparatory classes leading to the *Grandes Écoles*, the *Sections de Techniciens Supérieurs* and other bodies; there were also 27,700 students in *Écoles normales d'instituteurs*.

The other higher institutions under the Ministry of Public Instruction are the Collège de France (founded by Francis I in 1530), which has courses of study bearing on various subjects (literature and language, archaeology, mathematical, natural science, psychology and social science, political economy, etc.); the Museum of Natural History, giving instruction in science and natural history; the *École Pratique de Hautes Études* (history and philology, mathematical and physico-chemical sciences, natural science, theology, economics and social science), having its seat at the Sorbonne; the *École Normale Supérieure*, which prepares teachers for secondary education and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the *École des Chartes*, which trains archivists and palaeographers; the *École des Langues Orientales vivantes*; the *École du Louvre*, devoted to art and archaeology; the Bureau des Longitudes, the central meteorological bureau; the Observatoire de Paris; and the French Schools at Athens, Rome, Cairo and South-East Asia.

Outside Paris there are 12 observatories (Meudon, Besançon, Bordeaux, etc.). The observatory at Nice belongs to the University of Paris.

There are free faculties in Paris (the Catholic Institute of Paris comprising theology and literary studies), Angers, Lille, Lyon and Toulouse.

Professional and Technical Instruction. The principal institutions of higher or technical instruction are: (i) The *Grandes Écoles* with 136,700 students in 1977-78, the Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the *École Central des Arts et Manufactures* (953 students in 1971-72), the *École des Hautes Études Commerciales* (803 students in 1972-73), 17 higher schools of commerce (4,461 pupils in 1969-70), under the Ministry of Public Instruction; (ii) the National Agronomic Institute at Paris, the veterinary school at Maisons-Alfort, Lyon and Toulouse, a school of forestry at

Nancy, Écoles Nationales Supérieures Agronomiques at Grignon, Rennes, Montpellier, Nancy and Toulouse, 98 schools of agriculture, etc., under the Ministry of Agriculture; (iii) the École Supérieure de Guerre, the École Polytechnique, the military school at Coëtquidan (formerly St Cyr), the École d'Artillerie at Fontainebleau, the École de Cavalerie at Saumur and other schools under the Ministry of Defence; the Naval School at Brest under the Ministry of Marine; (iv) the School of Mines at Paris, the School of Civil Engineering at Paris, the School of Mines at St Etienne and the Schools of Miners at Alès and Douai with other schools under the Ministry of Public Works; (v) the École Nationale Supérieure des Beaux Arts, the École Nationale Supérieure des Arts Décoratifs and the Conservatoire de Musique et de Déclamation under the Department of Fine Arts, which is attached to the Ministry of Cultural Affairs. In the provinces there are national schools of fine arts, and schools of music, and several municipal schools, as well as free subventional schools, etc.

Health. At the end of 1978 there were 97,168 physicians, 34,887 pharmacists, 28,852 dentists and 8,999 midwives practising. There were 1,062 public hospitals (376,125 beds) including 205 public mental hospitals (120,466 beds) and 2,506 private hospitals (175,261 beds) including 223 private mental homes (15,414 beds) at the end of 1976.

Social Welfare. An order of 4 Oct. 1945 laid down the framework of a comprehensive plan of Social Security and created a single organization which superseded the various laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc. All previous matters relating to Social Security are dealt with in the Social Security Code, 1956; this has been revised several times, and finally by orders laid down on 21 Aug. 1967, which were ratified on 31 July 1968. The Social Security general scheme covers all wage-earning workers in industry and commerce that are not covered by a special scheme of their own.

Contributions. All wage-earning workers or those of equivalent status are insured regardless of the amount or the nature of the salary or earnings. The funds for the general scheme are raised mainly from professional contributions, these being fixed within the limits of a ceiling (assessed at 53,640 francs per annum on 1 Jan. 1979) and calculated as a percentage of the salaries. The calculation of the contributions payable for family allowances, old age and industrial injuries relates only to this amount; on the other hand, the amount payable for sickness, maternity expenses, disability and death is calculated partly within the limit of the 'ceiling' and partly on the whole salary. These contributions are the responsibility of both employer and employee, except in the case of family allowances or industrial injuries, where they are the sole responsibility of the employer.

Contributions and benefits paid in 1979 (in 1m. francs) were:

	<i>Contributions</i>	<i>Benefits</i>
Health service	132,809	97,193
Individual injuries	20,653	14,908
Old age pensions	68,905	64,350
Family benefits	49,659	41,818

Self-employed Workers. From 17 Jan. 1948 allowances and old-age pensions were paid to self-employed workers by independent insurance funds set up within their own profession, trade or business. Schemes of compulsory insurance for sickness were instituted in 1961 for farmers and in 1966, with modifications in 1970, for other non-wage-earning workers.

Social Insurance. The orders laid down in Aug. 1967 ensure that the whole population can benefit from the Social Security Scheme; at present all elderly persons who have been engaged in the professions, as well as the surviving spouse, are entitled to claim an old-age benefit; 98% of the population, both working and retired, are covered by a compulsory scheme of insurance for sickness, the remaining 2% who are not covered by a compulsory insurance scheme have been able to participate in a voluntary scheme since 1967; the whole population benefit from the legislation regarding family allowances.

Sickness Insurance refunds the costs of treatment required by the insured, of the needs of his wife, of children under 16 and a half who are in his care and not earning, under 18 who are apprenticed, under 20 who are still studying or who

cannot work on account of some chronic illness or infirmity, as well as relations older or younger or of similar age living under the same roof who are engaged exclusively in domestic duties and in the education of at least 2 children under 14. A decree of 12 Oct. 1976 laid down conditions on which students of 20 or over at public or private educational institutions, who do not benefit from a social security scheme in their own right, are guaranteed insurance benefits for sickness or maternity, holding their parents entitlement until the end of the academic year in which they attain their 21st birthday, provided they have proof that their studies have been interrupted by illness. The general principles relating to medical care consist of: a free choice by the patient of his doctor, his pharmaceutical chemist, his place of treatment, etc.; the medical practitioner is granted freedom of prescription. Reimbursement is not as a rule made in full: the insured person usually pays between 10% and 30% of the legal rate except in cases of exemption. The insured who is recognized as medically unfit for work receives daily allowances equal to half of the wage which has been used to calculate the contributions, or to two-thirds of this if the person has 3 or more children. These allowances may be paid for 3 years, plus 1 additional year if the insured undergoes re-adaptation treatment or takes up fresh vocational training.

Maternity Insurance covers the costs of medical treatment relating to the pregnancy, confinement and lying-in period; the beneficiaries being the insured person or the spouse. The daily allowances are equal to 90% of the salary on which contributions were calculated.

Insurance for Invalids is divided into 3 categories: (1) those who are capable of working; (2) those who cannot work; (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 50% of the average salary for the last 10 years, with a minimum additional allowance for home help of 28,094.64 francs per year for the third category.

Old-age Pensions for workers were introduced in 1910 and revised in 1930, 1935, 1941 and 1945 and are now fixed by the Social Security Code of 28 Jan. 1972. Since 1975 people who have paid insurance for at least $37\frac{1}{2}$ years (150 quarters) receive at 60 a pension equal to 25% of basic annual salary, to be increased by 1.25% of the basic salary for every quarter that realization is deferred; thus at 65 the maximum pension rate is reached, equal to 50% of basic salary. People who have paid insurance for less than $37\frac{1}{2}$ years but no less than 15 years can expect a pension equal to as many 1/150ths of the full pension as their quarterly payments justify. In the event of death of the insured person, the husband or wife of the deceased person receives half the pension received by the latter. Compulsory supplementary schemes ensure for those to whom they apply benefits additional to the old-age pensions.

Family Allowances. The system comprises: (a) Family allowances proper, equivalent to 23% of the basic monthly salary (949 francs) for 2 dependent children, 41% for the third child, 37% for the fourth child, and 35% for the fifth and each subsequent child; a supplement equivalent to 9% of the basic monthly salary for the second and each subsequent dependent child more than 10 years old and 16% for each dependent child over 15 years. (b) Single wage-earner allowance (when the wife does not work), according to the number of dependent children. (c) Housewife allowance (when an employer's or self-employed person's wife does not work), according to the number of dependent children and the amount of net annual taxable income. (d) Maintenance grant for children under 3 years for families who do not receive either of the above grants, and to individual recipients whose resources are less than a maximum which varies according to the number of dependent children. (e) Antenatal grants. (f) Maternity grant equal to 260% of basic salary. (g) Allowance for supervision. (h) Allowance for specialized education of crippled minors. (i) Allowances for orphans. (j) Allowance for handicapped minors. (k) Allowance for opening of school term. (l) Allowance for accommodation, under certain circumstances (since July 1972 older persons and young workers enjoy equal benefit from the accommodation allowance). The allowance for single wage (b) allowance for the mother in the home (c) and the allowance for expenses respecting supervision have been subjected to an annual ceiling of resources. The amount is identical over the whole country.

Workmen's Compensation. The law passed by the National Assembly on 30 Oct. 1946 forms part of the Social Security Code and is administered by the Social Security Organization. Employers are invited to take preventive measures. The application of these measures is supervised by consulting engineers (assessors) of the local funds dealing with sickness insurance, who may compel employers who do not respect these measures to make additional contributions; they may, in like manner, grant rebates to employers who have in operation suitable preventive measures. The injured person receives free treatment, the insurance fund reimburses the practitioners, hospitals and suppliers chosen freely by the injured. In cases of temporary disablement the daily payments are equal to half the total daily wage received by the injured. In case of permanent disablement the injured person receives a pension, the amount of which varies according to the degree of disablement and the salary received during the past 12 months.

A law promulgated on 11 Oct. 1946 has created a medical labour service of doctors who hold a diploma of 'industrial health specialists'. These doctors are entrusted with the control of hygiene and health matters in all industrial undertakings or groups of undertakings. In addition, it is the duty of this medical service to examine wage-earners when they are engaged, to carry out periodical medical examinations and to ensure the application of the existing rules relating to safety in work.

Unemployment Benefits vary according to circumstances (full or partial unemployment) and means test. Since 1926 unemployment benefits have been paid from public funds. Full unemployment benefit amounts to 13.50 francs per day for the head of the family and 5.40 francs for the spouse or a dependent person. After 3 months the payment is reduced to 12.40 francs.

A collective agreement signed on 31 Dec. 1958 between the national council of employers and certain trade unions has established a system of special allowances for unemployed workers in industry and trade. The costs are shared by employers (1.92%) and employees (0.48%) and the benefits amount to 35% of the wages for 12 months, to be extended for workers of old age and long employment. The system is administered by commissions composed of representatives of employers and employees in equal proportion. A similar agreement of 22 Feb. 1968 extends the system to partial unemployment.

GUADELOUPE

HISTORY. Discovered by Columbus in Nov. 1493, the two main islands were then known as *Karukera* (Isle of Beautiful Waters) to the Carib inhabitants, who resisted Spanish attempts to colonize. A French colony was established on 28 June 1635, and apart from short periods of occupancy by British forces, Guadeloupe has since remained a French possession. On 19 March 1946 the status of Guadeloupe was changed to that of an Overseas Department; in 1973 it additionally became an administrative region.

AREA AND POPULATION. Guadeloupe consists of a group of islands in the Lesser Antilles. The two main islands, Basse-Terre to the west and Grande-Terre to the east, are separated by a narrow channel, called *Rivière Salée*. Adjacent to these are the islands of Marie Galante (*Ceyre* to the Caribs) to the south-east. La Désirade to the east, and the *Îles des Saintes* to the south. The islands of St Martin and St Barthélemy lie 250 km to the north-west.

	Area in sq. km.	Census 1974	Chief town
St Martin ¹	52	6,191	Marigot
St Barthélemy	21	2,491	Gustavia
Basse-Terre	943	135,746	Basse-Terre
Îles des Saintes	14	3,084	Terre-de-Bas
Grande-Terre	570	159,424	Pointe-à-Pitre
La Désirade	21	1,682	Grande Anse
Marie-Galante	158	15,912	Grand-Bourg
	1,780	324,530	

¹ Northern part only; the southern third belongs to the Netherlands.

The total population at the 1974 Census was 324,530. The vast majority are black or mulatto, but the populations of St Barthélemy and Les Saintes are still mainly descended from 17th-century Breton and Norman settlers. French is the official language, but a Creole dialect is also widely used.

The seat of government is Basse-Terre (15,457 inhabitants) at the south-west end of that island but the largest towns are Pointe-à-Pitre (23,889 inhabitants), the economic centre with a large commercial harbour, and its suburb Abymes (53,605).

Vital statistics (1976): Births, 6,926; deaths, 2,362.

GOVERNMENT. Guadeloupe is under an appointed Prefect, an elected general council of 36 members (assisted by an Economic and Social Committee of 40 members) and an elected regional council of 41 members. It is represented in the National Assembly by 3 deputies, in the Senate by 2 senators and on the Economic and Social Council by 2 councillors. There are 3 *arrondissements*, sub-divided into 34 communes, each administered by an elected municipal council.

OVERSEAS TERRITORIES

SOUTHERN AND ANTARCTIC TERRITORIES

Terres Australes et Antarctiques Françaises

The Territory of the TAAF was created on 6 Aug. 1955. It comprises the islands of Saint Paul and Amsterdam, formerly Nouvelle Amsterdam, the Kerguelen and Crozet islands, and Terre Adélie.

The Administrator is assisted by a consultative council which meets twice yearly in Paris; its members are nominated by the Government for 5 years. Members of the Scientific Council are appointed by the Senior Administrator after approval by the Minister in charge of scientific research. The administration has its seat in Paris.

Administrateur supérieur: Francis Jacquemont.

There are 4 postal agencies; the TAAF has its own postage stamps.

The scientific stations of the TAAF which took an important part in the International Geophysical Year, 1956-58, have been made permanent; the staff of the French bases (183 in 1975) is renewed annually and forms the only population.

Kerguelen islands, situated 48° 50' S. lat., 68° 70' E. long., consists of 1 large and 85 smaller islands and over 200 islets and rocks with a total area of 7,215 sq. km (2,786 sq. miles), of which Grande Terre occupies 6,675 sq. km (2,577 sq. miles). It was discovered in 1772 by Yves de Kerguelen, but was effectively occupied by France only in 1949. Port-aux-Français has several scientific research stations (92 members). Reindeer, trout and sheep have been acclimatized.

Crozet islands, situated 46° S. lat., 50° 52' E. long., consists of 5 larger and 15 tiny islands, with a total area of 300 sq. km (116 sq. miles); the western group includes Apostles, Pigs and Penguins islands; the eastern group, Possession and Eastern

islands. The archipelago was discovered in 1772 by Marion Dufresne, whose mate, Crozet, annexed it for Louis XV. A meteorological and scientific station (28 members) on Possession Island was built in 1964.

Amsterdam Island and **Saint-Paul Island**, situated 38–39° S. lat., 77° E. long. Amsterdam, with an area of 60 sq. km (25 sq. miles) was discovered in 1522 by Magellan's companions; Saint-Paul, lying about 100 km to the south, with an area of 7 sq. km (2.7 sq. miles), was probably discovered in 1559 by Portuguese sailors. Both were first visited in 1633 by the Dutch explorer, Van Diemen, and were annexed by France in 1843. They are both extinct volcanoes, barren and uninhabited; but in 1949 an administrative office, research stations (37 members) and a hospital were established at Camp Heurtin on Amsterdam.

Terre Adélie comprises that section of the Antarctic continent between 136° and 142° E. long., south of 60° S. lat. The ice-covered plateau has an area of about 432,000 sq. km (166,800 sq. miles), and was discovered in 1840 by Dumont d'Urville. A research station (34 members) is situated at Base Dumont d'Urville, which is maintained by the French Polar Expeditions.

HISTORY. The Gambia was discovered by the early Portuguese navigators, but they made no settlement. During the 17th century various companies of merchants obtained trading charters and established a settlement on the river, which, from 1807, was controlled from Sierra Leone; in 1843 it was made an independent Crown Colony; in 1866 it formed part of the West African Settlements, but in Dec. 1888 it again became a separate Crown Colony. The boundaries were delimited only after 1890. The Gambia achieved full internal self-government on 4 Oct. 1963 and became an independent member of the Commonwealth on 18 Feb. 1965.

A referendum was held in Nov. 1965 to decide whether the Gambia was to become a republic. The referendum failed, as any alteration of the Constitution requires a two-thirds majority. A further referendum was held in April 1970 and 84,968 were cast in favour of a republic and 35,683 against. The Gambia became a republic within the Commonwealth on 24 April 1970.

The largest tribe is the Mandingo (186,241), followed by the Fulas (79,994), Woloffs (69,291), Jolas (41,988) and Sarahulis (38,478). The capital is Banjul, and the other chief town is Kombo St Mary (38,934). There are 1,159 non-Africans.

CONSTITUTION AND GOVERNMENT. Parliament consists of the House of Representatives which consists of a Speaker, Deputy Speaker and 32 elected members; in addition, 4 Chiefs are elected by the Chiefs in Assembly; 3 nominated members are without votes and the Attorney-General is nominated and has a vote.

At the general election of 4-5 April 1977, the People's Progressive Party obtained 27, the National Convention Party 5, and the United Party 2 seats.

The Cabinet comprises the President and 11 Ministers from the Legislature.

GERMANY

POST-WAR HISTORY. Since the unconditional surrender of the German armed forces on 8 May 1945 there has been no central authority whose writ runs in the whole of Germany. Consequently no peace treaty has been signed with a government representing the whole of Germany, and the country is virtually partitioned between the Federal Republic of Germany and the German Democratic Republic.

By the Berlin Declaration of 5 June 1945 the governments of the USA, the UK, the USSR and France assumed supreme authority over Germany. Each of the 4 signatories was given a zone of occupation, in which the supreme power was to be exercised by the C.-in-C. in that zone (*see* map in *THE STATESMAN'S YEAR-BOOK*, 1947). Jointly these 4 Cs.-in-C. constituted the Allied Control Council in Berlin, which was to be competent in all 'matters affecting Germany as a whole'. The territory of Greater Berlin, divided into 4 sectors, was to be governed as an entity by the 4 occupying powers.

At the Potsdam Conference (17 July–2 Aug. 1945) the northern part of the Province of East Prussia, including its capital Königsberg (renamed Kaliningrad), was transferred to the Soviet Union, pending final ratification by a peace treaty; and it was agreed that, pending the final peace settlement, Poland should administer those parts of Germany lying east of a line running from the Baltic Sea immediately west of Swinemünde along the river Oder to its confluence with the Western Neisse and thence along the Western Neisse to the Czechoslovak frontier.

The agreements between the war-time allies concerning the occupation zones (12 Sept. 1944) and control of Germany (1 May 1945) were repudiated by the USSR on 27 Nov. 1958.

A Treaty was signed in East Berlin between the German Democratic Republic and the Federal Republic of Germany on 21 Dec. 1972 agreeing the basis of relations between the two countries.

CONSTITUTION AND GOVERNMENT. Upon the establishment of the Federal Republic of Germany, the People's Council of the Soviet-occupied zone, appointed in 1948, was converted into a provisional People's Chamber.

On 7 Oct. 1949 the provisional People's Chamber enacted a constitution of the 'German Democratic Republic'.

In July 1952 the 5 Länder of Mecklenburg, Saxony-Anhalt, Brandenburg, Saxony and Thuringia were replaced by 14 districts (*Bezirke*).

A new 'socialist constitution' was approved by a referendum on 6 April 1968, when 94.54% of the electorate voted for the constitution; it came into force on 8 April 1968. The People's Chamber, of 500 deputies, is 'the supreme organ of state power'; it elects the Council of State, the Council of Ministers, the National Defence Council and the judges of the Supreme Court.

Council of State. After the death of President Wilhelm Pieck (7 Sept. 1960), the People's Chamber on 12 Sept. 1960 abolished the office of president and elected instead a council of state. This consists of a chairman, 6 deputy chairmen, 18 members and a secretary. The Council is authorized to issue decisions and to interpret existing laws. The Chairman of the Council of State represents the GDR in international law. *Chairman:* Erich Honecker.

On 13 Oct. 1978 the People's Chamber passed a 'law for the defence of the GDR'; the People's Chamber is authorized to declare a 'state of defence'.

At the elections held on 16 Oct. 1976, the list of the National Front received 99.86% of the valid votes.

DEFENCE. On 18 Jan. 1956 the Diet passed laws for the establishment of a 'national people's army' and a defence ministry. A 12-member defence council, under the chairmanship of E. Honecker, General Secretary of the Central Committee, was set up on 10 Feb. 1960.

The 'law for the defence of the GDR', of 20 Sept. 1960, makes military service (in case of emergency) and civil defence compulsory for all citizens.

Conscription for men between 18 and 25 years was introduced on 24 Jan. 1962 (18 months' service in the army, 2 years in the navy and air force).

Army. The Army, set up on 1 March 1956, is organized in 2 army corps, including 2 armoured divisions and 4 motorized infantry divisions. Operationally these divisions are subordinate to the Soviet formations of the Warsaw Pact forces. They are armed with about 2,600 tanks (mostly Soviet T-54, T-55 and T-62), 216 self-propelled guns and ground-to-air 'Guideline' missiles. The Border Police was incorporated in the Army in Sept. 1961. Total army strength was (1980) 108,000 all ranks.

Two fighter divisions consist respectively of 2 and 4 regiments (each with at least 3 squadrons of 12 aircraft), plus a fighter training division. Operational units are equipped mainly with MiG-21 supersonic day and all-weather interceptors and reconnaissance fighters; delivery of variable-geometry MiG-23 fighters began in 1979. About 40 MiG-17 fighters remain in service, mainly for training. Mi-24 gunship helicopters have been delivered to Germany. Other units include a regiment of Mi-2, Mi-4 and Mi-8 helicopters, a regiment of Il-14, An-24 26, Tu-124 and Tu-134 transports and a Flight Training Division with Yak-18, Trener, L-29 Delfin, L-39 Albatros, MiG-15U II and MiG-21U training aircraft. FEDERAL REPUBLIC OF GERMANY

Capital: Bonn

Population: 61.4m. (1979)

GNP per capita: US\$9,600 (1978)

Bundesrepublik Deutschland

HISTORY. The Federal Republic of Germany became a sovereign independent country on 5 May 1955 and is a member of EEC, the Council of Europe, Western European Union, NATO, the European Coal and Steel Community, Euratom, the European Monetary Agreement and the Agencies of the UN.

In June 1948 USA, UK and France agreed on a central government for the 3 western zones. An Occupation Statute, which came into force on 31 Sept. 1949, reduced the responsibilities of the occupation authorities. Formally, the Federal Republic of Germany came into existence on 21 Sept. 1949. The Petersberg Agreement of 22 Nov. 1949 freed the Federal Republic of numerous restrictions of the Occupation Statute. In 1951 USA, UK and France as well as other states terminated the state of war with Germany; the Soviet Union followed on 25 Jan. 1955. On 5 May 1955 the High Commissioners of USA, UK and France signed a proclamation revoking the Occupation Statute. On the same day, the Paris and London treaties, signed in Oct. 1954, came into force and established the sovereignty of the Federal Republic of Germany.

AREA AND POPULATION. In April 1949 some minor frontier rectifications were carried out in favour of the Netherlands (68 sq. km), Belgium (18 sq. km), Luxembourg (6 sq. km) and France (7 sq. km), subject to a final peace settlement. Belgium (1956) and the Netherlands (1963) returned most of this territory to Germany.

The annual rate of the population increase or decrease (including migration) was -0.2% in 1974; -0.6% in 1975; -0.3% in 1976; -0.2% in 1977; -0.1% in 1978; $+0.2\%$ in 1979.

Migrants from Eastern Germany to the Federal Republic, including West Berlin, totalled about 2,022,000 between 1955 and 1961. The East German Government tried to stop the outflow by erecting a concrete wall which later became a heavily fortified barrier along the border in Berlin on 13 Aug. 1961; despite the Berlin wall, the figures registered for persons moving from Eastern Germany and East Berlin into the Federal Republic were 20,700 in 1970, 19,900 in 1971, 19,700 in 1972, 17,300 in 1973, 16,200 in 1974, 20,300 in 1975, 17,100 in 1976, 13,900 in 1977, 14,400 in 1978 and 15,400 in 1979; most of them are older people with permission to emigrate. Migrants from the Federal Republic to Eastern Germany totalled about 279,000 between 1955 and 1961, 2,500 in 1969, 2,100 in 1970, 1,900 in 1971, 1,800 in 1972, 1,700 in 1973, 1,500 in 1974, 1,400 in 1975, 1,300 in 1976, 1,200 in 1977, 1,200 in 1978 and 1,300 in 1979.

The resident population of the principal towns was estimated as follows on 31 Dec. 1979:

CONSTITUTION. The Constituent Assembly (known as the 'Parliamentary Council') met in Bonn on 1 Sept. 1948, and worked out a Basic Law which was approved by a two-thirds majority of the parliaments of the participating Länder and came into force on 23 May 1949.

The Basic Law (*Grundgesetz*) consists of a preamble and 146 articles. The first section deals with the basic rights which are legally binding for legislation, administration and jurisdiction.

The Federal Republic of Germany is a democratic and social federal state. For the time being the Basic Law applies to the Länder Baden-Württemberg, Bavaria, Bremen, Greater Berlin (temporarily suspended), Hamburg, Hessen, Lower Saxony, North Rhine-Westphalia, Rhineland-Palatinate, Saarland and Schleswig-Holstein. The Basic Law decrees that the general rules of international law form part of the federal law. The constitutions of the Länder must conform to the principles of a republican, democratic and social state based on the rule of law. Executive power is vested in the Länder, unless the Basic Law prescribes or permits otherwise. Federal law supersedes Land law.

The organs of the Federal Republic are:

The Federal Diet (*Bundestag*), elected in universal, direct, free, equal and secret elections, for a term of 4 years.

The Federal Council (*Bundesrat*), consisting of members of the governments of the Länder. Each Land has at least 3 votes. Länder with more than 2m. inhabitants have 4, Länder with more than 6m. inhabitants have 5 votes.

The Federal President (*Bundespräsident*) is elected by the Federal Assembly for a term of 5 years and represents the Federal Republic in international relations. Re-election is admissible only once. The Federal Assembly (which meets only for the election of the Federal President) consists of the members of the Federal Diet and an equal number of members elected by the popular representative bodies of the Länder according to a particular system of semi-proportional representation.

The Federal Government consists of the Federal Chancellor, elected by the Federal Diet on the proposal of the Federal President, and the Federal Ministers, who are appointed and dismissed by the Federal President upon the proposal of the Federal Chancellor.

The Federal Republic has exclusive legislation on: (1) foreign affairs; (2) federal citizenship; (3) freedom of movement, passports, immigration and emigration, and extradition; (4) currency, money and coinage, weights and measures, and regulation of time and calendar; (5) customs, commercial and navigation agreements, traffic in goods and payments with foreign countries, including customs and frontier protection; (6) federal railways and air traffic; (7) post and telecommunications; (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal Government; (9) trade marks, copyright and publishing rights; (10) co-operation of the Federal Republic and the Länder in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

For concurrent legislation in which the Länder have legislative rights if and as far as the Federal Republic does not exercise its legislative powers, see *THE STATESMAN'S YEAR-BOOK*, 1956, p. 1038.

Federal laws are passed by the Federal Diet and after their adoption submitted to the Federal Council, which has a limited veto. The Basic Law may be amended only upon the approval of two-thirds of the members of the Federal Diet and two-thirds of the votes of the Federal Council.

The foreign service, federal finance, railways, postal services, waterways and shipping are under direct federal administration.

In the field of finance the Federal Republic has exclusive legislation on customs and financial monopolies and concurrent legislation on: (1) excise taxes and taxes on transactions, in particular, taxes on real-estate acquisition, incremented value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) real estate, industrial and trade taxes, with the exception of the determining of the tax rates.

Customs, the yield of monopolies, excise taxes with the exception of the beer tax, the transportation tax, the turnover tax and property dues serving non-recurrent purposes accrue to the Federal Republic. The Federal Republic can, by federal law, claim part of the income and corporation taxes to cover its expenditures not covered by other revenues. Financial jurisdiction is uniformly regulated by federal legislation.

National flag: Three horizontal stripes of black, red, gold.

National anthem: Einigkeit und Recht und Freiheit (words by H. Hoffmann, 1841; tune by J. Haydn, 1797).

GOVERNMENT. The *Federal Diet*, elected on 5 Oct. 1980, is composed of 496 members. In addition, there are 22 members for Berlin (11 CDU, 10 SPD, 1 FDP), who, however, have no vote.

State of the parties: Social Democrats (SPD), 218 (1976: 214); Christian Democrats (CDU/CSU), 226 (243); Free Democrats (FDP), 53 (39); other parties failed to obtain 5% of the votes or to elect a representative in a constituency, and therefore returned no members.

Bonn on the Rhine is the capital of the Federal Republic.

Federal President: Karl Castens (elected 1 July 1979).

The Cabinet, a coalition of Social Democrats and Free Democrats, in March 1981, was as follows:

DEFENCE. The Paris Treaties, which entered into force in May 1955, stipulated a contribution of the Federal Republic to western defence within the framework of NATO and the Western European Union. In 1977 the Federal Armed Forces (*Bundeswehr*) had a total strength of 489,000 all ranks (235,000 conscripts).

Army. In 1979 the Army consisted of 16 armoured brigades, 12 armoured infantry brigades, 3 Jäger brigades, 2 mountain brigades, 3 airborne brigades; total strength 335,200.

The principal combat unit is still the Brigade, however, under the 'Brigade 80' concept the number of battalions per brigade goes up, although the number of men per battalion comes down. The armoured brigade has 3,026 men and the armoured infantry 3,730. The main emphasis of the concept is to improve the anti-armour capability and the brigades will have to look to the divisional troops for reconnaissance, artillery and air-defence support in points of main effort. The Army is at present converting to the 'Brigade 80' concept. There are 3 corps and 12 divisions, each of 3 brigades. The Army has 1,342 M-48A2 Patton and 2,437 Leopard I medium tanks with a further 1,800 Leopard II tanks on order, 7,700 armoured personnel carriers, 1,400 artillery pieces, 65 *Honest John* and 26 *Lance* surface to surface missiles.

Territorial Army. The Territorial Army lies outside the Authority of Supreme Commander NATO, but is tasked with securing the freedom of manoeuvre of NATO forces under national command as well as protecting points of military relevance. There are 3 Territorial Commands and 6 Home Defence Groups. Peacetime strength, 63,000.

Navy. The Federal Navy comprises 24 diesel-powered coastal submarines, 1 old experimental oceangoing submarine, 3 US-built guided missile armed destroyers, 4 German-built destroyers, 4 ancient *ex*-US destroyers, 6 frigates, 6 corvettes, 30 fast missile boats (Exocet armed) of 265–390 tons, 10 fast torpedo boats, a light cruiser type training ship, 11 frigate-type support ships, 18 coastal minesweepers and mine-hunters, 22 fast minesweepers, 20 inshore minesweepers, 50 landing craft, 13 supply and support ships, 2 fleet replenishment ships, 7 oilers, 8 coast patrol ships, 9 coast-guard cutters, 3 repair ships, 24 tugs and 100 auxiliaries and service craft.

The construction programme includes 10 large patrol (missile) vessels. The project to build 4 guided missile frigates was cancelled, but 4 frigates (initially, to replace old *ex*-US destroyers) and eventually 8 (to replace 'Hamburg' class destroyers and 'Köln' class frigates) are projected under the new development programme.

The Naval Air Arm has 2 wings (each 2 squadrons of 18 aircraft) of F-104G Starfighters and 1 wing of Breguet Atlantic maritime patrol bombers, supplemented by an anti-submarine helicopter wing (Lynx for new frigates). Albatross amphibians and Do 27 aircraft form an air-sea rescue wing (re-equipping with Sea King helicopters).

Navy personnel in 1981 totalled 5,600 officers and 32,900 men, including 6,700 of the Naval Air Arm.

Air Force. Since Oct. 1970, the *Luftwaffe* has comprised the following commands: German Air Force Tactical Command, German Air Force Support Command (including two German Air Force Regional Support Commands—North and South) and General Air Force Office. Its strength in 1980 was approximately 106,200 officers and other ranks and about 560 first-line combat aircraft. Combat units, including 12 heavy fighter-bomber squadrons, 4 light ground attack reconnaissance squadrons, 4 reconnaissance squadrons, 8 surface-to-surface missile squadrons, and an air defence force of 4 interceptor squadrons, 24 batteries of *Nike-Hercules* and 36 batteries of *Improved Hawk* surface-to-air missiles, are assigned to NATO. There are 4 F-4F Phantom interceptor squadrons, 8 F-104G fighter-bomber squadrons (to be re-equipped with Tornados), 4 attack squadrons of F-4Fs, 4 RF-4E Phantom reconnaissance squadrons and 4 light attack/reconnaissance squadrons of Fiat G91Rs (being replaced with 7 squadrons of Alpha Jets). Three transport squadrons (each 15 aircraft) with turboprop Transall C-160 aircraft and 1 wing of 5 helicopter squadrons with UH-1D Iroquois add to the air mobility of the *Bundeswehr*. There are also VIP, support and light transport aircraft, and Piaggio P.149D initial training aircraft. Guided weapons in service include 8 squadrons of *Pershing* surface-to-surface missiles and 6 battalions of *Nike-Hercules* and 9 battalions of *Hawk* surface-to-air missiles.

All F-104 and Phantom pilots undergo basic and advanced training in USA.

INTERNATIONAL RELATIONS

Membership. The Federal Republic of Germany is a member of UN, OECD, EEC, NATO and the Council of Europe.

External Debt. On 27 Feb. 1953 several agreements were signed in London settling Germany's external pre-war and post-war debts. These agreements entered into force on 16 Sept. 1953.

The claims arising from the post-war economic assistance given to Germany by the UK (£201.8m.), France (US\$15.79m.) and the USA (US\$3,014m.) were fixed at £150m., US\$11.84m. and US\$1,000m. respectively, of which only the claims of the USA bear interest at 2½%. Up to March 1961 the claims were paid off by regular and premature redemption as follows: Great Britain except for £67.5m., France except for US\$5,328,000 and the USA except for US\$787.37m. In April May 1961 the Deutsche Bundesbank repaid on behalf of the Federal Republic the total claims of Great Britain and France and the amount of US\$587m. to the USA. The debt still outstanding on 30 Dec. 1966 (US\$195.94m.) was also repaid by the Deutsche Bundesbank on behalf of the Federal Republic.

On 31 Dec. 1968 the London Debts Agreement of 27 Feb. 1953 was in force in a total of 56 foreign countries. 90% of all debts were claims of the USA, Great Britain, France and Switzerland.

Of the approximately DM 4,000m. of public pre-war debts, the sum of DM 13m. are still to be paid at the present time. Of approximately DM 2,200m. of private pre-war debts the amount of DM 253m. had still to be paid back on 31 Dec. 1977.

GHANA

Capital: Accra

Population: 11.7m. (1980)

GNP per capita: US\$390 (1978)

HISTORY. The State of Ghana came into existence on 6 March 1957 when the former Colony of the Gold Coast and the Trusteeship Territory of Togoland attained Dominion status. The name of the country recalls a powerful monarchy which from the 4th to the 13th century A.D. ruled the region of the middle Niger.

The Ghana Independence Act received the royal assent on 7 Feb. 1957. The General Assembly of the United Nations in Dec. 1956 approved the termination of British administration in Togoland and the union of Togoland with the Gold Coast on the latter's attainment of independence.

The country was declared a Republic within the Commonwealth on 1 July 1960 with Dr Kwame Nkrumah as the first President. On 24 Feb. 1966 the Nkrumah regime was overthrown in a military *coup* and ruled by the National Liberation Council until 1 Oct. 1969 when the military regime handed over power to a civilian regime under a new constitution. Dr K. A. Busia was the Prime Minister of the Second Republic. In Aug. 1975 the Government announced that they would commemorate the late Dr Nkrumah as 'a great Ghanaian responsible for taking the country to independence'.

On 13 Jan. 1972 the armed forces and police took over power again from the civilian regime in a *coup*.

In Oct. 1975 the National Redemption Council was subordinated to a Supreme Military Council (SMC). In 1979 the SMC was toppled in a *coup* led by Flight-Lieut. J. Rawlings. The new government permitted elections already scheduled and these resulted in a victory for Dr Hilla Limann and his People's National Party.

AREA AND POPULATION. The area of Ghana is 92,010 sq. miles (238,305 sq. km); census population 1970, 8,559,331. Estimate (1980) 11.7m.

The Constitution of the Second Republic of Ghana which came into force on 22 Aug. 1969 was suspended. The office of President was abolished and the National Assembly dissolved.

On 5 July 1978 officers of the Supreme Military Council ousted Gen. I. K. Acheampong in a bloodless *coup*. They in turn were overthrown by a junior officers

Banking. The Bank of Ghana was established in Feb. 1957 as the central bank of the country. The Ghana Commercial Bank, also established in Feb. 1957, is the

former Bank of the Gold Coast. It is a purely commercial institution and has 120 branches in the country, 1 in London and 1 in Lomé (Togo). Barclays Bank (Ghana) Ltd has 54 branches and agencies and the Standard Bank (Ghana) Ltd has 27 branches.

The Ghana National Investment Bank, opened in June 1963, is a finance-cum-development agency. The former post office savings bank has been transformed into the Ghana Savings Bank. The Bank for Housing and Construction opened in 1973.

ENERGY AND NATURAL RESOURCES

Oil. The Government announced in Jan. 1978 that oil had been found in commercial quantities.

Minerals. In 1977 gold production was 481,000 fine oz.; diamonds, 1,851,000 carats; manganese, 268,000 tons; bauxite, 265,000 long tons. Old mines are being re-opened and exploration of mineral oil deposits, bauxite, limestone and iron ore is now extensive.

Agriculture. Cocoa is by far the most important crop and covers about 2m. acres. Production (1979-80) 300,000 tons. There has been a considerable increase in cocoa yields as a result of the Capsid control and the introduction of improved varieties. A Cocoa Affairs Ministry has been established to formulate policy and provide technical supervision for developing cocoa, coffee, shea-nuts, copra and bananas. Coffee, improved types of oil-palm and coconut are being planted on an increased scale and production from these crops is increasing. Progress has been made in the planting of Clonal rubber in south-west Ghana. In the south-east coastal belt irrigation works have been constructed and black-clay farming is being successfully undertaken in the Accra plains.

Of the main foodstuffs in south and central Ghana, maize, rice, cassava, plantain, groundnuts, yam and cocoyam predominate. Tobacco is proving an attractive and very important cash crop in food-crop producing areas.

In northern Ghana the chief food crops are groundnuts, rice, maize, guinea corn, millet and yams, with tobacco and cotton as important cash crops.

The State Farms Corporation has been reorganized and is now to concentrate on the development of large-scale tree-crop plantations such as palm-oil, rubber, coconut, kola and cashew. All its available food farms have been transferred to the newly formed Food Production Corporation. The Corporation undertakes the growing of maize, guinea corn, rice, vegetables, cassava, plantain, yams, etc.

Agricultural cash crops, *e.g.*, pepper, ginger, pineapple, avocado and citrus, etc., are being extensively cultivated for export. Active steps have also been taken to provide within the next few years industrial raw materials, *e.g.*, kenaf, cotton, tobacco, palm-oil, mango, pineapple, sugar-cane, etc., to feed the local factories. The trend is towards diversification of agriculture.

A Food Production Corporation has been established to see to the production and efficient and equitable distribution of foodstuffs throughout the country. The state farms have been transferred to the Corporation.

Production of main food crops (1977) was: Cassava, 2.3m. tons; plantain, 1,455,000 tons; coco yam, 905,000 tons; yam, 397,000 tons.

Livestock, 1979: Cattle, 930,000; sheep, 1.7m.; goats, 2m.; horses, 4,000; pigs, 400,000; poultry, 11.5m. The Central Veterinary Laboratory is located at Pong-Tamale under the Veterinary Research Officer. The efficient control of rinderpest and bovine pleuro-pneumonia, the two main killing diseases of cattle, has made it possible to quadruple the cattle in the past 20 years. The control of imported livestock is effected by 8 quarantine stations along the frontier, and newly established veterinary centres are being established.

Forestry. The total area of closed forest is 82,576 sq. km, of which 16,852.2 sq. km are reserved. Exports (1976) of logs, was 512,261 tons.

The destruction of unreserved forests by farming is threatening the timber supply for exports. Reafforestation is going ahead to counteract this and the Upper and Northern Regions included to arrest the Sahelian threat.

Fisheries. The fisheries sector of the economy is being developed, including fishing

harbours and landing stages, workshops for repair and maintenance of outboard motors; development of fish culture and expansion of fish farms, establishment of fishing complexes, purchase of refrigerated vans for fish distribution and the establishment of more cold-stores.

COMMERCE. Total trade, in C 1,000, for calendar years:

West African Common Market. On 4 May 1967, 12 West African countries (Benin, Ghana, Ivory Coast, Liberia, Mali, Mauritania, Niger, Nigeria, Senegal, Sierra Leone, Togo and Upper Volta) signed articles of association in Accra, setting up a common market for goods and services among them and eliminating customs and trade barriers.

JUSTICE, EDUCATION AND WELFARE

Justice. The judicial power of Ghana is vested in the Judiciary with the Chief Justice as the Head. It has jurisdiction in all civil and criminal matters.

The Courts of Ghana are constituted as follows: *Superior Courts of Ghana*, the Court of Appeal and the High Court of Justice. The Supreme Court of Ghana, created by the suspended Constitution in 1969, has been abolished and its functions taken over by the Court of Appeal.

The Court of Appeal. The Court of Appeal replaces the former Supreme Court of Ghana as the highest and final Court of Appeal in and for Ghana. It has all the power, authority and jurisdiction vested in any Court established in the country. The Court of Appeal consists of the Chief Justice, together with not less than 6 other Justices of the Appeal Court and such other Justices of Superior Courts as the Chief Justice may nominate. The Court is duly constituted by 3 justices. A full Bench of the Court of 5 Judges has jurisdiction to review and determine, among other things, a decision of the Court of Appeal or any justice or division thereof upon a question of law, including matters relating to aspects of the Chieftaincy Act 1971. Divisions of the Appeal Court may be created, subject to the discretion of the Chief Justice.

The High Court of Justice. This Court has jurisdiction in civil and criminal matters as well as those relating to industrial and labour disputes, including administrative complaints. It has supervisory jurisdiction over all interior and traditional courts, but has no power in a trial for offences involving treason, to convict any person for any offence other than treason. The High Court consists of the Chief Justice and not less than 12 other Judges as may be appointed by the Chief Justice. A High Court Judge can sit alone or with a jury.

The country has been divided into circuits, and there are Circuit Judges sitting in these courts with original jurisdiction in all criminal cases, except offences where the maximum punishment is death. The original jurisdiction in civil matters is restricted to cases where the subject-matter of the suit is not more than C 8,000 or, in respect of liquidated sums, C 15,000 involving ownership or occupation of land. *District Courts* (Grade I and II), sitting throughout the country in the magisterial districts. *Juvenile Courts*, dealing with persons under the age of 17, have been established in Accra, Cape Coast, Sekondi, Kumasi and Koforidua.

Police. The force was established in Oct. 1874. It is headed by an Inspector-General and consists of 7 divisions with a (1975) strength of 15,817.

Education. A complete re-organization of the system took place in 1974. There are kindergartens for the age-groups 4-6 years. Primary schools are free and attendance is compulsory. In 1973-74 there were 6,843 primary schools with 1,014,964 pupils. The 4,000 secondary schools had about 500,000 pupils. In 1975-76 there were 9,079 students at the 3 universities (University of Ghana, the University of Science and Technology and the University of the Cape Coast).

Health. Medical facilities include 50 government hospitals, 116 health centres and posts, 4 university hospitals, 3 mental hospitals, 4 leprosaria, 7 military hospitals, 1 prison hospital, 40 mission hospitals and 16 private hospitals. In addition, there are 30 nurses and midwives training schools.

GIBRALTAR

Population: 29,760 (1979)

GNP per capita: US\$3,660 (1978)

HISTORY. The Rock of Gibraltar was settled by Moors in 711; they named it after their chief Jebel Tariq, 'the Mountain of Tarik'. In 1462 it was taken by the Spaniards, from Granada. It was captured by Admiral Sir George Rooke on 24 July 1704, and ceded to Great Britain by the Treaty of Utrecht, 1713. The cession was confirmed by the treaties of Paris (1763) and Versailles (1783).

On 10 Sept. 1967, in pursuance of a United Nations resolution on the decolonization of Gibraltar, a referendum was held in Gibraltar in order to ascertain whether the people of Gibraltar believed that their interests lay in retaining their link with Britain or in passing under Spanish sovereignty. Out of a total electorate of 12,762, 12,138 voted to retain the British connexion, while 44 voted for Spain.

AREA AND POPULATION. Area, $2\frac{1}{2}$ sq. miles (6.5 sq. km). Total population, including port and harbour (census, 6 Oct. 1970), 26,833 (13,501 males; 13,322 females). Estimate (1979) 29,760 (15,256 males; 14,504 females). The population is mostly of Genoese, Portuguese and Maltese as well as Spanish descent.

Vital statistics (1979): Births, 472; marriages, 459; deaths, 257.

GOVERNMENT. Following a Constitutional Conference held in July 1968, a new Constitution was introduced in 1969. The Legislative and City Councils were merged to produce an enlarged legislature known as the Gibraltar House of Assembly. Executive authority is exercised by the Governor, who is also Commander-in-Chief. The Governor, while retaining certain reserved powers, is normally required to act in accordance with the advice of the Gibraltar Council, which consists of 4 *ex-officio* members (the Deputy Governor, the Deputy Fortress Commander, the Attorney-General and the Financial and Development Secretary) together with 5 elected members of the House of Assembly appointed by the Governor after consultation with the Chief Minister. Matters of primarily domestic concern are devolved to elected Ministers, with Britain responsible for other matters, including external affairs, defence and internal security. There is a Council of Ministers presided over by the Chief Minister.

The House of Assembly consists of a Speaker appointed by the Governor, 15 elected and 2 *ex-officio* members (the Attorney-General and the Financial and Development Secretary).

A Mayor of Gibraltar is elected from among the members of the Assembly by the elected members of the Assembly.

Governor and C.-in-C.: Gen. Sir William Jackson, GBE, KCB, MC.

Chief Minister: Sir Joshua Hassan, CBE, MVO, QC.

Flag: White with a red strip along the bottom, a red triple-towered castle with a gold key depending from the gateway.

DEFENCE. The Gibraltar Regiment is a part-time infantry battalion with a small regular cadre.

ECONOMY

Budget. Revenue and expenditure (in £ sterling):

	1974-75	1975-76	1976-77	1977-78	1978-79
Revenue	8,790,210	11,807,045	18,207,859	18,661,858	26,408,993
Expenditure	8,653,078	10,322,937	17,709,855	19,962,916	30,495,374

Currency. The legal currency consists of Gibraltar government notes and UK coins. The amount of local currency notes in circulation at 31 March 1979 was £5,651,410.

Banking. There are 7 banks, including 3 branches of Barclays Bank International. Government savings banks had £1,785,426 deposited at 31 March 1979.

INDUSTRY AND TRADE

Industry. There are a number of relatively small industrial concerns engaged in the bottling of beer and mineral waters, etc., mainly for local consumption. There is a small but important commercial ship-repair yard.

Tourism. The number of tourists in 1979 was 44,569 (1978, 39,102).

Labour. The full-time labour force in April 1979 was (estimate) 11,593. The labour supply from the local population is insufficient to meet the demand and since the withdrawal of the Spanish frontier workers in June 1969, a substantial part of the labour has had to come from other places. A quota system is in existence which takes into account the demand from the various industries and seasonal variations and the issue of employment permits is based on this. More than one-half of the local labour force is employed by the UK departments or the Gibraltar government.

A considerable proportion of the workers are organized in one or other of the 14 registered employees' trade unions, of which the Transport and General Workers Union has the largest membership; 7 of these are local branches of parent associations in the UK.

Commerce. Imports and exports (in £ sterling):

	1975	1976	1977	1978	1979
Imports	27,027,401	32,415,906	39,589,742	39,442,136	55,519,064
Exports	10,753,448	13,727,865	13,859,398	11,863,114	19,453,243

Britain and the Commonwealth provide the bulk of the imports, but fresh vegetables, fruit and fish come mainly from Morocco, Portugal and the Netherlands. Exports of local produce are negligible. Gibraltar depends largely on tourism, the entrepôt trade and the provision of supplies to visiting ships.

COMMUNICATIONS

Roads. There are 30 miles of roads including 4 miles of pedestrian way.

Aviation. There are 5 weekly flights between London and Gibraltar (3 operated by Gibraltar Airways and 2 by British Airways) during the winter; these are increased to daily flights during the summer.

The unilateral closure by Spain of their land frontier with Gibraltar makes over-land travel from or to Spain impossible. However, there is a regular car ferry service and air services to Tangier and Morocco from where it is possible to cross over to the Spanish mainland.

Shipping. Gibraltar is a naval and air base of strategic importance. There is a deep Admiralty harbour of 440 acres. A total of 2,752 merchant ships, 22,931,062 NRT, entered the port during 1979. An additional 4,672 calls were made by yachts, 48,861 NRT.

Post. An automatic telephone system exists in the town; number of telephones (1979), 8,982. There is also world-wide communication *via* the cable and/or wireless circuits of Cable & Wireless Ltd. Air-mails arrive by British Airways daily. A direct air-mail service between Gibraltar and Tangier is run by Gibraltar Airways, Ltd. Surface mails arrive direct and through France, Spain and Tangier.

Cinemas. In 1978 there were 3 cinemas with a seating capacity of 2,400.

JUSTICE, RELIGION, AND EDUCATION

Justice. The judicial system is based on the English system. There is a Court of Appeal, a Supreme Court, presided over by the Chief Justice, a court of first instance and a magistrates' court.

Religion. Religion of civil population mostly Roman Catholic; 1 Anglican and 1 Roman Catholic cathedral and 2 Anglican and 6 Roman Catholic churches; 1 Presbyterian and 1 Methodist church and 4 synagogues; annual subsidy to each communion, £500.

Education. Free compulsory education is provided for children between ages 5 and 15 years. Scholarships are made available for universities, teacher-training and other higher education in Britain. The comprehensive system was introduced in Sept. 1972. There are 12 government primary schools and 2 comprehensive schools. 1 for boys and 1 for girls. There is also 1 private primary school. 1 Hebrew primary school, 2 Services primary schools and 1 school for handicapped children. Total number of pupils was 5,313, including 42 in technical and vocational schools.

Mount Athos, the easternmost of the three prongs of the peninsula of Chalcidice, is a self-governing community composed of 20 monasteries. (See THE STATESMAN'S YEAR-BOOK, 1945, p. 983.) For centuries the peninsula has been administered by a Council of 4 members and an Assembly of 20 members, 1 deputy from each monastery. The Greek Government on 10 Sept. 1926 recognized this autonomous form of government: Articles 109-112 of the Constitution of 1927 gave legal sanction to the Charter of Mount Athos, drawn up by representatives of the 20 monasteries on 20 May 1924. Article 103 of the 1952 Constitution and Article 105 of the 1975 Constitution confirmed the special status of Mount Athos.

Vital statistics (1977): 143,739 live births; 1,566 still births; 1,918 illegitimate births; 76,228 marriages; 83,750 deaths; 16,510 emigrants (Jan.-Sept.); 12,572 immigrants (Jan.-Sept.).

GOVERNMENT AND CONSTITUTION. A *coup d'état* took place on 21 April 1967, 'to avert the danger of a communist threat against the nation'. A Military Government was formed, which suspended the 1952 Constitution. Following the unsuccessful counter-*coup* in 1967, King Constantine went abroad. Voting took place on 29 July 1973 in the referendum to change Greece from a Monarchy to a Republic and to elect a President. 77.2% of the valid votes were cast for a republican régime.

On 25 Nov. 1973, in a bloodless *coup*, President Papadopoulos was overthrown and Lieut.-Gen. Phaedon Ghizikis was sworn in. The military dictatorship collapsed on 23 July 1974 and the 1952 Constitution was reintroduced in a modified form. A new Constitution was introduced in June 1975. Parliamentary elections took place on 17 Nov. 1974.

A further referendum on the Monarchy took place on 8 Dec. 1974 and 69.2% of the valid votes were cast for an 'uncrowned democracy'.

Elections were again held on 20 Nov. 1977. The results were New Democracy,

173; Pan-Hellenic Socialist Movement, 92; Union of Democratic Centre, 15; Communists, 11; National Camp, 5; Alliance of Progressive and Left-Wing Forces, 2; Neo-Liberal Party, 2. A number of UDC deputies and both Neo-Liberal deputies subsequently joined the New Democracy Party.

Total strength is about 450 personnel and 70 aircraft.

INTERNATIONAL RELATIONS

Membership. Guatemala is a member of UN, OAS and CACM.

External Debt. In 1978 the external debt was Q.220m.

ECONOMY

Planning. In 1978 the Government announced its economic development programme and this included the continued development of agriculture, encouraging the development of agriculture-based industry and light engineering industry associated with agricultural development, promoting tourism, encouraging oil and mining development, improving roads and railway and airport facilities and continuing hydro-electric development. The 1979-82 National Economic Development Plan along these lines involves government investment of Q.1,937.5m.

Budget. The estimates of ordinary revenue and expenditure balanced as follows, in quetzales (1 quetzal = US\$): 1978, 942.6m.; 1979, 1,056m.; 1980, 1,280m.; 1981, 1,467m. Income tax was introduced for the first time in 1963.

Currency. The gold *quetzal* was established 7 May 1925 equal to 60 old Guatemala paper pesos, with a gold content equal to that of the US\$. Coins of 25, 10, 5 and 1 *centavos* were issued by the Banco de Guatemala on 16 Sept. 1965; they are of a lower content value than the previous ones. There are also paper notes of 100, 50, 20, 10, 5, 1 and $\frac{1}{2}$ *quetzales* (50 *centavos*). In March 1981, £1, = Q.2.18; US\$1 = Q.1.

Banking. By an Act effective 4 Feb. 1946 the Central Bank of Guatemala (founded in 1926 as a mixed central and commercial bank) was superseded by a new institution, the Banco de Guatemala, to operate solely as a central bank. Savings and term deposits at commercial banks were Q.882.6m. at the end of 1979. Total currency circulation (backed by a gold reserve fixed by law at a minimum of 40%) on 31 Dec. 1979 was Q.891.1m.; total net international reserves amounted to Q.632m. on 31 Dec. 1979. In July 1965 the country's quota with the IMF was increased from US\$15m. to 25m.

<i>Tonelada</i> of 20 quintals	= 18.10 cwt	<i>Caballeria</i> of 64 man-	
<i>Fanega</i>	= 1½ Imp. bushels	zanas	= 110 acres

ENERGY AND NATURAL RESOURCES

Electricity. 1,045m. kwh. of electricity were generated in 1976. A large-scale hydro-electric development is now underway and others are planned.

Oil. Guatemala began exporting crude oil in 1980. Production is from wells in Alta Verapaz department from where the oil is piped to Santo Tomas de Castilla. Further exploration is proceeding in the Petén.

Minerals. Mineral production includes zinc and lead concentrates, some antimony and tungsten, a small amount of cadmium and silver; some copper is also being mined. Exports (1979) Q.6m. In 1965 a subsidiary of International Nickel Company of Canada was granted a 40-year concession to extract and process nickel ore in northern Guatemala. Production and exports started in 1977.

Agriculture. The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 ft, and is the most densely settled part of the republic. The Atlantic slope is sparsely populated, and has little of commercial importance beyond the chicle and timber-cutting of the Petén, coffee cultivation of Cobán region and banana-raising of the Motagua Valley and Lake Izabal district. Soil erosion is serious and a single week of heavy rains suffices to cause flooding of fields and much crop destruction.

On 17 June 1952 an 'Agrarian Reform Law' was enacted providing for the expropriation (with eventual compensation) of those parts of landed estates which were not under cultivation. The US Government in 1953 protested against the expropriation of 234,000 acres belonging to the United Fruit Company. Under the new government the expropriation was halted and the 'Agrarian Reform Law' was superseded by a 'Statute' early in 1956, which provided small holdings to several thousand peasant farmers. This distribution of land continues, now under the provisions of the 'Agrarian Transformation Law' of 1962.

The principal crop is coffee; there are about 12,000 coffee plantations with 138m. coffee trees on about 338,000 acres, but 80% of the crop comes from 1,500 large coffee farms employing 426,000 workers. Coffee exports in 1979 were valued at Q.431.9m. mainly to USA and Federal Republic of Germany.

Bananas are still an important export crop, but exports have at times been seriously reduced, partly by labour troubles and by hurricanes. Exports 1978 were worth Q.19m.

Cotton has become an important export and in 1979 was valued at Q.192.3m. Other important exports (1979) were sugar, Q.53.5m.; beef, Q.41.4m. Guatemala is, after Mexico, the largest producer of chicle gum (used for chewing-gum manufacture in USA). Rubber development schemes are under way, assisted by US funds. Guatemala is one of the largest sources of essential oils (citronella and lemon grass); exports in 1979 were valued at Q.2.2m. Cardamom, exported mainly to the Arab countries, is an increasingly important source of revenue; exports, 1979, Q.49.2m. Cattle-grounds (*potreros*) occupy about 758,000 acres. There were (1979) some 1.6m. head of cattle (mostly beef) in the country.

Forestry. The forest area has an extent of 17,784,000 acres. The department of Petén is rich in mahogany and other woods.

Fisheries. Exports were about Q.8m. in 1978.

INDUSTRY AND TRADE

Industry. The principal industries are food and beverages, tobacco, chemicals, hides and skins, textiles, garments and non-metallic minerals. New industries include electrical goods, plastic sheet and metal furniture.

Trade Unions. Trade unions are small. In 1954 the trade unions were ordered to reorganize and there are now two main federations.

Commerce. Values in Q.1,000 (1 quetzal = US\$1) were:

	1974	1975	1976	1977	1978	1979
Imports (c i f)	700,473	732,679	981,600	1,052,507	1,285,640	1,503,900
Exports (f o b)	572,133	623,503	782,400	1,160,115	1,089,457	1,241,400

Value (in Q.1,000) of principal imports, 1977: Machinery and transport equipment, 355,191; chemicals, 191,952; petroleum products, 148,424; foodstuffs, 55,422. Chief exports are coffee, cotton, bananas, beef, essential oils, timber, chicle and shrimps. The main trading partners are USA, Japan and Federal Republic of Germany, and the partners of the Central American Common Market.

Total trade between Guatemala and UK for 6 years (British Department of Trade returns, in £1,000 sterling):

	1975	1976	1977	1978	1979	1980
Imports to UK	31,918	2,133	3,600	5,726	7,596	23,657
Exports and re-exports from UK	9,838	14,022	16,676	14,529	13,371	13,835

Tourism. There were 503,908 foreign visitors in 1979.

COMMUNICATIONS

There are 2 trunk highways from the Mexican to the Salvadorean frontier: the Pacific Highway serving the fertile coastal plain and the Pan-American Highway running through the highlands and Guatemala City. Motor vehicles number about 200,000.

Railways. The principal railway system is the government-owned (since 1968) *Ferrocarriles de Guatemala*. All railways are of 914 mm gauge. Total length of all lines is 820 km. Passengers carried, 1976, numbered 386,000, and freight carried (1976), 703,600 short tons. The bridge across the Suchiate River between Mexico and Guatemala in 1942 linked the railways of North and Central America, though differences in gauge make it necessary to change trains at Ayutla.

Aviation. The government-owned airline, Aviateca, furnishes both domestic and international services; 6 other airlines handle international traffic. In 1976 air cargo amounted to 16.1m. tons; number of passengers, 422,000.

Shipping. The chief ports on the Atlantic coast are Puerto Barrios and Santo Tomás de Castilla; on the Pacific coast, San José and Champerico. Total tonnage handled was, 1977, 2.6m. tons.

Post and Broadcasting. The Government own and operate the telegraph and telephone services; there were (1978) 70,614 telephone instruments. There are some 70 broadcasting stations. Radio receiving sets in use, 1976, numbered about 1m. There are 4 commercial TV stations, 1 government station and about 192,000 TV receivers.

Cinemas (1979). Cinemas numbered approximately 100.

Newspapers (1980). There are 8 daily newspapers.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered in a Supreme Court, 6 appeal courts and 28 courts of first instance. Supreme Court and appeal court judges are elected by Congress. Judges of first instance are appointed by the Supreme Court.

All holders of public office have to show on entering office, and again on leaving, a full account of their private property and income.

Religion. Roman Catholicism is the prevailing faith; but all other creeds have complete liberty of worship. Guatemala has an archbishopric.

Education. In 1976 there were 6,415 primary schools with 27,666 teachers and an attendance of 753,932 pupils; these figures include private schools. There are 357 secondary and other schools having 7,051 teachers and an attendance of 104,800 pupils; the autonomous University of San Carlos de Borromeo, founded in 1678, was reopened in 1910 with 7 faculties and schools and there are 4 new universities. Students at state university (1977) approximately 25,925. All education is in theory free, but owing to a grave shortage of state schools private schools flourish. The 1964 census showed that 63% of those 10 years of age and older were illiterate.

Social Welfare. A comprehensive system of social security was outlined in a law of

30 Oct. 1946. Medical personnel include about 1,250 doctors and 275 dentists for the whole republic. There are about 60 public hospitals and about 100 dispensaries.

GNP per capita: US\$550 (1978)

HISTORY. The territory, including the counties of Demerara, Essequibo and Berbice, named from the 3 rivers, was first partially settled by the Dutch West Indian Company about 1620. The Dutch retained their hold until 1796, when it was captured by the English. It was finally ceded to Great Britain in 1814 and named British Guiana. On 26 May 1966 British Guiana became an independent member of the Commonwealth under the name of Guyana and the world's first Co-operative Republic on 23 Feb. 1970.

AREA AND POPULATION. Guyana is situated on the north-east coast of South America on the Atlantic ocean, with Suriname on the east, Venezuela on the west and Brazil on the south and west. Area, 83,000 sq. miles (210,000 sq. km). Estimated population (Dec. 1978), 824,000. Births (1972), 25,065; deaths (1974), 3,418. The site on the Demerara River is being operated by the Guyana Government as a civil airport. The US Government relinquished its claims to Atkinson on Guyana's attainment of independence. On 1 May 1969 the airport and surrounding area (formerly Atkinson) were renamed Timehri.

The legislature is elected for 5 years unless earlier dissolved.

The elections held on 15 Dec. 1980 gave the People's National Congress 41 seats, the People's Progressive Party 10 seats, the Liberator Party 2 seats. The PNC with an overall majority formed a 25-member cabinet.

From 1901 to 1973 the production of diamonds was 4,008,211 metric carats (15,148 in 1979). There are large deposits of bauxite: 4,851,000 tons and 137,000 tons of alumina were produced in 1979. Full-scale production of manganese began in 1960 and 114,988 wet tons were produced in 1968. The North West Guyana Mining Co. Ltd, operating through the Manganese Mines Ltd, closed operation in Guyana by the end of 1968.

several mountain ranges and extensive savannahs. Approximately 87% of the land area is forested, and about 60,000 sq. miles of this is still available for timber exploitation. Only about 20% of the forest area is at present regarded as being reasonably accessible for timber extraction on an economic basis, however. In 1972 this area accounted for the production of 8,233,743 cu. ft of wood and wood products.

Roads. Roads and vehicular trails in the national, provincial and urban systems amount to 1,810 miles, of which 595 miles are maintained by government, 836 miles by local authorities and 269 miles by 5 municipalities. There are 422 miles of road on the coastal and lower riverain areas of which 308 miles are paved; and 651 miles of road and vehicular trail in the upper riverain and interior areas of which only 16 miles are paved. A new road, which will eventually link up with the Pan American Highway, is now under construction in the Guyana interior. The road extends from Mahdia on the Potaro River to Annai in the Rupununi. Work on the road is being undertaken on a self-help basis. Motor vehicles, as of 31 Dec. 1976, totalled 64,272, including 26,599 passenger cars, 6,979 lorries and vans, 9,072 tractors and trailers, and 19,109 motor cycles.

Railways. The 19-mile government-owned West Coast Railway ceased operation in June 1974. Passenger and cargo services between Vreed-en-Hoop on the west bank of the Demerara River and Parika at the mouth of the Essequibo River are carried out by buses owned by the Guyana Transport Services.

In addition, there is a short, government-owned railway in the North West District, while the Guyana Bauxite Co. operates a standard-gauge railway of 80 miles from Linden on the Demerara River to Ituni. In March 1967 a bridge (740 ft) across the Demerara River was opened to enable the company to resume mining operations on the west bank of the river.

Guyana is in direct sea-communication with the UK, France, Canada, USA, the West Indies, and Netherlands and French Guiana. There are 217 nautical miles of river navigation. There are ferry services across the mouths of the Demerara, Berbice and Essequibo rivers, the last providing a link between the West Coast Railway and the islands of Leguan and Wakenaam and the mainland at Adventure, and a number of coastal and river-boat services carrying both passengers and cargo. A number of launch services are operated in the more remote areas by private concerns.

Georgetown harbour, about $\frac{1}{2}$ mile wide and $2\frac{1}{2}$ miles long, has a minimum depth of 24 ft. New Amsterdam harbour is situated at the mouth of the Berbice River; there are wharves for coastal vessels only. Bauxite is loaded on ocean-going freighters at Mackenzie, 67 miles up the Demerara River, and at Everton on the Berbice River, about 10 miles from the mouth of the waterway. The Essequibo River has several timber-loading berths ranging from 20 to 40 ft. Springlands on the Corentyne River is the point of entry and departure of passengers travelling by launch services to and from Suriname. It is also a shipping point for rice and other produce from the Corentyne to Georgetown.

Post and Broadcasting. The inland public telegraph and radio communication services are operated and maintained by the Telecommunication Corporation, established on 1 March 1967. On 31 Dec. 1976 there were 57 post offices and 94 agencies (including travelling post offices and agencies).

The telephone exchanges had at the end of 1975 a total of 17,311 direct exchange lines with (1978), 27,064 telephone instruments. The number of route miles in the coastal and inland areas was 2,982 km. 39 land-line stations were maintained at post offices in the coastal area, and 8 telegraph stations in the interior provide communication with the coastal area through a central telegraph office in Georgetown.

Overseas radio-telephone and telegraphic communication were provided by Cable & Wireless (W.I.) Ltd, but were nationalized in 1977 and the service is now provided by the Guyana International Telecommunications Corporation Ltd (Guyintel). In Georgetown a central radio station provides facilities for radio communication with 5 branch offices operated in combination with the wireless telegraph stations mentioned above. 92 stations operated by other government departments, 31 stations operated by private concerns (including mining, ranching, timber and other commercial interests) and 12 coastal ships and launches. This system is linked with the telephone system and is available to the general public.

A Tropospheric Scatter System, operated by Guyintel, was opened on 26 March 1969. It provides for a maximum of 32 channels linking Guyana with the rest of the world *via* Trinidad, the nearest point for connexion in the company's broad band system. The Guyana Broadcasting Corporation, which came into operation on 1 July 1980, has 2 channels.

Capital: Port-au-Prince

Population: 5.53m. (1978)

GNP per capita: US\$260 (1978)

République d'Haiti

HISTORY. Haiti occupies the western third of the large island of Hispaniola which was discovered by Christopher Columbus in 1492. The Spanish colony was ceded to France in 1697 and became her most prosperous colony. After the extirpation of the Indians by the Spaniards (by 1533) large numbers of African slaves were imported whose descendants now populate the country. The slaves obtained their liberation following the French Revolution, but subsequently Napoleon sent his brother-in-law, Gen. Leclerc, to restore French authority and re-impose slavery. Toussaint Louverture, the leader of the slaves who had been appointed a French general and governor, was kidnapped and sent to France, where he died in gaol. However, the reckless courage of the Negro troops and the ravages of yellow fever forced the French to evacuate the island and surrender to the blockading British squadron.

The country declared its independence on 1 Jan. 1804, and its successful leader, Gen. Jean-Jacques Dessalines, proclaimed himself Emperor of the newly-named Haiti. After the assassination of Dessalines (1806) a separate régime was set up in the north under Henri Christophe, a Negro general who in 1811 had himself proclaimed King Henry. In the south and west a republic was constituted, with the mulatto Alexander Pétion as its first President. Pétion died in 1818 and was succeeded by Jean-Pierre Boyer, under whom the country became re-united after Henry had committed suicide in 1820. From 1822 to 1844 Haiti and the eastern part of the island (later the Dominican Republic) were united. After one more monarchical interlude, under the Emperor Faustin (1847-59), Haiti has been a republic. From 1915 to 1934 Haiti was under United States occupation.

AREA AND POPULATION. The area is 27,750 sq. km (10,700 sq. miles), of which about three-quarters is mountainous. The population at the census in 1975 was 4,583,785 (highest density in Latin America), of which 85% are living in rural areas. The capital, Port-au-Prince (Ouest) census (1975) population 458,675. Other estimates (1975): Cap Haitien (Nord), 54,691; Gonaïves (Artibonite), 36,736 (Sud); Les Cayes (Sud), 27,222; Jérémie (Sud), 25,117; Port de Paix (Nord-Ouest), 21,733; St Marc, 20,504; Jacmel, 16,449. Infant deaths per 1,000 live births in 1970 were estimated at 147.

The country is divided into 9 *Départements*: the original Nord-Ouest, Artibonite, Nord, Ouest, Sud; plus (1962) Nord Est, Centre, Sud Est and Grande Anse. The Île de la Gonave, some 40 miles long, lies in the gulf of the same name. Among other islands is La Tortue, off the north peninsula. The majority of the population are Negroes, with an important minority of mulattoes and only about 5,000 white residents, almost all foreign.

Haiti is the only French-speaking republic in the Americas. The standard French of government, parliament and the press is spoken by the small literate minority, but the great majority of the people habitually speak the dialect known as Créole.

CONSTITUTION AND GOVERNMENT. The 1950 Constitution, under which Dr François Duvalier was elected president on 22 Oct. 1957, provided that no president was immediately re-eligible. The new Constitution later in 1957 did not forbid re-election.

A single-chamber legislature of 58 deputies elected for a 6-year term was established in April 1961, and new chambers were elected in 1967, 1973 and 1979.

In 1964 the Constitution was again rewritten and Dr Duvalier named Life President (22 June); the deputies were made capable of indefinite re-election.

President of the Republic: In April 1961 elections were held for the Legislative Chamber, and afterwards it was announced that Dr Duvalier had been re-elected President for a further 6 years (on 22 June 1964 extended to 'life'), although the next presidential election was not due until 1963 and there had been neither nominations nor campaign. (For the series of *coups d'état* in 1956–57, see THE STATESMAN'S YEAR-BOOK, 1960, p. 1085.) Dr Duvalier died 21 April 1971. He was succeeded, as President for Life, by his son, Jean-Claude Duvalier whom he nominated as his successor under Article 102 of the 1964 Constitution as amended 14 Jan. 1971.

The Cabinet in Jan. 1981 was composed as follows:

President: Jean-Claude Duvalier.

Foreign Affairs and Worship: Edouard Francisque. *Interior and Defence:* Edouard Berrouet. *Labour and Social Affairs:* Ulysse Pierre-Louis. *Co-ordination and Information:* Jean-Marie Chanoine. *Minister to Presidency:* Henri Bayard. *Agriculture and Natural Resources:* René Destin. *Public Works, Transport and Communications:* Alix Cinéas. *Finance and National Economy:* Emmanuel Bros. *Public Health and Population:* René Charles. *Commerce and Industry:* Jacques Siméon. *Justice:* Roc Raymond. *Planning:* Raoul Berret. *Mines and Energy:* Fritz Pierre-Louis. *Education:* Joseph Bernard. *Youth and Sports:* Théodore Achille.

National flag: Vertically black and red, with a small white panel in the centre bearing the national arms.

National anthem: 'La Dessalinienne': Pour le pays, pour les ancêtres (words by J. Lhérisson; tune by N. Geffrard, 1903).

DEFENCE. The Haitian Defence Force (*Forces Armées d'Haïti*) totalling about 7,500 men, is divided into Army, Navy, and Air Force. The President is Commander-in-Chief and appoints the officers.

Army. Total strength, about 7,000, organized into 9 Military Departments and the 'Leopards'. Three of the Departments are in Port-au-Prince and consist of the Presidential Guard (4 Companies); the Dessalines Barracks (7 Companies including the Dessalines Battalion and Headquarters troops); and the Port-au-Prince Police (6 Companies in blue uniforms). The other 6 Military Departments are located outside Port-au-Prince; their troops (21 Companies) operate as District Police. The Fire Brigade and the Prison Guard Company are also part of the Armed Forces. Only the Presidential Guard, the Dessalines Battalion and the Leopards (2 companies of 'Commandos' or Special Forces) with a third company of about 200 recruits, now in training, have any potential for tactical military operations. They are armed mainly with light infantry weapons but have a few elderly pieces of light artillery, 9 light tanks and 6 V-150 commando vehicles.

Navy. The Navy coastguard of 40 officers and 260 men has 2 *ex-US* armed tugs, 2 *ex-USCG* cutters, 5 coastal patrol boats and 11 service craft. The base is at Port-au-Prince.

Air Force. Personnel strength is about 200, with about 29 aircraft of some 12 varieties. They include 8 Summit Cessna O2-327 Sentry twin piston-engined counter-insurgency aircraft, 2 DC-3s, 5 light transports, 5 training liaison aircraft, and 9 Hughes and Sikorsky helicopters.

Militia. There is in addition a volunteer civilian force, the *Volontaires de la Sécurité Nationale*, whose total strength is now estimated at about 14,900, about half of whom have access to antiquated rifles. This force, formerly of some importance as Dr François Duvalier's 'private army' of tough, devoted followers (sometimes called Tontons Macoute or Bogeymen) is much less prominent since his death, having been reduced in strength and reorganized under Defence Force Headquarters on lines roughly parallel to the regional Military Departments.

INTERNATIONAL RELATIONS

Membership. Haiti is a member of UN and OAS.

ECONOMY

Budget. Revenue and expenditure (fiscal year ending 30 Sept.) in US\$1m. (5 gourdes = US\$1), balanced as follows: 1971-72, 29.6; 1972-73, 31.3; 1973-74, 33.2; 1974-75, 38.9; 1975-76, 43.3.

Currency. The unit of currency is the *gourde* and its value fixed at 5 *gourdes* = US\$1. In March 1981, £1 = 10.9 *gourdes*. There are copper-nickel coins for 50, 20, 10 and 5 *centimes* and copper-zinc-nickel coins of 10 and 5 centimes. The amount of US currency in circulation is not known, due to the fact that it is used freely with the local currency, and is legal tender.

Banking. The Banque Nationale de la République d'Haiti, owned by the State, was established 21 Oct. 1910 with a capital of US\$5m., and has a monopoly of the note issue. US dollars may be included in the minimum required reserves. The Royal Bank of Canada, the Citibank, the Bank of Nova Scotia, the Bank of Boston, the Banque de l'Union Haitienne (mainly local capital with participation from American, Canadian and Dominican Republic Banks), Banque Nationale de Paris and First National Bank of Chicago all have branches in Port-au-Prince.

Weights and Measures. The metric system is officially accepted.

ENERGY AND NATURAL RESOURCES

Electricity. The hydro-electric plant at Péligre, which was inaugurated in July 1971, provides some 45m. kw. to the capital. The thermal plant in Port-au-Prince, formerly US and now state owned, is now on standby for emergencies. Generating capacity at Cap Haitien is 3.1m. kw.

Minerals. A US company is engaged in mining bauxite (792,600 tonnes in 1973-74). A Canadian firm mining copper (144,430 tonnes in 1970) had to suspend operations at the end of 1971, as uneconomical because of the world price of copper, but indications are that copper mining may start again. Haiti may possess undeveloped mineral resources of oil, gold, silver, antimony, sulphur, coal and lignite, nickel, gypsum and porphyry.

Agriculture. Only one-third of the country is arable and most people own the tiny plots they farm; the resulting pressure of population is the main cause of rural poverty. Number of farms is estimated at over 500,000.

The occupations of Haiti are nine-tenths agricultural, carried on in 7 large plains, from 200,000 to 25,000 acres, and in 15 smaller plains down to 2,000 acres. Irrigation is used in some areas. Haiti's most important product is coffee of good quality, classified as 'mild', and grown by peasants. Production in 1979 totalled about 40,000 tonnes. In 1974-75, 300,000 bags were exported. Second most important crop is sugar. Sisal is grown extensively. Much of the fibre is exported as or for cordage. New types of cotton are being tried with success. New varieties of rice should significantly boost future production, especially in the Artibonite Valley. Output of main crops in 1979 (tonnes) was: Maize, 260,000; plantains: 198,000; rice, 95,000; sugar, 70,000; sisal, 13,000; cocoa, 3,000.

Rum and other spirits are distilled. Essential oils from lime, vetiver, neroli and amyris are important. Cattle and horse breeding are encouraged.

Livestock (1979): Cattle, 1m.; sheep, 87,000; pigs, 1.9m.; goats, 1.3m.; horses, 408,000; poultry, 4.2m.

INDUSTRY AND TRADE

Industry. Light manufacturing industries assembling or finishing goods for re-export constitute the fastest growing sector. Their foreign exchange earnings are second only to those of coffee. There are 2 textile mills producing cheap denim with a total of 550 looms and 14,000 spindles. Soap factories produce laundry soap, toilet soap and detergent. A cement factory located near the capital produced 140,000 tons in 1973-74 and is extending to 300,000 tons per year. A steel plant making rods, beams and angles was opened in 1974. There are also a pharmaceutical plant, a tannery, a plastics plant, 2 paint works, 2 shoe factories, a large factory producing

enamel cookingware, 2 pasta-making factories, a tomato cannery and a flour-mill, all located in or near Port-au-Prince.

Labour. Trade unions were recognized in Feb. 1946. Strong government influence is exercised over the insignificant portion of the labour force that is unionized and organized labour has virtually no strength in Haiti.

Commerce. Imports and exports for fiscal years ending 30 Sept. (in US\$1m.):

	1972-73	1973-74 ¹	1974-75 ¹	1975-76 ¹	1976-77 ¹
Imports	76.7	119.9	142.5	201.0	225.4
Exports	51.3	100.8	81.1	117.5	143.3

¹ Provisional.

The leading imports are foodstuffs, textiles, machinery, mineral oils, raw materials for transformation industries and vehicles.

Total trade between Haiti and UK (British Department of Trade returns, in £1,000 sterling):

	1974	1975	1976	1977	1978	1979	1980
Imports to UK	199	139	882	1,063	635	1,118	915
Exports and re-exports from UK	2,000	2,143	2,697	3,394	4,155	3,162	2,818

Tourism. In 1976, 280,000 tourists visited Haiti.

COMMUNICATIONS

Roads. Total length of roads is some 4,000 km, little of which is practicable in ordinary motors in the rainy season. There were (1978) about 21,500 vehicles in Haiti.

Railways. The only railway is owned by the Haitian American Sugar Company.

Aviation. An airport capable of handling jets was opened at Port-au-Prince in 1965. US and French carriers provide daily direct services to New York, Miami, Jamaica, Puerto Rico and the French Antilles. There are also services to the Dominican Republic, the Bahamas and the Netherlands Antilles. A Haitian company provides a cargo service to the US and Puerto Rico. Air services connecting Port-au-Prince with other Haitian towns are operated by Haiti Air Inter, under a management contract with Turks and Caicos Airways, who provide aircraft and personnel.

Shipping. US, French, Federal Republic of Germany, Dutch, British, Canadian and Japanese lines connect Haiti with the US, Latin America (except Cuba), Canada, Jamaica, Europe and the Far East.

Post and Broadcasting. Most principal towns are connected by the government telegraph system, telephones and wireless.

The telephone company, of which the Haitian Government is now the majority stockholder, is in process of being modernized. Telephone subscribers totalled 17,800 in 1977.

In 1978 there were 100,000 radio and 15,000 television receivers.

Cinemas (1975). There were 19 cinemas and 4 drive-in cinemas in Port-au-Prince.

Newspapers (1975). There were 6 daily newspapers in Port-au-Prince, also a monthly in English and 1 weekly newspaper in Cap Haitien.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Judges, both of the lower courts and the court of appeal, are appointed by the President. The legal system is basically French. The divorce law has recently been amended to permit parties to obtain 'quick and painless' divorces at a moderate cost, in the hope of attracting the US trade, now that the Mexican 'divorce mills' have closed down. This has developed a useful flow of dollar revenue.

Police. The Police number about 600 in Port-au-Prince and are part of the armed forces.

Religion. Since the Concordat of 1860, the official religion is Roman Catholicism, under an archbishop with 5 suffragan bishops. There are still quite a number of foreigners, French and French Canadians mainly, among the clergy but the first Haitian archbishop took office in 1966. The Episcopal Church now has its first

Haitian bishop who was consecrated in 1971. Other Christian churches number perhaps 10% of the population. The folk religion is Voodoo.

Education. Education is divided into primary (first 6 years), secondary (the next 7 years) and finally superior or university. The school system is modelled on that of France. The law calls for free and compulsory elementary education in the French language.

For the 1973-74 academic year, urban primary schools numbered 360 (221 lay and 139 religious) attended by 127,330 pupils with 3,532 teachers. There were, for the same period, at the secondary level, 21 public secondary *lycées* with 15,760 students (4,163 of them girls), 563 teachers (39 of them women). In the private secondary sector, 129 schools were reported with 35,414 students (16,398 girls), 1,172 teachers (107 women). Professional education is divided into 3 categories: (a) 41 pre-vocational schools; (b) 18 vocational schools which prepare trained workers, and (c) 5 vocational schools preparing technicians. There were also 10 licensed private commercial schools. The total number of students was 13,000, 2,000 of whom were in the private sector.

It is estimated that rural school population was about 1.3m. but only about 14% regularly attended classes in 1973-74.

Higher education is offered at the following faculties of the University of Haiti: medicine and pharmacy, odontology (dentistry), science (engineering, architecture, natural sciences, physics, chemistry, biology) with a school of surveying, law and economic sciences, agronomy and veterinary medicine, ethnology, and the Institute of Administration and Management. A new Faculty of Arts (Sciences and Humanities) was opened in Nov. 1974. The École Normale Supérieure has replaced the faculty of Letters and Pedagogy.

Health. There were, in 1972, 332 doctors and 104 dentists in practice, 44 hospitals, and 196 health centres and rural clinics. The hospitals had 3,329 beds, of which 776 were in private and charitable establishments.

República de Honduras

HISTORY. On 5 Nov. 1838 Honduras declared itself an independent sovereign state, free from the Federation of Central America, of which it had formed a part.

AREA AND POPULATION. Honduras is bounded north by the Caribbean, east and north-east by Nicaragua, west by Guatemala, south-west by El Salvador and south by the Pacific ocean. Area is 112,088 sq. km (43,227 sq. miles), with a population, census (1974) of 2,656,948. Estimate (1980) 3,691,027.

The capital of Honduras is Tegucigalpa with (1979, estimate) a population of 445,100. The next most important town is San Pedro Sula, 317,100; other towns are: El Progreso, 89,300; Choluteca, 73,400; Danli, 68,100; Olanchito, 49,700; Juticalpa, 46,500; Comayagua, 42,200; Siguatepeque, 39,900; Santa Rosa de Copan, 25,200. The main ports are Henecan on the Pacific, and, on the Atlantic coast, La Ceiba (61,700), Puerto Cortés (56,100) and Tela (56,800). The port of entry for the Bay Islands is Roatán. A new port at Puerta Costilla, on the Atlantic coast, is under construction.

The republic is divided into 18 departments with their populations (1981, estimate): Atlántida (223,023); Choluteca (272,888); Colón (118,674); Comayagua (198,044); Copán (206,653); Cortés (566,937); El Paraíso (194,840); Francisco Morazán (683,138); Gracias a Dios (32,519); Intibucá (106,963); Islas de La Bahía (17,910); La Paz (84,308); Lempira (167,690); Ocotepeque (62,943); Olanchito (123,525); Santa Barbara (269,054); Valle (120,498); and Yoro (281,344).

Aboriginal tribes number over 35,000, principally Miskito, Payas and Xicaques Indians and Sambos (the latter a mixture of Miskito and Negro), each speaking a different dialect. The Spanish-speaking inhabitants are chiefly *mestizos*, Indians with an admixture of Spanish blood. Gracias a Dios is still largely unexplored and is inhabited by pure native races who speak little or no Spanish.

In 1978 there were 145,717 live births and 18,127 deaths; 14,056 marriages and 727 divorces. Infant mortality rate, 26.9 per 1,000 live births.

CONSTITUTION AND GOVERNMENT. Until a change of Government on 4 Dec. 1972, legislative power had been vested in a single chamber, the Congress of Deputies consisting of 64 members, chosen for 6 years by popular vote, in the ratio of 1 per 30,000 inhabitants. It used to meet for 180 days beginning 26 May and ending 26 Oct. A permanent commission of 5 members used to sit while Congress was not in session for the transaction of routine or emergency business. All men and women over 18 are entitled to vote.

In March 1971, Dr Ramón Ernesto Cruz (National Party) was elected President, defeating Dr Jorge Bueso Arias (Liberal Party). The former President, Gen. López, who was debarred from standing for re-election in 1971, seized power in a bloodless *coup* on 4 Dec. 1972. Since that date Congress has been suspended and Government is by decree. Gen Oswaldo López Arellano was deposed in a military *coup* in April 1975 and Gen. Juan Melgar Castro was deposed on 7 Aug. 1978. The *coup* was led by the commander of the armed forces, Gen. Policarpo Paz García, supported by Col. Domingo Álvarez Cruz (chief of Air Force) and Col. Amilcar Zelaya (chief of National Police). A Military Junta was established.

In fulfilment of their promise to restore constitutional Government, elections were held on 20 April 1980 for deputies to a National Constituent Assembly. The election results were Liberals, 35 deputies; Nationalists, 33 and Party of Innovation and Unity, 3. Roberto Suazo Córdova (Liberal), was elected President of the Assembly. The Assembly elected Gen. Paz as Provisional President until elections could be

held for a Constitutional President. A new Constitution is being drafted and electoral law in preparation for elections for President, Deputies to Congress and Municipal officers in late 1981 or early 1982.

President: Gen. Policarpo Paz García.

National flag: Three horizontal stripes of blue, white, blue, with 5 blue stars in the centre.

National anthem: *Tu bandera es un lampo de cielo* (words by A. C. Coello; tune by C. Hartling).

DEFENCE

Army. Every male citizen is liable to serve in the Army from the age of 18 to 50. Service in the active Army is for approximately 1 year. Although there is no actual reserves programme, those men who have served on active duty for 1 year or more, are eligible for recall. The size of the regular Army is approximately 10,000 men; this does not include the National Police Force, which numbers 3,000. The Army is organized into 8 infantry battalions, 2 artillery battalions and minor units.

Air Force. Equipment, mostly of US origin, includes 12 J52-engined Super Mystère fighters acquired from Israel, 6 A-37B jet light attack aircraft, 1 or 2 F-86K jet fighters, 3 RT-33A reconnaissance aircraft, some Summit Cessna O2-337 Sentry twin piston-engined COIN aircraft, 8 T-28S Fennec and 4 T-28E armed piston-engined trainers, 2 C-54, 6 C-47 and 3 Israeli-built Arava and 1 Westwind transports, T-33A, T-41A and T-6 trainers. Total strength is about 1,200 personnel, of whom 400 are civilian maintenance staff.

INTERNATIONAL RELATIONS

Membership. Honduras is a member of UN and OAS.

ECONOMY

Budget. The fiscal and calendar years have coincided since 1 Jan. 1957. Recent budgets (in 1m. lempiras) balance as follows: 1977, 625.7; 1978, 831.9; 1979, 1,000; 1980, 1,136.7; 1981, 1,350.

The largest sources of income (1978) were (in 1m. lempiras): Production taxes, 138; import taxes, 135.9; export taxes, 109.7; income tax, 111.

Total external debt (1978) was (in 1m. lempiras), 1,509 and net reserves of foreign currency, 233.7.

Currency. The unit of the monetary system is the *lempira* also known as a *peso*, comprising 100 *centavos*. Notes are issued by the Banco Central de Honduras which has the sole right to issue, in denominations of 100, 50, 20, 10, 5, 2 and 1 *lempiras*. Coins in circulation are 50 and 20 *centavos* in silver, 10 and 5 *centavos* in cupro-nickel and 2 and 1 *centavos* in copper.

Rate of exchange, March 1981: 2 *lempiras* = US\$1, 4.37 *lempiras* = £1.

Banking. The central bank of issue is the Banco Central de Honduras. The Banco Atlántida has branches in Tegucigalpa, San Pedro Sula, Comayagua, Puerto Cortés, La Ceiba, Tela, El Progreso, Choluteca and other towns. The Banco de Honduras which operates in many parts of the country is controlled by the Citibank. The Bank of America has branches in Tegucigalpa and San Pedro Sula. The Bank of London and Montreal has branches in Tegucigalpa, San Pedro Sula, Comayagua and La Ceiba. The Central American Bank for Economic Integration has its head office in Tegucigalpa.

Weights and Measures. The metric system has been legal since 1 April 1897, but English pounds and yards and the old Spanish system are still in use: 1 *vara* = 32 in.; 1 *manzana* (10,000 sq. *varas*) = 700 sq. metres; 1 *arroba* = 25 lb.; 1 *quintal* = 100 lb.; 1 *tonelada* = 2,000 lb.

NATURAL RESOURCES

Minerals. Mineral resources include gold, silver, lead, tin, zinc and mercury, which

are exported. There are probably reserves of other minerals which have not yet been exploited. The Rosario Resources Company, which owned and operated the famous Rosario mines near Tegucigalpa from 1882 to 1954, developed and now operates a mine at El Mochito (Department of Santa Barbara) while the Compañía Minera Los Angeles SA has a mine currently extracting lead, zinc and silver at Valle de Angeles (Department of Francisco Morazán).

Agriculture. Although Honduras is essentially an agricultural country, less than a quarter of the total land area is cultivated and by far the larger portion of this is on the Caribbean and Pacific coastal plains. Agriculture employs 56% of the working population and provides 80% of the exports. The main agricultural crops are: Coffee, bananas, cotton, sugar and tobacco. Exports of meat amounted to 64.5m. lempiras in 1978.

Livestock (1979): Cattle, 1.8m.; sheep, 3,000; pigs, 530,000; goats, 15,000; horses, 149,000; poultry, 4.7m.

Forestry. Forests cover nearly 45% of the total land area. Honduras has an abundance of hard- and softwoods. Large stands of mahogany and other hardwoods—granadino, guayacán, walnut and rosewood—grow in the north-eastern part of the country, in the interior valleys, and near the southern coast. Stands of pine occur almost everywhere in the interior, but are severely damaged by bark beetle and fires. In 1978, total wood exports amounted to 94m. lempiras. The Olancho Forest Development Programme involving the construction of saw- and pulp- mills was in progress in 1978.

Fisheries. Commercial fishing in territorial waters is restricted to Honduran nationals and Honduran companies in which the controlling share of the capital is owned by a Honduran national. Shrimps and lobsters are important catches.

INDUSTRY AND TRADE

Industry. Small-scale local industries include beer and mineral waters, cement, flour, vegetable lard, coconut oil, sweets, cigarettes, cigars, textiles and clothing, panama hats, plastics, nails, matches, plywood, furniture, paper bags, soap, candles, fruit juices and household chemicals. An important hydro-electric scheme has been built at Rio Lindo to serve the Central and North Coast regions. The El Cajon hydro-electric project is now under construction and will come on stream in 1985 (290 mw). A small integrated steel-mill may be erected in Agalteca (Department of Francisco Morazán). The manufacturing industry employed 13% of the working population in 1979.

Labour. The organization of trade unions was begun in 1954 with the assistance of ORIT (Inter-American Regional Organization) sponsored by the USA trade unions. In 1972 there were 166 trade unions, of which only 119 were active, with about 67,956 members. A 'Charter of Labour' was granted in Feb. 1955 and an advanced Labour Code and Social Security Bill passed into law in May 1959. A Ministry of 'Labour, Social Assistance and the Middle Class' was created in 1955; the last four words of its title were expunged in 1957.

Commerce. Imports in 1979 were valued at 2,133.7m. lempiras and exports at 1,699.3m. lempiras.

Imports (1979) in 1m. lempiras: Machinery and transport equipment, 498.5; manufactured goods, 384.3; chemicals, 277.1; mineral fuel and lubricants, 225.2; various products, 111.4; food products, 110; crude material inedible, 20; animal and vegetable oils and fats, 14.3; beverages and tobacco, 10.

Exports (1979) in 1m. lempiras: Bananas, 400.7; coffee, 393.7; refrigerated meats, 114.7; timber, 84.1; shrimps and lobster, 51.3; lead and zinc, 48.2; silver, 41.9; soap, 30.2; tobacco, 29.8; sugar, 26.9; cotton, 22.2; preserved fruit, 7.3.

Trade with main countries in 1m. lempiras (1979) was: USA, 1,529.5; Japan, 189.3; Federal Republic of Germany, 188; Guatemala, 165.5; Venezuela, 160.1; Netherlands, 140.

Total trade between Honduras and UK (British Department of Trade returns, in £1,000 sterling):

	1976	1977	1978	1979	1980
Imports to UK	483	1,107	2,219	4,000	3,687
Exports and re-exports from UK	4,580	6,965	8,443	9,013	11,835

Tourism. There were 102,353 tourists in 1979.

COMMUNICATIONS

Roads. Honduras is connected with Guatemala, El Salvador and Nicaragua by the Pan-American Highway. Out of a total of 12,316 km of road (1979), 1,681 are paved. There are good asphalted highways between Puerto Cortés in the north and Choluteca in the south passing through San Pedro Sula and Tegucigalpa with branches to Guatemala and El Salvador. In 1979 there were 5,360 motor vehicles, including 495 motor cycles.

Railways. Only 4 railways exist; they are confined to the north coastal region and are used mainly for transportation of bananas. Tegucigalpa, the capital, is not served by any railway, and there are no international railway connexions. The total railways operating in 1980 were 1,928 km of 1,067 mm and 914 mm gauge.

Aviation. Over a large part of the country the aeroplane is the normal means of transport for both passengers and freight. There are international airports at Tegucigalpa, San Pedro Sula, La Ceiba and over 30 smaller airstrips in various parts of the country.

Shipping. Sailings to the Atlantic coast port of Puerto Cortés from Europe are frequent, mainly operated by the Harrison Line, Cia Generale Transatlantique, the Royal Netherlands Steamships Co., Hapag Lloyd and vessels owned or chartered by the Tela Railroad Co., a subsidiary of United Brands, and the Standard Fruit Co.

Post and Broadcasting. The Government in April 1972 operated 18,845 km of telephone lines and 12,526 km of telegraph lines. Number of government telephones in use, 1975, 14,984; telephone exchanges, 52; number of telegraph offices, 210; combined telephone and telegraph offices, 179. In 1979 there were 514 post offices and agencies, 145 commercial broadcasting stations. Commercial television began with a station in Tegucigalpa in Sept. 1959. There were (1979) 3 commercial channels and about 27,000 receivers in use. Transmission in colour commenced mid-1973.

Cinemas (1972). Cinemas numbered about 46 with seating capacity of some 40,000.

Newspapers (1979). The 5 most important daily papers are *El Cronista*, *El Heraldo* and *La Tribuna* in Tegucigalpa, *La Prensa* and *El Tiempo* in San Pedro Sula. Several others exist but their circulation is low and their influence is very limited.

JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The judicial power resides in the Supreme Court, with 7 judges elected by the National Constituent Assembly in 1980 for 6 years; it appoints the judges of the courts of appeal, labour tribunals and the district attorneys who, in turn, name the justices of the peace.

Religion. Roman Catholicism is the prevailing religion, but the constitution guarantees freedom to all creeds, and the State does not contribute to the support of any.

Education. Instruction is free, compulsory (from 7 to 15 years of age) and secular. In 1976 the 4,698 primary schools had 483,210 children (11,938 teachers); the 154 secondary, normal and technical schools had 45,000 pupils (2,983 teachers); the teachers' college had 1,025 students (59 teachers); 6 university faculties (1976) had 12,951 students (729 teachers) at Tegucigalpa offering economics, engineering, law, medicine, dentistry, chemistry and pharmacy. Other courses offered are: Public administration, journalism, business administration, auditing and accounting, nursing, psychology, mechanical engineering, social service, agronomy (La Ceiba) and economics (San Pedro Sula). The José Cecilio del Volla University in Tegucigalpa and the Private University of San Pedro Sula opened in 1978.

The illiteracy rate was 40% of those 10 years of age and older in 1978.

Health. In 1972 there were 780 doctors and 4,500 hospital beds.

HONG KONG

Population: 5.1m. (1980)

GDP per capita: US\$3,600 (1979)

HISTORY. The Crown Colony of Hong Kong was ceded by China to Great Britain in Jan. 1841; the cession was confirmed by the treaty of Nanking in Aug. 1842, and the charter bears the date 5 April 1843. Since then Hong Kong has been under British administration, with the exception of the period from 25 Dec. 1941 to 30 Aug. 1945, when it was occupied by the Japanese.

AREA AND POPULATION. Hong Kong island is 32 km east of the mouth of the Pearl River and 130 km south-east of Canton. The area of the island is 76.2 sq. km. It is separated from the mainland by a fine natural harbour. On the opposite side is the peninsula of Kowloon (10.48 sq. km), which, with Stonecutters Island (0.75 sq. km), was added to the Colony by the Convention of Peking, 1860. By a further convention, signed at Peking on 9 June 1898, about 950 sq. km, consisting of all the immediately adjacent mainland and numerous islands in the vicinity, were leased to Great Britain by China for 99 years. This area is known as the New Territories. Total area of the territory is 1,062 sq. km (including recent reclamations), a large part of it being steep and unproductive hillside. Shortage of land suitable for development for housing and industry, is a serious problem. Since 1945, the Government has reclaimed about 1,600 hectares from the sea, principally from the seafronts of Hong Kong and Kowloon, facing the harbour. In the New Territories, the new town of Tsuen Wan, incorporating Tsuen Wan, Kwai Chung and Tsing Yi, is well advanced and already houses 644,000 of its planned ultimate population of 990,000. The construction of 5 further new towns at Sha Tin, Tuen Mun, Tai Po, Fanling Shek Wu Hui and Yuen Long is now well underway, with population capacities of 720,000, 537,000, 219,000, 168,000 and 127,000 respectively.

The climate is sub-tropical, the winter being cool and dry and the summer hot and humid. The average rainfall is 2,246 mm. (88 in.), May to Sept. being the wettest months.

The population was 4,439,250 at 1976 census. Estimate (1980) 5.1m. During the war years the population of Hong Kong fluctuated sharply. In Sept. 1945, at the end of the Japanese occupation, it was about 600,000. In mid-1950 it was estimated at 2.24m. Since 1963 the net annual increase has been between 32,000 and 95,100. Of the present population about 37% are under 20 years of age. About 59% of the population was born in Hong Kong.

CONSTITUTION AND GOVERNMENT. The administration is in the hands of a Governor, aided by an Executive Council, composed of the Commander, British Forces, the Chief Secretary, the Attorney-General, the Secretary for Home Affairs, the Financial Secretary (who are members *ex officio*) and such other members, both official and unofficial, as may be appointed by the Queen upon the Governor's nomination. In 1980 there were, in addition to the 5 *ex-officio* members, 1 nominated official and 9 nominated unofficial members. There is also a Legislative Council, presided over by the Governor. In 1980 it consisted of 4 *ex-officio* members, namely the Chief Secretary, the Attorney-General, the Secretary for Home Affairs and the Financial Secretary, 26 nominated unofficial members and 17 official members. Chinese and English are the official languages.

Governor and C.-in-C.: Sir Murray MacLehose, GBE, KCMG, KCVO.

Commander British Forces: Maj.-Gen. John Chapple, CBE.

Chief Secretary: Sir Jack Cater, KBE.

Flag: British Blue Ensign with the arms of the Colony on a white disc in the fly.

DEFENCE. The Hong Kong Garrison, under the Commander British Forces, comprises units of all three services. Its principal role is to assist the Hong Kong Government in maintaining security and stability.

Army. The Army constitutes the bulk of the garrison. It comprises a UK battalion, based at Stanley Fort, and 3 Gurkha infantry battalions, based in the New Territories; supporting units include the Queen's Gurkha Engineers, the Queen's Gurkha Signals, the Gurkha Transport Regiment, and 660 Squadron Army Air Corps.

Navy. The Naval Base is at HMS *Tamar*. The Hong Kong Squadron comprises five patrol craft, which are converted Ton-class minesweepers. In addition, there are two SRN 6 hovercraft and a fast patrol boat. 3 Raiding Squadron Royal Marines, equipped with fast 'Sea Rider' craft, also operates from HMS *Tamar*.

Air Force. The Royal Air Force is based at Sek Kong. No. 28 (Army Co-operation) Squadron operates 8 Wessex helicopters. In addition to its operational role in support of the army and navy, the RAF carries out search and rescue and medical evacuation tasks. It is also responsible for air traffic control services at Sek Kong, and provides a territory-wide air traffic advisory service.

Auxiliary Defence Units. The local Auxiliary Defence Units, consisting of the Royal Hong Kong Regiment and the Royal Hong Kong Auxiliary Air Force, are administered by the Hong Kong Government, but, if called out, would come under the command of the Commander British Forces. The Royal Hong Kong Regiment (The Volunteers) has a strength of about 700. It is fully mobile and its role is to operate in support of regular army battalions stationed in Hong Kong. The Royal Hong Kong Auxiliary Air Force is intended mainly for internal security and air-sea rescue duties. It has a strength of about 116, operating a fleet of seven aircraft – a twin-engined Britten-Norman Islander, a twin-engined Cessna 404 Titan Courier, two Scottish Aviation Bulldog Trainers and three Aérospatiale Dauphin 365C1 helicopters. Apart from these, a Vickers Supermarine 'Spitfire' is retained for display.

ECONOMY

Budget. The public revenue and expenditure for financial years ending 31 March were as follows (in HK\$):

	1976-77	1977-78	1978-79	1979-80
Revenue	7,493,500,000	10,232,600,000	12,557,000,000	16,796,000,000
Expenditure	6,590,900,000	8,996,900,000	11,090,100,000	13,872,000,000

The revenue is derived chiefly from rates, licences, duties on liquor, tobacco and hydrocarbon oils, a tax on earnings and profits, land sales and stamp duties.

Currency. The unit of currency is the Hong Kong *dollar*. Bank-notes (of denominations of \$10 upwards) are issued by the Hongkong and Shanghai Banking Corporation, and the Chartered Bank. Their combined note issue was, at 31 March 1980, HK\$8,350m. Subsidiary currency consisting of HK\$5, HK\$2, HK\$1, 50-cent, 20-cent, 10-cent, 5-cent copper-nickel-alloy coins and 1-cent notes is issued by the Hong Kong Government and at 31 March 1980 totalled HK\$1,007m.

Since 1975, the Hong Kong Government has issued annually a limited quantity of HK\$1,000 gold coins. The first in the series was issued to commemorate the Queen's visit to Hong Kong in 1975. Gold coins have since been minted to mark the Chinese Lunar Years of the Dragon, the Snake, the Horse, the Goat, the Monkey and the Cockerel.

Banking. There are 115 licensed banks and 118 foreign banks maintaining representative offices in Hong Kong. Deposits in 1980 totalled HK\$88,490m.

Weights and Measures. The *Tael* (*leung*) = 1½ oz. avoirdupois; the *Picul* (*taam*) = 133½ lb. (often taken as ¼ of a ton); the *Catty* (*kam*) = 1½ lb. avoirdupois; the *Chek* (Chinese foot) = 14½ in. (but varying from 11½ to 14½ in. according to the custom of various trades, the commonest equivalent being 14.14 in.); the *Tsuen* (Chinese inch) = ⅓ of a *Chek*, the *Cheung* = 10 *Chek*; the *Lei* (Chinese mile) = 707-744 yd.

Besides the above weights and measures of China, Hong Kong is adopting the metric system.

AGRICULTURE. Livestock (1979): Cattle, 9,000; pigs, 510,000; poultry, 6m.

WATER. The provision of sufficient capacity to store the summer rainfall to meet water requirements, particularly during the dry winter months, has always been a serious problem. However, this has been alleviated to some extent by the raising of the Plover Cove Dams in 1973, giving the reservoir a capacity of 230m. cu. metres, and the completion in 1978 of the 273m. cu. metre High Island Reservoir which involved the conversion of another sea inlet to a fresh water lake, as was the case with Plover Cove.

Total available storage capacity now stands at 579m. cu. metres distributed in 18 impounding reservoirs. This is supplemented by water purchased from China which at present amounts to 172 m. cu. metres a year with provision for staged increases in the future. These resources can be further supplemented when necessary by up to 181,800 cu. metres of fresh water a day from a desalting plant completed in 1976 but now in a 'stand-by' state.

INDUSTRY AND TRADE

Industry. An economic policy based on free enterprise and free trade; an industrious work force; an efficient and aggressive commercial infrastructure; modern and efficient sea-port (including container shipping terminals) and airport facilities; its geographical position relative to markets in North America and its traditional trading links with Britain have all contributed to Hong Kong's success as a modern industrial complex.

In Sept. 1980, there were 45,409 factories employing 892,140 people out of a total population of approximately 5.1m. The type of factory involved ranges from the small cottage type to large highly complex modern establishments. Given the scarcity of land it is most common for light industry to operate in multi-storey buildings specially designed for this purpose. The main industry is textiles and clothing, which employs 19% of the labour force and accounts for 41% of total domestic exports. Other major light manufacturing industries include electronic products, clocks and watches, toys, plastic products, metalware, footwear, cameras and travel goods. Heavy industry includes ship-building, ship-repairing, aircraft engineering and iron and steel rolling. Agriculture, fishing and some mining are the main primary industries.

Commerce. Hong Kong's industries are mainly export oriented. The total value of domestic exports in 1980 was HK\$68,171m. The major markets were USA (33%), Federal Republic of Germany (11%), UK (10%), Japan (3%), Australia (3%), and Singapore (3%). There is also a sizeable and flourishing entrepôt trade which accounted for another HK\$30,072m. in 1980.

The total value of imports in 1979 was HK\$85,837m., mainly from Japan (23%), China (18%), USA (12%), Taiwan (7%), Singapore (6%) and UK (5%).

The chief import items were machinery (22%), textiles (14%), foodstuffs (11%), chemicals (8%) and petroleum products (6%), crude raw materials (2%).

Imports from the Commonwealth countries (HK\$13,491m. in 1979) amounted to 16% of total imports and exports to the Commonwealth countries (HK\$12,733m.) accounted for 23% of Hong Kong's domestic exports.

Duties are levied only on tobacco, hydrocarbon oils, methyl alcohol and alcoholic liquors (including toilet preparations containing more than 1.2% of ethyl alcohol but excluding registered pharmaceutical products), whether imported into or manufactured in Hong Kong for local consumption.

All imports (apart from foodstuffs, which are subject to a flat charge of HK\$2 per shipment) and exports are subject to a varying *ad valorem* charge.

The adverse balance on visible trade is offset by a favourable balance from exchange, shipping and insurance transactions, an inflow of capital, ship-repairing, a flourishing tourist industry, remittances from overseas Chinese, etc.

Hong Kong has a free exchange market. Foreign merchants may remit profits or repatriate capital. Import and export controls are kept to the minimum, consistent with strategic requirements.

Total trade between Hong Kong and UK (British Department of Trade returns, in £1,000 sterling) is given as follows:

	1975	1976	1977	1978	1979	1980
Imports to UK	306,967	439,605	454,056	531,368	689,252	850,340
Exports and re-exports from UK	157,376	204,430	271,194	362,444	442,452	559,420

Tourism. Tourists spent an estimated HK\$6,528m. in Hong Kong in 1980. During the year tourists totalled over 2.3m.

COMMUNICATIONS

Roads. In Dec. 1980 there were 1,161 km of roads, distributed as follows: Hong Kong Island, 348; Kowloon and New Kowloon, 346, and New Territories, 467. A cross-harbour tunnel, 1.6 km in length, opened to traffic in Aug. 1972, now links Hong Kong Island with the Kowloon peninsula. The 1.4 km twin-tube Lion Rock Tunnel, which links Kowloon with Sha Tin New Town and other areas of the north-eastern New Territories, became fully operational in Oct. 1978.

Railways. There is an electric tramway of 13.2 km, and a cable tramway connecting the Peak district with the lower levels in Victoria. The government-owned Kowloon Canton Railway which has remained virtually unchanged for the past 80 years is now undergoing a massive modernization and electrification programme. The entire 34 km route which runs from the Kowloon terminus in Hung Hom to Lo Wu on the Chinese frontier is being double tracked and electrified. On 4 April 1979, a through passenger train service between Kowloon and Guangzhou was reintroduced after a lapse of 30 years; other local passenger services to Lo Wu allow for connections to be made for onward trains at Shenzhen.

An underground railway is under construction between Hong Kong Island and Kwun Tong in Kowloon with a branch to Tsuen Wan. The first section (with 15 stations and a length of 15.6 km) opened on 1 Oct. 1979. The whole Modified Initial System running from Kwun Tong across the harbour to Central became fully operational on 12 Feb. 1980. The extended system (total length 26 km with 25 stations) will be operational by the end of 1982.

Aviation. Hong Kong International Airport is situated on the north shore of Kowloon Bay. It is regularly used by 32 airlines and many charter airlines which provide frequent services throughout the Far East to Europe, North America, Africa, the Middle East, Australia and New Zealand. British Airways operates 13 services per week, to UK, Africa and Japan. Cathay Pacific Airways, the Hong Kong-based airline, operates 114 passenger services to the UK, the Far and Middle East and Australia. During 1980, British Caledonian Airways also commenced scheduled services on the Hong Kong to London route. About 960 scheduled services are operated weekly to and from Hong Kong by various airlines. In 1980, 54,569 aircraft arrived and departed on international flights, carrying 6.8m. passengers, 9,701 tonnes of mail and 257,866 tonnes of freight.

Shipping. The total vessels entering and clearing Hong Kong and engaged in foreign trade during the year ending 31 Dec. 1979 amounted to 19,710 ocean-going vessels of 102,867,200 net tons. Telecommunications, Post and Broadcasting. There were 78 post offices in 1980; postal revenue totalled HK\$344m.; expenditure, HK\$225m. Telephone services are provided by the Hong Kong Telephone Co. Ltd. It operates through a network of 64 fully automatic main exchanges and served (1980) 1.6m. subscribers. Cable & Wireless Ltd is responsible for all external telecommunications and also provides for marine, meteorological and aeronautical communications. Telecommunication systems employed in Hong Kong include satellite, tropospheric scatter, HF, VHF, UHF, submarine and land coaxial cables. Services provided to the community include international telephone, telegram, telex, leased circuits, data transmission, facsimile and ship-shore communications.

There is a government broadcasting station, Radio Television Hong Kong, with daily transmissions in English and Chinese. Wireless licences were abolished as from 1 March 1967. A commercial station, the Commercial Broadcasting Co. Ltd, transmits daily in English and Cantonese. Two radio stations operate 8 channels.

Television Broadcasts Ltd and Rediffusion Television Ltd transmit commercial television in English and Chinese on 4 channels, mainly in colour.

There is also a District Court which, for administrative purposes, is divided into 3 geographical areas. It sits in several different buildings. There are 45 Magistrates sitting in 8 separate Magistracies. The district courts, apart from hearing civil cases where the claim does not amount to more than HK\$20,000, also have jurisdiction over certain criminal matters. A tenancy tribunal hears cases covering disputes between landlord and tenant, etc. The labour tribunal provides speedy settlements to individual money claims arising from contracts of employment. The lands tribunal adjudicates on all statutory claims for compensation over land. The small claims tribunal deals with monetary claims involving amounts not exceeding HK\$3,000.
